The NCCD Children’s Research Center is a nonprofit social research organization and a center of the National Council on Crime and Delinquency.

Introduction

Act 906 of the 2001 session of the Arkansas legislature requires the Arkansas Division of Children and Family Services (DCFS) to conduct an annual evaluation of family preservation services. The Act specifies several types of services, including those designed to prevent the removal of children from their homes, facilitate the reunification of families with children who have been removed from their homes, and help children attain safe and appropriate permanent living arrangements in event that reunification does not occur.

These services encompass virtually all activities performed by DCFS in its work with families and children. In this sense, any child or family that DCFS has assessed and/or for whom the agency has opened a case can be said to be in need of family preservation services. This report addresses whether the assistance and services that children and their families receive lead to positive results.

Within this context, the goal of this report is to examine DCFS's performance during Calendar Year 2019 (CY 2019), comparing it to its performance during the preceding two years. Many of the metrics analyzed herein replicate indicators currently monitored by the federal Children's Bureau, while other metrics are commonly used within Arkansas's and other states' child welfare systems. The report metrics are structured around safety, permanency, and well-being.

In addition to assessing statewide performance, individual service areas and counties' ability to keep children safe, help them gain permanency, and promote their well-being are examined; their performance is detailed in the report as well.

Reports Accepted for a Child Maltreatment Assessment

During CY 2019, Arkansas accepted 28,645 child maltreatment reports for an investigation.

Of those investigations, 80% (n=22,955) were assigned to DCFS; the remainder (n=5,690) were assigned to the Arkansas State Police Crimes Against Children Division.

DCFS was also responsible for all 5,367 reports that were accepted for differential response (DR) during the year. The number of DRs received decreased by more than 16% from the previous year (Figure 1).

Of assessments (investigations and DRs combined) assigned to DCFS during CY 2019, 19% originated from Area 1 (Figure 2).

DCFS staff from Area 10 received the fewest total assessments, followed by those in Areas 4 and 7.

Figure 1

Accepted Child Maltreatment Reports Statewide by Calendar Year

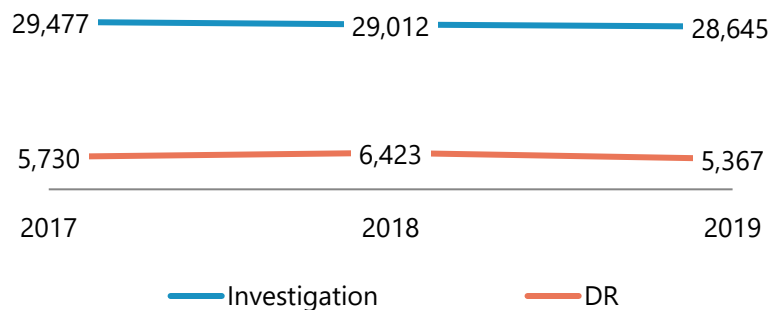

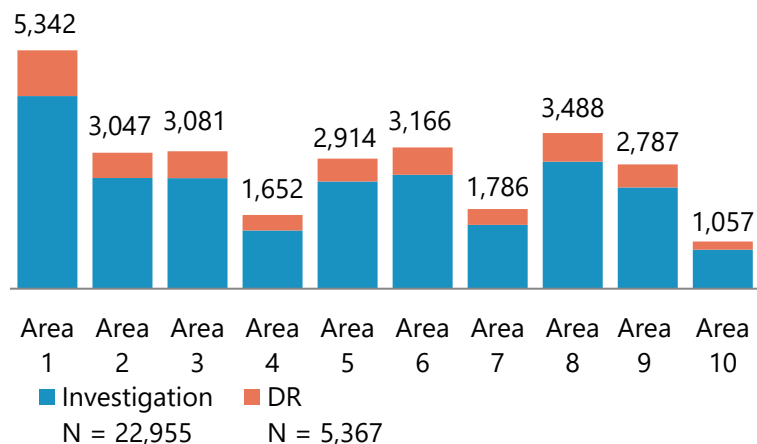

Figure 2

Total Reports Assigned to DCFS by Area (CY 2019)

Note: Two reports did not have a county and area identified for the incident.

Child Maltreatment Investigations

Timeliness of Initiating Investigations

DCFS staff must see alleged victims within 24 hours of receipt of a priority one report and 72 hours of receipt of a priority two report. Agency staff statewide initiated 84% of their investigations on time during CY 2019 (Figure 3).

Areas 8 and 10 initiated at least 90% of their investigations in a timely manner during the year, followed closely by Area 9 at 87% (Figure 4).

Nearly all counties within these three Areas performed well at initiating investigations on time, with the highest initiation rates in Clay, Izard, and Randolph counties (Area 8); Stone, Cleburne, and Woodruff counties (Area 9); and Drew, Chicot, and Desha counties (Area 10).

The lowest timely initiation rate was in Area 6 (76%), which is composed entirely of Pulaski County, and Area 3 (79%), which is composed entirely of Pulaski County, and Area 3 (79%). Area 3's performance is attributed largely to Saline (75%) and Garland (76%) counties. Also in Area 3, Perry County (62%) initiated a smaller share of its investigation on time than any other county.

Appendix Table A1 displays, by county, the percentage of investigations with timely initiation.

Figure 3

Timeliness of Initiating Investigations Statewide by Calendar Year

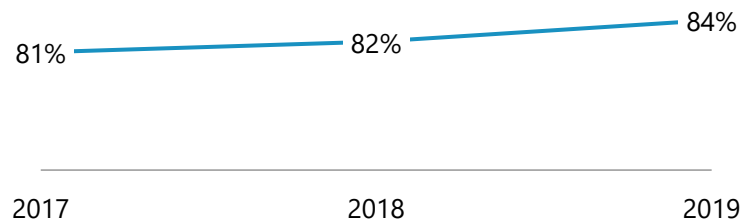

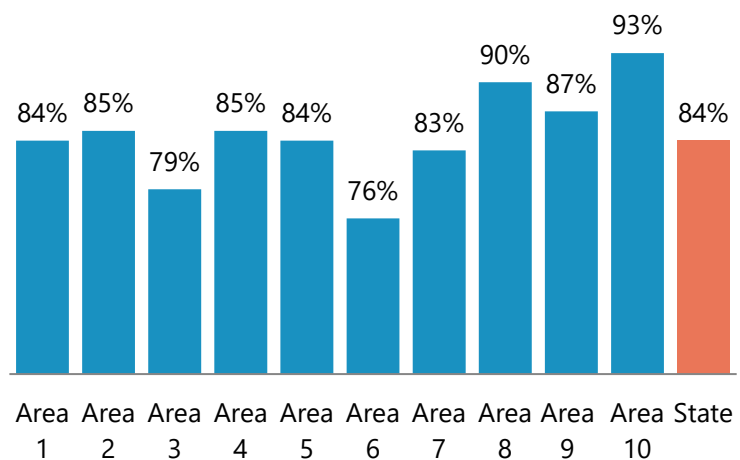

Figure 4

Timeliness of Initiating Investigations by Area (CY 2019)

Timeliness of Completing Investigations

Investigations are to be completed within 45 days of receipt of the report. In select instances, a 15-day extension may be granted, resulting in a 60-day completion requirement. DCFS completed 79% of its investigations on time in CY 2019, a decrease from CY 2017 (Figure 5).

As with timely initiation rates, Areas 8, 9, and 10 had the highest timely completion rates. Areas 4 (53%) and 6 (60%) struggled the most to complete their investigations on time during the year (Figure 6).

Virtually all counties in Areas 8, 9, and 10— Independence County (86%) in Area 9 was the lone exception—completed at least 90% of their investigations on time.

All counties in Area 4 except Nevada completed less than two thirds of their investigations on time. Less than half of investigations originating from Columbia, Lafayette, Ouachita, Sevier, and Union counties had timely completion.

Appendix Table A2 displays the percentage of investigations completed on time by county.

Figure 5

Timeliness of Completing Investigations Statewide by Calendar Year

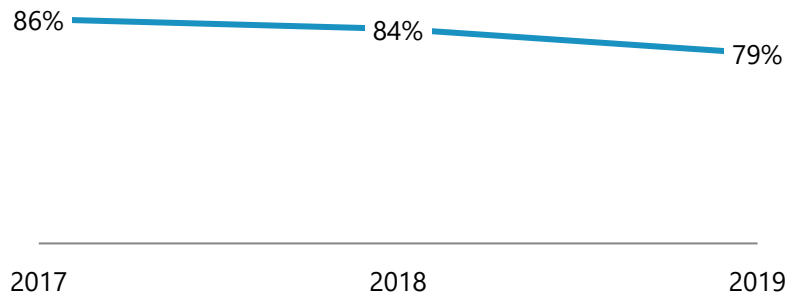

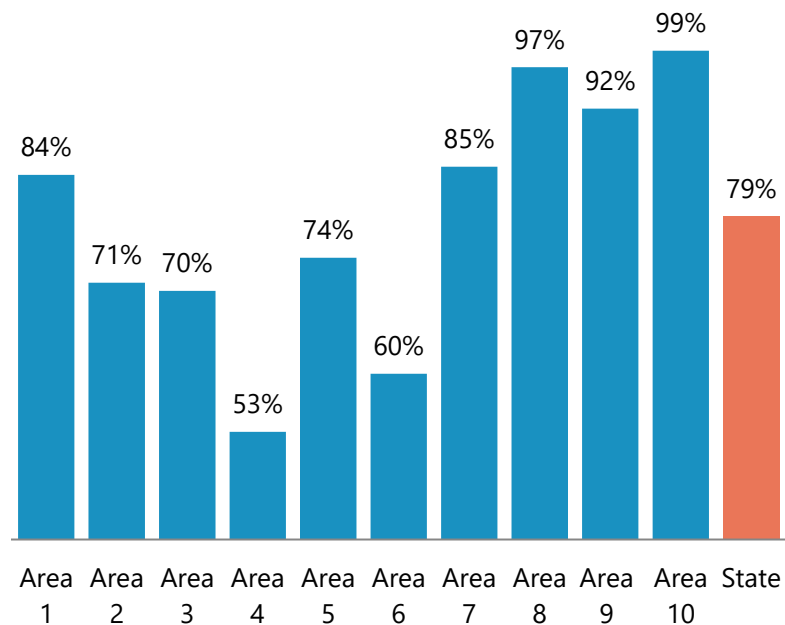

Figure 6

Timeliness of Completing Investigations by Area (CY 2019)

Substantiation of Investigations

DCFS substantiated 21% of its investigations during CY 2019, similar to in previous years (Figure 7).

DCFS staff from Areas 2, 4, 9, and 10 substantiated approximately a quarter (25–26%) of their assigned investigations during CY 2019. The lowest substantiation rates were in Areas 1 and 7 (Figure 8).

Among individual counties, Dallas (11%) and Lonoke (12%) in Area 7 substantiated their investigations at a lower rate than any other county. Meanwhile, the following counties substantiated investigations at the highest rates: Sebastian (Area 2); Hempstead and Little River (Area 4); Baxter, Marion, and Pope (Area 5); Cleveland (Area 7); Cross and Jackson (Area 9); and Lee and Monroe (Area 10).

Appendix Table A3 displays the percentage of substantiated investigations by county.

Figure 7

Percentage of Substantiated DCFS Investigations Statewide by Calendar Year

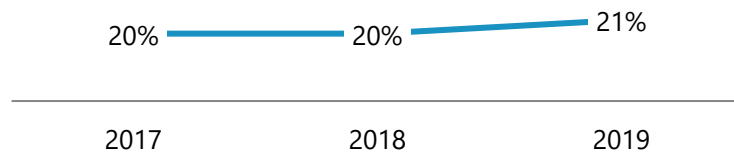

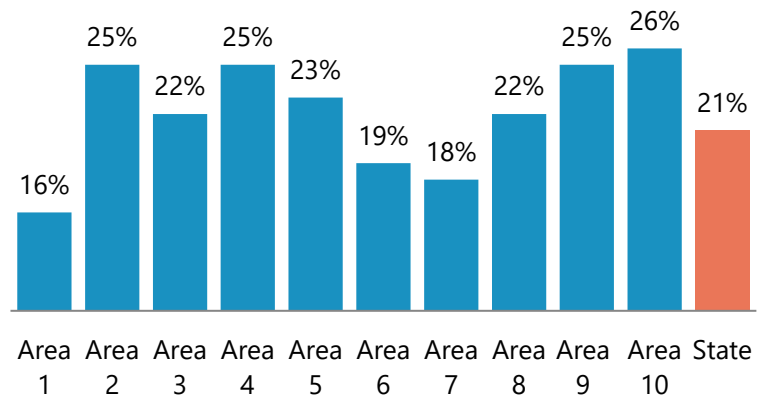

Figure 8

Percentage of Substantiated DCFS Investigations by Area (CY 2019)

Preventing Maltreatment Recurrence

Recurrence of maltreatment is measured by examining all child victims of maltreatment during a 12-month period and identifying how many were victimized within the next 12 months. For example, for CY 2019, all child victims of maltreatment during CY 2018 were tracked to see whether they were victims of a subsequent maltreatment report within 12 months of the initial report.

Just 6% of child victims in Arkansas experienced a recurrence of maltreatment within 12 months of a substantiation for CY 2019 (Figure 9). DCFS met the national standard with respect to the recurrence of maltreatment for each of the past three years. All 10 areas also achieved the national standard (Figure 10).

Of the 75 Arkansas counties, 61 met the standard; Baxter, Boone, Fulton, Hempstead, Jackson, Lawrence, Madison, Newton, Pike, Poinsett, Polk, Searcy, White, and Woodruff counties did not. Most of these counties are sparsely populated. Appendix Table A4 displays the percentage of children who experienced maltreatment recurrence by county.

Figure 9

Recurrence Within 12 Months Statewide by Calendar Year

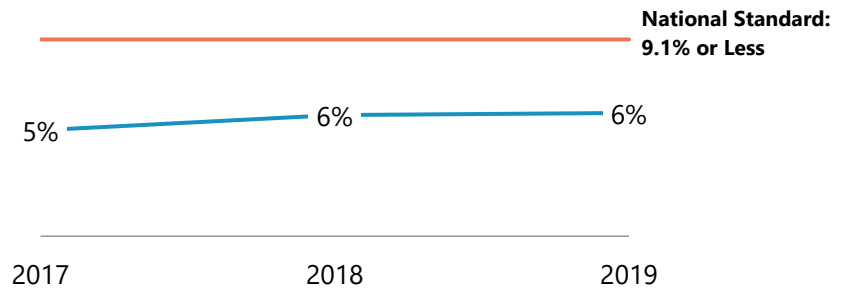

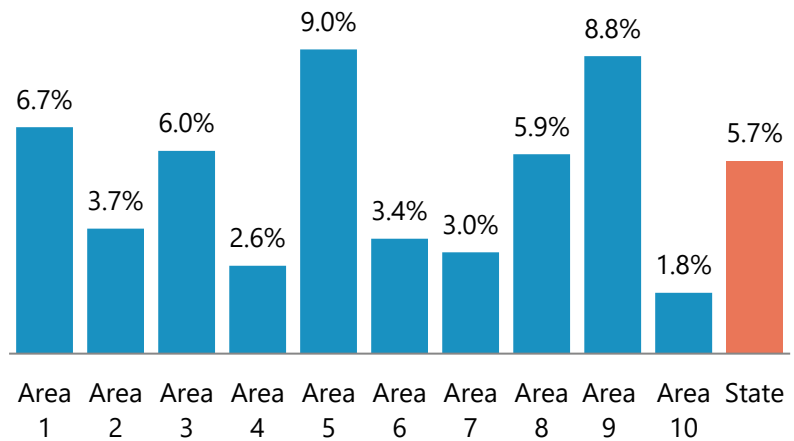

Figure 10

Recurrence Within 12 Months by Area (CY 2019)

Differential Response Assessments

Timeliness of Initiating DR Reports

DCFS must see all alleged victims and at least one caregiver within 72 hours for DR referrals. Though the agency improved its timely initiation rate for DRs in 2019, overall, staff have struggled to initiate DRs on time. Arkansas initiated less than 70% of DRs on time for each of the past three years (Figure 11).

Areas 5, 8, and 10 performed comparatively well at initiating DRs; each of those areas initiated at least 85% on time. Meanwhile, Areas 2 and 6 struggled the most (Figure 12).

Only a handful of counties had timely initiation rates of at least 90%: Montgomery County (Area 4); Baxter, Boone, Conway, and Searcy counties (Area 5); Greene and Mississippi counties (Area 8); and Arkansas, Desha, Drew, and Monroe counties (Area 10).

In several counties within Area 2, less than half of DRs were initiated on time, highlighted by the timely initiation rates for Johnson (29%), Yell (31%), Logan (46%) and Franklin (48%) counties.

Appendix Table A5 displays the percentage of timely DRs initiated by county.

Figure 11

Timeliness of Initiating DR Referrals Statewide by Calendar Year

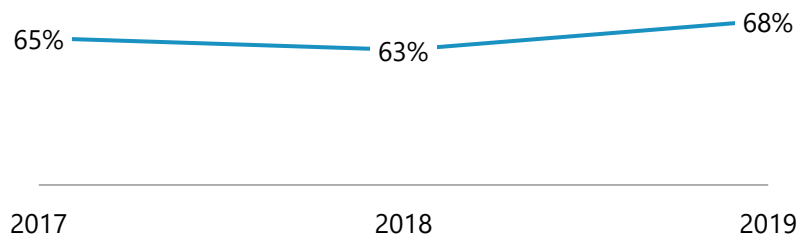

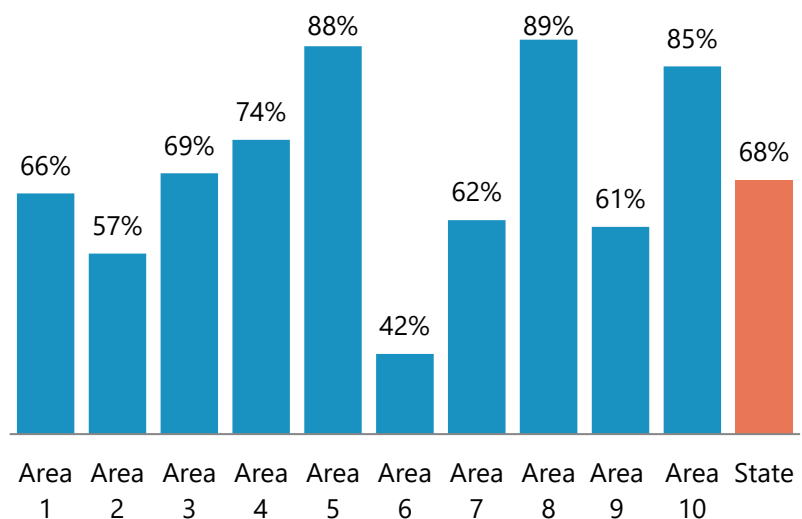

Figure 12

Timeliness of Initiating DR Referrals by Area (CY 2019)

Timeliness of Completing DR Reports

Reports assigned for DR must be closed within 30 days of receipt of the report. In certain instances when the families' needs necessitate longer involvement, up to two 15-day extensions can be granted, for a total of 60 days.

DCFS completed 80% of DRs on time for CY 2019. This was lower than the previous year but identical to its performance two years ago (Figure 13).

Areas 5 and 8 each completed over 95% of DRs in a timely manner (Figure 14). All counties in these two areas performed well.

The lowest DR completion rates were in Areas 3 (59%) and 10 (58%). Area 3's performance is notable in contrast with its performance one year ago (94%). The completion rate plummeted for each county within the Area.

Area 10 struggled to complete DRs on time despite performing well at initiating and completing investigations and initiating DRs. Specifically, DRs originating from Ashley, Chicot, Desha, and Drew counties were rarely completed on time. Appendix Table A6 displays timely DR completion by county.

Figure 13

Timeliness of DR Referral Completion Statewide by Calendar Year

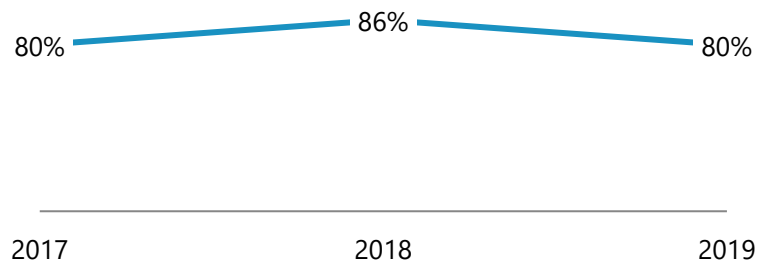

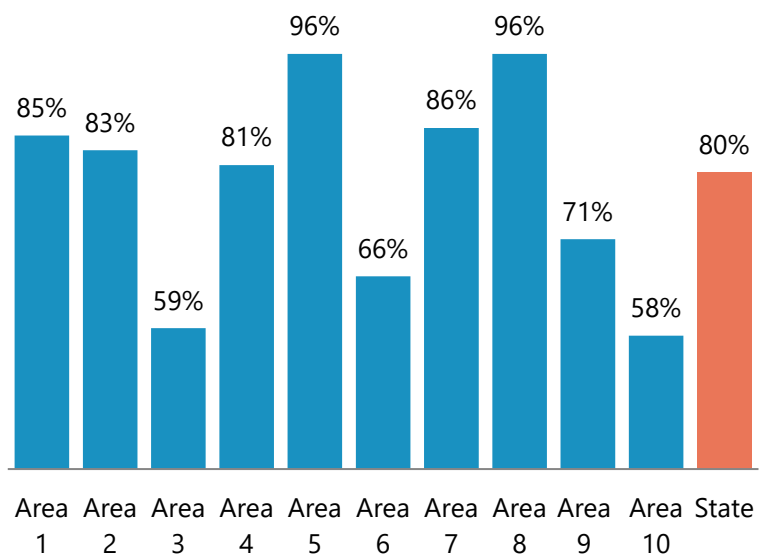

Figure 14

Timeliness of DR Referral Completion by Area (CY 2019)

In-Home Protective Services Cases

When a maltreatment report or court order necessitates DCFS involvement with a family but there is not an immediate threat to any child's safety, the agency can provide in-home protective services to the family in which no children are removed from the home.

DCFS was responsible for 2,202 open in-home cases at the end of CY 2019, an increase from the previous year but still a decrease of 8% since CY 2017 (Figure 15). Figure 16 shows the number of in-home cases by area at the end of CY 2019.

The number of in-home cases decreased in six areas from CY 2017, with the largest decreases in Areas 7 (35%) and 10 (34%). The largest increase in in-home cases occurred in Areas 6 (15%) and 1 (13%).

Among counties, the largest net decreases in in-home cases occurred in Lonoke (93 to 31) and Greene (89 to 59) counties; the largest increases occurred in Benton (78 to 147) and Craighead (83 to 124) counties.

Appendix Table A7 reviews the number of in-home protective services cases open at the end of the year by county.

Figure 15

Open In-Home Protective Services Cases Statewide by Calendar Year

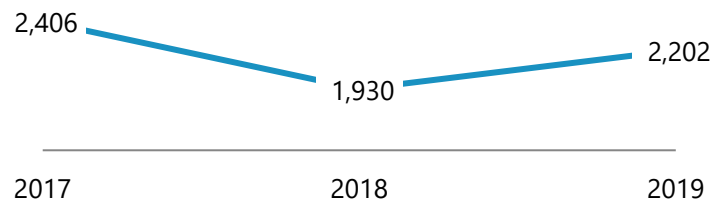

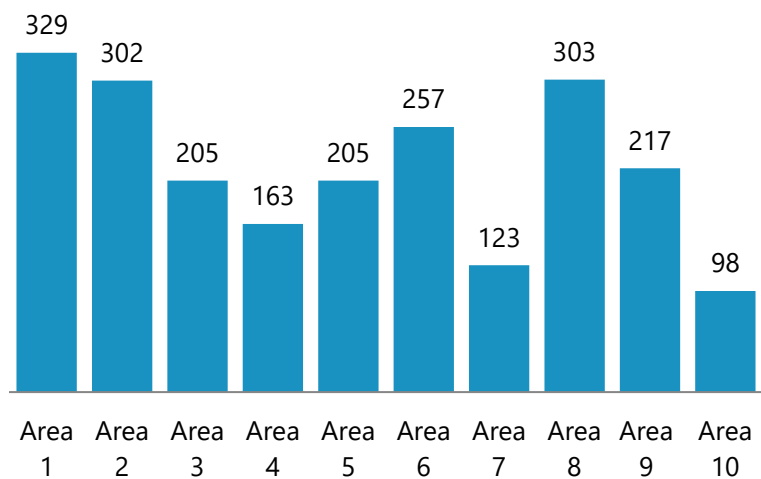

Figure 16

Open In-Home Protective Services Cases by Area (CY 2019)

N = 2,202

Discussion

Strengths

Of the 28,645 child maltreatment reports accepted for investigation in Arkansas during CY 2019, 22,955 (80%) were assigned to DCFS. DCFS was also responsible for all 5,367 reports accepted for DR over the same period.

The rate at which DCFS initiated its investigations continued to improve during CY 2019; agency staff initiated 84% on time during CY 2019. Areas 8, 9, and 10 performed particularly well.

DCFS also performed well at limiting the recurrence of maltreatment within 12 months, bettering the national standard (9.1% or less) for each of the last three years. All 10 areas met the standard for CY 2019.

Areas for Improvement

While DCFS made some strides with respect to initiating DR reports on time (jumping by several percentage points to 68%) during CY 2019, additional improvement is necessary to ensure that the children and families involved in these reports are seen more quickly. Agency staff had particular difficulty with initiating DRs originating from Areas 2 and 6.

DCFS performance at completing timely investigations and DRs during CY 2019 regressed from the previous year, with completion rates of 79% for investigations and 80% for DRs. The agency had particular difficulty completing timely investigations originating from Areas 2 and 6 and timely DRs originating from Areas 3 and 6.

Children in Foster Care

The Population

The number of children in foster care decreased by 12% since CY 2017 (Figure 17). The number of children in care has fallen by nearly 1,000 (not shown) since reaching an all-time high during CY 2016. Figure 18 shows children in care by area at the end of CY 2019.

Over the past two years, the population of children in care decreased in seven areas, with the largest decreases in Areas 2 (by 25%), 8 (23%), and 5 (18%). Within these areas, the largest net decreases occurred in Sebastian (683 to 531), Crawford (146 to 85), and Logan (99 to 66) counties for Area 2; Greene (143 to 82) and Craighead (145 to 104) counties for Area 8; and Faulkner (140 to 104) and Boone (65 to 44) counties for Area 5.

The foster child populations increased in Areas 1, 7, and 9. Among counties in these areas, the largest net increases occurred in Benton County (146 to 170) for Area 1, Lonoke County (91 to 118) for Area 7, and Cleburne County (25 to 55) for Area 9.

Appendix Table A8 displays the number of children in care at the end of the year by county.

Figure 17

Children in Foster Care Statewide by Calendar Year

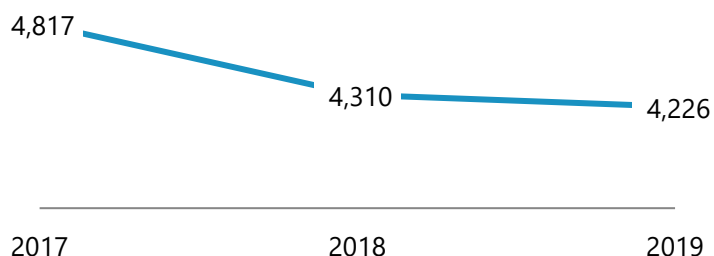

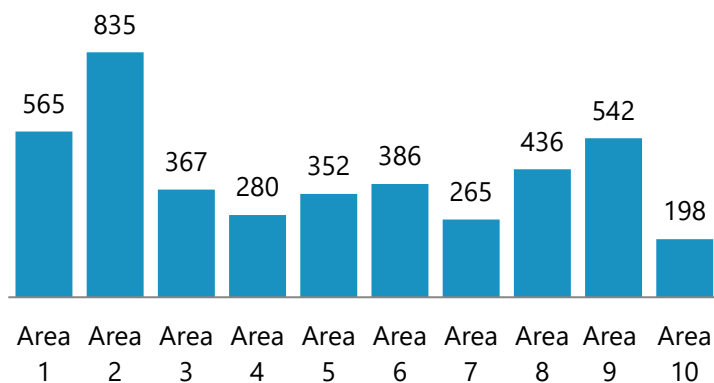

Figure 18

Children in Foster Care by Area (CY 2019)

N = 4,226

Proximity of Children's Placements

Of children in care at the end of CY 2019, 74% were residing in a placement setting either within the same county from which they were removed or a neighboring county, a considerable improvement over previous years (Figure 19).

Eight of 10 areas improved since CY 2017. Areas 1 (87%) and 6 (85%) placed the highest share of children in close proximity to their homes (Figure 20). Within Area 1, more than 89% of the children from Benton, Madison, and Washington counties were placed in close proximity.

At the other end of the spectrum, less than two thirds of children in care from Areas 2, 4, and 10 were placed in close proximity to their homes. Noteworthy counties that struggled within these areas included Crawford (20%) in Area 2, Miller (53%) and Ouachita (56%) in Area 4, and Ashley (54%) and St. Francis (55%) in Area 10.

Appendix Table A9 displays the percentage of foster children placed in (1) their home county and (2) their home county or a neighboring county, by removal county.

Figure 19

Proximity of Child's Placement (Same or Neighboring County) Statewide by Calendar Year

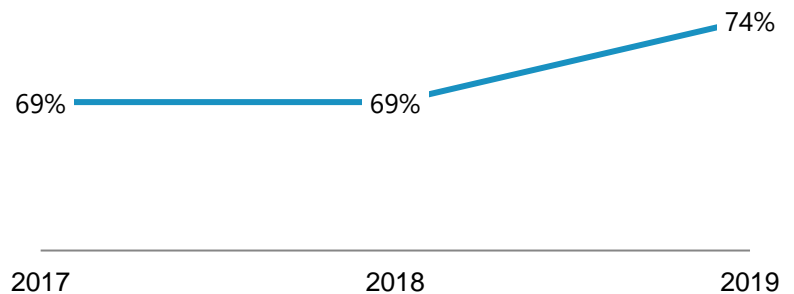

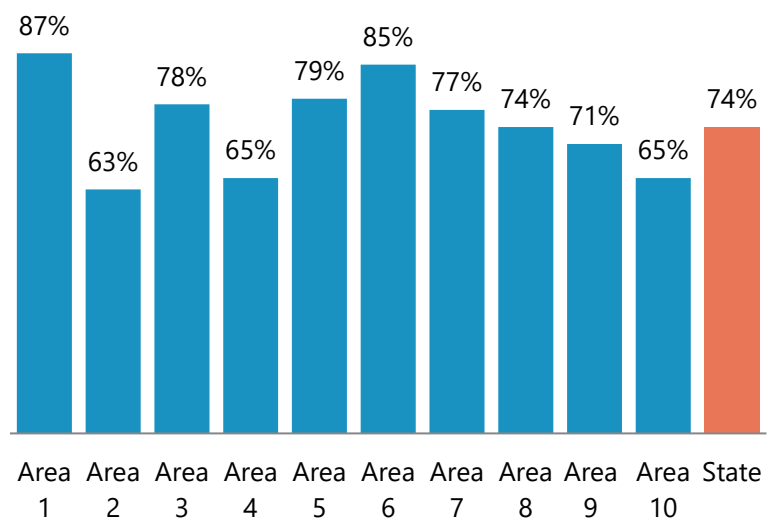

Figure 20

Proximity of Child's Placement (Same or Neighboring County) by Area (CY 2019)

Child Removals After Substantiation

DCFS staff removed 22% of the victim children in response to a true report (i.e., the children were removed from their home either during the investigation or within 10 days of its closure) during CY 2019, lower than the removal rate during CY 2017 (Figure 21).

Areas 4 (27%) and 9 (25%) removed the highest proportion of children in response to a true report during CY 2019 (Figure 22). Area 4's removal rate stemmed largely from Sevier (38%) and Miller (31%) counties; Area 9's was clearly affected by Cross County (52%)

Areas 8 and 10 (17% each) were least likely to remove children in response to a true report. Within Area 8, Craighead County demonstrated restraint with respect to removing children; it removed less than 11% for the second consecutive year. Within Area 10, a removal rate of less than 11% was observed for Desha, Lee, and Phillips counties for the second consecutive year.

Appendix Table A10 displays the percentage of children removed from their homes in response to a true report (i.e., substantiation) by county.

Figure 21

Child Removal After Substantiation Statewide by Calendar Year

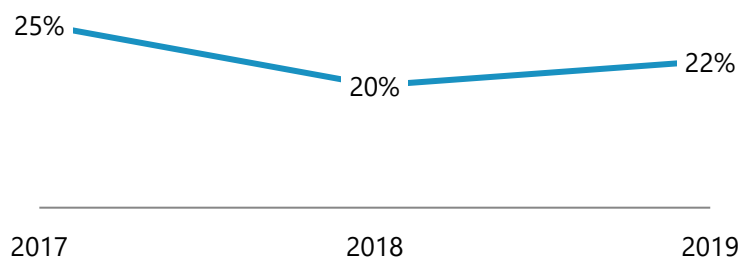

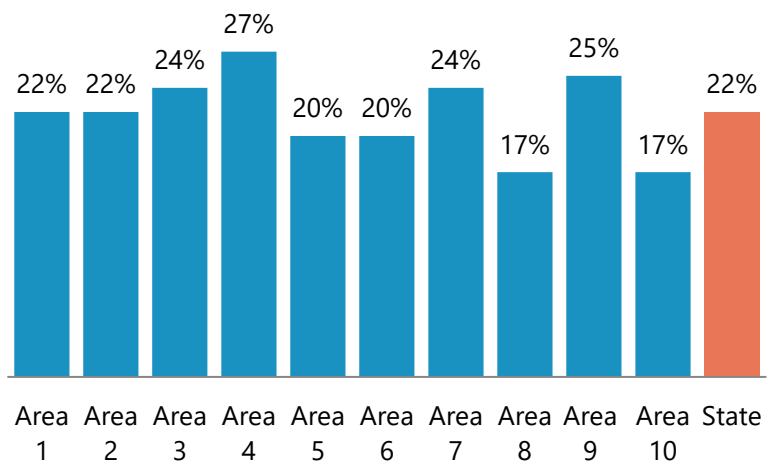

Figure 22

Child Removal After Substantiation by Area (CY 2019)

Performance Metrics on Permanency

Placement With Relatives

DCFS has identified and used relatives as appropriate foster care placements more often in recent years. As of the end of CY 2019, 33% of children in care were in relative placements, meeting the agency's goal (Figure 23).

Areas 1, 4, 5, 7, 8, and 10 each met the agency's goal (33%), and Areas 2 and 3 (31% each) were close behind. The best-performing counties within these areas were Benton and Madison counties (Area 1), Franklin County (Area 2), Montgomery and Pike counties (Area 3), Columbia and Ouachita counties (Area 4), Conway and Searcy counties (Area 5), Cleveland and Bradley counties (Area 7), Clay and Lawrence counties (Area 8), and Arkansas and Lee counties (Area 10). Meanwhile, the lowest relative placement rate was in Area 6 (20%; Figure 24).

Appendix Table A11 displays the percentage of children in care residing with relatives by county.

Figure 23

Placement With Relatives Statewide by Calendar Year

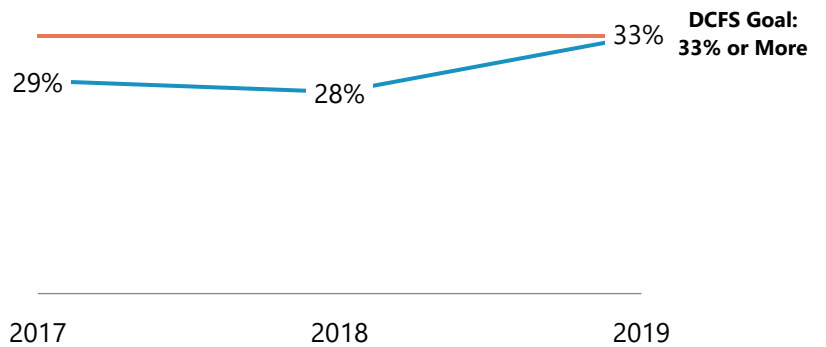

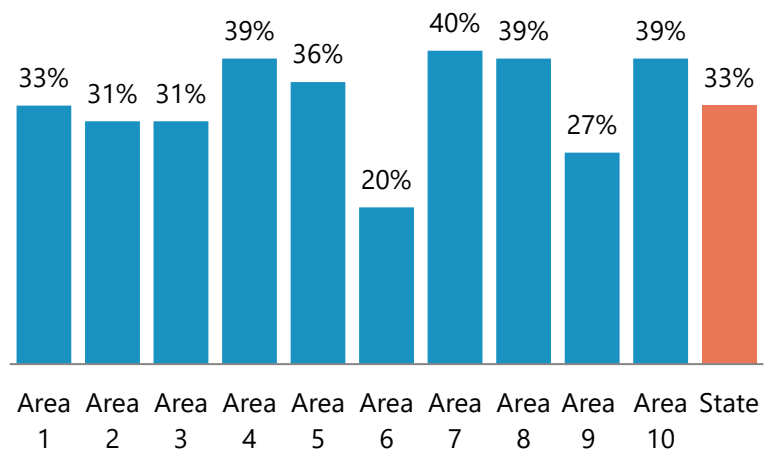

Figure 24

Placement With Relatives by Area (CY 2019)

Placement Stability

Placement stability is measured by the rate of placement moves per 1,000 days in care for children who enter care over a 12-month period. The national standard is a rate of 4.12 or less.

For CY 2019, the placement stability rate was 6.32, higher than the previous year but lower than two years ago (Figure 25).

Nearly a quarter (n=18) of Arkansas' 75 counties met the national standard for placement stability. For five of the nine counties in Area 5—where children experienced greater placement stability (5.16) than those entering care from any other area—the placement stability rate was less than 4.00. It also warrants mentioning that Saline County (Area 3) and Craighead County (Area 8), the sixth and seventh most populous in the state, excelled at limiting children's moves. Meanwhile, children entering care from Areas 4, 6, 8, 9, and 10 experienced the highest number of moves on average (Figure 26).

Appendix Table A12 displays placement stability rates by county.

Figure 25

Placement Stability Rate Statewide by Calendar Year

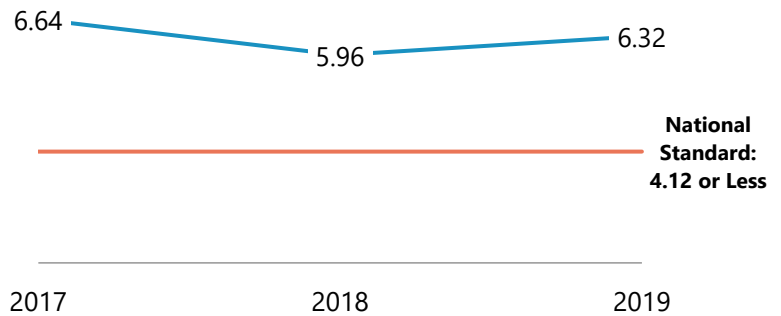

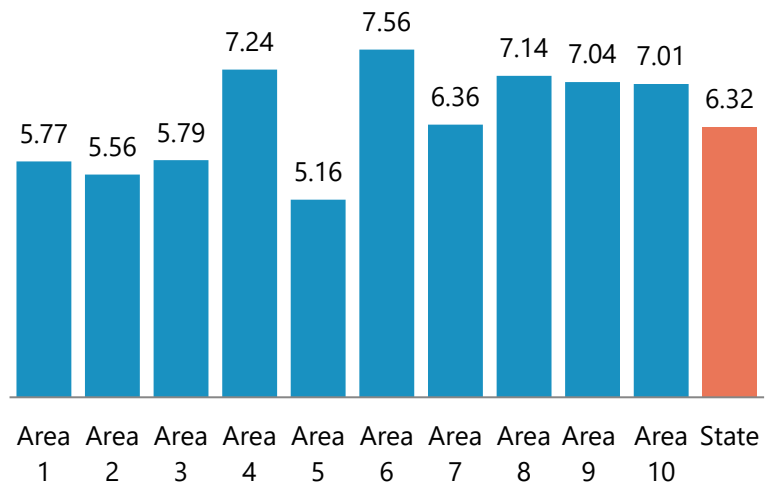

Figure 26

Placement Stability Rate by Area (CY 2019)

Achieving Permanency Within 12 Months

Arkansas consistently exceeds the national standard of 40.5% or more for achieving permanency for children within 12 months of removal (Figure 27). Discharges from foster care due to reunification, relative custody, noncustodial parent custody, guardianship, adoption, and nonrelative custody are considered to be permanent living situations.

Most areas met this standard, with only Areas 2 and 6 narrowly missing it (Figure 28).

The state also exceeded the national standards of 43.6% for children who had been in care for 12 to 23 months and achieved permanency within the subsequent 12 months (59%) and 30.3% for children who had been in care for 24 months or longer and achieved permanency within the ensuing 12 months (41%). All areas met the standard for the 12-to-23-month interval, while all but one area (Area 7) met the standard for the 24-months-or-longer interval.

Appendix Tables A13–15 display the state’s performance with respect to achieving permanency for these three intervals by county.

Figure 27

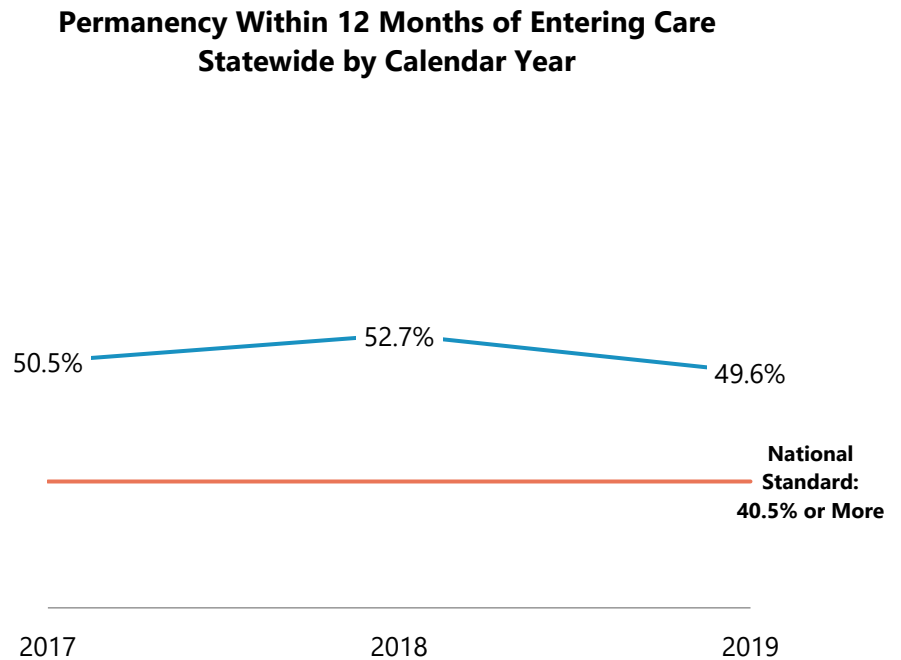

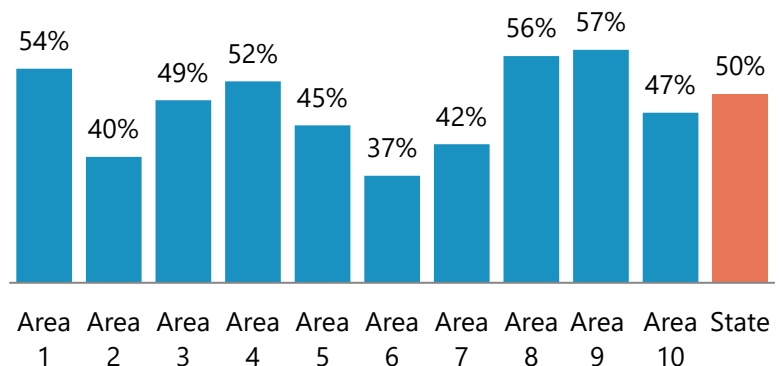

Figure 28

**Permanency Within 12 Months of Entering Care by Area
(CY 2019)**

Preventing Foster Care Reentry

The state met the national standard (8.3% or less) for preventing child reentry into care within 12 months of discharge for CY 2019 (Figure 29).

The statewide reentry rate improved (i.e., decreased) by two percentage points from CY 2017.

Six of the 10 areas met the standard for limiting child reentry into care (Figure 30). Of the remaining four, Area 5's struggles with limiting reentries stemmed largely from Faulkner County (21%), Area 7's from Lonoke County (33%), Area 8's from Greene County (22%), and Area 10's from St. Francis County (40%).

Appendix Table A16 displays foster care reentry rates by county.

Figure 29

Reentries Within 12 Months Statewide by Calendar Year

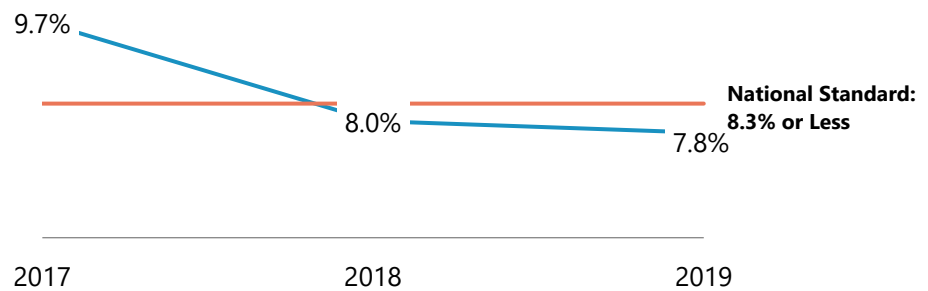

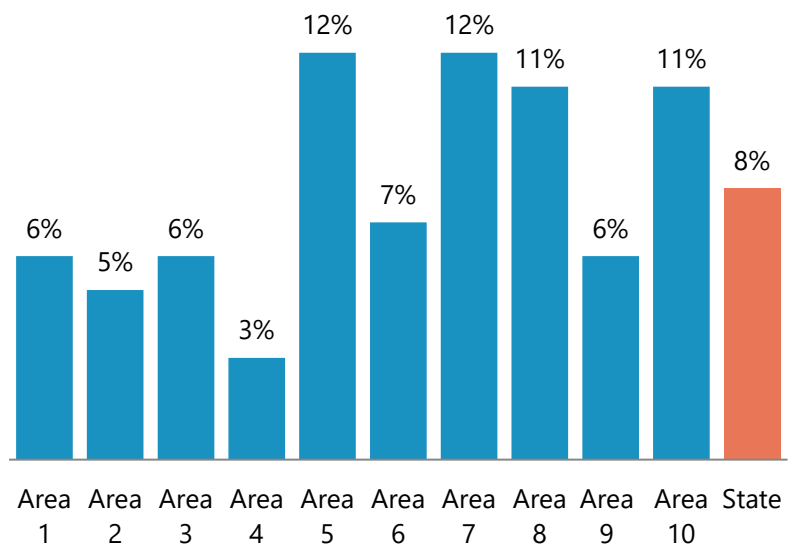

Figure 30

Reentries Within 12 Months by Area (CY 2019)

Time to Adoption

Adoptions were finalized for 985 children in CY 2019, slightly higher than the number finalized during each of the previous two years (Figure 31).

The average length of time from termination of parental rights (TPR) until adoption finalization was 13 months for CY 2019, nearly two months longer than the average time it took in CY 2017 and CY 2018 (Figure 32).

It took 10 months, on average, to finalize adoptions in Area 10, making it the only area in the state where adoptions were finalized faster than the national average of 11.6 months. Areas 2 and 4 (12 months each) were the next closest. Adoptions finalized in Areas 6 (16 months on average) and 1 (14 months on average) took the longest.

Appendix Table A17 displays the number of finalized adoptions and the average time from TPR to adoption finalization by county.

Figure 31

Number of Finalized Adoptions Statewide by Calendar Year

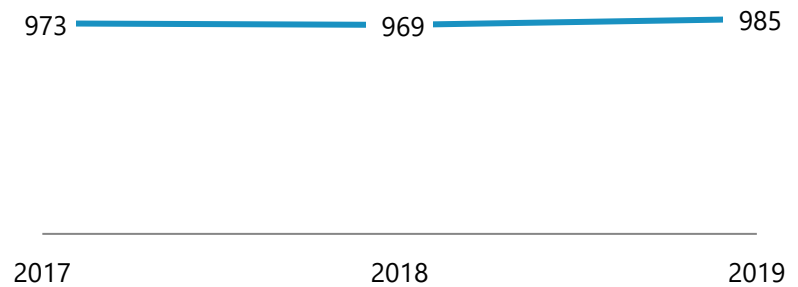

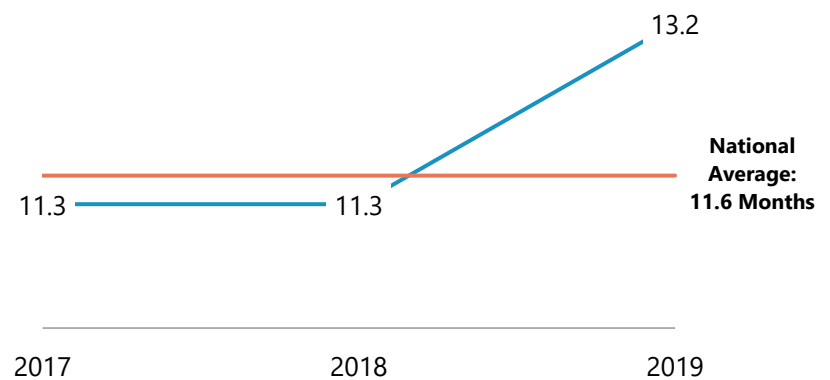

Figure 32

Time in Months From TPR to Adoption Finalization Statewide by Calendar Year

Discussion

Strengths

There were 4,226 children in care as of the end of CY 2019, a decrease of nearly 1,000 since the all-time high in CY 2016.

DCFS made considerable improvements with both placing children in care close to the homes from which they were removed and placing children with relatives. Just over 74% of children resided in a foster care setting in either their home county or a neighboring county at the end of CY 2019, compared to 69% for both CY 2017 and CY 2018. Moreover, 33% of children in care were residing with relatives, higher than the relative placement rate during each of the previous two years (29% in CY 2017 and 28% in CY 2018) and thereby matching DCFS's goal.

DCFS did well at moving children in care toward permanency regardless of their length of time in care. For each of the past three years, DCFS met the federal standards with respect to achieving permanency within 12 months for (1) children who enter care during the year, (2) children who had been in care for 12 to 23 months, and (3) children who had been in care for 24 months or longer.

DCFS performed well at preventing children from reentering care within 12 months of discharge. For the second consecutive year, Arkansas met the national standard of 8.3% or less.

Areas for Improvement

Although DCFS has improved the stability of children's foster care placements in recent years, it falls well short of the national standard. The placement stability rate for CY 2019 (6.32) was higher than the preceding year (5.96) but less than the rate two years ago (6.64). None of the 10 areas met the standard for CY 2019; the highest rate of placement moves was in Area 6.

The average length of time from TPR to adoption finalization was 13.2 months for the 985 adoptions finalized during CY 2019, two months longer than the average during each of the previous two years. Thus, Arkansas' performance on this item is less than the national average of 11.6 months.

Assessing and Visiting Children and Families

DCFS must assess the children and families involved in its in-home and foster care cases on an ongoing basis to identify their needs and provide them with appropriate services. DCFS’s primary means of assessing and monitoring children and families is consistent face-to-face visits. Caseworkers must visit each child in care in the placement setting once a month; for in-home protective services cases, caseworkers must visit family members in their home at least once a month.

DCFS caseworkers completed 75% of visits to in-home families during CY 2019, an increase of 15 percentage points from its visitation rate in CY 2017 (60%) and closer to DCFS’s goal of 85% (Figure 33).

The in-home visitation rate has increased in all 10 areas since CY 2017. Area 4—led by its efforts to see in-home families in Union (96%), Miller (95%), and Hempstead (93%) counties—met DCFS’s goal, while Areas 5, 6, 8, 9, and 10 all came very close (Figure 34).

Conversely, staff made less than three-fourths of the required visits to see in-home families in Areas 1, 2, 3, and 7. The in-home visitation rates in Benton County (59%) in Area 1, Sebastian (65%) in Area 2, Saline (51%) in Area 3, and Jefferson (51%) in Area 7 contributed to the below-average performance in those areas (not shown).

Appendix Table A18 displays the agency’s performance at visiting in-home families by county.

Figure 33

Caseworker Visitation With In-Home Cases Statewide by Calendar Year

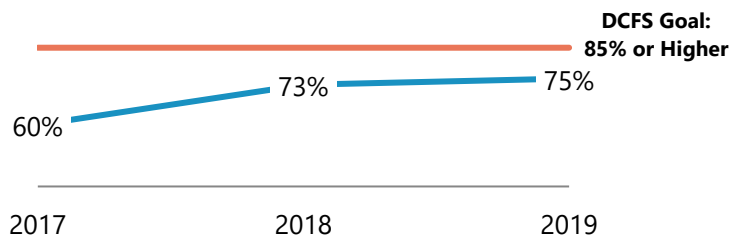

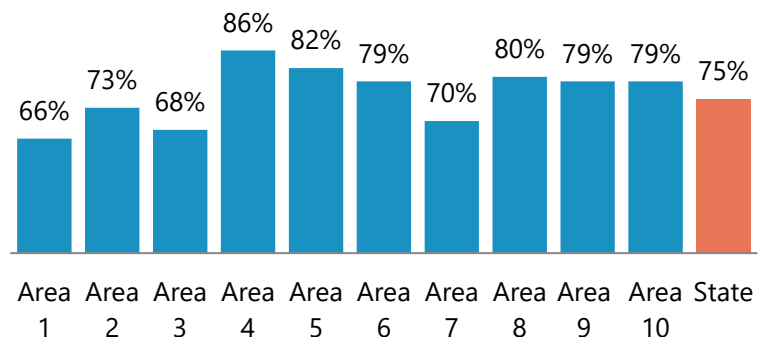

Figure 34

In-Home Monthly Visits by Area (CY 2019)

Visiting Children in Foster Care

DCFS completed 85% of its required monthly visits to see foster children in their placement during CY 2019, 13 percentage points higher than in CY 2017 (Figure 35).

Areas 2, 4, 5, 6, 9, and 10 met DCFS's goal of 85% for monthly visits to foster children during CY 2019. The remaining four areas completed at least 80% of their required visits to foster children (Figure 36).

Appendix Table A19 displays the agency's rate of visiting children in care by county.

Figure 35

Caseworker Visitation With Foster Children Statewide by Calendar Year

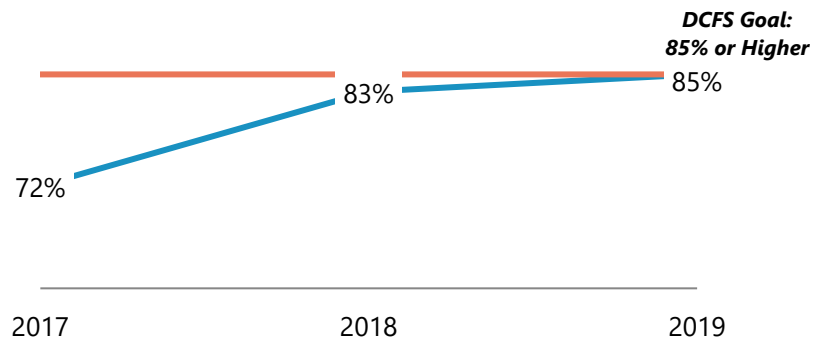

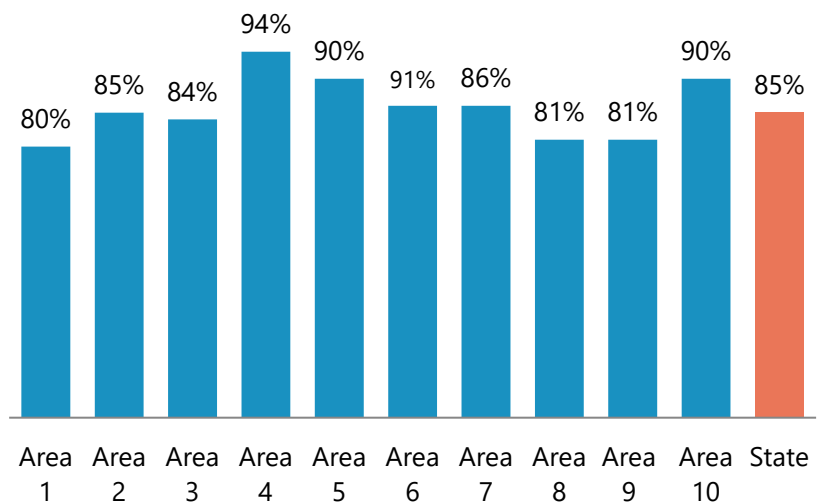

Figure 36

Foster Care Monthly Visits Statewide by Area (CY 2019)

Discussion

Strengths

DCFS improved the rate at which it visited the children and families in its in-home cases during CY 2019. The agency made 75% of its required monthly visits to in-home families, higher than the rates during the preceding two years (60% and 73%, respectively).

DCFS likewise improved the rate at which it visited children in care, culminating in staff completing 85% of their required monthly visits during CY 2019. As a result, the agency met its goal of 85%.

Areas for Improvement

Though DCFS has commendably improved the rate at which it monitors its in-home cases in recent years, further is still needed to reach the in-home visitation goal of 85%. The lowest in-home visitation rates for CY 2019 were in Areas 1, 3, and 7.
