ArcGIS for iPhone Install and Users Guide

Follow similar procedure for iPad. App is also available on Android
(search Google Play) and Windows Mobile 7

Step 1: Go to the iPhone "App Store"

Step 2: Go to "Search" and type in "ESRI". Click the "ESRI ArcGIS" application

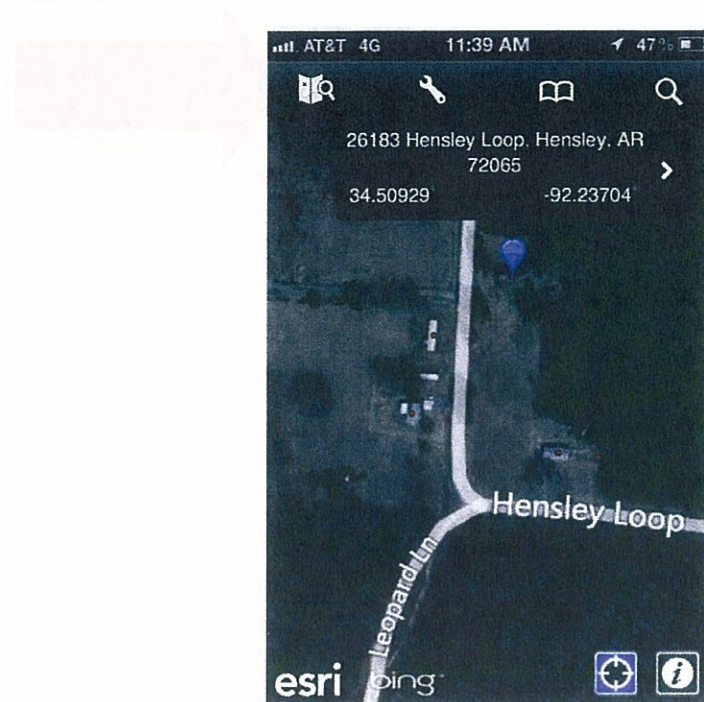

Step 5: To find a published map, click on the magnifying glass

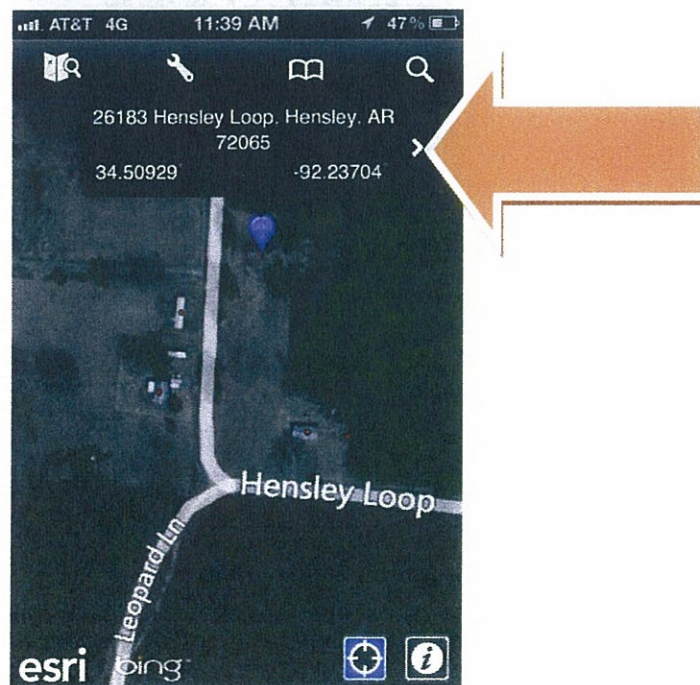

Step 6: To find our published maps, search for the tag "AGIO"

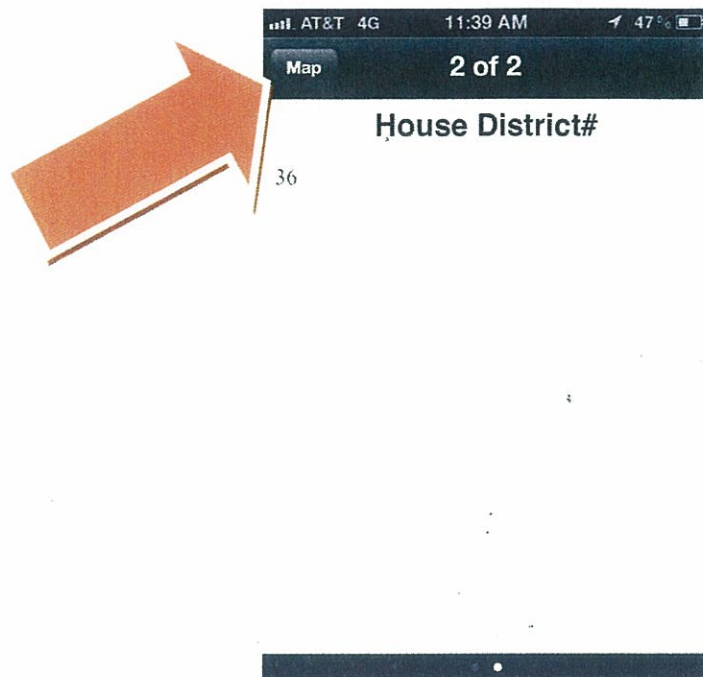

Step 9: Tapping the screen will allow you to identify features.

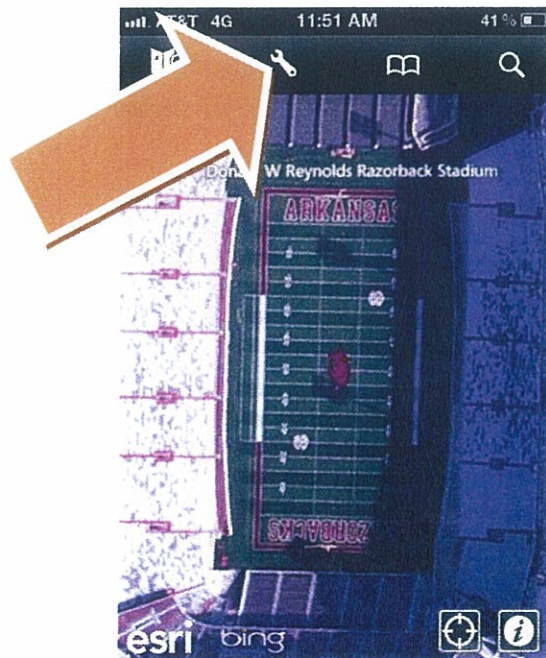

Step 10: Once you tap the screen, a popup window will appear. To view information about what you have clicked, click the Chevron on the right side of the popup.

Step 13: Clicking the “Map” button on the top left hand corner will take you back to the map.

Step 14. From the map, you will see a “Wrench” icon on the top. This button will take you to the “Map Tools” page.
