4. Arkansas Economic  
Development Commission  
/ TANF Block

A large number of students do not follow a traditional path and therefore have challenges to success in the workplace. The State of Arkansas has recognized this challenge, and has empowered ADWS and AEDC, along with other state agency partners, to design, develop and implement innovative programs to meet these students' needs. The target population for this project is middle and high school youth and out-of-school youth ages 14-19. The project will consist of providing career training educational resources to schools and provide businesses with the tools to help train and educate such youths. Transitioning from school and educational system to a career is a multi-generational challenge that has confronted families, state policy, economic and workforce development agencies
