

# Vaccination Status of Cases, Hospitalizations, and Deaths Since December 1, 2021

Data as of 2/3/2022

# COVID-19 TREATMENT OPTIONS

## MONOCLONAL ANTIBODIES

### MONOCLONAL ANTIBODIES INFUSION THERAPIES

for treating COVID-19 to prevent hospitalization, reduce viral loads, and lessen symptom severity. These are antibodies similar to the ones your body would naturally make in response to infection.

- Sotrovimab

## ORAL ANTIVIRALS

### ORAL ANTIVIRAL TREATMENTS

for the treatment of mild-to-moderate COVID-19 in adults.

- Molnupiravir
- Paxlovid

## PRE-EXPOSURE PROPHYLAXIS

### PRE-EXPOSURE TREATMENTS

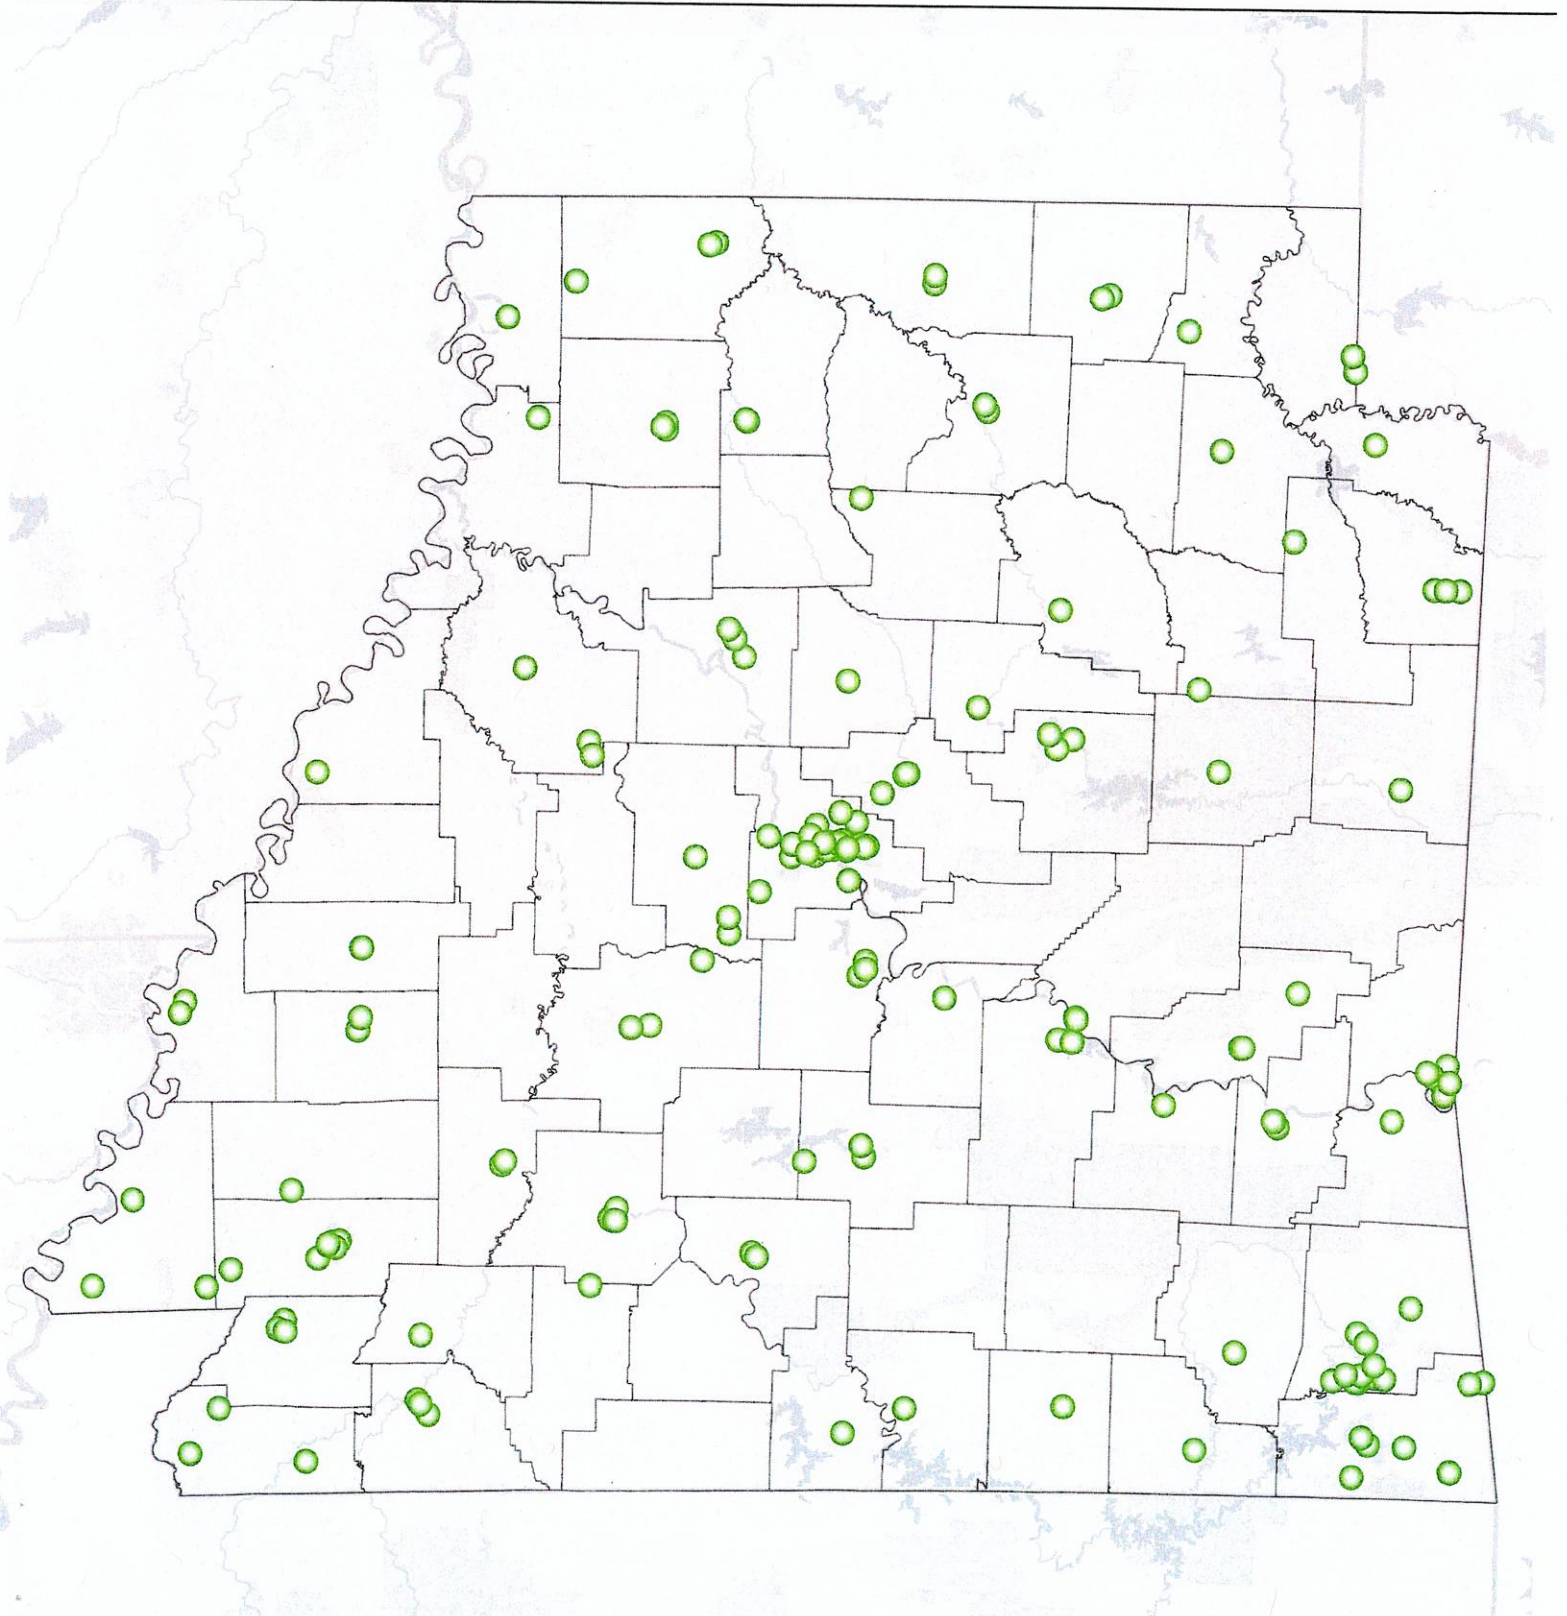

for those not infected with COVID-19 with moderate to severe immune compromise or whom vaccination is not available to a history of severe adverse reactions to vaccine components.

- Evusheld
