# PACE

PACE means

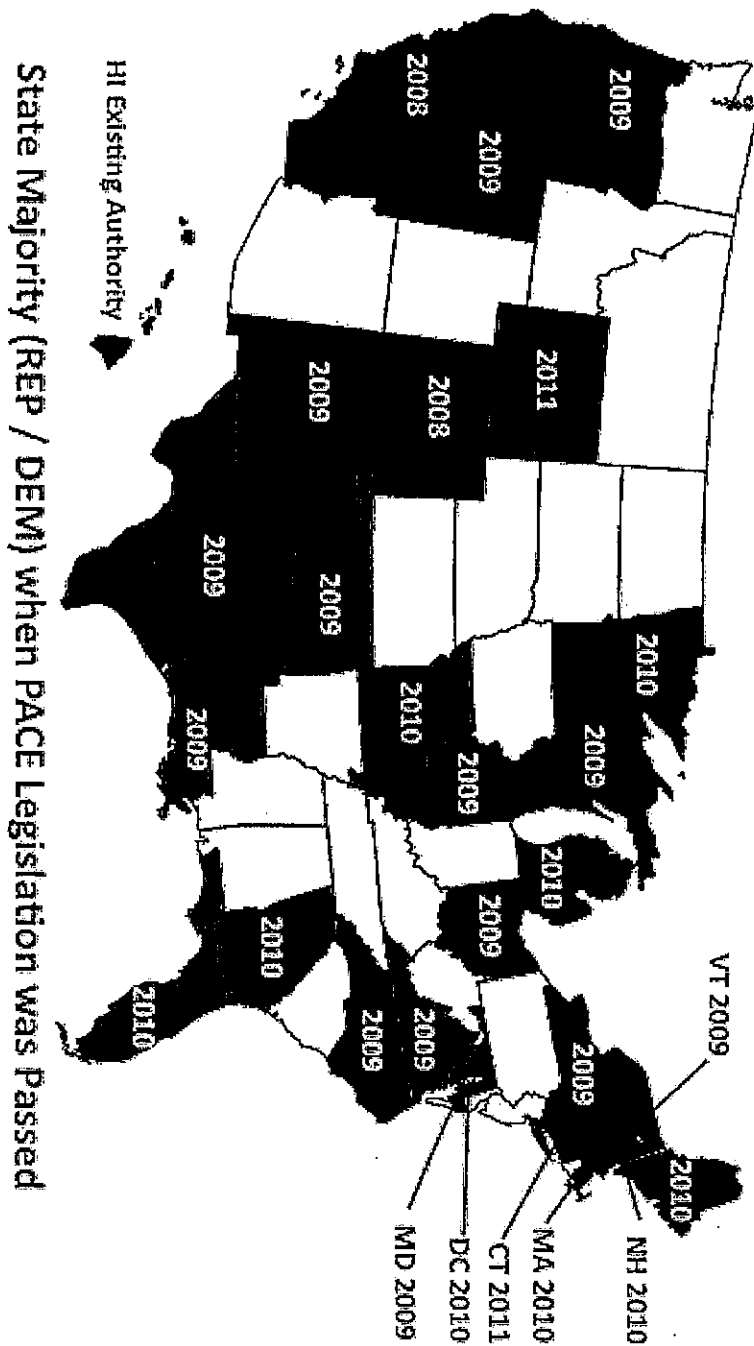

Property Assessed Clean Energy,

Local government/community initiatives that creates permanent private sector jobs in America and makes our nation more energy secure by promoting energy efficiency and renewable energy projects in our homes and commercial buildings.

PACE is voluntary and community based, not mandated by Washington. It provides long term funding from private capital markets at low cost and needs no government subsidies or taxes.

PACE raises property values by making buildings less expensive to heat and cool and it enjoys broad bipartisan support nationwide at state and local levels.

PACE enabling legislation has been adopted by a total of 27 states.

State Majority (REP / DEM) when PACE Legislation was Passed

## What is PACE ?

PACE is a bipartisan local government initiative that allows property owners to finance energy efficiency and renewable energy projects for their homes and commercial buildings. Interested property owners opt-in to receive financing for improvements that is repaid through an assessment on their property taxes for up to 20 years.

PACE financing spreads the cost of energy improvements such as weather sealing, insulation, energy efficient boilers and cooling systems, new windows, and solar installations over the expected life of the measures and allows for the repayment obligation to transfer automatically to the next property owner if the property is sold.

PACE is unique because it:

- Creates badly needed local jobs.
- Uses private capital, not taxes or government subsidies.
- Saves money for building owners and increases property values
- Is voluntary – not a government mandate.
- Promotes energy security without driving up energy costs.
- Avoids the need to build costly new power plants.
- Reduces air pollution.

## Why PACE ?

PACE solves two key barriers to increased adoption of energy efficiency and small scale renewable energy:

1. High upfront costs.
2. Fear that project costs won't be recovered prior to a future sale of the property.

Basic energy efficiency measures can cut energy costs by up to 35%

Annual energy savings will typically exceed the cost of PACE assessments;

The upfront cost barrier actually turns into improved cash flow for owners.

Like OTHER property based assessments, PACE assessments stay with a property upon sale, until they are fully repaid by future owners who continue to benefit from the improvement measures.

PACE programs provide a way for local communities to sponsor programs that meet their individual needs.

## Economic Benefits Of PACE

If 1% of U.S. homes participated in PACE, the projects would generate\*:

- 226,000 jobs;**
- \$42 billion in economic output;**
- \$4.2 billion in combined Federal, state and local tax revenue.**

\*"Economic Impact Analysis of Property Assessed Clean Energy Programs (PACE). Study conducted by EcoNorthwest, May 2011.

## Benefits of PACE

○ PACE promotes energy efficiency in ways that are good for America, our municipalities, building owners and mortgage lenders.

### Benefits to Our Nation

- Creates permanent private sector jobs – nationwide and across a range of skills.
- Uses private capital for funding – NO taxes or government subsidies.
- Saves owners money – lower operating costs make their buildings more valuable.
- Promotes energy security – without federal regulation or taxes that drive up energy costs.
- Avoids costly power plants – increasingly difficult to site.
- No budgetary impact - voluntary participants pay all fees and expenses.

### Benefits to Municipalities

- Permanent local jobs – as many as 10 per \$1 million in spending makes communities stronger.
- No debt or credit risk - bonds are secured solely by the assessment payments of opt-in participants.
- Saves money for residents – PACE is the only assessment that creates positive cash flow.
- Voluntary participation – building owners who opt-in if they decide healthier.

## Benefits to Property Owners

- No upfront cost - PACE financing spreads costs over the life of improvements.
- Owners save money - programs are designed to ensure annual savings exceed assessments.
- Assessment transfers upon sale - new owner benefits from improvements that stay with the property.
- Safety - assured by best practices and guidelines established to protect all program participants.
- Broad applicability – residential and commercial properties can use PACE.
- Voluntary – only opt-in participants pay assessments (and benefit from improvements).
- Comfort – efficient buildings are healthier and more comfortable.

## Benefits to Existing Lenders

- Lowers default risk – improved cash flow makes it easier for owners to pay mortgages.
- Improves Loan-to-Value Ratio - buildings that are less expensive to operate are worth more.
- Safety and soundness - best practices framework developed to meet all participants' concerns.
- Lien risk minimized - non-acceleration of assessments in default limits senior lien PACE exposure to less than \$200 per home, on average.

# Strong Bipartisan Support Continues for HR 2599

## Protects Taxpayers and Banks

- Homes must have 15% or more positive equity to qualify.
- Projects are limited to 10% of the home value.
- Prohibits acceleration of non-delinquent payments.
- Projects must show a positive cash flow savings compared to the cost of the PACE investment; i.e., the estimated utility bill savings must exceed the assessment payments.
- Requires an energy audit or feasibility study prior to approval.
- Requires that the work must be performed by accredited professionals.
- Requires that, prior to levying a PACE assessment, the local government determine that there are no signs of an inability to pay.

## WHAT OTHERS ARE SAYING:

CONGRESSWOMAN NAN HAYWORTH (R-NY) "PACE programs allow homeowners to make energy-saving modifications on their houses through a voluntary assessment on their property, at no cost to local taxpayers. Our bill facilitates participation by homeowners in states with PACE programs, which will promote conservation, energy savings and job creation."

CONGRESSMAN MIKE THOMPSON (D-CA) "PACE promotes energy efficiency in ways that are good for our country, economy, and environment, saving property owners money by lowering energy costs and more importantly, creating jobs without taxes or government subsidies. Congresswoman Hayworth, Congressman Lungren, and I are committed to protecting PACE for the future."

GOV BILL RITTER (D-CO) "PACE is already creating economic opportunity, energy savings, and environmental benefits through the retrofit of residential and commercial building stock."

ADAM HASNER (R-FL) "PACE provides a no-cost to taxpayers, no-mandate, consumer opt-in approach to bringing clean energy technology to homeowners and businesses. PACE will help create jobs for Floridians at a critical time when we are working to get Florida's economy back on track." Adam Hasner led passage of Florida's PACE legislation as Majority Leader of the State House of Representatives

# PACENOW

Sonoma County Energy Partnership Upgrade  
 and  
 Independence Program with California

Monthly PACE and Municipal Open Market Forum Financing

Wednesday, December 14, 2011, 12:00 - 1:00 p.m. PST

## AGENDA

1. Welcome and Introductions
2. Sonoma County Program and FHFA Litigation Updates (Sonoma County Energy Independence Program)
3. National PACE Program and Legislation Updates (David Gabrielson, PACENOW)
4. PACE and Open Market Financing (John Kinney and Craig Hill, Clean Fund)
  - a. Accessing the Open Market - Considerations for Municipalities
  - b. Sonoma County Case Study: the Sonoma Mountain Village Solar Project
  - c. The Future of Open Market Financing and PACE Learned
  - d. The Future of Open Market Financing and PACE
5. Question and Answer Session
6. January and February Forum Preview
