

MOTION

I move that the Joint Adequacy Evaluation Oversight Subcommittee recommend the adoption of a funding mechanism for transportation costs, using a formula to be studied and developed by the Joint Adequacy Evaluation Oversight Subcommittee based on fair and essential cost of transportation. The purpose of adding a fair and essential transportation funding mechanism is to assist those school districts whose documented student transportation costs exceed the amount of funding currently provided in the funding matrix for this purpose and to establish accountability between present funding and fair and essential transportation costs in all districts.
