STATE PLAN UNDER TITLE XIX OF THE SOCIAL SECURITY ACT

State/Territory: ARKANSAS

Requirements for Third Party Liability –
Payment of Claims

If the provider bills the Medicaid Program, he/she must certify either:

(1) that he/she has not billed the known third party due to medical support enforcement, or

(2) that he/she has billed the known third party but has not received payment or denial from the third party within 30 days from the date of service.

Claims submitted for payment with certification that the provider attempted to collect from the third party are extracted and written to a report produced monthly. The report is reviewed monthly using a random sampling of 10% based on the total number of claims reported. Follow-up activity is performed with the third party to ensure that payment has not been made within 30 days of the provider's date of service.

The Agency does not use threshold amounts for any cases other than Tort/Casualty cases to determine whether to seek reimbursement from a liable third party. Threshold amounts vary from $25.00 to $100.00 depending on the type of service. Total TPL program expense divided by the number of claims recovered (monthly figures are used) are utilized in this calculation. This limit is determined annually.

A timeframe of six months is allocated for the allowed amount on individual claims to be collected for comparison with the threshold level of each valid third party source's coverage areas. If the cumulative or individual allowed amount total exceeds the threshold level then each applicable third party source is pursued.

Medicare claims are reflected in Arkansas' MMIS as cost avoidance.

The State makes payment for pediatric preventive services, including early and periodic screening, diagnosis, and treatment services (EPSDT), without regard to third party liability and seeks reimbursement from any liable third party to the extent of such legal liability.

For services covered under the plan that are provided to an individual on whose behalf child support enforcement is being carried out by the State Title IV-D agency, the State makes payment for such services without regard to third party liability up to 100 days that is derived (through insurance or otherwise) from the parent whose obligation to pay support is being enforced by the State Title IV-D agency, and seeks reimbursement from such liable third party to the extent of legal liability.

Providers are required to bill liable third parties when services covered under the plan are furnished to an individual on whose behalf child support enforcement is being carried out by the State IV-D agency.

The State makes payment without regard to third party liability for pediatric preventive services unless a determination related to cost-effectiveness and access to care that warrants cost avoidance up to 90 days has been made.

The State will use standard coordination of benefits cost avoidance when processing claims for prenatal services, labor and delivery, and postpartum care claims.

This request must be received within twenty (20) calendar days following the application of policy and/or procedure or the notification of the provider of its rate. Upon receipt of the request for review, the Assistant Director will determine the need for a Program/Provider conference and will contact the provider to arrange a conference if needed. Regardless of the Program decision, the provider will be afforded the opportunity for a conference, if he/she so wishes, for a full explanation of the factors involved and the Program decision. Following review of the matter, the Assistant Director will notify the provider of the action to be taken by the Division within twenty (20) calendar days of receipt of the request for review or the date of the Program/Provider conference.

When the provider disagrees with the decision made by the Assistant Director, DMS, the provider may appeal the question to a standing Rate Review Panel established by the Director of the DMS. This section specifies, for each episode type, the types of providers eligible to be Principal Accountable Providers (PAPs) for an episode type and the algorithm used to determine the PAP(s) for an individual episode. For each episode of care, providers designated as PAPs hold the main responsibility for ensuring that the episode is delivered with appropriate quality and efficiency.

200.300 Exclusions 7-1-16

There are two types of exclusions. Global Exclusions are either policy related or clinically pertinent medical conditions that will exclude a beneficiary from all Episodes of Care.

Global Exclusions (applied to all Episodes of Care):

Episode-Specific Exclusions are identified for each episode of care.

200.400 Adjustments 7-1-16

This section describes, for each episode type, adjustments to the reimbursement amount attributable to a PAP for the purpose of calculating performance and determining incentives.

Across all episode types, the reimbursement amount attributable to a PAP for facility claims for acute inpatient hospitalizations is adjusted to a per diem rate of $850.

200.500 Quality Measures 7-1-16

This section describes, for each episode type, the specified data and measures which Medicaid will track and evaluate to ensure provision of high-quality care for each episode type. Quality measures may be determined from paid claims data or provider portal entry.

A. *Quality measures "to pass":* Measures for which a PAP must meet or exceed a minimum threshold in order to qualify for a positive (gain-share) incentive for that episode type.

B. *Quality measures "to track":* Measures for which a PAP's performance is not linked to receive incentives. Performance on these measures may result in an Office of Medicaid Inspector General review.

200.600 Reimbursement Thresholds 7-1-16

This section describes, for each episode type, the specific values used to calculate positive (gain-share) or negative (risk-share) incentives. This includes an acceptable threshold, a commendable threshold, a gain-sharing limit and a risk-sharing percentage.

210.400 Adjustments 10-1-12

The reimbursement for the initial visit that is attributable to the PAP is normalized across different places of service (e.g., "Level 2" visits will count equally toward average reimbursement regardless of place of service). Reimbursements for the facility claim associated with the initial visit are not counted in the total reimbursements attributed to a PAP for calculation of performance.

Reimbursement attributed to the calculation of a PAP's performance for beneficiaries 10 and under is adjusted to reflect age-related variations in treatment using a multiplier determined by regression.

211.400 Adjustments 10-1-12

For the purposes of determining a PAP's performance, the total reimbursement attributable to the PAP is adjusted to reflect risk and/or severity factors captured in the claims data for each episode in order to be fair to providers with high-risk patients, to avoid any incentive for adverse selection of patients and to encourage high-quality, efficient care. Medicaid, with clinical input from Arkansas providers, will identify risk factors via literature, Arkansas experience and clinical expertise. Using standard statistical techniques and clinical review, risk factors will be tested for statistical and clinical significance to identify a reasonable number of factors that have meaningful explanatory power ($p < 0.01$) for predicting total reimbursement per episode. Some factors which have meaningful explanatory power may be excluded from the set of selected risk factors where necessary to avoid potential for manipulation through coding practices. Episode reimbursement attributable to a PAP for calculating average adjusted episode reimbursement are adjusted based on selected risk factors. Over time, Medicaid may add or subtract risk factors in line with new research and/or empirical evidence.
