

## Arkansas Legislative Task Force – Key Questions for 9/20/2017 Meeting

- What key industries and/or occupations should Arkansas be focusing its workforce system on filling (in the short, medium, and long term)?
- What gaps exist between the skills and education needed for those key jobs and the workforce and education pipeline?
- Whose responsibility is it to address these gaps?
  - What partners and programs comprise the “system”?
- How do we know if the “system” is functioning at its optimal level?
- What additional data and information should be regularly available in order to measure the “system’s” effectiveness?
