# E-200 Determining Financial Eligibility Under the MAGI Methodology

### E-210 What is MAGI?

MS Manual 08XX/01XX/202001/01/14

MAGI is a federal income tax term meaning **M**odified **A**djusted **G**ross **I**ncome. For purposes of determining Medicaid eligibility, MAGI is a methodology for determining how income is counted and how household composition and family size are determined. It is based on federal tax rules, but it is not an amount on a specific line on an individual federal tax return. In addition to being used to determine Medicaid eligibility for certain eligibility groups, the MAGI methodology is also used to determine eligibility for and the amount of Advance Premium Tax Credits (APTC) and cost-sharing reductions available to individuals and families who are eligible to purchase health insurance through the Federally Facilitated Health Insurance Marketplace (FFM).

For tax purposes, the modified adjusted gross income reflects annual income for a specific tax year. For Medicaid purposes, <a href="https://www.however\_though">however\_though</a>, current monthly income is used to determine eligibility. This is true even when using MAGI methodologies. <a href="https://www.see.ms.com/

## E-220 Families and Individuals (MAGI) Groups

MS Manual <del>01/01/17</del>08/01/2020

MAGI methodologies are used to determine financial eligibility for the following eligibility groups:

- 1. Infants and children under age 19\_-(ARKids A & B);
- 2. Pregnant women;
- 3. Parents and caretaker relatives; and
- 4. Adults age 19 through 64 who do not fall into another adult group, such as the (Adult the Adult Expansion Group); or

4.5. Transitional Medicaid.

## E-230 Steps in Determining MAGI Income Eligibility

MS Manual <del>01/01/14??/??/??08/01/2020</del>

Below are the steps for determining income eligibility:

### E-200 Determining Financial Eligibility Under the MAGI Methodology

- 1. Determine the Medicaid household composition and size for each individual applying for assistance. See MS E-240-E-251.
  - "Medicaid household" means the household members whose income will be considered when determining eligibility and for who will be included in the household size. For MAGI determinations, the Medicaid household is determined based on the individual's tax filing status. See MSE 250.
  - The "Medicaid household size" is the number of people who will be counted to determine the appropriate Federal Poverty Level (or other income standard) for the household.
- 2. Determine countable household income. See MS E-260-E-264.
  - Countable household income is refers to the income of the Medicaid household members that will be counted in determining eligibility.
- 3. Determine current household income. See MS E-265-E-266.
  - The income used to determine Medicaid eligibility must reflect the income that a Medicaid household member is currently receiving.
- 4. Compare countable current household income to the appropriate FPL Federal Poverty Level for the household size. See MS E-267.
  - This step will determine each individual's Medicaid eligibility.

The following sections describe each of the steps above in more detail. In addition, the following example scenario is used throughout these sections to illustrate the application of each step to a particular household.

Example Scenario: Bertha is a working grandmother who claims her daughter Audrey, age 20 and a full-time student, and granddaughter Chloe (Audrey's daughter), age 2, as tax dependents. Audrey works a few hours each week and Chloe's father pays child support. The household consists of these three only. All are applying for Medicaid.

### E-200 Determining Financial Eligibility Under the MAGI Methodology

## E-240 Determining the Medicaid Household Forfor Families and Individuals Groups

MS Manual XX/XX/2001/01/14 08/01/2020

Under the Modified Adjusted Gross Income (MAGI) methodology, the Medicaid household composition is based on federal income tax filing status. Household size is the number of individuals counted in the family size for the income standard. When determining the household size, individual Supplemental Security Income (SSI) (SSI) recipients are counted and in addition, and pregnant woman is counted as one (1) person plus the number of children she is expecting. In most situations, the Medicaid household is the same as the tax filing unit of which the individual is a member. The Medicaid household composition determines whose income will be considered in determining eligibility. If the family or individual has not filed a federal tax return for the most recent tax year and does not expect to file one, then the Medicaid household is determined as described in MS E-251.

## E-250 Tax Filing Status

MS Manual <del>01/01/14??/??/??</del>08/01/2020

To determine an individual's tax filing status or unit, two basic questions must be asked. in relation to the individual.

**NOTE:** Each person's eligibility for Medicaid is determined individually, even if two or more individuals are living in the same <a href="https://homehousehold">house/homehousehold</a>.

- 1. Does the individual expect to file taxes?
- 2. Does the individual expect to be claimed as a tax dependent?

If the answer to both of these questions is "No<sub>2</sub>"<sub>7</sub> then the individual's Medicaid household is determined according to MS E-251 (Non-Tax Filing Households).

If the answer to either of the above questions is "Yes<sub>2</sub>", then additional questions must be asked to determine the individual's Medicaid household as described in the table below.

Question 1. Does the individual expect to file taxes?		
Yes	Continue to Question 1a.	
No	Continue to Question 2.	
Q. 1a. Does the individual expect to be claimed as a tax dependent by anyone else?		
Yes	Continue to Question 2.	
No	No Household is:	
■ The taxpayer;		

### E-200 Determining Financial Eligibility Under the MAGI Methodology

	<ul> <li>A spouse living with the taxpayer; and</li> </ul>		
	<ul> <li>All persons the taxpayer expects to claim as a tax dependent.</li> </ul>		
Question 2. Does the individual expect to be claimed as a tax dependent?			
Yes	Continue to Question 2a.		
No	Household composition is determined according to MS E-251.		
Question 2a. Do	pes the individual meet any of the following exceptions?		
<ul><li>Expects</li></ul>	to be claimed as a tax dependent of someone other than a spouse or parent		
(biologic	cal, adoptive, or step-parent) <u>.</u>		
<ul> <li>Is a child</li> </ul>	<ul> <li>Is a child under age 19 living with both parents, but the parents do not expect to</li> </ul>		
file a joi	file a joint tax return.		
<ul> <li>Is a child</li> </ul>	d under age 19 who expects to be claimed by a non-custodial parent <u>.</u>		
Yes	Yes Household composition is determined according to MS E-251.		
No	No Household is:		
	<ul> <li>The household of the taxpayer claiming the individual as a tax</li> </ul>		
	dependent; and		
	The individual's spouse, if married.		

## Example Scenario: Household Composition, i.e. Household Members

Example Scenario: Bertha is a working grandmother who claims her daughter Audrey, age 20 and a full-time student, and granddaughter Chloe (Audrey's daughter), age 2, as tax dependents. Audrey works a few hours each week and Chloe's father pays child support. The household consists of these three only. All are applying for Medicaid.

The table below shows how each individual's Medicaid household for the Example Scenario described above is determined based on each individual's tax filing status.

	Bertha Bertha			
<del>1.</del>	Does Bertha expect to file a tax return?	Yes	Continue to Question 1a.	
<del>1a.</del>	Does Bertha expect to be claimed as a tax dependent by	No		
	anyone else?			
Bertha	Bertha's Medicaid household is: Bertha (applicant and taxpayer)			
	Audrey (tax dependent)			
	Chloe (tax dependent)			
	<del>Audrey</del>			
1.	1. Does Audrey expect to file a tax return? No Continue to Question 2.			
<del>2.</del>	Does Audrey expect to be claimed as a tax dependent?	Yes	Continue to Question 2a.	

### E-200 Determining Financial Eligibility Under the MAGI Methodology

	Chloe		
1.	Does Chloe expect to file a tax return?	<del>No</del>	Continue to Question 2.
<del>2.</del>	Does Chloe expect to be claimed as a tax dependent?	Yes	Continue to Question 2a.
<del>2a.</del>	Does Chloe expect to be claimed as a tax dependent of	Yes	See MS E-251 for how Chloe's
	someone other than a spouse or parent (biological,		household is determined.
	adoptive, or stepparent?		

Additional Tax Filing Unit Example Scenarios can be found in Appendix E. They include scenarios dealing with single adults, children claimed as a tax dependent by a non-custodial parent, non-filers, etc.

## E-251 Non-Tax Filing Households

MS Manual 01/01/14??/??/2208/01/2020

Medicaid household composition will be determined in accordance with this section in the following situations:

- 1. The individual has not filed and/or does not expect to file a federal income tax return for the current year AND does not expect to be claimed as a tax dependent for the current year; or
- 2. The individual meets one of the following tax dependent exceptions:
  - a. Expects to be claimed as a tax dependent of someone other than a spouse or parent (biological, adoptive, or step-parent);

### E-200 Determining Financial Eligibility Under the MAGI Methodology

- b. The individual Is-is a child under age 19 living with both parents, but the parents do not expect to file a joint tax return;
- c. The individual Is-is a child under age 19 who expects to be claimed by a non-custodial parent.

When an individual is in one of the situations above:	The Medicaid household includes the following persons who live in the home with the individual:  • Spouse  • Children (biological, adopted and step children) under the age 19  • Siblings (biological, adopted, and step siblings) under age 19.
	<ul> <li>step siblings) under age 19.</li> <li>If the individual is under age 19, his or /her parent(s) (biological, adopted, and</li> </ul>
	step parents).

## Example Scenario: Household Composition for a Non-Tax FilingHousehold

Since Chloe met one of the exceptions to using tax filing status to determine household-composition, her household is determined in accordance with this section (Non-Tax Filing Households) as follows:

Question 2a exception: Chloe is under age 19 and is claimed as a tax dependent by her grandmother,
Bertha.

Chloe's Medicaid household includes the following person or persons who live in the home with her:

Spouse
Children (biological, adopted and step children) under the age 19
Parent(s) (biological, adopted and step parents)
Siblings (biological, adoptive and step siblings) under age 19

Chloe's household is: Chloe (applicant)
Audrey (Chloe's parent living in the home with her)

## E-260 Determining Countable Income for Families and Individuals Groups

MS Manual <del>01/01/14??/??/??</del>08/01/2020

Once the Medicaid household composition has been established for the individual, then each household member's countable income must be determined. Only the income of the persons in an individual's Medicaid household is considered when determining financial eligibility.

### E-200 Determining Financial Eligibility Under the MAGI Methodology

Generally speaking, countable income sources using the MAGI methodology are the same as a tax filing unit's taxable income sources with a few exceptions. The exceptions are:

- Social Security benefits are counted in full;
- Income received as a lump sum is counted as income only in the month received; and
- Any portion of an educational scholarship, award and/or fellowship grant used for living expenses is countable income.

### E-261 Income Included for Families and Individuals Groups

MS Manual <del>01/01/14??/??/??</del>08/01/2020

<u>Although not an exhaustive list, The-the following are some sources examples of taxable income income that are taxed and included in MAGI calculations to determine Medicaid eligibility: (list not inclusive)</u>

- 1. Earned Income: (i.e. iflf the pay stub lists "Federal Taxable Wages" use that amount; income, if not, use "Gross Income" instead;
- 1.2. Self-employment income or (i. e. "Net Self-Employment income"): The amount after allowable income-producing costs are deducted. Refer to See MS E-266;
- 2.3. Social Security income Income (Title II) counted in full for Medicaid even though only a portion (or none) may be taxable;
- 3.4. Lump sum payments in month of receipt only;
- 4.5. Dividends and interest income;
- 5.6. Unemployment compensation:
- 6.7. Alimony, divorces, and separations finalized before January 1, 2019;
- 7.8. Pensions and annuities payments:
- 8.9. Rental income;
- 10. Lottery and gambling winnings (Income less than \$805,000 is countable income in month received., Income greater than or equal to more than \$805,000 to \$89,999 is countable income for two months, divided months, divided equally. For Everyevery additional \$10,000, add a month and divide equally. —The maximum penalty cannot exceed 120 months or 10 years.—Maximum of 120 months or 10yr. divisor. Pro-rated winnings only count for the individual receiving income;

Example Scenario: Bertha wins \$100,000 at the casino. Bertha's winnings will count as income for the current month for the household. \*tThe income pro-rated over future months would not count for Bertha's children, only Bertha;.NOTE: Individuals who receive lottery and gambling winnings may request an undue hardship exception to not be imposed avoid a penalty. Please see E-269;—

- 11. Any portion of educational scholarships, awards, or fellowship grants used for living expenses: or
- 9-12. Student Loan Debt (i.e. that has been "forgiven" unless it was due to death or permanent disability).

If an individual received income from a source not listed above, and did file a tax return for the tax year in which the income was received, then the general rule to follow is the income will be considered for Medicaid purposes if it was reported as taxable income for that tax year. If the income was excluded for from taxes, it will be excluded for Medicaid purposes. If the individual

## E-200 Determining Financial Eligibility Under the MAGI Methodology

did not file a tax return for the applicable tax year, then a determination must be made as to whether the income would-will be taxable or not.

### E-200 Determining Financial Eligibility Under the MAGI Methodology

## E-262 Income Excluded Forfor the Families and Individuals Groups

MS Manual <del>10/26/15??/??/08/01/2020</del>

<u>Although not an exhaustive list</u>, <u>Tt</u>he following <u>are some examples</u> sources of income that are excluded as taxable income for federal income tax purposes, and therefore are excluded as countable income for Medicaid purposes: <u>(list not inclusive)</u>

- 1. Child Support
- 2. Contributions
- 3. Worker's Compensation
- 4. Veteran's Benefits
- 5. Educational grants: <u>PELLPell Grant -or the (Basic Education Opportunity Grant (BEOG), the or PELL</u>, <u>the Federal Supplemental Educational Opportunity Grant (FSEOG), College Work Study and the Supplemental State Student Income Grant (SSIG) and college work study.</u>
- 6. American Indian/Alaska Native
- 7. Public Assistance Benefits, such as Transitional Employment Assistance (TEA) or Supplemental Security Income (SSI) (TEA Cash, SSI)
- 8. Disaster Relief Payments
- 9. Gifts
- 10. Federal Tax Refunds
- 11. Alimony: (Ddivorces and separations finalized on or after January 1, 2019.)
- 12. Moving Expenses (Active Military Duty only)
- 13. Outreach and Enrollment Grants
- 10.14. Combat pay for military personnel

Refer to MS E-261 to determine if a source of income not listed above can be excluded for Medicaid purposes or whether it must be counted.

## E-263 Household Members Whose Income Will Not be Counted for Families and Individuals (MAGI) Groups

MS Manual <del>10/26/15??/??/??</del>08/01/2020

The income of the following household members is not considered when determining Medicaid eligibility for any person in the household:

- 1. Income of a child who is included in the parent's Medicaid household and is not expected to be required to file a tax return.
- Income of a tax dependent who is not expected to be required to file a tax return and is
  in the Medicaid household of the person who is claiming him for her as a tax
  dependent.
- 3. Income of an <u>Supplemental Security Income (SSI)</u> recipient who is included in the Medicaid household size.

### E-200 Determining Financial Eligibility Under the MAGI Methodology

When determining MAGI eligibility, the income of a child must be counted and verified if the child must file a tax return because <a href="his/her/his or her">his/her/his or her</a> income exceeds the IRS filing threshold.

Once a household has been established, the MAGI-based income of every household member will be counted with one exception: the income for children and tax dependents whose income is below the filing threshold will be disregarded. This exception only applies <a href="for-to">for-to</a> a child who is in the household with a parent or for a tax dependent who is in the household with the tax filer who claims <a href="him/her/him or her">him/her/him or her</a> as a tax dependent.

<u>Example:</u> In a MAGI based household that includes only a child (perhaps the child lives with a grandparent) that child's income will be counted because the child's parent is not in the household, even if the child's income is below the filing threshold.

<u>Example:</u> In a MAGI based household that includes a child that lives with his or her parent(s) and the child is not required to file a tax return, the child's income is not counted.

Please refer to example at MS E-264 below.

To determine if a child is required to file a tax return, see the chart below.

### **2014 Filing Requirements for Dependents**

If your parent (or someone else) can claim you as a dependent, use this table to see if you must file a return.

Single dependents—Were you either age 65 or older or blind?

No. You must file a return if any of the following apply.

- Your unearned income was over \$1,000.
- Your earned income was over \$6,200.
- Your gross income was more than the larger of—
  - \$1,000, or
  - Your earned income (up to \$5,850) plus \$350.

Yes. You must file a return if any of the following apply.

- Your unearned income was over \$2,550 (\$4,100 if 65 or older and blind),
- Your earned income was over \$7,750 (\$9,300 if 65 or older and blind),
- Your gross income was more than the larger of—
  - \$2,550 (\$4,100 if 65 or older and blind), or
  - Your earned income (up to \$5,850) plus \$1,900 (\$3,450 if 65 or older and blind).

<u>Example:</u> Joe is 17 years old, single, not blind, and a full-time high school student. He does not provide more than half of his own support, and his parents claim an exemption for him on their income tax return. He received \$200 taxable interest income and earned \$2,750 from a part-

### E-200 Determining Financial Eligibility Under the MAGI Methodology

time newspaper delivery job. He does not have to file a tax return because his unearned income, \$200, is under \$1000 and his earned income, \$2750, is not over \$6200.

<u>Example:</u> Carlton is 16 years old, single, not blind, and a full-time high school student. He does not provide more than half of his own support, and his parents claim an exemption for him on their income tax return. He earned \$7,500 from a part-time job doing TV commercials. He does have to file a tax return because his earned income, \$7,500, is over \$6200.

# E-264 Household Members Whose Income Will Be Counted Forfor The Families and Individuals Groups - Example Scenario

MS Manual <del>01/01/14??/??/??</del>08/01/2020

Continuing with the Example Scenario of Bertha, Audrey and Chloe, the table below shows how each person's income will be counted for each individual's Medicaid eligibility.

<u>NOTE:</u> Bertha's and Audrey's households are the same, so the income of each member will be considered in the same way for each of their households.

## Bertha's and Audrey's Medicaid Household Composition (which determines whose income iscounted)

000		
<del>Members</del>	Income Type	Counted
Bertha	Full-time Earnings	Yes
Audrey	Part-time Earnings	No — Audrey is not expected to be required to file a tax return and she is in the household of her parent and a tax dependent of her parent. Therefore, her income is not counted in either Bertha's or her own household.
Chloe	Child Support	No — Chloe is not expected to be required to file a tax return and is Bertha's tax dependent; child support income is not counted.

#### Chloe's Household

Members	Income Type	Counted
Audrey	Part time Earnings	Yes — Although Audrey is not required to file a tax return and is claimed as a tax dependent, her income does count in this household because she is not the child nor tax dependent of any of the other members of this household, i.e., Chloe.
Chloe	Child Support	No – Chloe is Audrey's child; child support income is not counted.

### E-200 Determining Financial Eligibility Under the MAGI Methodology

# **E-265**<u>E-264</u> Determining Current Gross Monthly Income For The Families and Individuals Groups

MS Manual <del>02/01/18??/??/??</del>08/01/2020

Current gross monthly income <u>minus allowable deductions</u> will be used in determining financial eligibility for Medicaid. Current monthly income is the income the individual is expected to have in the month(s) for which eligibility is being determined.

Gross income is the amount paid to the individual before any withholding taxes or other deductions are taken from the income. Income that may have been received in the prior tax year or even the prior month, but that is not currently being received or expected to be received in the current or future months will not be counted. If a continuing source of income has increased or decreased since the last tax return or from other information available to the agency, then then the current income will be determined and used for eligibility purposes.

<u>NOTE:</u> Income received in a month for which retroactive eligibility is being determined will be considered for the retroactive month even if it is not considered for current or future months.

Once the household members' current income has been established and verified using the ten percent (10%) reasonable compatibility standard as appropriate (See MS G-151-152), the monthly amount used to determine eligibility will be calculated. Depending on how the current income was established (e.g., tax return income via the Federal Data Services Hub, State Quarterly Wage Data, check\_stubs, SOLQ, etc.,), the "verified" income amount may have to be reduced or increased to reflect a monthly amount. For example, if the most recent tax return reflects the income still currently available to the individual, then the annual income from the tax return is-will be divided by 12 to arrive at a monthly amount. If the current income was established through the most recent weekly check stubs, the average weekly amount is-will be multiplied by 4.334 to arrive at a monthly amount. Unless the verified amount is already a monthly amount, for example Social Security benefits, then some conversion to a monthly amount is required. The calculation will be documented in the individual's case file.

The chart below shows how income amounts larger or smaller than monthly amounts can be converted to a monthly amount.

### E-200 Determining Financial Eligibility Under the MAGI Methodology

Income Amount is	Convert to Monthly
Annual	Divide by 12
Quarterly	Divide by 3
Weekly	Multiply by 4.334
Bi-weekly	Multiply by 2.167
Semi-Monthly	Multiply by 2
Monthly	No conversion needed
More Often than Weekly	Total all Income Paid/Received in the Month

There may be situations in which an alternative method must be used Some situations require alternative methods to arrive at a current monthly income. For example, if annual income included a lump sum payment that will not be paid again, then the lump sum payment will be excluded from the rest of the annual income before the conversion to monthly income. is made. Self-employment income may also require an alternative method. See MS E-266 contains for a more detailed discussion on self-employment income.

**ExampleSeenario:** Bertha's and Audrey's current monthly income is determined as follows. Since Chloe's income is not considered in any of the three households, there is noneed to determine her current income.

### **Bertha**

Bertha works full time as the vice president of The High Rise Corporation. She reported that the annual income amount returned from the Federal Data Services Hub (\$96,000) was reflective of her current salary and that she receives the same amount each month. Therefore, the annual income amount can be divided by 12 months to arrive at her current monthly income (\$8000).

### Audrey

Audrey just started working part time (10 hours per week) at the daycare center where Chloe attends. She earns \$7.25 per hour. Her current monthly income is determined as follows:  $$7.25 \times 10 = $72.50$ 

\$72.50 x 4.334 = \$314.22 (\$314.22 x 12 = \$3,770.64 annual)

## **E-266E-265** Self-Employment Income

MS Manual <del>01/01/14??/??/08/01/2020</del>

The <u>current</u> monthly amount of self-employment earnings is the best estimate of <del>earned</del> income which will be available to the individual in a month or months earned income for future months.

### E-200 Determining Financial Eligibility Under the MAGI Methodology

The individual's recent tax data can be used to determine the monthly income. If the most recent tax data is not available or does not reflect current income, the individual's income will be determined by other means as determined appropriate by the caseworker eligibility worker, such as sales receipts, business records, etc.

Costs directly related to producing the self-employment income are subtracted from the self-employment annual gross income before the monthly earnings are included in the budget. See Schedule C in Appendix Q for all allowable costs associated with self-employment income.

After allowable deductions from annual income, the remainder is then divided by 12 to determine the monthly income.

# E-267E-266 Comparing Income to Income Standard for Appropriate Household Size

MS Manual 01/01/1408/01/2020

After the Medicaid household composition, size and countable current income have been established, the Medicaid household's countable income will be compared to the household size income standard for the appropriate eligibility group to determine whether an individual is income eligible. Income eligibility will first be determined in-according to the eligibility group the individual falls into with the lowest income standard. For example, e.g., eligibility for a parent would first be determined in the Parent/Caretaker Relative group before a group with a higher income standard.

### E-268E-267 The 5% Gross Income Disregard

MS Manual <del>05/01/18</del>08/01/2020

Each individual will be allowed a general gross income disregard in the amount of <u>five</u> <u>percent (5%)</u> of the Federal Poverty Level for the household size.

The five percent (5%) disregard will be applied only to the Families and Individuals category that haswith the highest income level in which an individual could be eligible. For example, if an individual is not income eligible in the lowest income level group (e.g., Parents/Caretaker Relatives), the five (5%) percent (5%) disregard will be applied to the higher income group (e.g., Adult Expansion Group). However, if the individual is eligible in the higher income group without applying the five percent (5%) disregard, the disregard will not be applied.

When applied, the <u>five percent (5%)</u> disregard effectively raises the income limits for the applicable eligibility group by five <del>(5)</del> percentage points. For example, the income limit for the Adult Expansion Group is <u>one hundred thirty-three (133%)</u> <del>(See MS E-110)</del>. To apply the <u>five percent (5%)</u> 5% disregard, add <u>five percent (5%)</u> 5% to <u>one hundred thirty-three percent (133%)</u> to raise the income limit to <u>one hundred thirty-eight percent (138%)</u> of <u>the Federal Poverty Level FPL</u>. The Full Pregnant Women and Parent Caretaker Relative categories of assistance are not eligible to receive the five percent (5%) disregard. The eligibility groups with dollar amounts for income limits are not the highest

### E-200 Determining Financial Eligibility Under the MAGI Methodology

income limit groups for the individuals that fall into them. Therefore, the <u>five percent (5%)</u>5% disregard will never be applied to the dollar amount income limits.

### Application of the 5% Disregard in the ARKids First groups

The <u>five percent (5%)</u> disregard is applied to the ARKids A income limit only if the child who would otherwise be ineligible without the disregard is covered by a health insurance plan. Since eligibility in ARKids B is not available to a child with health insurance, ARKids A is the eligibility group with the highest income limit available to an insured child, and therefore, the <u>five percent (5%)</u> disregard can be allowed.

The <u>five percent (5%)</u> 5%-disregard is not applied to the ARKids A income limit if the child is uninsured and ineligible for ARKids A without application of the disregard. ARKids B is the eligibility group with the highest income limit for uninsured children, and therefore, the <u>five percent (5%)</u> 5% disregard is applied only if needed to achieve ARKids B eligibility.

Refer to MS F-180 for exceptions to health insurance coverage for ARKids B eligibilityeligibles.

## **E-269**E-268 Undue Hardship for Lottery/Gambling Winnings Who Is Eligible Example Scenario

MS Manual xx/xx/xx05/01/1808/01/2020

An individual who is assessed a penalty for lottery/gambling winnings outlined in MS E-261 may request an undue hardship exception. The eligibility worker will consider factors including, but not limited to, the following:

- 1. The recipient is currently involved in an open or pending bankruptcy case;
- 2. The recipient or another household member is disabled;
- 3. The recipient is homeless;
- 4. The recipient or another household has a serious illness and the penalty could interrupt their health care coverage;
- 5. The recipient is the sole primary caretaker of minor children in the home;
- 6. The recipient is experiencing a life-changing event, {such as divorce for domestic violence}; and
- 7. Other compelling circumstances.

If an individual requests an undue hardship exception, the eligibility worker must verify the client's attestation. These cases will be handled on a case-by-case basis. If an undue hardship is granted for the recipient, a penalty will not be assessed.

Continuing the example of Bertha, Audrey and Chloe to show whose income will be counted and who is eligible for Medicaid.

### E-200 Determining Financial Eligibility Under the MAGI Methodology

Bertha and Audrey's household are the same which includes Bertha, Audrey & Chloe.

Bertha earns \$8,000.00 per month, which equals \$96,000 annually.

Audrey earns \$314.22 per month, which equals \$3,770.64 annually.

Audrey is the child and tax dependent of Bertha. Audrey is not required to file-taxes; therefore, her income does not count. Bertha's income is counted.

Bertha's household size is 3.

Compare the \$8,000.00 monthly income to the 133% + 5% = 138% standard for a household size of 3, \$2,390.16.

Bertha and Audrey are not eligible for Medicaid; therefore, the agency will electronically transfer their account to the FFM for possible eligibility for Advanced Premium Tax Credits and cost sharing reductions.

### E-200 Determining Financial Eligibility Under the MAGI Methodology

Chloe's household includes Chloe and her mother, Audrey.

- Audrey earns \$314.22 per month, which equals \$3,770.64 annually. Audrey's income will be counted because neither her mother, nor father is included in this household. Chloe's child support income is disregarded.
- → Chloe's household size is 2.
- Compare the \$314.22 monthly income to the ARKids A standard of 142% for 2, \$1,948.24. Note: The 5% disregard was not needed for ARKids A eligibility and therefore was not applied.
- > Chloe is eligible for ARKids A.

### E-200 Determining Financial Eligibility Under the MAGI Methodology

# E-200 Determining Financial Eligibility Under the MAGI Methodology

### E-210 What is MAGI?

MS Manual 08/01/2020

MAGI is a federal income tax term meaning **M**odified **A**djusted **G**ross **I**ncome. For purposes of determining Medicaid eligibility, MAGI is a methodology for determining how income is counted and how household composition and family size are determined. It is based on federal tax rules, but it is not an amount on a specific line on an individual federal tax return. In addition to being used to determine Medicaid eligibility for certain eligibility groups, the MAGI methodology is also used to determine eligibility for and the amount of Advance Premium Tax Credits (APTC) and cost-sharing reductions available to individuals and families who are eligible to purchase health insurance through the Federally Facilitated Health Insurance Marketplace (FFM).

For tax purposes, the modified adjusted gross income reflects annual income for a specific tax year. For Medicaid purposes, however, current monthly income is used to determine eligibility. This is true even when using MAGI methodologies. Detailed information on determining whether income is "current" and converting income amounts to monthly amounts can be found in MS E-265.

### Families and Individuals (Management

MS Manual 08/01/2020

MAGI methodologies are used to determine financial eligibility for the following groups:

- 1. Infants and children under age 19 (ARKids A & B);
- 2. Pregnant women;
- 3. Parents and caretaker relatives;
- 4. Adults age 19 through 64 who do not fall into another adult group, such as the Adult Expansion Group; or
- 5. Transitional Medicaid.

### Steps in Determining MAGE Transport

MS Manual 08/01/2020

Below are the steps for determining income eligibility:

### E-200 Determining Financial Eligibility Under the MAGI Methodology

- 1. Determine the Medicaid household composition and size for each individual applying for assistance. See MS E-240-E-251.
  - "Medicaid household" means the household members whose income will be considered when determining eligibility and who will be included in the household size. For MAGI determinations, the Medicaid household is determined based on the individual's tax filing status. See <u>MS E-250.</u>
  - The "Medicaid household size" is the number of people who will be counted to determine the appropriate Federal Poverty Level (or other income standard) for the household.
- 2. Determine countable household income. See MS E-260-E-264.
  - Countable household income refers to the income of the Medicaid household members that will be counted in determining eligibility.
- 3. Determine current household income. See MS E-265-E-266.
  - The income used to determine Medicaid eligibility must reflect the income that a Medicaid household member is currently receiving.
- 4. Compare countable current household income to the appropriate Federal Poverty Level for the household size. See MS E-267.
  - This step will determine each individual's Medicaid eligibility.

### E-200 Determining Financial Eligibility Under the MAGI Methodology

## E-240 Determining the Medicaid Household for Families and Individual Groups

MS Manual 08/01/2020

Under the Modified Adjusted Gross Income (MAGI) methodology, the Medicaid household composition is based on federal income tax filing status. Household size is the number of individuals counted in the family size for the income standard. When determining the household size, individual Supplemental Security Income (SSI) recipients are counted. A pregnant woman is counted as one (1) person plus the number of children she is expecting. In most situations, the Medicaid household is the same as the tax filing unit of which the individual is a member. The Medicaid household composition determines whose income will be considered in determining eligibility. If the family or individual has not filed a federal tax return for the most recent tax year and does not expect to file one, then the Medicaid household is determined as described in MS E-251.

## Tax Filing Status

MS Manual 08/01/2020

To determine an individual's tax filing status or unit, two basic questions must be asked.

**NOTE:** Each person's eligibility for Medicaid is determined individually, even if two or more individuals are living in the same household.

- 1. Does the individual expect to file taxes?
- 2. Does the individual expect to be claimed as a tax dependent?

If the answer to both questions is "No," then the individual's Medicaid household is determined according to MS E-251 (Non-Tax Filing Households).

If the answer to either of the above questions is "Yes," then additional questions must be asked to determine the individual's Medicaid household as described in the table below.

Question 1. Does the individual expect to file taxes?		
Yes	Continue to Question 1a.	
No	Continue to Question 2.	
Q. 1a. Does the individual expect to be claimed as a tax dependent by anyone else?		
Yes	Continue to Question 2.	
No	Household is:	
	■ The taxpayer;	

## E-200 Determining Financial Eligibility Under the MAGI Methodology

	<ul> <li>A spouse living with the taxpayer; and</li> </ul>			
	<ul> <li>All persons the taxpayer expects to claim as a tax dependent.</li> </ul>			
Question 2. Does the individual expect to be claimed as a tax dependent?				
Yes	Continue to Question 2a.			
No	Household composition is determined according to MS E-251.			
Question 2a. Does t	he individual meet any of the following exceptions?			
(biological, a  Is a child und file a joint ta	cts to be claimed as a tax dependent of someone other than a spouse or parent ogical, adoptive, or step-parent). hild under age 19 living with both parents, but the parents do not expect to joint tax return. hild under age 19 who expects to be claimed by a non-custodial parent.			
Yes	Household composition is determined according to MS E-251.			
No	No  Household is:  The household of the taxpayer claiming the individual as a tax dependent; and The individual's spouse, if married.			

E-200 Determining Financial Eligibility Under the MAGI Methodology

## Non-Tax Filing Households

MS Manual 08/01/2020

Medicaid household composition will be determined in accordance with this section in the following situations:

- 1. The individual has not filed or does not expect to file a federal income tax return for the current year AND does not expect to be claimed as a tax dependent for the current year; or
- 2. The individual meets one of the following tax dependent exceptions:
  - a. Expects to be claimed as a tax dependent of someone other than a spouse or parent (biological, adoptive, or step-parent);

### E-200 Determining Financial Eligibility Under the MAGI Methodology

- b. The individual is a child under age 19 living with both parents, but the parents do not expect to file a joint tax return;
- c. The individual is a child under age 19 who expects to be claimed by a non-custodial parent.

When an individual is in one of the situations above:	The Medicaid household includes the following persons who live in the home with the individual:  Spouse Children (biological, adopted and step children) under age 19 Siblings (biological, adopted, and step siblings) under age 19.  If the individual is under age 19, his or
	<ul> <li>If the individual is under age 19, his or her parent(s) (biological, adopted, and step parents).</li> </ul>

## **Determining Countable Income for**

### **Groups**

MS Manual 08/01/2020

Once the Medicaid household composition has been established for the individual, each household member's countable income must be determined. Only the income of persons in an individual's Medicaid household is considered when determining financial eligibility.

### E-200 Determining Financial Eligibility Under the MAGI Methodology

Countable income sources using the MAGI methodology are the same as a tax filing unit's taxable income sources with a few exceptions. The exceptions are:

- Social Security benefits are counted in full.
- Income received as a lump sum is counted as income only in the month received.; and
- Any portion of an educational scholarship, award or fellowship grant used for living expenses is countable income.

### Income Included for Families and Individual

MS Manual 08/01/2020

Although not an exhaustive list, the following are examples of taxable income included in MAGI calculations to determine Medicaid eligibility:

- 1. Earned Income: If the pay stub lists "Federal Taxable Wages" use that amount; if not, use "Gross Income" instead;
- 2. Self-employment income or "Net Self-Employment income": The amount after allowable income-producing costs are deducted. See MS E-266;
- 3. Social Security Income (Title II) counted in full for Medicaid even though only a portion (or none) may be taxable;
- 4. Lump sum payments in month of receipt only;
- 5. Dividends and interest income;
- 6. Unemployment compensation;
- 7. Alimony, divorces, and separations finalized before January 1, 2019;
- 8. Pensions and annuities payments;
- 9. Rental income;
- 10. Lottery and gambling winnings (Income less than \$80,000 is countable income in month received. Income greater than or equal to \$80,000 to \$89,999 is countable income for two months, divided equally. For every additional \$10,000, add a month and divide equally. The maximum penalty cannot exceed 120 months or 10 years. Pro-rated winnings only count for the individual receiving income;

NOTE: Individuals who receive lottery and gambling winnings may request an undue hardship exception to avoid a penalty. Please see <u>E-269</u>;

- 11. Any portion of educational scholarships, awards, or fellowship grants used for living expenses; or
- 12. Student Loan Debt that has been "forgiven" unless it was due to death or permanent disability).

If an individual received income from a source not listed above and did file a tax return for the tax year in which the income was received, the income will be considered for Medicaid purposes if it was reported as taxable income for that tax year. If the income was excluded from taxes, it will be excluded for Medicaid purposes. If the individual did not file a tax return for the applicable tax year, then a determination must be made as to whether the income will be taxable or not.

### E-200 Determining Financial Eligibility Under the MAGI Methodology

### Income Excluded for the Families and Land

MS Manual 08/01/2020

Although not an exhaustive list, the following examples of income that are excluded as taxable income for federal income tax purposes, and therefore are excluded as countable income for Medicaid purposes:

- 1. Child Support
- 2. Contributions
- 3. Worker's Compensation
- 4. Veteran's Benefits
- 5. Educational grants: Pell Grant, the Federal Supplemental Educational Opportunity Grant (FSEOG), the State Student Income Grant (SSIG) and college work study.
- 6. American Indian/Alaska Native
- 7. Public Assistance Benefits, such as Transitional Employment Assistance (TEA) or Supplemental Security Income (SSI)
- 8. Disaster Relief Payments
- 9. Gifts
- 10. Federal Tax Refunds
- 11. Alimony: divorces and separations finalized on or after January 1, 2019.
- 12. Moving Expenses (Active Military Duty only)
- 13. Outreach and Enrollment Grants
- 14. Combat pay for military personnel

Refer to MS E-261 to determine if a source of income not listed above can be excluded for Medicaid purposes or whether it must be counted.

# Household Members Whose Process Families and Individual (MAGI) Groups

MS Manual 08/01/2020

The income of the following household members is not considered when determining Medicaid eligibility:

- 1. Income of a child who is included in the parent's Medicaid household and is not expected to be required to file a tax return.
- 2. Income of a tax dependent who is not expected to be required to file a tax return and is in the Medicaid household of the person who is claiming him or her as a tax dependent.
- 3. Income of a Supplemental Security Income (SSI) recipient who is included in the Medicaid household size.

### E-200 Determining Financial Eligibility Under the MAGI Methodology

When determining MAGI eligibility, the income of a child must be counted and verified if the child must file a tax return because his or her income exceeds the IRS filing threshold. Once a household has been established, the MAGI-based income of every household member will be counted with one exception: the income for children and tax dependents whose income is below the filing threshold will be disregarded. This exception only applies to a child who is in the household with a parent or for a tax dependent who is in the household with the tax filer who claims him or her as a tax dependent.

### E-200 Determining Financial Eligibility Under the MAGI Methodology

# Determining Current Gross Monthly Individuals Groups

MS Manual 08/01/2020

Current gross monthly income minus allowable deductions will be used in determining financial eligibility for Medicaid. Current monthly income is the income the individual is expected to have in the month(s) for which eligibility is being determined.

Income that may have been received in the prior tax year or even the prior month, but that is not currently being received or expected to be received in the current or future months will not be counted. If a continuing source of income has increased or decreased since the last tax return or from other information available to the agency, the current income will be determined and used for eligibility purposes.

<u>NOTE:</u> Income received in a month for which retroactive eligibility is being determined will be considered for the retroactive month even if it is not considered for current or future months.

Once the household members' current income has been established and verified using the ten percent (10%) reasonable compatibility standard as appropriate (See MS G-151-152), the monthly amount used to determine eligibility will be calculated. Depending on how the current income was established (e.g., tax return income via the Federal Data Services Hub, State Quarterly Wage Data, check stubs, SOLQ, etc.), the "verified" income amount may have to be reduced or increased to reflect a monthly amount. For example, if the most recent tax return reflects the income still currently available to the individual, the annual income from the tax return will be divided by 12 to arrive at a monthly amount. If the current income was established through the most recent weekly check stubs, the average weekly amount will be multiplied by 4.334 to arrive at a monthly amount. Unless the verified amount is already a monthly amount, for example Social Security benefits, then some conversion to a monthly amount is required. The calculation will be documented in the individual's case file.

The chart below shows how income amounts larger or smaller than monthly amounts can be converted to a monthly amount.

### E-200 Determining Financial Eligibility Under the MAGI Methodology

Income Amount is	Convert to Monthly
Annual	Divide by 12
Quarterly	Divide by 3
Weekly	Multiply by 4.334
Bi-weekly	Multiply by 2.167
Semi-Monthly	Multiply by 2
Monthly	No conversion needed
More Often than Weekly	Total all Income Paid/Received in the Month

Some situations require alternative methods to arrive at a current monthly income. For example, if annual income included a lump sum payment that will not be paid again, then the lump sum payment will be excluded from the rest of the annual income before the conversion to monthly income. Self-employment income may also require an alternative method. MS E
266 contains a more detailed discussion on self-employment income.

## **Self-Employment Income**

MS Manual 08/01/2020

The current monthly amount of self-employment earnings is the best estimate of earned income for future months.

### E-200 Determining Financial Eligibility Under the MAGI Methodology

The individual's recent tax data can be used to determine monthly income. If the most recent tax data is not available or does not reflect current income, the individual's income will be determined by other means as determined appropriate by the eligibility worker, such as sales receipts, business records, etc.

Costs directly related to producing self-employment income are subtracted from the annual gross income before the monthly earnings are included in the budget. See Schedule C in <a href="Appendix Q">Appendix Q</a> for all allowable costs associated with self-employment income. After allowable deductions from annual income, the remainder is then divided by 12 to determine the monthly income.

## Comparing Income to Income Sandaria Household Size

MS Manual 08/01/14

After the Medicaid household composition, size and countable current income have been established, the Medicaid household's countable income will be compared to the household size income standard for the appropriate eligibility group to determine whether an individual is income eligible. Income eligibility will first be determined according to the eligibility group the individual falls into with the lowest income standard. For example, eligibility for a parent would first be determined in the Parent/Caretaker Relative group before a group with a higher income standard.

## The 5% Gross Income Disregard

MS Manual 08/01/18

Each individual will be allowed a general gross income disregard in the amount of five percent (5%) of the Federal Poverty Level for the household size.

The five percent (5%) disregard will be applied only to the Families and Individuals category with the highest income level in which an individual could be eligible. For example, if an individual is not income eligible in the lowest income level group (e.g., Parents/Caretaker Relatives), the five percent (5%) disregard will be applied to the higher income group (e.g., Adult Expansion Group). However, if the individual is eligible in the higher income group without applying the five percent (5%) disregard, the disregard will not be applied.

When applied, the five percent (5%) disregard effectively raises the income limits for the applicable eligibility group by five percentage points. For example, the income limit for the Adult Expansion Group is one hundred thirty-three (133%) See MS E-110. To apply the five percent (5%) disregard, add five percent (5%) to one hundred thirty-three percent (133%) to raise the income limit to one hundred thirty-eight percent (138%) of the Federal Poverty Level . The Full Pregnant Women and Parent Caretaker Relative categories of assistance are not eligible to receive the five percent (5%) disregard.

### E-200 Determining Financial Eligibility Under the MAGI Methodology

.

### Application of the 5% Disregard in the ARKids First groups

The five percent (5%) disregard is applied to the ARKids A income limit only if the child who would otherwise be ineligible without the disregard is covered by a health insurance plan. Since eligibility in ARKids B is not available to a child with health insurance, ARKids A is the eligibility group with the highest income limit available to an insured child, and therefore, the five percent (5%) disregard can be allowed.

The five percent (5%) disregard is not applied to the ARKids A income limit if the child is uninsured and ineligible for ARKids A without application of the disregard. ARKids B is the eligibility group with the highest income limit for uninsured children, and therefore, the five percent (5%) disregard is applied only if needed to achieve ARKids B eligibility.

Refer to MS F-180 for exceptions to health insurance coverage for ARKids B eligibility.

## Undue Hardship for Lottery/

MS Manual 08/01/2020

An individual who is assessed a penalty for lottery/gambling winnings outlined in <u>MS E-261</u> may request an undue hardship exception. The eligibility worker will consider factors including, but not limited to, the following:

- 1. The recipient is currently involved in an open or pending bankruptcy case;
- 2. The recipient or another household member is disabled;
- 3. The recipient is homeless;
- 4. The recipient or another household has a serious illness and the penalty could interrupt their health care coverage;
- 5. The recipient is the sole primary caretaker of minor children in the home;
- 6. The recipient is experiencing a life-changing event, such as divorce or domestic violence; and
- 7. Other compelling circumstances.

If an individual requests an undue hardship exception, the eligibility worker must verify the client's attestation. These cases will be handled on a case-by-case basis. If an undue hardship is granted for the recipient, a penalty will not be assessed.

#### SHO # 19-003

Re: Changes to Modified Adjusted Gross Income (MAGI)-based Income Methodologies

August 22, 2019

Dear State Health Official:

The purpose of this letter is to provide guidance to explain several legislative changes to the modified adjusted gross income (MAGI)-based methodologies used for determining Medicaid and CHIP eligibility. These changes stem from the following pieces of legislation: the Tax Cuts and Jobs Act (Pub. L. No. 115-97, "TCJA"), enacted on December 22, 2017; the Bipartisan Budget Act of 2018 (Pub. L. No. 115-123, "BBA of 2018"), enacted on February 9, 2018; and the Helping Ensure Access for Little Ones, Toddlers, and Hopeful Youth by Keeping Insurance Delivery Stable Act (Pub. L. No. 115-120, "HEALTHY KIDS Act"), enacted on January 22, 2018. This guidance provides states with information on how to implement these legislative requirements, consistent with titles XIX and XXI of the Social Security Act ("Act"), for individuals whose financial eligibility is determined using MAGI-based methodologies.

### Background

Section 1902(e)(14) of the Act requires that state Medicaid agencies generally use "modified adjusted gross income" and "household income," as defined at section 36B(d)(2) of the Internal Revenue Code of 1986 (the IRC) to determine Medicaid eligibility. Section 2107(e)(1)(H) of the Act requires that MAGI and household income also be used to determine eligibility for the Children's Health Insurance Program (CHIP). For purposes of Medicaid and CHIP eligibility, we refer to these definitions collectively as "MAGI-based methodologies for Medicaid and CHIP are implemented in the regulations at 42 CFR 435.603 and 457.315, respectively.<sup>1</sup>

In general, the calculation of MAGI-based income includes all taxable earned and unearned income minus certain expenses such as student loan interest or IRA contributions that are deductible in determining an individual's adjusted gross income (AGI) for federal income tax purposes. Three items must be added to adjusted gross income to determine an individual's MAGI (i.e., modified AGI): non-taxable foreign earned income, tax-free interest, and non-taxable Social Security benefits. There are a few discrete ways in which MAGI-based

<sup>&</sup>lt;sup>1</sup> Certain individuals are exempt from application of MAGI-based financial methodologies. Generally, these include individuals whose eligibility is being determined on the basis of being age 65 or older, living with a disability or blindness or needing long-term services and supports; and individuals for whom the state does not apply an income test. A more detailed description of individuals for whom MAGI-based methodologies do not apply can be found in regulations at 42 CFR 435.603(j).

### Page 2 – State Health Official

methodologies used for Medicaid and CHIP differ from the definition of MAGI and household income in the IRC. For example, MAGI-based methodologies for treatment of irregular income received as a lump sum is different than the treatment of lump sum income under section 36B of the IRC. These differences are set forth in regulations at 42 CFR 435.603(e).

Identifying the members of an individual's household is important to determine the individual's total household income and family size. Under 42 CFR 435.603(f), for individuals intending to file a tax return as well as the individuals they claim as tax dependents, the MAGI-based household generally consists of the tax filer and his or her tax dependents. For individuals who are not tax filers or tax dependents, "non-filer" rules set forth in 42 CFR 435.603(f)(3) are used to determine the MAGI-based household. Under the non-filer rules, an individual's household generally consists of the family members, if living with the individual: the individual; the individual's spouse, if married; the individual's children (including step children); and, if the individual is a child, his/her parent(s) and sibling(s). The non-filer rules also are used for children and tax dependents in certain living situations, as described in 42 CFR 435.603(f)(2)(i)-(iii).

Once the composition of an individual's household has been established, additional rules are applied to determine whose income is counted in household income. Generally, the income of a tax dependent in a household is not counted unless it is expected that the dependent will be required to file a federal tax return – i.e., the income of the dependent is at or above the tax-filing thresholds for tax dependents under the IRC. Under regulations at 42 CFR 435.603(d)(2), the income of children in non-filing households also generally is excluded from household income unless a child's income meets the federal tax filing threshold.<sup>2</sup>

The TCJA, the BBA of 2018 and the HEALTHY KIDS Act each amended the Act as well as tax rules under the IRC in several ways, which impact the MAGI-based methodologies for Medicaid and CHIP. The following discussion explains the changes brought about by these new laws.

#### Changes to Tax Filing Thresholds

In 2017, a single tax dependent under age 65 and not blind met the federal tax filing threshold if he or she had \$6,350 or more of gross income or \$1,050 or more of unearned income. Gross income includes both earned and unearned income. This meant that, generally, for a child with unearned income below \$1,050 and gross income below \$6,350, none of the child's income would be included in determining household income. In contrast, all of the income of a child with unearned income equal to or greater than \$1,050 or total gross income equal to or greater than \$6,350 generally would be counted in household income.

<sup>&</sup>lt;sup>2</sup> Under MAGI-based methods, a child's income is always counted when the child is the only person in his/her MAGI-based household (or is living with his/her sibling(s)), regardless of whether or not the child's income exceeds the filing threshold. For example, the child's income is counted in the case of a child living with his or her grandparent(s) and neither parent is living with them nor claiming the child as a tax dependent. 42 CFR 435.603(d)(1)

### Page 3 – State Health Official

The TCJA modified the tax filing threshold for most individuals. For tax year 2018, single tax dependents who are under age 65 and not blind must file a federal tax return if any of the following apply for the tax year:<sup>3</sup>

- 1. Unearned income is more than \$1,050;
- 2. Earned income is more than \$12,000;
- 3. Gross income is more than the larger of
  - a. \$1,050; or
  - b. Earned income (up to \$11,650) plus \$350.

Further, the filing threshold is increased for tax dependents who are age 65 or older or who are blind. For tax year 2018, single tax dependents who are age 65 or older and/or who are blind must file a federal tax return if any of the following apply for the tax year:

- 1. Unearned income is more than \$2,650 (\$4,250 if 65 or older and blind);
- 2. Earned income is more than \$13,600 (\$15,200 if 65 or older and blind);
- 3. Gross income is more than the larger of
  - a. \$2,650 (\$4,250 if 65 or older and blind); or
  - b. Earned income (up to \$11,650) plus \$1,950 (\$3,550 if 65 or older and blind).

Attachment A includes a table comparing the 2017 and 2018 tax filing thresholds. The IRS updates the standard deduction and filing thresholds annually for inflation.

### **Impact on Household Composition**

For years prior to 2018, tax filers were allowed a deduction for each of their personal exemptions, including their tax dependents. The TCJA reduced the personal exemption deduction amount to \$0 for tax years 2018 through 2025, meaning that tax filers will no longer claim a deduction for their tax dependents on their federal tax return. Although taxpayers will no longer claim personal exemption deductions, they must still claim their dependents on their tax return by putting the name and Social Security Number of the dependent on the return to be eligible for certain tax benefits such as the dependent care credit and the premium tax credit for the child's health insurance coverage. Claiming dependents also remains relevant for determining household composition under the MAGI-based methodologies used by Medicaid and CHIP. Thus, there is no change to the rules governing household composition under 42 CFR 435.603(f) for purposes of making MAGI-based eligibility determinations.<sup>4</sup>

#### Changes to Countable Income

In addition to the changes noted above, the BBA of 2018 and TCJA made several changes to the taxability of certain items, which similarly impact MAGI-based methodologies.

<sup>&</sup>lt;sup>3</sup> See IRS Publication 501, Table 2. https://www.irs.gov/pub/irs-pdf/p501.pdf.

<sup>&</sup>lt;sup>4</sup> See: https://www.irs.gov/pub/irs-drop/n-18-84.pdf.

### Counting of Qualified Lottery and Gambling Winnings in MAGI-based Methods

Under 42 CFR 435.603(e)(1) of the current regulations describing the MAGI-based methodologies, non-recurring income received as a lump sum is generally counted (if it is taxable) as income only in the month received; if not spent, the money converts to savings, which is a resource. Section 53103 of the BBA of 2018 supersedes this regulatory rule in the case of "qualified lottery winnings" and "qualified lump sum income" (i.e., gambling) of \$80,000 or greater. Specifically, section 53103, which added paragraph (K) to section 1902(e)(14) of the Act, requires that covered lottery and gambling winnings of \$80,000 or greater, which are received in a single payout, be counted not only in the month received, but over a period of up to 120 months. The statute provides a formula for determining this period, depending on the amount of the winnings. States must apply this formula to qualified lottery or gambling winnings received beginning on or after January 1, 2018.

Qualified Lottery Winnings. Under section 1902(e)(14)(K)(v) of the Act, the term "qualified lottery winnings" is defined as "winnings from a sweepstakes, lottery, or pool" described in section 4402 of the IRC (which generally requires that these particular activities be conducted by a state agency or under the authority of state law), or winnings from "a lottery operated by a multistate or multijurisdictional lottery association." Multijurisdictional lotteries include those that include multiple entities of government.

While lottery winners generally have a choice between receiving a single payment or an annuity that pays out in installments over a period of time (often in annual payments over 20 or 30 years), the definition of "qualified lottery winnings" in section 1902(e)(14)(K)(v) by its own terms applies to the single payout option. Lottery winnings paid out in installments are not required to be considered "qualified lottery winnings" under the statute, and we do not think that interpreting the term to include such winnings would be consistent with the purpose of the statute. In our analysis of the potential impact of the formula for qualified lottery winnings on an annuity paid in installments, we found through many permutations of winnings that some individuals could have winnings counted for a shorter time and others for a longer time under the formula as compared to existing MAGI-based income counting. Due to the complexity of various lotteries, payment amounts and scenarios, and in the absence of rulemaking to implement this law, at this time we are not interpreting the definition of "qualified lottery winnings" beyond the plain language of the statute. Therefore, lottery winnings paid out in installments would be treated the same as other types of recurring income under 42 CFR 435.603(e).

With respect to non-cash prizes, like a car or boat, the statute does not clearly specify whether such prizes are considered "qualified lottery winnings" under section 1902(e)(14)(K)(v) of the Act. As an example, the winner of a sweepstakes may be awarded a boat, which is appraised at a value of \$110,000. Unlike a cash prize, however, a non-cash prize like the boat will begin to depreciate immediately. Depending on the length of time that elapses between receipt and sale

<sup>&</sup>lt;sup>5</sup> There is one exception to this rule in the case of beneficiaries who receive lump sum income in a state that has elected the option to use projected annual household income for current beneficiaries under 42 CFR 435.603(h)(2). 
<sup>6</sup> To address the fluctuations in monthly income of a lottery winner receiving annual annuity payments, under MAGI-based rules at 42 CFR 435.603(h)(3), states currently may elect an option to account for "reasonably predictable future income" by prorating lottery payments over a 12-month period to determine an average current monthly income for Medicaid and CHIP.

of the item, the fair market value could be considerably less than the original appraised value. Therefore, we believe that non-cash prizes should continue to be counted as lump sum income in the month in which they are received and not counted as "qualified lottery winnings".

Qualified Lump Sum Income. Section 1902(e)(14)(K)(vi) of the Act defines "qualified lump sum income" as "income that is received as a lump sum from monetary winnings from gambling." Under this statute, the Secretary has discretion to define "gambling," except that the activities described in 18 U.S.C 1955(b)(4) must be included in the definition. These activities include: betting pools; wagers placed through bookmakers; slot machines; roulette wheels; dice tables; lotteries; and bolita or numbers games, or the selling of chances therein. The Secretary will consider other activities proposed by one or more states to be included in the definition of gambling. Absent a determination by the Secretary that inclusion of other activities in the definition of gambling is appropriate, states may not include any other activities. Because the statute specifically defines qualified lump sum income as "monetary winnings from gambling" (emphasis added), non-cash prizes are not counted as qualified lump sum income for the purposes of section 1902(e)(14)(K) of the Act

Formula for Counting Qualified Winnings. For qualified winnings from lotteries or gambling activities occurring on or after January 1, 2018, states must count the winnings according to the following formula:

Winnings less than \$80,000 are counted in the month received;

- Winnings of \$80,000 but less than \$90,000 are counted as income over two months, with an equal amount counted in each month; and
- For every additional \$10,000 one month is added to the period over which total winnings are divided, in equal installments, and counted as income.

The maximum period of time over which winnings may be counted is 120 months, which would apply for winnings of \$1,260,000 and above. A table showing the amount of monthly income attributed to increasing amounts of qualified winnings and the number of months over which the winnings is counted appears in Attachment B.

Treatment of Winnings for Other Household Members. Under section 53103(b)(2) of the BBA of 2018, the requirement to count qualified lottery and gambling winnings in household income over multiple months applies only to the individuals receiving the winnings. The determination of household income for other members of the individual's household are not affected. Thus, for example, the total amount of qualified lottery or gambling winnings of a spouse or parent continues to count only in the month received in determining the eligibility of the other spouse and children.

Verification of lottery and gambling winnings. Under regulations at 42 CFR 435.940 through 435.952 and 457.380, states may accept self-attestation or require other verification of lottery and gambling winnings. If a state requires other verification, per regulations at 42 CFR 435.952(c), the agency must first access available electronic data sources (such as a state lottery winner database, if available) and may accept self-attestation of lottery and gambling winnings before requesting documentation from the individual.

### Page 6 - State Health Official

Hardship exemption. Section 1902(e)(14)(K)(iii) of the Act requires that states establish an "undue medical or financial hardship" exemption, through a procedure and based on a standard established by the state, in accordance with guidance provided by the Secretary, for individuals impacted by the new treatment of lottery and gambling winnings. Pending further guidance from the Secretary, states should develop a procedure and establish a reasonable standard for this hardship exemption.

State responsibilities to ineligible applicants and beneficiaries. Applicants and beneficiaries affected by the counting of lottery or gambling winnings maintain the ability to request a determination on a non-MAGI basis, as described at 42 CFR 435.911. Individuals determined financially ineligible for Medicaid or CHIP due to lottery or gambling winnings also have the right to purchase health coverage through a Qualified Health Plan (QHP) on the Exchange and, if eligible, claim a premium tax credit (PTC) for such purchase. Section 1902(e)(14)(K)(iv) of the Act addresses certain state responsibilities to such applicants and beneficiaries, related to notices and technical assistance. The Act specifies that the state agency provide notice to affected individuals of the date on which the lottery or gambling winnings no longer will be counted for the purpose of Medicaid or CHIP eligibility. States also must notify affected individuals of the hardship exemption. In addition, the Act requires states to "inform the individual of the individual's opportunity to enroll in" a QHP on the Exchange, which states meet through implementation of notices regulations at 42 CFR 435.917, 435.1200(e) and 457.340(e).

Section 1902(e)(14)(K)(iv)(II) requires states to "provide technical assistance to the individual seeking to enroll in" a QHP. Consistent with coordination regulations at 42 CFR 435.1200(e) and 42 CFR 457.350(i), the state agency takes appropriate action to transfer the electronic account of an individual financially ineligible for Medicaid or CHIP to the Exchange. Inasmuch as the existing account transfer procedures that states use under the coordination regulations afford individuals needed assistance and provide the opportunity to enroll in appropriate coverage, such existing procedure satisfy the requirement to provide technical assistance.

#### MAGI Exclusion of Parent Mentor Compensation

Section 3004 of the HEALTHY KIDS Act extended the outreach and enrollment grant program for children who are eligible for, but not enrolled in, Medicaid or CHIP. Section 2113(f)(1)(E) of the Act provides that national, state, local, or community-based public or nonprofit private organizations that use parent mentors, are eligible to receive such grants. A "parent mentor," defined in section 2113(f)(5) of the Act, is a parent or guardian of a Medicaid or CHIP-eligible child who is "trained to assist families with children who have no health insurance coverage with respect to improving the social determinants of the health of such children."

<sup>&</sup>lt;sup>7</sup> Qualified lottery and gambling winnings are subject to federal income taxation in the year received. Because PTC for subsidized purchase of a QHP is based on taxable income during the tax year, if the amount of winnings results in individuals losing Medicaid or CHIP eligibility and their household income, including the lottery or gambling winnings, exceeds the income limit for PTC (400 percent of the federal poverty level (FPL)), those individuals will not qualify for a subsidized health plan for the year in which the winnings are received. However, because section 1902(e)(14)(K) of the Act applies only to MAGI-based methods for Medicaid and CHIP, such winnings will not be counted in subsequent years for purposes of eligibility for the PTC for purchase of coverage through the Exchange.

#### Page 7 – State Health Official

In order to protect parent mentors from losing eligibility for Medicaid, section 3004 of the HEALTHY KIDS Act amends section 1902(e)(14) of the Act to exclude parent mentor compensation from their MAGI-based household income. New paragraph (J) provides that "[a]ny nominal amount received by an individual as compensation, including a stipend, for participation as a parent mentor" in a grant-funded program under section 2113 of the Act "shall be disregarded for purposes of determining income eligibility of such individual for medical assistance." The disregard of parent mentor income applies only in the case of parent mentors working with a grantee organization under section 2113 of the Act.

Nominal amounts paid as a stipend to a parent mentor are excluded from income. For payments received as wages or other compensation, states have discretion to determine the threshold of a "nominal amount." CMS will alert states if a grant is awarded under section 2113 of the Act in which the grantee plans to use parent mentors. We will be available to work with those states and grantees to establish a process for applicants and beneficiaries to identify parent mentor income that is not counted in determining eligibility under section 1902(e)(14)(J) of the Act.

#### Alimony Received

Prior to enactment of the TCJA, alimony as defined in IRC section 71 was considered taxable income to the recipient. Section 11051 of the TCJA modified the alimony rules. Under the TCJA, alimony payments under separation or divorce agreements finalized after December 31, 2018, or pre-existing agreements modified after December 31, 2018, are not included in the income of the recipient. For individuals with alimony agreements finalized on or before December 31, 2018, alimony continues to be included in the income of the recipient for the duration of the agreement unless or until the agreement is modified. Treatment of alimony paid is discussed below. The treatment of child support is unchanged: child support is not included in the income of the recipient and thus not counted in MAGI-based income.

#### Discharged Student Loan Debt

Student loan debt that is discharged, forgiven or cancelled is generally treated as taxable income to the borrower, and therefore the amount of discharged debt is included in MAGI-based income. However, section 11031 of the TCJA amended section 108(f) of the IRC to provide an exception for tax years 2018 through 2025 in cases of discharged debt on account of the death or permanent and total disability of the student. Under the amendment, discharged student loan debt is not included in income (and not counted in the MAGI-based income) of a borrower if the debt is discharged on account of the death or the permanent and total disability of the student. (The borrower and the student may or may not be the same person.) Student loan debt discharged under the foregoing circumstances is not counted as income in determining household income for other members of the borrower's household.

#### **Changes to Deductions**

<sup>&</sup>lt;sup>8</sup> A notable exception is the Public Service Loan Forgiveness program and certain teacher loan/healthcare loan forgiveness programs, which do not lead to taxable income (26 USC 108(f)(1)).

#### Page 8 – State Health Official

As noted above, certain deductions are allowed under the IRC in determining adjusted gross income, upon which MAGI is based. The TCJA eliminated several of these deductions.

#### Moving Expenses

Section 11049 of the TCJA, amending section 217 of the IRC, eliminated the deduction for qualified moving expenses for tax years 2018 through 2025. Moving expenses, including expenses incurred by the individual as well as reimbursements from an employer, should no longer be deducted in calculating MAGI. This change does not apply to active duty members of the military who are ordered to move or change duty station.

#### **Alimony Paid**

Under the TCJA, alimony payments under separation or divorce agreements finalized after December 31, 2018, or pre-existing agreements modified after December 31, 2018, are not deductible by the payer. For individuals with alimony agreements finalized on or before December 31, 2018, alimony payments continue to be deductible. Child support payments remain non-deductible.

#### **Tuition and Fees Deduction**

The payment of tuition and fees for qualified education expenses for postsecondary education had been an allowable deduction. Amounts paid for these expenses for the taxpayer, spouse or tax dependent typically could be deducted in computing adjusted gross income. Section 40203 of the BBA of 2018 amended section 222(e) of the IRC to eliminate this deduction, effective January 1, 2018. Such tuition and fees paid are no longer deductible in calculating MAGI, effective January 1, 2018.

The tuition and fees deduction is separate and distinct from the exclusion of scholarships, awards or fellowships used solely for educational purposes from MAGI for purposes of Medicaid and CHIP eligibility. This exclusion, which also applies for determining MAGI under the IRC, remains in effect under the Medicaid regulations at 42 CFR 435.603(e)(2) and CHIP regulations at 42 CFR 457.315.

#### State Requirement to Report Enrollment in MEC

Under Section 6055 of the IRC, states are required to provide Medicaid and CHIP beneficiaries with IRS Form 1095-B, indicating that the beneficiary had minimum essential coverage (MEC) for the tax year. States also must provide this information to the IRS. Under section 5000A of the IRC, individuals not enrolled in MEC and not exempt are subject to a "shared responsibility payment." The TCJA reduced the shared responsibility payment to \$0 beginning in tax year 2019. However, it did not eliminate the requirement for states to furnish Form 1095-B or to provide information about Medicaid and CHIP enrollment to IRS. Therefore, states must continue to send Forms 1095-B for Medicaid and CHIP coverage for tax year 2019 and beyond. If there is any change to these reporting requirements, CMS will communicate the changes to states.

#### **Operational Considerations**

In order to implement the changes to MAGI-based methods described in this letter, states may need to make updates to eligibility policies and procedures and changes to eligibility systems logic. In addition, states will need to be able to collect the relevant application information in order to make accurate Medicaid and CHIP determinations. Capturing the information may involve changes to applications and other forms, additional instructions or help text, or new application questions. In order to implement needed systems changes, and in accordance with 42 CFR 433.112(b)(14), states may request enhanced 90 percent federal financial participation for eligibility technology investments funded through an approved Advanced Planning Document. CMS remains available to provide technical assistance to states on implementation of such changes to ensure that states are able to make the changes as soon as possible.

We hope this information will be helpful. Questions and comments about the changes to MAGI-based methodologies discussed in this bulletin may be directed to Stephanie Kaminsky, Director, Division of Medicaid Eligibility Policy, CMCS, at <a href="Stephanie.Kaminsky@cms.hhs.gov">Stephanie.Kaminsky@cms.hhs.gov</a>. Requests for technical assistance on revisions to the state's application and renewal processes needed to implement the changes to MAGI-based methodologies may be directed to Jessica Stephens, Director, Division of Enrollment Policy and Operations, CMCS, at Jessica. Stephens@cms.hhs.gov.

Sincerely,

Calder Lynch
Deputy Administrator and Director

## Attachment C – Frequently Asked Questions: Changes to Modified Adjusted Gross Income (MAGI)-based Income Methodologies

#### Lottery and Gambling Winnings

- Q1. Can you provide some examples of how lottery and gambling winnings would impact individual applicants and beneficiaries?
- **A1.** Consider the following examples:
  - Sally is enrolled in Medicaid with MAGI-based household income of \$1,200 per month. She is single and has no dependents. On New Year's Eve 2018, Sally wins \$192,000 playing roulette. How do Sally's gambling winnings impact her MAGIbased income and eligibility for Medicaid?
    - a. Using the chart in Attachment B, we see that Sally's winnings of \$192,000 are counted in her MAGI-based income for 13 months, including the month in which she receives the winnings. So they are counted in December 2018 through December 2019.
    - b. An equal amount of \$14,769 is counted in each month (\$192,000/13 months = \$14,769 per month).
    - c. Sally's MAGI-based monthly income for December 2018 through December 2019 is \$15,969 (\$14,769 gambling winnings + \$1,200 other MAGI-based income) assuming no changes to her other MAGI-based income.
    - d. Because Sally's income exceeds the state's MAGI-based income standard, the agency would provide Sally with a notice alerting her that she is no longer eligible for Medicaid and her coverage will be terminated following the advance notice period. The notice will also tell Sally that beginning January 1, 2020, her gambling winnings will no longer be counted in her MAGI-based income.
    - e. The Medicaid agency will transfer Sally's account to the Exchange. Because she is losing eligibility for Medicaid, she qualifies for a special enrollment period and the Exchange will determine if she is eligible for advanced payments of the premium tax credit.
  - 2. Joe is a single individual who has no dependents. He earns \$700 per month and has no other income or deductions. Joe wins a scratch-off ticket paying out \$50,000 on May 15, 2019. The following month, Joe applies for Medicaid. How do his lottery winnings impact his MAGI-based income and eligibility for Medicaid?
    - a. Using the chart in Attachment B, we see that Joe's lottery winnings are counted in MAGI-based methods for only one month. Because his winnings are less than \$80,000, they are counted only in the month received. So the full amount of \$50,000 is counted in May of 2019.
    - b. When Joe applies for Medicaid in June, his MAGI-based income will be \$700 and that will be used to determine his financial eligibility for Medicaid.

### Q2. How do lottery and gambling winnings received by parents impact their children's eligibility for Medicaid?

A2. The changes to section 1902(e)(14) of the Act made by the Bipartisan Budget Act of 2018 (Pub. L. No. 115-123, "BBA of 2018") only impact the MAGI-based household income of the individuals who themselves receive the lottery or gambling winnings. Therefore, when determining Medicaid eligibility for a child who lives with a parent, the parent's qualified lottery or gambling winnings would be treated the same as any other lump sum income received and included in the child's MAGI-based income only in the month received, as described at 42 CFR 435.603(e)(1). Consider the following example.

Justine is a single parent who lives with her son, Oscar, who is age 7. Justine and Oscar have monthly MAGI-based income of \$2,000 from Justine's job. On April 14, 2019, Justine submits a Medicaid application for Oscar. The following week Justine wins the state lottery and receives a lump sum payment of \$755,000. How do Justine's lottery winnings impact Oscar's MAGI-based income and eligibility for Medicaid?

For the month of April, Oscar's MAGI-based household income will be calculated as \$755,000 in lottery winnings, plus \$2,000 in the other MAGI-based income, for a total monthly income of \$757,000 for a family of two. For the month of May, Oscar's MAGI-based income will be \$2,000. Justine's lottery winnings would count toward Oscar's MAGI-based income only in the month of April. If Justine applies for Medicaid, using the chart in Attachment B, her winnings of \$755,000 would be counted in her MAGI-based income for 69 months (or, 5 years and 9 months), beginning in the month in which she receives the winnings. That is, Justine's winnings would be counted in her MAGI-based income in April 2019 through December 2024. An equal amount of \$10,942 would be counted in each month (\$755,000/69 months = \$10,942 per month).

## Q3. Do winnings from any state count under the lottery and gambling winnings methodology?

- A3. Yes. Lottery and gambling winnings are treated the same regardless of the state in which they were won. The methodology in section 1902(e)(14)(K) of the Act applies to winnings an individual receives from any state.
- Q4. How are multiple instances of gambling winnings counted under the lottery and gambling winnings methodology?
- A4. If a Medicaid or CHIP applicant or beneficiary wins monetary winnings from gambling multiple times, the lottery and gambling winnings methodology is applied separately to each instance of winning. Where the amount of months over which winnings are counted overlap, those months are counted concurrently (each instance beginning and ending as per the formula) and the countable income attributed to each month is added together for each month.

- Q5. Are gambling losses subtracted from gambling winnings for the purposes of the lottery and gambling winnings methodology?
- A5. No. Although there are circumstances in which gambling losses may be deducted from income for the purpose of federal income taxes, gambling losses are not deducted from winnings for the purposes of the lottery and gambling winnings methodology under MAGI-based income methodologies for Medicaid and CHIP.
- Q6. How should the "gap-filling" rule at 42 CFR 435.603(i) apply to individuals whose income is counted under the lottery and gambling winnings methodology?
- A6. The Medicaid "gap-filling" rule at 42 CFR 435.603(i), promulgated in March 2012, was designed to prevent a potential gap in coverage for low-income individuals caused by the slight differences in the MAGI methodologies used for purposes of premium tax credit (PTC) eligibility and the MAGI-based methodologies used for purposes of Medicaid and CHIP eligibility. Under the gap-filling rule, if an individual's MAGI-based monthly household income for purposes of Medicaid eligibility is above the applicable Medicaid income standard and the individual's MAGI-based annual household income for purposes of PTC eligibility is under 100 percent of the FPL (and ineligible for a PTC due to too little income) the state is required to apply the MAGI methodologies generally used for purposes of PTC eligibility in determining the individual's eligibility for Medicaid.

The different treatment of lottery and gambling winnings under the MAGI methodologies for PTC eligibility versus the MAGI-based methodologies used for Medicaid and CHIP may result in a situation in which an individual's household income for purposes of PTC eligibility in a given year will be under 100 percent FPL, but his or her income applying MAGI-based methodologies (for purposes of Medicaid and CHIP eligibility) will be over the Medicaid and CHIP eligibility thresholds. If applied in this situation, the gap filling rule would result in approval of Medicaid or CHIP eligibility in the year after receipt of the winnings. If applying the lottery and gambling methodology would result in income over the Medicaid eligibility standard, applying the gap-filling rule and determining such an individual eligible would not be consistent with the intended result under the BBA of 2018. We believe that the new statutory provision supersedes the regulatory policy in this situation. Thus, we have determined that states should not apply the gap-filling regulation at 42 CFR 435.603(i) if doing so would result in a determination contrary to the determination reached after applying the lottery and gambling methodology added at section 1902(e)(14)(K) of the Act by the BBA.

- Q7. Are states required to keep a record of individuals found ineligible for a period of time due to lottery or gambling winnings?
- A7. Per regulations at 42 CFR 431.17 and 435.914(a), states are required to maintain case records on each applicant and beneficiary containing, among other things, facts essential to supporting the agency's denial or termination of eligibility. States are expected to follow their standard recordkeeping protocol when an individual is denied or terminated

due to lottery or gambling winnings, including the period of time such records are maintained. States are not required to establish a separate process specific to individuals denied or terminated from coverage due to lottery or gambling winnings.

When an individual previously denied or terminated from coverage subsequently reapplies for coverage, states typically are able to identify the individual's previous application or enrollment in the state's program. Some states may have ready access to the record of the individual's prior winnings, and such states would be expected to take this information into account in processing the individual's new application. Other states may want to establish a process to maintain a record of the monthly amount of winnings of former applicants and beneficiaries to be counted as income as well as the duration for which that amount is counted.

#### **Other Questions**

Below we answer frequently asked questions which are not related to the lottery and gambling winnings methodology discussed in this letter.

- Q8. Now that alimony payments are treated differently under MAGI-based methodologies depending on the date that the agreement was consummated or last revised, how can states verify the date of execution of separation or divorce agreements that include provision for alimony?
- A8. Under the general verification regulations at 42 CFR 435.945(a) and 435.952(c), states have the flexibility to accept attestation of the date of the finalization or modification of a separation or divorce agreement or to require paper documentation, provided that electronic verification is not available or is inconsistent with the individual's attestation.
- Q9. Does the change to the treatment of alimony affect or render obsolete the mandatory eligibility group for extended Medicaid due to increased collection of spousal support (42 CFR 435.115)?
- A9. No. The discussion of including alimony in income relates only to MAGI-based methods, and not to any particular MAGI-based eligibility group. In particular, the group for extended Medicaid eligibility based on the increased collection of spousal support remains in effect as described under 42 CFR 435.115.

As noted in the SHO letter, if a separation or divorce agreement (or a modification to a pre-existing agreement) was finalized after December 31, 2018, the alimony payments under the agreement would not be counted in MAGI income and an increase would not trigger the four-month extension of Medicaid eligibility. However, if a separation or divorce agreement was finalized on or before December 31, 2018 (and is not modified thereafter), the alimony payments under the agreement must be included in the income of the recipient. In circumstances in which such alimony income meets the definition of "spousal support" under title IV-D of the Act, and the recipient has an increased collection of such support (e.g., through a scheduled increase, payment of arrears, or

through new collection on an existing support obligation) through the IV-D agency, the family may qualify for the four-month extension of Medicaid eligibility group under 42 CFR 435.115.

Spousal support that does not meet the IRS definition of alimony is not included in income and therefore an increased collection of such support would not trigger the extension under 42 CFR 435.115. The five requirements for spousal support to be alimony are:

- 1. Payment must be in cash;
- 2. Payment is received by (or on behalf of) a spouse under a divorce or separation agreement;
- 3. The divorce or separation instrument does not designate such payment as a payment not includable in gross income and not allowable as a deduction;
- 4. The payee spouse and the payer spouse are not members of the same household at the time such payment is made; and
- 5. There is no liability to make any such payment (in cash or property) as a substitute for such payments after the death of the payee spouse.
