4 INTERIM STUDY PROPOSAL 2023-103
5

6 REQUESTING THE SENATE COMMITTEE ON PUBLIC HEALTH, WELFARE, AND
7 LABOR STUDY THE TOTAL ARKANSAS HEALTHCARE EXPENDITURES ON PRIMARY
8 CARE AND RECOMMEND FURTHER ACTION TO ENSURE PRIMARY CARE
9 SUSTAINABILITY.
10

11 WHEREAS, data demonstrates that a focus on primary care can improve
12 patient health through cost effectiveness and that there is a strong fiscal
13 and business case for preventative care; and
14

15 WHEREAS, investing early in preventative care can reduce the need for
16 future complex and expensive treatments, saving money in the healthcare
17 system in the long run; and
18

19 WHEREAS, studies show that one (1) or more primary care visits per year
20 is associated with increased likelihood of specific evidence-based preventive
21 care interventions that improve longitudinal health outcomes and decrease
22 healthcare costs, and that increasing efforts to track and increase the
23 number of primary care visits by clinics and healthcare systems may improve
24 patient compliance with select preventive measures; and
25

26 WHEREAS, further studies show associations between primary care and
27 high-value care among both healthcare systems and Medicare fee-for-service
28 populations that lead to higher continuity of care, lower costs, and lower
29 hospitalization rates; and
30

31 WHEREAS, spending on primary care remains, as a proportion of all
32 healthcare spending, significantly below desired rates in the United States;
33 and
34

35 WHEREAS, Arkansas does not have state-specific healthcare spending
36 information to ensure the long term sustainability and efficacy of healthcare
in Arkansas through primary care investment,

NOW THEREFORE,

01-24-2024 14:31 ISP-2023-103

I.S.P. 2023-103

BE IT PROPOSED BY THE SENATE COMMITTEE ON PUBLIC HEALTH, WELFARE, AND LABOR
OF THE NINETY-FOURTH GENERAL ASSEMBLY OF THE STATE OF ARKANSAS:

THAT the Senate Committee on Public Health, Welfare, and Labor study
the amount of healthcare money expended on primary care providers and on
primary care services across the state through data maintained in the
Arkansas Healthcare Transparency Initiative's All-Payer Claims Database, as
governed by the State Insurance Department and determine how to best support
primary care physicians in Arkansas to reduce overall costs and improve the
health of all Arkansans.

Respectfully submitted,

Senator Missy Irvin

District 24
