(4)	03-25-2011	Arkansas Crime Information Center/ Field Services Division	The state of Arkansas acknowledges the significance of a statewide automated victim notification system. To inform and notify victims of crimes across the state, accurate and consistent data is needed via an interface to the VINE system from the various local agencies throughout Arkansas. The assurance of reliable interfaces is one of the most significant challenges with the Arkansas VINE System. The ability to measure the effectiveness of the VINE system and registered user satisfaction on an ongoing basis is also a desirable outcome. The old technology that is currently being used for these local interfaces has proven to be troublesome and is not a desirable method for detecting local interface problems. The ability to improve the stability of the local interfaces	Statewide	U.S. Office of Justice Programs	Federal Applicant State Other Total \$1,000,000.00 \$1,000,000.00 \$2,000,000.00

			and the supportability of the system is needed. The ability to exchange information via the US DOJ National Information Exchange Model (NEIM) is also a desired outcome of the interface redeployment. An enhancement grant to deploy 34 agency interfaces will result in more reliable technology and optimal performance of the interfaces for the sake of informing and notifying victims and survivors of the State of Arkansas. The 34 interfaces total over 65% of the offender population in the State of Arkansas. Also, when you spend money to create and enhance a program as important as the Arkansas VINE System it is important to inform the public that this service exists.
