

## INTERIM STUDY PROPOSAL 2019-144

1  
2  
3 REQUESTING THAT THE JOINT COMMITTEE ON ADVANCED COMMUNICATIONS  
4 AND INFORMATION TECHNOLOGY CONDUCT A STUDY TO CREATE A CURRENT  
5 INVENTORY OF STATE GOVERNMENT BUILDINGS, BUILDING SYSTEMS,  
6 SUPPORTING TECHNOLOGY, AND DATA; ASSESS THE STATUS OF STATE  
7 CYBERSECURITY MEASURES IN PLACE TO PROTECT STATE GOVERNMENT  
8 BUILDINGS, ONLINE SYSTEMS, NETWORKS, AND DATA AGAINST  
9 CYBERATTACKS; AND DETERMINE BEST PRACTICES AND ESTABLISH  
10 STANDARDS FOR STATE BUILDING CYBERSECURITY THAT MAY BE  
11 IMPLEMENTED TO INCREASE STATE BUILDING CYBERSECURITY AND PROTECT  
12 STATE GOVERNMENT INTERESTS.

13  
14 WHEREAS, state governments and the property of state governments,  
15 including state government buildings, building systems, supporting  
16 technology, and data, are vulnerable to cyberattacks; and  
17

18 WHEREAS, state governments have been subject to recent cyberattacks and  
19 depending on whether the attacker was seeking intelligence or trying to  
20 disrupt government operations, state government buildings, supporting  
21 technology, data, business operations, security systems, HVAC and electrical  
22 systems, and any other state or local systems that are plugged in to online  
23 networks could be the targets of such attacks; and  
24

25 WHEREAS, due to electronic and online information being scattered  
26 across a variety of online systems and networks maintained by individual  
27 government entities and the lack of a designated state entity responsible for  
28 the maintenance and security of all state government property, including  
29 state government buildings, online systems, networks, and data, it is unknown  
30 which buildings, building systems, supporting technology, or data could be  
31 subject to a cyberattack; and  
32

33 WHEREAS, state government buildings, whether owned or leased by the  
34 state, may not meet any standards for ensuring security and therefore may  
35 require costly expenditures for cybersecurity protections necessary to  
36 protect state government interests; and

1  
2 WHEREAS, data collection across the state from various stakeholders,  
3 including quasi-independent stakeholders, is needed to gather information on  
4 state government property in order to create an accurate inventory of state  
5 government property, including buildings, building systems, supporting  
6 technology, and data,  
7

8 NOW THEREFORE,

9 BE IT PROPOSED BY THE JOINT COMMITTEE ON ADVANCED COMMUNICATIONS AND  
10 INFORMATION TECHNOLOGY OF THE NINETY-SECOND GENERAL ASSEMBLY OF THE STATE OF  
11 ARKANSAS:

12 THAT the Joint Committee on Advanced Communications and Information  
13 Technology conduct a study to:

14 (1) Create a current inventory of state government buildings,  
15 building systems, supporting technology, and data;

16 (2) Assess the status of state cybersecurity measures in place  
17 to protect state government buildings, building systems, supporting  
18 technology, and data against cyberattacks; and

19 (3) Determine the best practices and establish standards for  
20 state building cybersecurity measures that may be implemented to increase  
21 state building cybersecurity and protect state government interests.  
22

23 BE IT FURTHER PROPOSED THAT the study identify:

24 (1) The exact number of buildings owned or leased by the state,  
25 including the square footage of each building and current cybersecurity  
26 systems in place in and around each building;

27 (2) The personnel who are responsible for maintaining each  
28 building and providing cybersecurity services within and around each  
29 building;

30 (3) The presence of any other cybersecurity systems connected to  
31 any state government online system or network, including without limitation  
32 HVAC systems and electrical systems; and

33 (4) Relevant stakeholders, including quasi-independent  
34 stakeholders, in order to recommend potential solutions to cybersecurity  
35 vulnerabilities and the cost impact of those proposed solutions.  
36

1 BE IT FURTHER PROPOSED THAT the study review and analyze:

2 (1) Current state readiness to respond to a hypothetical  
3 cyberattack;

4 (2) Existing backup systems to state government building  
5 systems, supporting technology, and data and how backup data is stored and  
6 compares to the original data; and

7 (3) Any other pertinent information related to increasing state  
8 cybersecurity and protecting state government property, including state  
9 government buildings, building systems, supporting technology, and data.

10  
11 Respectfully submitted,

12  
13  
14  
15 Representative Stephen Meeks  
16 District 67

17  
18  
19  
20 Senator Mark Johnson  
21 District 15
