22 BE IT ENACTED BY THE GENERAL ASSEMBLY OF THE STATE OF ARKANSAS:
23

24 SECTION 1. Arkansas Code 27-70-207(c), concerning the purposes for
25 which highway revenues can be used, is amended to read as follows:

26 (c)(1) All highway revenues transferred to the State Highway and
27 Transportation Department Fund under the provisions of this subchapter shall
28 be used for the construction, reconstruction, and maintenance of highways and
29 bridges in the state highway system.

30 (2)(A) However, the department may use highway revenues
31 transferred to the State Highway and Transportation Department Fund for the
32 installation, upgrading, or improvement of any highway-railroad crossing
33 safety device, railroad crossing traffic control device, warning lights,
34 crossing gates, or other railroad crossing safety devices at public highway
35 railroad crossings and for the construction, reconstruction, and maintenance
36 of any highway-railroad crossing, including the construction or installation

1 of any underpasses or overpasses.

2 (B) Except for the construction or installation of
3 underpasses or overpasses, the department's goal is to expend one dollar
4 (\$1.00) of state funds for each dollar of federal funds received to improve
5 railroad crossing safety and to reduce railroad crossing accidents.

6 (C) It is the intent of this subdivision (c)(2) to
7 encourage the State Highway Commission to continue to upgrade the state's
8 highway-railway crossings with traffic control devices, warning lights,
9 crossing gates, and other appropriate devices in order to increase the safety
10 of persons using the state's highways.
