State of Arkansas
93rd General Assembly
Regular Session, 2021

By: Senator M. Johnson

For An Act To Be Entitled
AN ACT TO PROVIDE FOR THE SALES TAX TREATMENT OF
BROADBAND EQUIPMENT; TO EXEMPT BROADBAND EQUIPMENT
FROM SALES TAX WHEN THE EQUIPMENT IS INSTALLED IN A
RURAL AREA; AND FOR OTHER PURPOSES.

Subtitle
TO EXEMPT BROADBAND EQUIPMENT FROM SALES
TAX WHEN THE EQUIPMENT IS INSTALLED IN A
RURAL AREA.

BE IT ENACTED BY THE GENERAL ASSEMBLY OF THE STATE OF ARKANSAS:

SECTION 1. Arkansas Code Title 26, Chapter 52, is amended to add an
additional subchapter to read as follows:

Subchapter 17 — Arkansas Broadband Technology Act

26-52-1701. Title.

This subchapter shall be known and may be cited as the “Arkansas
Broadband Technology Act.”

26-52-1702. Legislative findings and intent.
(a) The General Assembly finds that:
(1) The long-standing telecommunications policy of this state
has been to ensure that all citizens have access to telephone service and
that, due to the increasing reliance on access to computer information for
services, jobs, housing, and other necessities, this policy should be
broadened to include high-speed access to the internet;

(2)(A) Arkansans’ ability to access the internet in all parts of the state is critical for:

(i) Arkansas to remain competitive in the fields of business and education; and

(ii) State and local governments to provide services, both now and in the future.

(B) Arkansans’ ability to access the full potential of the Internet requires having the most advanced telecommunications infrastructure; and

(3) The growth of high-speed access to the Internet has occurred predominately in areas of this state with higher population density and development, which has led to a “digital divide” between areas of the state with less population density and development;

(b) The intent of this act is to:

(1) Increase access to high-speed internet in areas with less population density and infrastructure development; and

(2) Provide certain tax incentives to businesses that install and manage equipment to enable high-speed access to the internet.

As used in this subchapter:

(1) “Broadband equipment” means the infrastructure, materials, and other facilities designed to provide regulated or nonregulated connectivity to a high-speed, high-capacity transmission medium that can carry signals from multiple independent network carriers:

(A) Over electric power lines, communication lines, antennas, or related facilities, whether above or below ground; or

(B) Wirelessly; and

(2) "Rural area" means:

(A) An unincorporated part of an Arkansas county; or

(B) A municipality or town in Arkansas that has a population of less than two thousand five hundred (2,500) people according to the most recent federal decennial census.

26-52-1704. Sales tax exemption.
(a) The gross receipts or gross proceeds derived from the purchase of broadband equipment capable of providing high-speed internet access to customers in a rural area are exempt from the gross receipts tax levied by this chapter and the compensating use tax levied by the Arkansas Compensating Tax Act of 1949, § 26-53-101 et seq.

(b) The Department of Finance and Administration shall promulgate rules to implement the tax exemption created under this subchapter.

SECTION 2. EFFECTIVE DATE. Section 1 of this act is effective on the first day of the second calendar month following the effective date of this act.
