Nancy	Debock	AGAINST	Dear AR State Plant Board, Public natural areas, conservation buffers, and family farms are threatened by expanded dicamba use. Sincerely, Nancy Debock Bay, AR 72411	The concerns expressed in the comments in favor and against the proposed regulations were considered during the lengthy period of debate during the development of the proposed regulations. The Board amended the published regulation and voted to approve the amended regulation.

Online and Written Comments regarding the Propose Dicamba Regulation Change for the Public Hearing on February 20, 2019

FIRST NAME	LAST NAME	Selection	COMMENTS	AGENCY RESPONSE
Dr. Michael B.	Dougan	AGAINST	I am an Agricultural Historian, having written extensively in Arkansas Odyssey, my history book, and in articles and Encyclopedia of Arkansas entries. Dicamba means no gardens, organic farms, farmers' markets, no local honey in the Delta.,	The concerns expressed in the comments in favor and against the proposed regulations were considered during the lengthy period of debate during the development of the proposed regulations. The Board amended the published regulation and voted to approve the amended regulation.
Brian	Maddox	AGAINST		The concerns expressed in the comments in favor and against the proposed regulations were considered during the lengthy period of debate during the development of the proposed regulations. The Board amended the published regulation and voted to approve the amended regulation.
Angela	Jones	AGAINST	Make Dicamba completely illegal to preserve our environment. There are other ways to farm and be good stewards of the land and of neighbors.	The concerns expressed in the comments in favor and against the proposed regulations were considered during the lengthy period of debate during the development of the proposed regulations. The Board amended the published regulation and voted to approve the amended regulation.
Garnet C.	McDaniel	AGAINST		The concerns expressed in the comments in favor and against the proposed regulations were considered during the lengthy period of debate during the development of the proposed regulations. The Board amended the published regulation and voted to approve the amended regulation.
Jane	McDaniel	AGAINST		The concerns expressed in the comments in favor and against the proposed regulations were considered during the lengthy period of debate during the development of the proposed regulations. The Board amended the published regulation and voted to approve the amended regulation.
Kelly	Benson	AGAINST	Dicamba has caused damage to many farms and will continue to do so if it is allowed to be used after the April date. It is very prone to drift causing damage.	The concerns expressed in the comments in favor and against the proposed regulations were considered during the lengthy period of debate during the development of the proposed regulations. The Board amended the published regulation and voted to approve the amended regulation.

Online and Written Comments regarding the Propose Dicamba Regulation Change for the Public Hearing on February 20, 2019

FIRST NAME	LAST NAME	Selection	COMMENTS	AGENCY RESPONSE
Brian	Kelly	AGAINST	Any chemical formulation that has repeated oif target damage needs to be removed from the market until such formulations are manageable. The stability of the farming community rests on the decisions of responsible governing bodies. Regards, Mr. Kelly	The concerns expressed in the comments in favor and against the proposed regulations were considered during the lengthy period of debate during the development of the proposed regulations. The Board amended the published regulation and voted to approve the amended regulation.
William	Gott	AGAINST	You are right, this chemical cannot be properly controlled.	The concerns expressed in the comments in favor and against the proposed regulations were considered during the lengthy period of debate during the development of the proposed regulations. The Board amended the published regulation and voted to approve the amended regulation.
Rebekah	Evans	AGAINST	This rule will hurt crops, wildlife, and humans. Please look to the established science when proposing new rules.	The concerns expressed in the comments in favor and against the proposed regulations were considered during the lengthy period of debate during the development of the proposed regulations. The Board amended the published regulation and voted to approve the amended regulation.
Emily	Boves	AGAINST	Dear AR State Plant Board, Public natural areas, conservation buffers, and family farms are threatened by expanded dicamba use. Sincerely, Emily Boves Jonesboro, AR 72401	The concerns expressed in the comments in favor and against the proposed regulations were considered during the lengthy period of debate during the development of the proposed regulations. The Board amended the published regulation and voted to approve the amended regulation.
Chuck	Bari	AGAINST	Having seen the damage from the spaying of the dicamba on trees I can't in good conscience support this proposed rule.	The concerns expressed in the comments in favor and against the proposed regulations were considered during the lengthy period of debate during the development of the proposed regulations. The Board amended the published regulation and voted to approve the amended regulation.
Joseph	Long	AGAINST	Dear AR State Plant Board, Public natural areas, conservation buffers, and family farms are threatened by expanded dicamba use. Sincerely, Joseph Long Jonesboro, AR 72404	The concerns expressed in the comments in favor and against the proposed regulations were considered during the lengthy period of debate during the development of the proposed regulations. The Board amended the published regulation and voted to approve the amended regulation.

Online and Written Comments regarding the Propose Dicamba Regulation Change for the

Public Hearing on February 20, 2019

FIRST NAME	LAST NAME	Selection	COMMENTS	AGENCY RESPONSE
Caryl	Steele	AGAINST	I encourage the State Plant Board to not extend the date of dicamba usage until further study. Agriculture is essential to Arkansas' economy, but the health and safety of its citizens are equally essential.	The concerns expressed in the comments in favor and against the proposed regulations were considered during the lengthy period of debate during the development of the proposed regulations. The Board amended the published regulation and voted to approve the amended regulation.
Norma	Emission	AGAINST	Dear AR State Plant Board, Public natural areas, conservation buffers, and family farms are threatened by expanded dicamba use. Sincerely, Norma Emission Jonesboro, AR 72401	The concerns expressed in the comments in favor and against the proposed regulations were considered during the lengthy period of debate during the development of the proposed regulations. The Board amended the published regulation and voted to approve the amended regulation.
Norma	Emission	AGAINST	Dear AR State Plant Board, Public natural areas, conservation buffers, and family farms are threatened by expanded dicamba use. Sincerely, Norma Emission Jonesboro, AR 72401	The concerns expressed in the comments in favor and against the proposed regulations were considered during the lengthy period of debate during the development of the proposed regulations. The Board amended the published regulation and voted to approve the amended regulation.
Carol	Brigance	AGAINST	Dear AR State Plant Board, Public natural areas, conservation buffers, and family farms are threatened by expanded dicamba use. Sincerely, Carol Brigance Jonesboro, AR 72401	The concerns expressed in the comments in favor and against the proposed regulations were considered during the lengthy period of debate during the development of the proposed regulations. The Board amended the published regulation and voted to approve the amended regulation.
Gary	Leibrock	AGAINST	I think because Dicamba will vaporize in warm temperatures and is likely to damage non-GMO crops, its use should be based on air temperature and not on calendar dates! Spraying should cease by mid-April to early May.!!	The concerns expressed in the comments in favor and against the proposed regulations were considered during the lengthy period of debate during the development of the proposed regulations. The Board amended the published regulation and voted to approve the amended regulation.
Michael	Horton	AGAINST	In my opinion, Dicamba should not be used based on an arbitrary date, but strictly on air temperature.	The concerns expressed in the comments in favor and against the proposed regulations were considered during the lengthy period of debate during the development of the proposed regulations. The Board amended the published regulation and voted to approve the amended regulation.

Online and Written Comments regarding the Propose Dicamba Regulation Change for the Public Hearing on February 20, 2019

FIRST NAME	LAST NAME	Selection	COMMENTS	AGENCY RESPONSE
Douglas	Rayback	AGAINST	Dear AR State Plant Board, Public natural areas, conservation buffers, and family farms are threatened by expanded dicamba use. Sincerely, Douglas Rayback Jonesboro, AR 72401	The concerns expressed in the comments in favor and against the proposed regulations were considered during the lengthy period of debate during the development of the proposed regulations. The Board amended the published regulation and voted to approve the amended regulation.
Jane	Rees	AGAINST	I am concerned about the effect of drifting pesticides that affect other vegetation, organic farms, bees, trees, and ultimately people.	The concerns expressed in the comments in favor and against the proposed regulations were considered during the lengthy period of debate during the development of the proposed regulations. The Board amended the published regulation and voted to approve the amended regulation.
Marguerite	Lindemann	AGAINST	I grow herbs and plants for my organic chickens. there is farming fields near me. I'm worried that my organic chickens would be affected by pesticides.	The concerns expressed in the comments in favor and against the proposed regulations were considered during the lengthy period of debate during the development of the proposed regulations. The Board amended the published regulation and voted to approve the amended regulation.
Austin	Lester	AGAINST		The concerns expressed in the comments in favor and against the proposed regulations were considered during the lengthy period of debate during the development of the proposed regulations. The Board amended the published regulation and voted to approve the amended regulation.
Susan	Hall	AGAINST	Save the bees!	The concerns expressed in the comments in favor and against the proposed regulations were considered during the lengthy period of debate during the development of the proposed regulations. The Board amended the published regulation and voted to approve the amended regulation.
Geoffrey	Payne	AGAINST	Dicamba is far to unstable to be used at all, let alone during warmer and more humid times of the year when it is more volatile. Non-gmo plants are at risk and the loss from its use does not come close to the benefit of its use.	The concerns expressed in the comments in favor and against the proposed regulations were considered during the lengthy period of debate during the development of the proposed regulations. The Board amended the published regulation and voted to approve the amended regulation.

Online and Written Comments regarding the Propose Dicamba Regulation Change for the

Public Hearing on February 20, 2019

FIRST NAME	LAST NAME	Selection	COMMENTS	AGENCY RESPONSE
Sara	Pollard	AGAINST	If you extend the spray date you put a lot of farmers both big and small in danger of damage from dicamba as young shoots will be showing by this time. Last year we lost ever BlackBerry bush due to drift	The concerns expressed in the comments in favor and against the proposed regulations were considered during the lengthy period of debate during the development of the proposed regulations. The Board amended the published regulation and voted to approve the amended regulation.
Micheal	Pollard	AGAINST	We as citizens of Craighead county should have the right to raise a garden to help feed our family's. Yet allowing Dicamba to be sprayed up till mid May will do nothing but damage gardens, fruit trees, and etc.	The concerns expressed in the comments in favor and against the proposed regulations were considered during the lengthy period of debate during the development of the proposed regulations. The Board amended the published regulation and voted to approve the amended regulation.
Than	Boves	AGAINST	Most experts suggest that in order to avoid severe vaporization of dicamba, spraying should cease before air temperatures reach 80 degrees F, which in eastern Arkansas typically occurs in early May (and is often reached in mid-April).	The concerns expressed in the comments in favor and against the proposed regulations were considered during the lengthy period of debate during the development of the proposed regulations. The Board amended the published regulation and voted to approve the amended regulation.
Erik	Edwards	AGAINST		The concerns expressed in the comments in favor and against the proposed regulations were considered during the lengthy period of debate during the development of the proposed regulations. The Board amended the published regulation and voted to approve the amended regulation.
Tim	Jones	AGAINST	Dicamba has been proven to be detrimental to all non DT crops. I have had damage each year by neighbors that don't care about rules. I recommend: Limit to a pre emerge only with a 4/15 cutoff and fine offenders from 2018 & it will get better.	The concerns expressed in the comments in favor and against the proposed regulations were considered during the lengthy period of debate during the development of the proposed regulations. The Board amended the published regulation and voted to approve the amended regulation.
Travis	Marsico	AGAINST	Dicamba is too risky with its ability to volatilize and and drift to be sprayed on crops during the warm seasons. There were literally hundreds of farmer complaints from Mississippi and Crittenden Counties about the negative impacts to their crops.	The concerns expressed in the comments in favor and against the proposed regulations were considered during the lengthy period of debate during the development of the proposed regulations. The Board amended the published regulation and voted to approve the amended regulation.

Online and Written Comments regarding the Propose Dicamba Regulation Change for the Public Hearing on February 20, 2019

FIRST NAME	LAST NAME	Selection	COMMENTS	AGENCY RESPONSE
Lisa	Williamson	AGAINST		The concerns expressed in the comments in favor and against the proposed regulations were considered during the lengthy period of debate during the development of the proposed regulations. The Board amended the published regulation and voted to approve the amended regulation.
Ivy	Kalinin	AGAINST	Dicamba is terrible and should be illegal. It has already done a lot of damage and it should not be allowed to be used ever again.	The concerns expressed in the comments in favor and against the proposed regulations were considered during the lengthy period of debate during the development of the proposed regulations. The Board amended the published regulation and voted to approve the amended regulation.
John	Stanton	AGAINST		The concerns expressed in the comments in favor and against the proposed regulations were considered during the lengthy period of debate during the development of the proposed regulations. The Board amended the published regulation and voted to approve the amended regulation.
Kay	Brockwell	AGAINST	I am opposed to allowing use of Dicamba because of its impact on bees, butterflies and other pollinators, as well as the impact of drift on fruit and vegetable crops.	The concerns expressed in the comments in favor and against the proposed regulations were considered during the lengthy period of debate during the development of the proposed regulations. The Board amended the published regulation and voted to approve the amended regulation.
Kristi	Cook	AGAINST	Dicamba use after April 16 should not be allowed as it is impossible to fully predict drift. My naturally grown farm and bee apiary are within a short distance of the land Crooked Creek utilized. My land, crops, and bee forage are Dicamba intolerant.	The concerns expressed in the comments in favor and against the proposed regulations were considered during the lengthy period of debate during the development of the proposed regulations. The Board amended the published regulation and voted to approve the amended regulation.
Tony	Thomas	AGAINST		The concerns expressed in the comments in favor and against the proposed regulations were considered during the lengthy period of debate during the development of the proposed regulations. The Board amended the published regulation and voted to approve the amended regulation.

Janet	Glidewell	AGAINST	Dear AR State Plant Board, Public natural areas, conservation buffers, and family farms are threatened by expanded dicamba use. Sincerely, Janet Glidewell Jonesboro, AR 72401	The concerns expressed in the comments in favor and against the proposed regulations were considered during the lengthy period of debate during the development of the proposed regulations. The Board amended the published regulation and voted to approve the amended regulation.
Martha	Tacker	AGAINST	I believe Dicamba should be completely banned. It has done damage to pecan trees, bees and damage to our soybeans from other farmers using it.	The concerns expressed in the comments in favor and against the proposed regulations were considered during the lengthy period of debate during the development of the proposed regulations. The Board amended the published regulation and voted to approve the amended regulation.
Ashley	Bobbith	AGAINST		The concerns expressed in the comments in favor and against the proposed regulations were considered during the lengthy period of debate during the development of the proposed regulations. The Board amended the published regulation and voted to approve the amended regulation.
Scott	Vest	AGAINST		The concerns expressed in the comments in favor and against the proposed regulations were considered during the lengthy period of debate during the development of the proposed regulations. The Board amended the published regulation and voted to approve the amended regulation.
Lisa	Vest	AGAINST	Dicamba is killing our bee population. We as a people need bees to live..!!!	The concerns expressed in the comments in favor and against the proposed regulations were considered during the lengthy period of debate during the development of the proposed regulations. The Board amended the published regulation and voted to approve the amended regulation.
Matt	Garrett	AGAINST		The concerns expressed in the comments in favor and against the proposed regulations were considered during the lengthy period of debate during the development of the proposed regulations. The Board amended the published regulation and voted to approve the amended regulation.

Online and Written Comments regarding the Propose Dicamba Regulation Change for the Public Hearing on February 20, 2019

FIRST NAME	LAST NAME	Selection	COMMENTS	AGENCY RESPONSE
Theresa	Long	AGAINST		The concerns expressed in the comments in favor and against the proposed regulations were considered during the lengthy period of debate during the development of the proposed regulations. The Board amended the published regulation and voted to approve the amended regulation.
Niki	Garrett	AGAINST		The concerns expressed in the comments in favor and against the proposed regulations were considered during the lengthy period of debate during the development of the proposed regulations. The Board amended the published regulation and voted to approve the amended regulation.
Forrest	Grisham	AGAINST		The concerns expressed in the comments in favor and against the proposed regulations were considered during the lengthy period of debate during the development of the proposed regulations. The Board amended the published regulation and voted to approve the amended regulation.
Jonathan	Bobbitt	AGAINST	Jason Morsworthy has done a excellent job in conducting research on the volatility of dicamba. I as a farmer should be able to grow what I want without having to fear my plants will be drifted or have a temperature inversion bring in dicamba.	The concerns expressed in the comments in favor and against the proposed regulations were considered during the lengthy period of debate during the development of the proposed regulations. The Board amended the published regulation and voted to approve the amended regulation.
Wendy	Kemp	AGAINST		The concerns expressed in the comments in favor and against the proposed regulations were considered during the lengthy period of debate during the development of the proposed regulations. The Board amended the published regulation and voted to approve the amended regulation.
Jennifer	Nobles	AGAINST	No Diacamba extension! No Diacsmba, period!	The concerns expressed in the comments in favor and against the proposed regulations were considered during the lengthy period of debate during the development of the proposed regulations. The Board amended the published regulation and voted to approve the amended regulation.

Online and Written Comments regarding the Propose Dicamba Regulation Change for the Public Hearing on February 20, 2019

FIRST NAME	LAST NAME	Selection	COMMENTS	AGENCY RESPONSE
Jerry	Whitten	AGAINST	I urge you to prevent any use of Dicamba products after April 15. Preferably nothing past April 1. Vegetable and other specialty crops are planted late March and forward throughout the growing season.	The concerns expressed in the comments in favor and against the proposed regulations were considered during the lengthy period of debate during the development of the proposed regulations. The Board amended the published regulation and voted to approve the amended regulation.
Mayor Gary D.	Baxter	AGAINST	The drift of Dicamba onto Non GMO and organic crops such as Edamame can, and most likely will, destroy the positive economic development to the City of Mulberry. Edamame is grown throughout the River Valley and Dicamba is detrimental to its growth.	The concerns expressed in the comments in favor and against the proposed regulations were considered during the lengthy period of debate during the development of the proposed regulations. The Board amended the published regulation and voted to approve the amended regulation.
Monica	Freeland	AGAINST	Temperatures vary too much in May and exceed the recommended temp often. Our city supports the only Edamame plant in Arkansas which is dependent on non-GMO soybeans that are adversely affected by Dicamba. They are grown next to conventional soybean	The concerns expressed in the comments in favor and against the proposed regulations were considered during the lengthy period of debate during the development of the proposed regulations. The Board amended the published regulation and voted to approve the amended regulation.
Carly	Riggins	AGAINST	Dear AR State Plant Board, Public natural areas, conservation buffers, and family farms are threatened by expanded dicamba use. Sincerely, Carly Riggins Alma, AR 72921	The concerns expressed in the comments in favor and against the proposed regulations were considered during the lengthy period of debate during the development of the proposed regulations. The Board amended the published regulation and voted to approve the amended regulation.
Johua	Rothemberger	AGAINST		The concerns expressed in the comments in favor and against the proposed regulations were considered during the lengthy period of debate during the development of the proposed regulations. The Board amended the published regulation and voted to approve the amended regulation.
Kathryn	Smith-Hicks	AGAINST	Dear AR State Plant Board, Public natural areas, conservation buffers, and family farms are threatened by expanded dicamba use. Sincerely, Kathryn Smith-Hicks Alma, AR 72921	The concerns expressed in the comments in favor and against the proposed regulations were considered during the lengthy period of debate during the development of the proposed regulations. The Board amended the published regulation and voted to approve the amended regulation.

The Board amended the published regulation and voted to approve the amended regulation.
Julia	Morgan	AGAINST	Please stop the use of this poison that kills vegetable gardens, flowers, and pollen-producing vegetation needed by honeybees. Large-scale farmers have other options. No more Dicamba!	The concerns expressed in the comments in favor and against the proposed regulations were considered during the lengthy period of debate during the development of the proposed regulations. The Board amended the published regulation and voted to approve the amended regulation.
Larry	Clifford	AGAINST	I believe Dicamba should be banned altogether, but at the very least should be curtailed during any period where drift is bound to hurt other crops. This is a no brainer. Those pushing Dicamba are being selfish via their own monetary prejudices.	The concerns expressed in the comments in favor and against the proposed regulations were considered during the lengthy period of debate during the development of the proposed regulations. The Board amended the published regulation and voted to approve the amended regulation.
Cathy	Brownlee	AGAINST	Dear AR State Plant Board, Public natural areas, conservation buffers, and family farms are threatened by expanded dicamba use. Sincerely, Cathy Brownlee Paragould, AR 72450	The concerns expressed in the comments in favor and against the proposed regulations were considered during the lengthy period of debate during the development of the proposed regulations. The Board amended the published regulation and voted to approve the amended regulation.
Jackie	Williams	AGAINST	It has been scientifically proven that Dicamba is extremely volatile when sprayed at higher temperatures. It is very irresponsible to allow application of dicamba in May or June when high temps will cause Dicamba to become a gas and travel and kill	The concerns expressed in the comments in favor and against the proposed regulations were considered during the lengthy period of debate during the development of the proposed regulations. The Board amended the published regulation and voted to approve the amended regulation.

Online and Written Comments regarding the Propose Dicamba Regulation Change for the

Public Hearing on February 20, 2019

FIRST NAME	LAST NAME	Selection	COMMENTS	AGENCY RESPONSE
Jamie	Brothers	AGAINST	Farmers need 6/15 cutoff to spray.	The concerns expressed in the comments in favor and against the proposed regulations were considered during the lengthy period of debate during the development of the proposed regulations. The Board amended the published regulation and voted to approve the amended regulation.
Wesley	Sandusky	AGAINST		The concerns expressed in the comments in favor and against the proposed regulations were considered during the lengthy period of debate during the development of the proposed regulations. The Board amended the published regulation and voted to approve the amended regulation.
Jason	Bennett	AGAINST	Dicamba applications anytime after April 15th are detrimental to our environment and growth of other non Dicamba plants.	The concerns expressed in the comments in favor and against the proposed regulations were considered during the lengthy period of debate during the development of the proposed regulations. The Board amended the published regulation and voted to approve the amended regulation.
Pam	Sandusky	AGAINST	My brother, Mike Wallace, was killed over a dispute about Dicamba. He had filed complaints about this chemical several times. This chemical is harmful to so much even if applied correctly. Volatilization is going to happen. This is just wrong.	The concerns expressed in the comments in favor and against the proposed regulations were considered during the lengthy period of debate during the development of the proposed regulations. The Board amended the published regulation and voted to approve the amended regulation.
Barrett	Brothers	AGAINST	We need dicamba with a cutoff of at least June 15 that's fair and believe everyone else believes so	The concerns expressed in the comments in favor and against the proposed regulations were considered during the lengthy period of debate during the development of the proposed regulations. The Board amended the published regulation and voted to approve the amended regulation.
Jamie	Chun	AGAINST	Too much of these chemicals sprayed now. No consequences for breaking rules. No 1 in cancer this county.	The concerns expressed in the comments in favor and against the proposed regulations were considered during the lengthy period of debate during the development of the proposed regulations. The Board amended the published regulation and voted to approve the amended regulation.

Online and Written Comments regarding the Propose Dicamba Regulation Change for the Public Hearing on February 20, 2019

FIRST NAME	LAST NAME	Selection	COMMENTS	AGENCY RESPONSE
Doris D	Hartwick	AGAINST	I would prefer this chemical be banned completely but barring that linking the application of dicamba to the temperature rather than a date would be preferable.	The concerns expressed in the comments in favor and against the proposed regulations were considered during the lengthy period of debate during the development of the proposed regulations. The Board amended the published regulation and voted to approve the amended regulation.
Shawn	Hawkins	AGAINST	Dear AR State Plant Board, Public natural areas, conservation buffers, and family farms are threatened by expanded dicamba use. Sincerely, Shawn Hawkins Leachville, AR 72438	The concerns expressed in the comments in favor and against the proposed regulations were considered during the lengthy period of debate during the development of the proposed regulations. The Board amended the published regulation and voted to approve the amended regulation.
Scott	Gothard	AGAINST	Why are we even having this discussion?	The concerns expressed in the comments in favor and against the proposed regulations were considered during the lengthy period of debate during the development of the proposed regulations. The Board amended the published regulation and voted to approve the amended regulation.
Robert	Hawks	AGAINST	My garden dies when they spray the crops! Money and time wasted. How can I grow my food if they keep killing it? No for Dicamba!!!	The concerns expressed in the comments in favor and against the proposed regulations were considered during the lengthy period of debate during the development of the proposed regulations. The Board amended the published regulation and voted to approve the amended regulation.
Skip	Kelley	AGAINST	Expanding use of this potentially dangerous chemical is an environmental hazard. While at the same time it allows Monsanto/Bayer to build an agricultural monopoly.	The concerns expressed in the comments in favor and against the proposed regulations were considered during the lengthy period of debate during the development of the proposed regulations. The Board amended the published regulation and voted to approve the amended regulation.
Kerin	Hawkins	AGAINST	I am strongly opposed to the May cutoff date. Most plants, trees, flowers, bushes, & personal gardens are already blooming & producing fruit by the proposed date. U of A scientists have proven it will not stay put. We all should be protected!!!	The concerns expressed in the comments in favor and against the proposed regulations were considered during the lengthy period of debate during the development of the proposed regulations. The Board amended the published regulation and voted to approve the amended regulation.

Scott	Gothard	AGAINST	Dear AR State Plant Board, Public natural areas, conservation buffers, and family farms are threatened by expanded dicamba use. Sincerely, Scott Gothard Armored, AR 72310	The concerns expressed in the comments in favor and against the proposed regulations were considered during the lengthy period of debate during the development of the proposed regulations. The Board amended the published regulation and voted to approve the amended regulation.
Catherine D.	Palmer	AGAINST	I have not picked a tomato or many other vegetables from my garden in the past 2 years. Please ban dicamba. Do not let politics get ahead of public safety. We breathe this chemical also. If passed, larger boundaries should be around homes!	The concerns expressed in the comments in favor and against the proposed regulations were considered during the lengthy period of debate during the development of the proposed regulations. The Board amended the published regulation and voted to approve the amended regulation.
dwight	jackson	AGAINST		The concerns expressed in the comments in favor and against the proposed regulations were considered during the lengthy period of debate during the development of the proposed regulations. The Board amended the published regulation and voted to approve the amended regulation.
Monroe County	Master Garden	AGAINST	The use of Dicamba has proved to be a good weed killer in soybeans. But the harms to nearby trees, nonresistant soybeans, fruits, vegetables, and plants used as habitats by bees. Herbicide injury can't be reversed. We feel that more research is needed!	The concerns expressed in the comments in favor and against the proposed regulations were considered during the lengthy period of debate during the development of the proposed regulations. The Board amended the published regulation and voted to approve the amended regulation.
Jerry	Miley	AGAINST	I live in town 1/2 mile from farmland ag planes routinely turn right over the house. That's usually the end of garden. This stuff is even worse might as well use agent orange from what I have heard	The concerns expressed in the comments in favor and against the proposed regulations were considered during the lengthy period of debate during the development of the proposed regulations. The Board amended the published regulation and voted to approve the amended regulation.
Corey	Porter	AGAINST		The concerns expressed in the comments in favor and against the proposed regulations were considered during the lengthy period of debate during the development of the proposed regulations. The Board amended the published regulation and voted to approve the amended regulation.

The Board amended the published regulation and voted to approve the amended regulation.

Online and Written Comments regarding the Propose Dicamba Regulation Change for the Public Hearing on February 20, 2019

FIRST NAME	LAST NAME	Direction	COMMENTS	AGENCY RESPONSE
Lolly	Tindol	AGAINST	I am opposed to the use of Dicamba, period. Big Ag is poisoning the world with too many chemicals, killing the soil, killing and causing more CO2 to escape to further pollute the atmosphere. Please stop now. Big Ag is right up there with Fossil Fuels	The concerns expressed in the comments in favor and against the proposed regulations were considered during the lengthy period of debate during the development of the proposed regulations. The Board amended the published regulation and voted to approve the amended regulation.
Pamela	Stewart	AGAINST	Warmer temperatures in late spring increase volatile nature of Dicamba, thus further affecting native plant species important as food to larvae of pollinator insects and insects fed on by fish, frogs, birds etc. Some weeds resistant already.	The concerns expressed in the comments in favor and against the proposed regulations were considered during the lengthy period of debate during the development of the proposed regulations. The Board amended the published regulation and voted to approve the amended regulation.
Pamela	Stewart	AGAINST	Dear AR State Plant Board, Public natural areas, conservation buffers, and family farms are threatened by expanded dicamba use. Sincerely, Pamela Stewart Jasper, AR 72641	The concerns expressed in the comments in favor and against the proposed regulations were considered during the lengthy period of debate during the development of the proposed regulations. The Board amended the published regulation and voted to approve the amended regulation.
Shawn	Porter	AGAINST	Dear AR State Plant Board, Public natural areas, conservation buffers, and family farms are threatened by expanded dicamba use. Debora	Casey	AGAINST	Dear AR State Plant Board, Public natural areas, conservation buffers, and family farms are threatened by expanded dicamba use. Sincerely, Debora Casey Houston, AR 72070	The concerns expressed in the comments in favor and against the proposed regulations were considered during the lengthy period of debate during the development of the proposed regulations. The Board amended the published regulation and voted to approve the amended regulation.
Alex	Kehree	AGAINST	Why should new guidelines be considered to spray dicamba, when some growers have yet to prove they can, or are willing to follow the current guidelines?	The concerns expressed in the comments in favor and against the proposed regulations were considered during the lengthy period of debate during the development of the proposed regulations. The Board amended the published regulation and voted to approve the amended regulation.
Jeff	Carnathan	AGAINST	It will not work the way it is written. Arkansas should be like all the other states who are allowed to use it.	The concerns expressed in the comments in favor and against the proposed regulations were considered during the lengthy period of debate during the development of the proposed regulations. The Board amended the published regulation and voted to approve the amended regulation.

Online and Written Comments regarding the Propose Dicamba Regulation Change for the Public Hearing on February 20, 2019

FIRST NAME	LAST NAME	Selection	COMMENTS	AGENCY RESPONSE
Michael	Taylor	AGAINST	Cutoff date is too early, needs to be like all the other states in the south. The pigweed is going to devastate Arkansas agriculture if we can't control it.	The concerns expressed in the comments in favor and against the proposed regulations were considered during the lengthy period of debate during the development of the proposed regulations. The Board amended the published regulation and voted to approve the amended regulation.
Lisa	Fuller	AGAINST	I have replaced my sky pencil Holly bushes three times. In 2018 I used iron art! My iron art is Dicamba tolerant! Sadly due to wide spread Dicamba use my white Oaks, Cypress and Pecans trees may not be seen by future generations.	The concerns expressed in the comments in favor and against the proposed regulations were considered during the lengthy period of debate during the development of the proposed regulations. The Board amended the published regulation and voted to approve the amended regulation.
Debbie	Hayes	AGAINST	I have a pecan orchard on my farm. I have NEVER experienced a year with absolutely ZERO pecans...not even 1 to eat...I am convinced it was due to Dicamba, and the person who leases the orchard is as well.	The concerns expressed in the comments in favor and against the proposed regulations were considered during the lengthy period of debate during the development of the proposed regulations. The Board amended the published regulation and voted to approve the amended regulation.
Kristi	Miller	AGAINST		The concerns expressed in the comments in favor and against the proposed regulations were considered during the lengthy period of debate during the development of the proposed regulations. The Board amended the published regulation and voted to approve the amended regulation.
Jacob	Cox	AGAINST		The concerns expressed in the comments in favor and against the proposed regulations were considered during the lengthy period of debate during the development of the proposed regulations. The Board amended the published regulation and voted to approve the amended regulation.
Donna	Cox	AGAINST	Is not safe for animals and I have animals in my yard	The concerns expressed in the comments in favor and against the proposed regulations were considered during the lengthy period of debate during the development of the proposed regulations. The Board amended the published regulation and voted to approve the amended regulation.

Online and Written Comments regarding the Propose Dicamba Regulation Change for the Public Hearing on February 20, 2019

FIRST NAME	LAST NAME	Selection	COMMENTS	AGENCY RESPONSE
Joe	Smith	AGAINST		The concerns expressed in the comments in favor and against the proposed regulations were considered during the lengthy period of debate during the development of the proposed regulations. The Board amended the published regulation and voted to approve the amended regulation.
Lona	Bryant	AGAINST	Stop dicamba usage	The concerns expressed in the comments in favor and against the proposed regulations were considered during the lengthy period of debate during the development of the proposed regulations. The Board amended the published regulation and voted to approve the amended regulation.
Shelton	Guest	AGAINST	This would be a great product if it could be controlled better	The concerns expressed in the comments in favor and against the proposed regulations were considered during the lengthy period of debate during the development of the proposed regulations. The Board amended the published regulation and voted to approve the amended regulation.
Suzie	Fuller	AGAINST	My trees garden and landscaping cannot take any more dicamba damage. An extended spraying period will just make things worse. More rule breaking farmers will stretch that beyond whatever limits you impose which will kill even more vegetation.	The concerns expressed in the comments in favor and against the proposed regulations were considered during the lengthy period of debate during the development of the proposed regulations. The Board amended the published regulation and voted to approve the amended regulation.
Melanie	Keys	AGAINST	My yard is all oak trees which have been damaged by dicamba. Very few acorns produced due to this damage. I can not produce a vegetable garden due to dicamba drift. It will not be any trees or food for wildlife if dicamba does not get banned.	The concerns expressed in the comments in favor and against the proposed regulations were considered during the lengthy period of debate during the development of the proposed regulations. The Board amended the published regulation and voted to approve the amended regulation.
Katherine	Thompson	AGAINST	I enjoy growing vegetables, shrubs, flowers and trees in my yard. This will not be possible to even have a tree in my yard if Dicamba is continued being used.	The concerns expressed in the comments in favor and against the proposed regulations were considered during the lengthy period of debate during the development of the proposed regulations. The Board amended the published regulation and voted to approve the amended regulation.

Sylvia	Potter	AGAINST	Dear AR State Plant Board, Public natural areas, conservation buffers, and family farms are threatened by expanded dicamba use. Sincerely, Sylvia Potter Little Rock, AR 72223	The concerns expressed in the comments in favor and against the proposed regulations were considered during the lengthy period of debate during the development of the proposed regulations. The Board amended the published regulation and voted to approve the amended regulation.
Will	Simpson	AGAINST	Dear AR State Plant Board, Public natural areas, conservation buffers, and family farms are threatened by expanded dicamba use. Sincerely, Will Simpson North Little Rock, AR 72116	The concerns expressed in the comments in favor and against the proposed regulations were considered during the lengthy period of debate during the development of the proposed regulations. The Board amended the published regulation and voted to approve the amended regulation.
Andrew	Waldron	AGAINST	As someone who keeps up on Arkansas affairs, I've read the problems Dicamba caused to our farmers. I do not believe that the buffer zone is capable of overcoming the problems that were caused.	The concerns expressed in the comments in favor and against the proposed regulations were considered during the lengthy period of debate during the development of the proposed regulations. The Board amended the published regulation and voted to approve the amended regulation.
Rebecca	Hardin	AGAINST	We need to be using LESS dicamba, not more.	The concerns expressed in the comments in favor and against the proposed regulations were considered during the lengthy period of debate during the development of the proposed regulations. The Board amended the published regulation and voted to approve the amended regulation.
Joe	Chacko	AGAINST	We can no longer allow large corporations to endanger our environment for the sake of their profits.	The concerns expressed in the comments in favor and against the proposed regulations were considered during the lengthy period of debate during the development of the proposed regulations. The Board amended the published regulation and voted to approve the amended regulation.
Terry	Chacko	AGAINST	We support organic and non-GMO food sources, and we know that the use of dicamba is poisoning our environment. It is time for our officials and legislators to stand up to big business when it produces chemicals that are harmful.	The concerns expressed in the comments in favor and against the proposed regulations were considered during the lengthy period of debate during the development of the proposed regulations. The Board amended the published regulation and voted to approve the amended regulation.

Online and Written Comments regarding the Propose Dicamba Regulation Change for the Public Hearing on February 20, 2019

FIRST NAME	LAST NAME	Selection	COMMENTS	AGENCY RESPONSE
Lorilee	Evans	AGAINST	Dear AR State Plant Board, Public natural areas, conservation buffers, and family farms are threatened by expanded dicamba use. Sincerely, Lorilee Evans Little Rock, AR 72205	The concerns expressed in the comments in favor and against the proposed regulations were considered during the lengthy period of debate during the development of the proposed regulations. The Board amended the published regulation and voted to approve the amended regulation.
Crata	Castleberry	AGAINST	I believe every effort should be made to prevent the use of dicamba on non-resistant crops. Uncontrolled spread of dicamba to nearby crops and to any surrounding trees and all other plants is difficult to prevent and causes tremendous damage.	The concerns expressed in the comments in favor and against the proposed regulations were considered during the lengthy period of debate during the development of the proposed regulations. The Board amended the published regulation and voted to approve the amended regulation.
Barbara	Williams	AGAINST	There is no safe buffer zone for dicamba. The loss of the only commercial honey company in the state is testimony. The harm to the environment, wildlife and humans is too great. Identify other ways to assist farmers who want to use it	The concerns expressed in the comments in favor and against the proposed regulations were considered during the lengthy period of debate during the development of the proposed regulations. The Board amended the published regulation and voted to approve the amended regulation.
Patricia W.	O'Donoghue	AGAINST	Dear AR State Plant Board, Public natural areas, conservation buffers, and family farms are threatened by expanded dicamba use. Sincerely, Patricia W. O'Donoghue Little Rock, AR 72205	The concerns expressed in the comments in favor and against the proposed regulations were considered during the lengthy period of debate during the development of the proposed regulations. The Board amended the published regulation and voted to approve the amended regulation.
Lynn	Foster	AGAINST	The costs and dangers of expanded dicamba use to other crops, plants, including trees, bees, birds, and the environment in general are far greater than the benefits. Please vote against the new rule.	The concerns expressed in the comments in favor and against the proposed regulations were considered during the lengthy period of debate during the development of the proposed regulations. The Board amended the published regulation and voted to approve the amended regulation.
Dan	Farley	AGAINST		The concerns expressed in the comments in favor and against the proposed regulations were considered during the lengthy period of debate during the development of the proposed regulations. The Board amended the published regulation and voted to approve the amended regulation.

Online and Written Comments regarding the Propose Dicamba Regulation Change for the Public Hearing on February 20, 2019

FIRST NAME	LAST NAME	Selection	COMMENTS	AGENCY RESPONSE
Cathy	Lamb	AGAINST	This chemical has no redeeming qualities. It hurts trees, endangers animal habitats, such as for bees, ducks and birds, not to mention food sources. Extending the date of dicamba usage is counter-productive, as it should not be used at all.	The concerns expressed in the comments in favor and against the proposed regulations were considered during the lengthy period of debate during the development of the proposed regulations. The Board amended the published regulation and voted to approve the amended regulation.
William	Jones	AGAINST	The proposed Dicamba rule will have a profoundly negative impact on Arkansas plant and animal life, with long-range unintended consequences.	The concerns expressed in the comments in favor and against the proposed regulations were considered during the lengthy period of debate during the development of the proposed regulations. The Board amended the published regulation and voted to approve the amended regulation.
Julia	BALDRIDGE	AGAINST	I oppose an extension for the use of dicamba. The chemical moves outside it's intended application area, kills native plants, damages habitats, threatens local farm crops and our bee population. No extension, please!	The concerns expressed in the comments in favor and against the proposed regulations were considered during the lengthy period of debate during the development of the proposed regulations. The Board amended the published regulation and voted to approve the amended regulation.
Peggy	Trokey	AGAINST	Dear AR State Plant Board, Public natural areas, conservation buffers, and family farms are threatened by expanded dicamba use. Sincerely, Peggy Trokey Sherwood, AR 72120	The concerns expressed in the comments in favor and against the proposed regulations were considered during the lengthy period of debate during the development of the proposed regulations. The Board amended the published regulation and voted to approve the amended regulation.
James	Britt	AGAINST	No dicamba use after April 15. It has too much drift. It is killing our native plants that our butterflies and bees depend on and other insects that our bird population needs. I work with some rural clients and they report garden plot losses.	The concerns expressed in the comments in favor and against the proposed regulations were considered during the lengthy period of debate during the development of the proposed regulations. The Board amended the published regulation and voted to approve the amended regulation.
Bill	Hirst	AGAINST	Dear AR State Plant Board, Public natural areas, conservation buffers, and family farms are threatened by expanded dicamba use. Sincerely, Bill Hirst Little Rock, AR 72211	The concerns expressed in the comments in favor and against the proposed regulations were considered during the lengthy period of debate during the development of the proposed regulations. The Board amended the published regulation and voted to approve the amended regulation.

Online and Written Comments regarding the Propose Dicamba Regulation Change for the Public Hearing on February 20, 2019

FIRST NAME	LAST NAME	Selection	COMMENTS	AGENCY RESPONSE
Elizabeth	Jimenez	AGAINST	Dear AR State Plant Board, Public natural areas, conservation buffers, and family farms are threatened by expanded dicamba use. Sincerely, Elizabeth Jimenez Sherwood, AR 72120	The concerns expressed in the comments in favor and against the proposed regulations were considered during the lengthy period of debate during the development of the proposed regulations. The Board amended the published regulation and voted to approve the amended regulation.
Kay	Mapes	AGAINST	Stop the use of this poison.	The concerns expressed in the comments in favor and against the proposed regulations were considered during the lengthy period of debate during the development of the proposed regulations. The Board amended the published regulation and voted to approve the amended regulation.
Darlene J	Kurtz	AGAINST	The glyphosate product cannot be controlled in an outdoor environment making it unsafe for use in Arkansas rural areas where farmers and their crops are put in a position of loosing their livelihood and health. Do NOT extend the terms of its usage.	The concerns expressed in the comments in favor and against the proposed regulations were considered during the lengthy period of debate during the development of the proposed regulations. The Board amended the published regulation and voted to approve the amended regulation.
Janice	Ammann	AGAINST	Dear AR State Plant Board, Public natural areas, conservation buffers, and family farms are threatened by expanded dicamba use. Sincerely, Janice Ammann Little Rock, AR 72205	The concerns expressed in the comments in favor and against the proposed regulations were considered during the lengthy period of debate during the development of the proposed regulations. The Board amended the published regulation and voted to approve the amended regulation.
Karen	Suen	AGAINST		The concerns expressed in the comments in favor and against the proposed regulations were considered during the lengthy period of debate during the development of the proposed regulations. The Board amended the published regulation and voted to approve the amended regulation.
India	Cheairs	AGAINST	I am against this rule change for many reasons. Dicamba is dangerous at best, the timing of the spraying is key to keeping it confined to the crops it's meant to protect. allowing application in warmer months will be dangerous for our environment.	The concerns expressed in the comments in favor and against the proposed regulations were considered during the lengthy period of debate during the development of the proposed regulations. The Board amended the published regulation and voted to approve the amended regulation.

Beverly	Millford	AGAINST		The concerns expressed in the comments in favor and against the proposed regulations were considered during the lengthy period of debate during the development of the proposed regulations. The Board amended the published regulation and voted to approve the amended regulation.
George	Wilken	AGAINST	As a meteorologist with over 39 years experience, I can state that with dicamba's ability to become an aerosol and the fact it is impossible to assess current wind fields or future wind fields over crops, dicamba becomes a dangerous product to use.	The concerns expressed in the comments in favor and against the proposed regulations were considered during the lengthy period of debate during the development of the proposed regulations. The Board amended the published regulation and voted to approve the amended regulation.
Pamela	Gibson	AGAINST	The burden of use should fall to the makers/users of Dicamba. They should be proactive in preventing drift of this chemical which harms wildlife, humans, and farmers who do not apply it to their fields. Don't let them pollute ever more.	The concerns expressed in the comments in favor and against the proposed regulations were considered during the lengthy period of debate during the development of the proposed regulations. The Board amended the published regulation and voted to approve the amended regulation.
TIMOTHY	LOCKHART	AGAINST	THIS GOVERNMENT NEEDS TO STOP POISONING THE POOR AND TAKE TOXIN OUT OF OUR FOOD...	The concerns expressed in the comments in favor and against the proposed regulations were considered during the lengthy period of debate during the development of the proposed regulations. The Board amended the published regulation and voted to approve the amended regulation.
Judy	Whitehead	AGAINST		The concerns expressed in the comments in favor and against the proposed regulations were considered during the lengthy period of debate during the development of the proposed regulations. The Board amended the published regulation and voted to approve the amended regulation.
Jessie	Walker	AGAINST	This historic move seems to be unnecessary and will have long term negative impacts on our state. Please stand up AGAINST this rule change.	The concerns expressed in the comments in favor and against the proposed regulations were considered during the lengthy period of debate during the development of the proposed regulations. The Board amended the published regulation and voted to approve the amended regulation.

James	Baker	AGAINST		The concerns expressed in the comments in favor and against the proposed regulations were considered during the lengthy period of debate during the development of the proposed regulations. The Board amended the published regulation and voted to approve the amended regulation.
Rhonda	Patton	AGAINST	The use of dicamba is proven to cause harm. We must not allow this product to continue to be used!	The concerns expressed in the comments in favor and against the proposed regulations were considered during the lengthy period of debate during the development of the proposed regulations. The Board amended the published regulation and voted to approve the amended regulation.
Rose	Kirkpatrick	AGAINST	I am opposed to the extension date for usage of this chemical that harms both humans and animals in the vicinity where it is used.	The concerns expressed in the comments in favor and against the proposed regulations were considered during the lengthy period of debate during the development of the proposed regulations. The Board amended the published regulation and voted to approve the amended regulation.
Lynn	Springfield	AGAINST	The use of dicamba is detrimental to our food sources as well as to the endangerment of persons and animals in the vicinity of the application of this chemical. It is my hope that the Ark St Plant Board will not support the proposed extension date.	The concerns expressed in the comments in favor and against the proposed regulations were considered during the lengthy period of debate during the development of the proposed regulations. The Board amended the published regulation and voted to approve the amended regulation.
James	Sears	AGAINST	Dicamba is a dangerous chemical and is not ready to be released upon the world. Please, please do NOT allow this to be done.	The concerns expressed in the comments in favor and against the proposed regulations were considered during the lengthy period of debate during the development of the proposed regulations. The Board amended the published regulation and voted to approve the amended regulation.
Karen	Mauermann	AGAINST	Stop the extension date of dicamba usage. It is a dangerous chemical that hurts our local food sources as well as our habitat.	The concerns expressed in the comments in favor and against the proposed regulations were considered during the lengthy period of debate during the development of the proposed regulations. The Board amended the published regulation and voted to approve the amended regulation.

Online and Written Comments regarding the Propose Dicamba Regulation Change for the Public Hearing on February 20, 2019

FIRST NAME	LAST NAME	Selection	COMMENTS	AGENCY RESPONSE
David	Wooley	AGAINST	It is horrifying to me that the continued use of Dicamba is even being considered. From what I've read about it, the effects of the "drift" on adjacent property landscapes and farms is devastating.	The concerns expressed in the comments in favor and against the proposed regulations were considered during the lengthy period of debate during the development of the proposed regulations. The Board amended the published regulation and voted to approve the amended regulation.
Nancy	Jenkins	AGAINST	We must protect the family farms and their ability to produce clean foods. This is just silly that we have to do this in order to get affordable nutritional foods on every table for our families. Stop this Proposal for the extension of dicamba use	The concerns expressed in the comments in favor and against the proposed regulations were considered during the lengthy period of debate during the development of the proposed regulations. The Board amended the published regulation and voted to approve the amended regulation.
Lee	Stricklin	AGAINST	State officials should stand up AGAINST the extension date of DICAMBA usage	The concerns expressed in the comments in favor and against the proposed regulations were considered during the lengthy period of debate during the development of the proposed regulations. The Board amended the published regulation and voted to approve the amended regulation.
Elizabeth	Moore-Peatros	AGAINST	Dear AR State Plant Board, Public natural areas, conservation buffers, and family farms are threatened by expanded dicamba use. Sincerely, Elizabeth Moore-Peatross Little Rock, AR 72211	The concerns expressed in the comments in favor and against the proposed regulations were considered during the lengthy period of debate during the development of the proposed regulations. The Board amended the published regulation and voted to approve the amended regulation.
Paul	Lasseigne	AGAINST	I am opposed to anything that has a negative impact on habitats for birds and bees, and trees, and gardens.	The concerns expressed in the comments in favor and against the proposed regulations were considered during the lengthy period of debate during the development of the proposed regulations. The Board amended the published regulation and voted to approve the amended regulation.
Allie	Green	AGAINST		The concerns expressed in the comments in favor and against the proposed regulations were considered during the lengthy period of debate during the development of the proposed regulations. The Board amended the published regulation and voted to approve the amended regulation.

Online and Written Comments regarding the Propose Dicamba Regulation Change for the Public Hearing on February 20, 2019

FIRST NAME	LAST NAME	Selection	COMMENTS	AGENCY RESPONSE
Priscilla	Kilgore	AGAINST	Please do not authorize the use of dicamba in Arkansas. "We are the "natural state."	The concerns expressed in the comments in favor and against the proposed regulations were considered during the lengthy period of debate during the development of the proposed regulations. The Board amended the published regulation and voted to approve the amended regulation.
Edith	Bradberry	AGAINST	We do not need dicamba used in our state. This kills bees, birds and ducks.	The concerns expressed in the comments in favor and against the proposed regulations were considered during the lengthy period of debate during the development of the proposed regulations. The Board amended the published regulation and voted to approve the amended regulation.
Cordelia	Welsh	AGAINST	Dicamba is dangerous and its usage MUST be stopped. Bees, birds, and ducks are endangered by it and Dicamba will hurt our local food sources. Please stand up AGAINST the extension date of Dicamba usage!!!	The concerns expressed in the comments in favor and against the proposed regulations were considered during the lengthy period of debate during the development of the proposed regulations. The Board amended the published regulation and voted to approve the amended regulation.
William	Nagle	AGAINST	Dear AR State Plant Board, Public natural areas, conservation buffers, and family farms are threatened by expanded dicamba use. Sincerely, William Nagle North Little Rock, AR 72116	The concerns expressed in the comments in favor and against the proposed regulations were considered during the lengthy period of debate during the development of the proposed regulations. The Board amended the published regulation and voted to approve the amended regulation.
Glen	Meldahl	AGAINST	Dicamba is poison. We don't need poison in our food supply. Stop Dicamba , NOW!	The concerns expressed in the comments in favor and against the proposed regulations were considered during the lengthy period of debate during the development of the proposed regulations. The Board amended the published regulation and voted to approve the amended regulation.
Dale	Gossien	AGAINST	There have been several newspaper articles which have led me to the conclusion that there needs to be changes to the Dicamba product as currently produced. We do not need the adverse affects that heat and moisture have on Dicamba.	The concerns expressed in the comments in favor and against the proposed regulations were considered during the lengthy period of debate during the development of the proposed regulations. The Board amended the published regulation and voted to approve the amended regulation.
