FINDINGS

The Arkansas General Assembly finds that:

- (1) Alzheimer's disease is a progressive and fatal brain disease that destroys brain cells and causes problems with memory, thinking, and behavior;
- (2) More than five million four hundred thousand (5,400,000) Americans now have Alzheimer's disease;
- (3) Alzheimer's disease is the most common form of dementia and is the sixth leading cause of death in the United States; and
- (4) No cure exists for Alzheimer's disease, but treatments for symptoms used in conjunction with appropriate services and support can improve the quality of life for those living with the disease.

CHARGE TO THE ADVISORY COUNCIL

The Alzheimer's Advisory Council shall:

- (1) Assess the current and future impact of Alzheimer's disease and other types of dementia on the residents of the State of Arkansas;
- (2) Examine the existing industries, services, and resources addressing the needs of persons living with Alzheimer's disease, their families, and caregivers; and
- (3) Develop a strategy to mobilize a state response to the public health crisis created by Alzheimer's disease and other types of dementia.

2016 ALZHEIMER'S DISEASE FACT AND FIGURES (Provided by Arkansas Alzheimer's Association)

- Alzheimer's is not just memory loss – Alzheimer's kills
- Alzheimer's Disease is the 6th leading cause of death in the United States
- Alzheimer's is the only disease among the top 10 causes of death in America that cannot be prevented, cured or even slowed
- 1 in 3 seniors die with Alzheimer's or another dementia
- It kills more than breast and prostate cancer combined
- More than 5 million Americans are living with Alzheimer's
- Every 60 seconds someone in the United States develops Alzheimer's
- Alzheimer's cost caregivers more than their time
- In 2015, more than 15 million caregivers provided an estimated 18.1 billion hours of unpaid care
- Family caregivers spend more than \$5,000 a year caring for someone with Alzheimer's; for some families this means missing a vacation, but for others, it means going hungry
- The growing Alzheimer's crisis is helping to bankrupt Medicare
 - In 2016, the direct cost to American society of caring for those with Alzheimer's will total an estimated \$236 billion, with just under half of the costs borne by Medicare
 - Nearly one in every five Medicare dollars is spent on people with Alzheimer's and other dementias. In 2050, it will be in every three dollars
 - Average per person Medicare spending for those with Alzheimer's and other dementias is three times higher than average per-person spending across all other seniors. Medicaid payments are 19 times higher
 - Unless something is done, in 2050, Alzheimer's will cost \$1.1 trillion (in 2016 dollars). Costs to Medicare will increase 365 percent to \$589 billion

LEGISLATION

Arkansas Code §20-8-601 - 20-8-604

- Act 92 of 2009 - Established the Task Force on the Effect of Alzheimer's Disease in Arkansas
