### **DISCUSSION**

Arkansas Game and Fish Wildlife Conservation Education Grant Program

There are no population limits associated with this program. This grant program is funded through fines collected from hunting and fishing violations. The funding is county specific, meaning that only fines collected in a county may be used to fund conservation education in that county. As an example, fines collected in Monroe County may not be used to fund conservation education programs in Prairie County. The cap on this program varies by county and year and the program requires no match.
