Memorandum

To: Senator Mary Anne Salmon
Representative Tommy Lee Baker
Arkansas Legislative Council

From: Jane T. Benton, CPPO, Director

Date: January 31, 2012

Subject: Alternative Fuel Vehicle Report

This report is provided in accordance with Ark. Code Ann. § 19-11-217(2)(A), which requires the Office of State Procurement to develop and implement a plan for all state agencies. The report addresses vehicles acquired that will reduce the overall annual petroleum consumption of state agencies by at least ten percent (10%) by January 1, 2009, through various measures.

This report includes:

- (a) The number and type of alternative-fuel vehicles used by each state agency (**Attachment A**);
- (b) The difference between the acquisition cost, maintenance, and operation of alternative-fuel vehicles and comparable conventionally fueled motor vehicles (**Attachment B**);
- (c) An evaluation of the plan's success; and
- (d) Suggestions for modifying the plan.

The initial step taken by the Office of State Procurement was creating a state-wide contract for alternative-fuel and hybrid vehicles, beginning with 2006 model vehicles. Each year since the inception of this contract, it has been modified to increase and encompass vehicles available in the market.

The increased usage of alternative-fuel vehicles is based on continued funding, emphasis on the continued use of hybrid or alternative-fuel vehicles, the availability of competitively priced vehicles and alternative fuels, and the active participation of the state agencies. There continues to be a significant price difference between hybrid and alternative-fuel vehicles and conventionally fueled vehicles. **Attachment B** is a comparison of acquisition cost, average gas mileage, annual gas costs and savings, both averages of \$3.38 per gallon of gasoline. As the market changes so that hybrid and alternative-fuel vehicles increase in availability and prices decrease, the margin between petroleum-fueled vehicles and alternative-fuel vehicles should begin to equalize and become more attractive for the state to purchase and use.

Ark. Code Ann. § 15-13-205 required the Department of Finance & Administration to implement a policy regarding the standard of biofuel usage, effective January 1, 2009. The policy states that, when available and economically feasible, all State agencies are required to purchase diesel fuel that contains at least a minimum of two percent (2%) biofuels by volume for all State diesel-powered motor vehicles,

light trucks and equipment. The average diesel cost in 2011 was \$3.82 per gallon. This policy works in tangent with the requirement to purchase alternative vehicles to help achieve the 10% goal for the annual reduction of petroleum consumption by state agencies.

As of December 31, 2011, the state has 267 vehicles that fall into the alternative fuel category, a 4.9% decrease from December 2010. This figure includes those alternative-fuel or hybrid vehicles purchased from contracts developed and awarded by the Arkansas Highways and Transportation Department. The current percentage of alternative-fuel vehicles is 3.2% of the 8,267 vehicles in the state fleet as of December 31, 2011. The purchase of alternative-fuel vehicles has kept abreast of what the market currently bears relating to the life cycle cost of both types of vehicles. As the market matures where alternative-fuel vehicles and alternative fuels become more widely available in Arkansas, the State's usage should increase.

The Arkansas Energy Office (AEO), a division of the Arkansas Economic Development Commission (AEDC), administered a Compressed Natural Gas Conversion Rebate Program in 2011. The Office of State Procurement created a contract with two Arkansas certified installers to facilitate the conversions for state vehicles. These efforts, along with the opening of the North Little Rock compressed natural gas station, helps to position the state to migrate to vehicles that will reduce the overall annual petroleum consumption.

The Office of State Procurement, working with the Arkansas Energy Office and the Arkansas Department of Environmental Quality, continues to disseminate information to educate agency personnel about alternative fuels, vehicles and their availability in Arkansas. Education of agency personnel is the key to the success of the long-term plan and attainment of the goal of reducing usage of petroleum-based fuel products for State vehicles and equipment.

Alternative Fueled Vehicles by State Agency as of December 31, 2011
