Appendix B: Local Food Vendors	23
Appendix C: Reported Local Farm and Food Products	25

Term Definitions

Institute: Institute of higher education (college, university), school district, early childhood education facility, state agency or other entity of the state, Medicaid funded/provider (senior care center, residential treatment facility, skilled nursing facility, etc.), public library, and other designees under contract within Arkansas.

Local: Food products that are grown in Arkansas, packaged and processed in Arkansas, or both.

Median: The median is included in this report as a general representation of the central measure or middle number if the values were lined up sequentially from smallest to largest. Mean (also known as average) was not included because of the wide range in the reach and size of the institutions reporting.

Complete/Partially Complete: Responses were considered partially complete if some information was provided but the respondent did not provide both their total and local food budgets.

2025 Responses at a Glance

Institution Participation	Total
Total institutions identified:	1,263
Responded to initial screening:	577 (45.7%)
Did not respond to screening:	686 (54.3%)
Met criteria for reporting:	485 (84.1%)
Did not meet criteria:	92 (15.9%)
Key Findings from FY 2025	
Number of institutions reporting total food budget:	492
Reported total food budget:	\$281,453,363.11
Reported median food budget:	\$280,000.00
Number of institutions reporting local food budget:	492
Number of institutions purchased local food:	441
Reported total spent on local food:	\$84,767,632.39
Institutions meeting criteria median local food spent:	\$44,160.01
Reported median local food spent:	\$43,631.21
Median percentage of total food budget on local food:	17.2%
Reported meeting 20% of local food goal:	222
Common vendors in each category: (Distributor/Wholesaler, Farms, Grocers, Processors)	Ben E. Keith, Sysco, Natural State Beef, Wahrmund Farms, Harps Food, Walmart, Hiland Dairy, and Tyson Foods
Common products purchased:	Milk, apples, beef, and chicken
Top vendor preferences:	Purchase local through their wholesale distributor like Sysco or Ben E. Keith and work directly with a producer, grower, farmer, or processor
Top food preferences:	Meat, protein, eggs, and dairy
Top motivators:	Higher quality products; meeting the requirements of the Local Food Act
Top barriers:	Higher cost for local food or farm products; lack of information about where to purchase local food or farm products

For detailed information, please refer to the full 2025 Local Food, Farms, and Jobs Act Annual Report that follows.

Background

The Local Food, Farms, and Jobs Act (Local Food Act) was enacted in 2017 to create, strengthen, and expand local farm and food economies throughout the state. The Local Food Act also intended to support and encourage the procurement of local farm or food products as a significant portion of all food products.

The Local Food Act of 2017, codified at Ark. Code Ann. § 15-4-3801, required institutions that received at least \$25,000 from the State of Arkansas for the purchase of food products to set a goal to ensure that 10% of the amount budgeted for food purchases in fiscal year 2018 was spent on local farm and food products. The goal increased to at least 20% for subsequent fiscal years.

The law also required institutions to submit information annually about their local food procurement to the Bureau of Legislative Research. The Bureau of Legislative Research was instructed to submit an annual report to the Governor and the co-chairs of the Legislative Council, or the co-chairs of the Joint Budget Committee, if the General Assembly was in session.

The Bureau of Legislative Research fulfilled the reporting requirements in 2017 and 2018 by sending a form to institutions meeting the definition as defined in the Local Food Act. In 2017, the Bureau of Legislative Research surveyed 130 institutions, and 103 (79.2%) responded. Of the 103 responses, 12 (11.7%) of the institutions reported they met the reporting criteria and 91 (88.3%) of the institutions reported that they did not meet the reporting criteria because they did not receive at least \$25,000 from the state to purchase food or food products. Based on the data received in fiscal year 2017, the median percentage of the food budget that was spent on local farm and food products was 8.0%.

In 2018, the Bureau of Legislative Research surveyed 146 institutions, and 55 (37.7%) responded. Of the 55 responding institutions, eight (14.5%) met the criteria for reporting and 47 (85.5%) reported that they did not meet the reporting requirements. Based on the data received in fiscal year 2018, the median percentage of the food budget that was spent on local farm and food products was 11.0%. A copy of the 2017 and 2018 annual reports can be found on the Department's website at <https://agriculture.arkansas.gov/resources/local-food-farms-and-jobs-act/>.

Significant changes were made to the Local Food Act during the 2019 legislative session of the Arkansas General Assembly by Act 796 of 2019. The amendment requires institutions that receive at least \$25,000 a year from the state and offer a food service program to report annually on their local food procurement. It increased the local food procurement goal from 20% of the institution's purchases of food products to be spent on local farm and food products to at least 20%.

The amendment expanded the number of institutions required to report by changing the definition of "institution" to include institutes of higher education, childcare facilities, after-school programs, state parks, state agencies, and designees under contract that receive at least \$25,000 a year from the state. Further, it expanded the duties of a program coordinator position to work with distributors

and assist producers in gaining access to institutions, distribution networks, and food service operators. Finally, the amendment placed the responsibility to collect and report on local food procurement data with the Arkansas Department of Agriculture (Department) and required the annual report to be submitted to the House and Senate Committees on Agriculture, Forestry, and Economic Development. A copy of Act 796 of 2019 can be found on the Department's website.

In 2019, the Department partnered with the Access to Healthy Foods Research Group at Arkansas Children's Research Institute and the Office of Community Health and Research at the University of Arkansas for Medical Sciences (UAMS) to prepare the annual report. An online survey was distributed to 1,980 institutions identified as receiving funding from the state at some level. Of the 1,980 who received the survey, 454 (22.9%) completed it. Of those, 176 (38.8%) met the criteria for reporting, and 278 (61.2%) did not meet the criteria for reporting because they did not receive state funding or did not operate a food service program. Based on the data received in fiscal year 2019, the median percentage of the food budget spent on local farm and food products was 15.0%.

In 2020, the Department partnered with the Office of Community Health and Research at UAMS to prepare the annual report. An online survey was distributed to 2,322 institutions identified as receiving funding from the state at some level. Of the 2,322 institutions who received the survey, 673 (29.0%) completed it. Of those, 352 (52.3%) met the criteria for reporting, and 321 (47.7%) did not meet the criteria for reporting because they did not receive state funding or did not operate a food service program. Based on the data received in fiscal year 2020, the median percentage of the food budget spent on local farm and food products was 12.0%.

In 2021, in partnership with the Office of Community Health and Research at UAMS, an online survey was distributed to 1,206 institutions identified as receiving funding from the state at some level. Of the 1,206 institutions that received the survey, 579 respondents (48.0%) completed it. Of those, 449 (77.5%) met the criteria for reporting, and 130 (22.5%) did not meet the criteria for reporting because they did not receive state funding or did not operate a food service program. Based on the data received in fiscal year 2021, the median percentage of the food budget spent on local farm and food products was 20.2%.

In 2022, the Department, in partnership with the Office of Community Health and Research at UAMS, distributed an online survey to 1,267 institutions identified as receiving funding from the state. Of the 1,267 institutions that received the survey, 612 respondents (48.3%) completed it. Of those, 484 (79.1%) met the criteria for reporting, and 128 (20.9%) did not meet the criteria for reporting because they did not receive state funding or did not operate a food service program. Based on the data received in fiscal year 2022, the median percentage of the food budget spent on local farm and food products was 16.6%.

In 2023, the partnership with the Office of Community Health and Research at UAMS ended due to the end of a United States Department of Agriculture (USDA) grant. Therefore, the Department became the sole entity responsible for managing the Local Food Act, including the report distribution, data collection, data analysis, and development of the FY 2023 annual report. The online survey was distributed to 1,325 institutions identified as receiving funding from the state. Of

the 1,325 institutions that received the survey, 627 respondents (47.3%) completed it. Of those, 509 (81.2%) met the criteria for reporting and 118 (18.8%) did not meet the criteria for reporting because they did not receive state funding or did not operate a food service program. Based on the data received in fiscal year 2023, the median percentage of the food budget spent on local farm and food products was 19%.

In 2024, the Department sent the online survey to 1,397 institutions identified as receiving funding from the state. Of the 1,397 institutions that received the survey, 658 (47.1%) respondents completed it. Of those, 523 (79.5%) met the criteria for reporting and 135 (20.5%) did not meet the criteria for reporting because they did not receive state funding or did not operate a food service program. Based on the data received in fiscal year 2024, the median percentage of the food budget spent on local farm and food products was 17.4%.

Copies of all previous annual reports can be found on the Department's website at <https://agriculture.arkansas.gov/resources/local-food-farms-and-jobs-act/>.

Findings from 2025 Local Food, Farms, and Jobs Act Survey

The Arkansas Department of Agriculture (Department) was the sole entity responsible for managing the Local Food, Farms, and Jobs Act (Local Food Act), including the report distribution, data collection, data analysis, and development of the FY 2025 annual report. The reports are recorded as submitted.

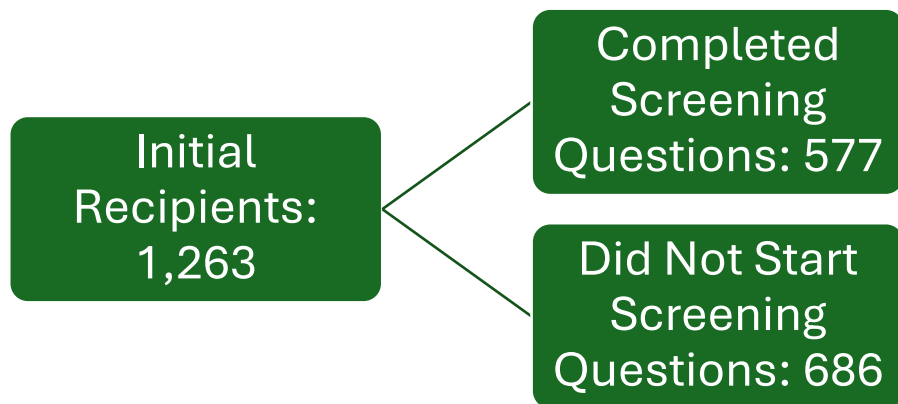

The Department initiated the 2025 reporting requirements by gathering contact information from the Arkansas Department of Finance and Administration, Arkansas Department of Education, and Arkansas Department of Human Services for all potentially eligible institutions and to refine the recipient list based on 2024 responses.

In July 2025, the survey was distributed to 1,263 institutions identified as receiving funding from the state or operating a food service program. Institutions were given until September 12, 2025, to complete the survey. Follow-up emails were sent throughout the reporting period to remind institutions to complete the survey. The Department provided technical assistance to the institutions via email and phone communications while the survey was open.

In July 2025, the Department updated the Local Food Act webpage. The webpage contains information about the Local Food Act, including a frequently asked questions document, an eligibility infographic, copies of the annual reports from 2017–2024, and a webinar recording that provides an overview of the Local Food Act.

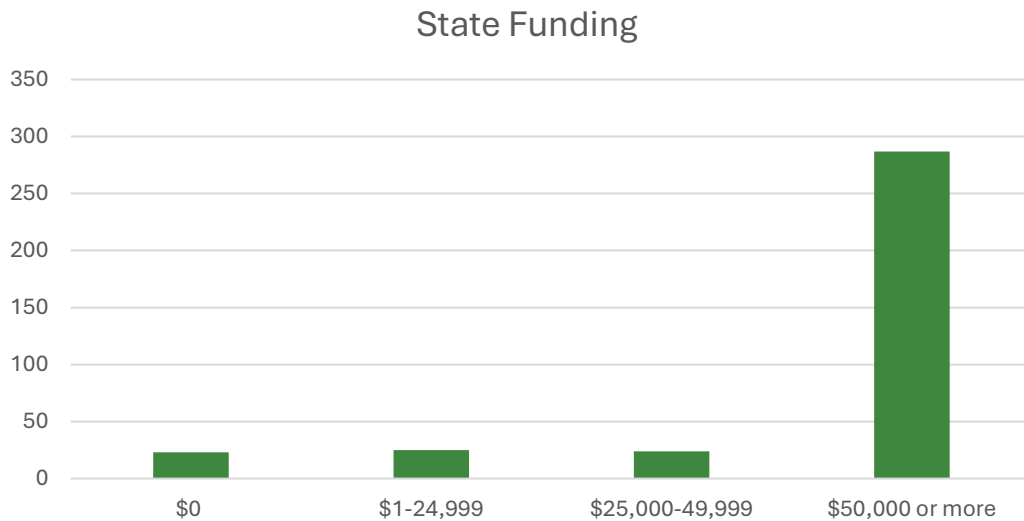

Screening Questions

The goal of the first set of questions was to determine if the recipient met the criteria for reporting on local food procurement. To meet the reporting requirements, institutions must receive at least \$25,000 per year from the state and offer a food service program. Of the 1,263 institutions identified as receiving funding from the state or offering a food service program, 577 (45.7%) respondents completed the screening questions, and 686 (54.3%) institutions did not start the screening questions.

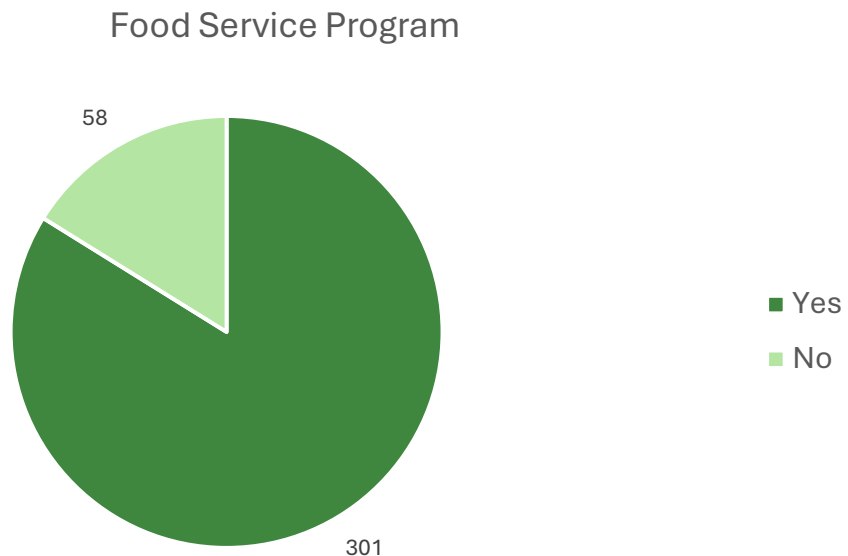

State Funding

The first question asked institutions how much state funding they received in fiscal year 2025, and 359 institutions responded. Of the 359 respondents, 23 (6.4%) institutions reported not receiving any state funding, 25 (7.0%) institutions reported receiving \$1–\$24,999 in state funding, 24 (6.7%) institutions reported receiving \$25,000–\$49,999 in state funding, and 287 (79.9%) institutions reported receiving greater than or equal to \$50,000 in state funding.

Food Service Program

The second question asked institutions whether or not they offered a food service program, and 359 institutions responded. A total of 301 (83.8%) reported having a food service program, and 58 (16.2%) reported not having a food service program.

Respondents Eligible for Full Report

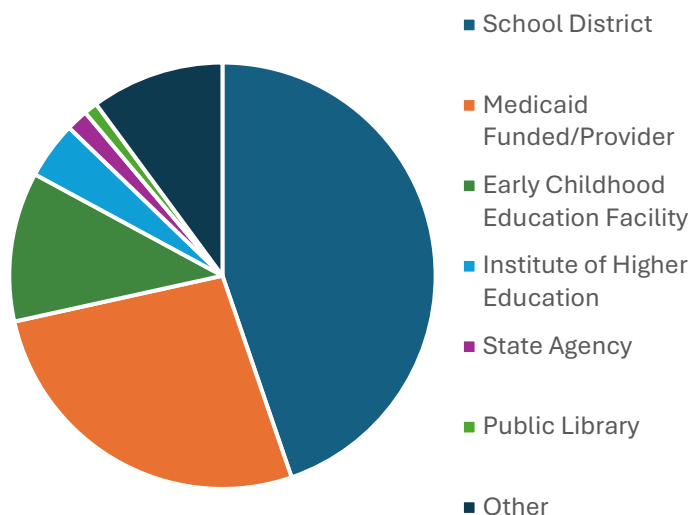

Based on the answers to the state funding and food service program questions, 485 (84.1%) institutions met the criteria for reporting on local food procurement goals and 92 (15.9%) institutions did not meet the criteria for reporting because they did not receive state funding, did not operate a food service program, or both.

Of the 485 respondents who met the criteria for reporting, 485 (100.0%) completed the report by providing their total food budget and their total local food budget, and answers to some or all additional questions. A total of 46 institutions indicated that they did not purchase local food in FY 2025. All information from institutions that completed the report and submitted a complete report was included in the analysis of each question and is reported below. For a complete list of respondents, please see Appendix A.

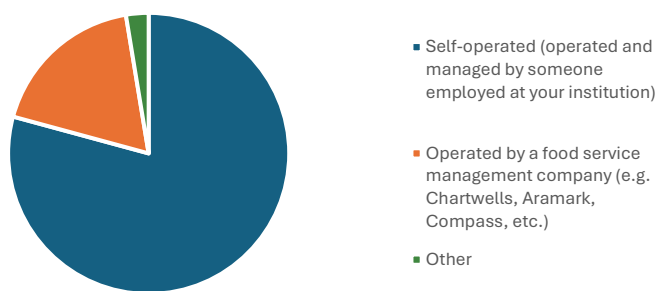

Type of Institution

Of the 485 respondents who met the criteria for reporting, 485 respondents classified their institutions based on the categories detailed in the Local Food Act. Among them, 217 (44.7%) are school districts, 130 (26.8%) are Medicaid-funded programs and providers, 55 (11.3%) are early childhood education facilities, 21 (4.3%) are institutes of higher education, eight (1.6%) are state agencies, five (1.0%) are public libraries, and 49 (10.1%) are other types of institutions, including out-of-school programs, senior programs, and community programs.

Type of Institution

Type of Food Service Program

Type of Food Service Program

Institutions were asked to provide information about how their food service program was managed. Of the 385 respondents to this question, 305 (79.2%) self-operate their food service program, 70 (18.2%) use a food service management company, and 10 (2.6%) reported an “Other” category. Some of the other ways food service programs were

operated include working with other local partner institutions and a hybrid of self-operation and working with other food service programs.

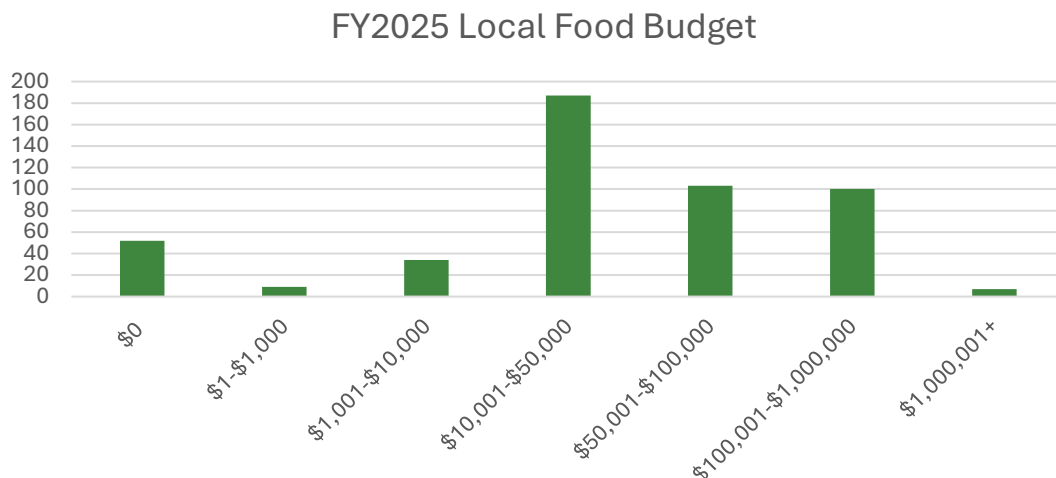

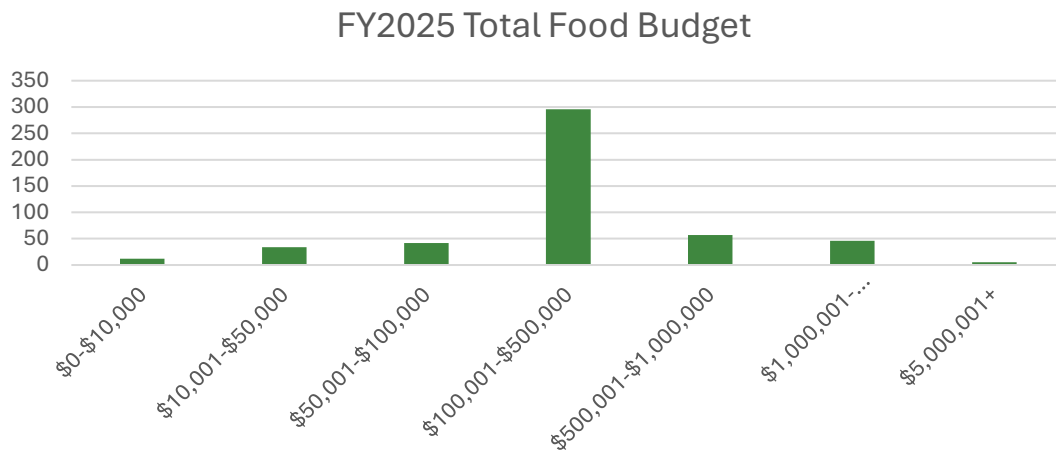

Food and Beverage Procurement

FY 2025 Total Food Budget

Institutions were asked to report their annual food budget, and 492 institutions reported their food budget by providing the amount of funding they spent to purchase food products. The responses ranged from spending \$0.00 to \$32,288,194.65 annually with the middle amount (median) of the range at \$280,000.00. All responses together totaled \$281,453,363.11.

FY 2025 Total Local Food Budget

A total of 492 institutions reported the amount of money used to purchase local farm and food products. The responses ranged from spending \$0.00 to \$32,288,194.65 annually with the median of the range at \$43,631.21. Institutions that met the criteria spent a median of \$44,160.01 annually. All responses together totaled \$84,767,632.39.

Percentage of FY 2025 Total Food Budget Spent on Local Food

A total of 492 institutions reported their total food budget and dollars spent on local farm and food products. A total of 441 institutions reported purchasing local food. The percentage of dollars spent on local farm and food products was calculated for each institution. The median percentage of dollars spent by reporting institutions on local food was 17.2%. The median percentage of dollars spent on local food by institutions that met the criteria was 17.3%. A total of 222 institutions reporting met the Local Food Act goal of 20% or more of their local food budget for FY 2025 being spent on local food. A total of 219 institutions that met the criteria met the Local Food Act goal of 20% or more of their local food budget for FY 2025 being spent on local food.

Vendors

Respondents who reported purchasing local farm and food products were asked to provide a list of vendors from whom they purchased those products. Vendors included distributors and wholesalers, farms, grocers, processors, and others.

The most frequently used vendors for each category were Ben E. Keith, Sysco, Natural State Beef, Wahrmond Farms, Harps Food, Walmart, Hiland Dairy, and Tyson Foods. For a full list of vendors, see Appendix B.

Products

Institutions that reported purchasing local farm and food products were asked to provide a list of the products purchased. The categories reported were dairy; fruit; herbs; meat, protein, and eggs; non-dairy beverages; processed and prepared foods; seasonings, sauces, condiments, and jams; vegetables; and whole grains, seeds, and nuts.

The most commonly reported local farm and food products purchased were milk, apples, beef, and chicken. For a full list of products, see Appendix C.

Institution Commitment

The Local Food Act requires each institution to submit a policy statement signed by the executive head of the institution expressing a commitment to comply with the Local Food Act in the following fiscal year. A total of 347 institutions submitted the required policy statement. The policy included the local procurement goal of at least twenty percent (20%) of the institution's purchases of food products is spent on local farm and food products. For a full list of those who submitted a policy statement, see Appendix A.

Local Vendor Preference

Institutions were asked how they plan to meet their local procurement goals. They were able to select their vendor preference from a list of multiple categories, and 482 institutions responded. Of those, 367 indicated they intend to purchase local through their wholesale distributor like Sysco or Ben E. Keith; 227 institutions intend to work directly with a producer, grower, farmer, or processor; 74 reported wanting to work with a food hub; 29 reported that they intend to grow products on-site;

and 24 reported wanting to work with a cooperative. Additional answers included examples such as utilizing local farms and working with local vendors, distributors, and food banks to identify local products.

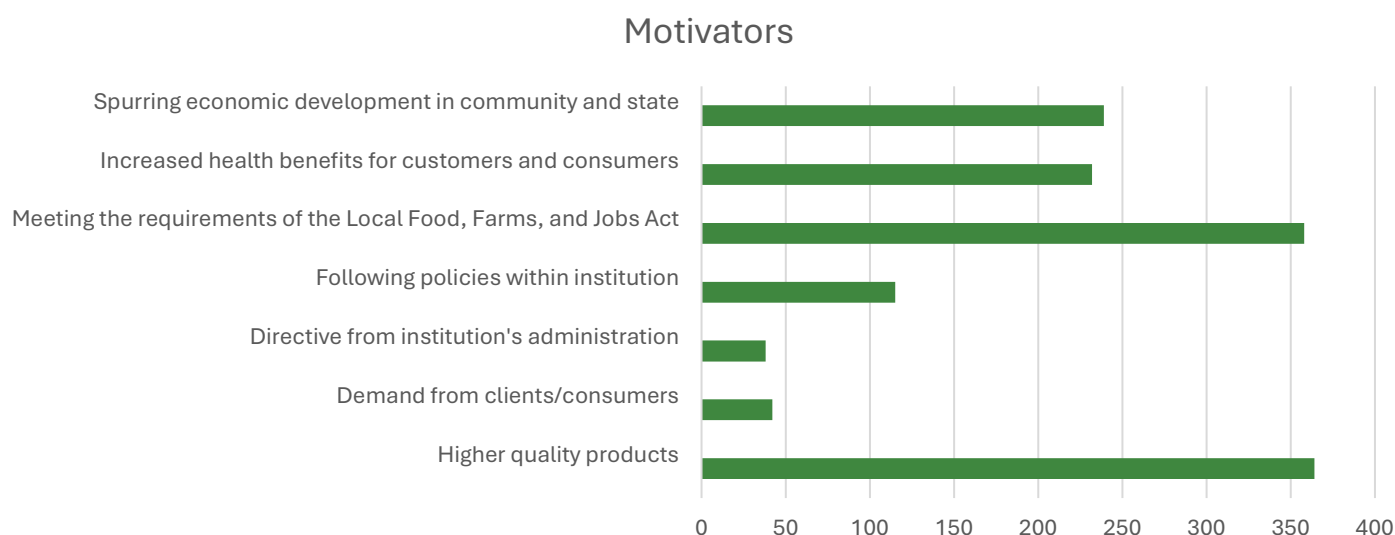

Local Food Preference

Institutions were asked what product categories they were interested in purchasing. They were able to select their food preferences from a list of multiple categories, and 473 institutions responded. The results are as follows: 358 were interested in meat, protein, and eggs; 353 in dairy; 341 in vegetables; 305 in fruit; 194 in processed and prepared food; 158 in whole grains, seeds, and nuts; 102 in non-dairy beverages; 100 in seasonings, sauces, condiments, and jams; and 89 in fresh herbs.

Motivators and Barriers

Motivators for Purchasing Local Food

Respondents were asked to select their top three motivators for procuring local farm and food products, and 488 responded. Of those, 364 identified higher quality products, 358 identified meeting the requirements of the Local Food Act, 239 identified spurring economic development in their community and state, 232 identified increased health benefits for customers and consumers, 115 identified following policies within their institution, 42 identified demand from clients or customers, and 38 identified directive from their institution's administration as motivators for purchasing local foods.

Barriers to Purchasing Local Food

Respondents were asked to select their top three barriers to procuring local food and farm products, and 488 responded. Of those, 326 identified higher costs for local food or farm products, 309 identified a lack of information about where to purchase local food or farm products, 244 identified a lack of supply to meet their needs, 187 identified a lack of clearly labeled local farm or

farm products, 141 identified a lack of knowledge about how to purchase local food or farm products, 109 identified an inability to justify purchasing local food or farm products over comparable non-local products, 29 identified that food purchased locally does not meet the food safety requirements for their program, and 18 identified COVID-19 and the resulting supply chain issues as barriers to purchasing local food.

Facilitators to Purchasing Local Food

Institutions were asked to select which tools helped facilitate procuring local foods in FY 2025, and 439 institutions responded. Of those, 247 identified positive relationships and communication with procurement partners, 209 identified successful past local purchasing, 124 identified the Arkansas Grown map, 84 identified the Department's Local Food Act infographic, 77 identified institutional policies and contracts that support local purchasing, 53 identified the Department's informational webinar, and 21 identified annual reports from previous years.

Conclusion

The Local Food, Farms, and Jobs Act (Local Food Act) is a “farm to institution” policy, which aims to increase the purchase of locally grown and processed food products in institution-based food service programs across the State of Arkansas.

Procuring products from within the state spurs local economic development by engaging Arkansas farms and producers. In addition, farm to institution practices can provide healthier, fresher food choices to students, employees, and others eating in these institutions while also engaging and educating consumers about the value of eating healthy, local food. Potential benefits of farm to institution practices range from creating a stable market for local products, increasing participation in meal programs, and increasing community awareness of local farming and food systems.

Based on the FY 2025 data, the Arkansas Department of Agriculture (Department) will work to respond to the motivators, barriers, and facilitators identified by institutions. The 2026 goals for the Department are:

- Continue to refine the identification of which institutions in the state meet the eligibility requirements for reporting based on receiving at least \$25,000 from the state and offering a food service program;
- Continue to improve the reporting instrument based on key stakeholder feedback;
- Provide technical assistance to institutions, distributors, food hubs, and producers;
- Develop programs, resources, and tools that connect institutions to the local supply chain;
- Work with distributors to help them identify and market local farm and food products; and
- Work with farmers and producers to connect them to distributors, food hubs, and institutions.

Beyond the Local Food Act, the Department’s support for farm to institution includes a Farm to School and Early Childhood Education Program and the Arkansas Grown, Arkansas Made, and Homegrown by Heroes branding programs. The Department will continue to commit staff to support efforts to: 1) deepen our understanding of the stakeholder needs of farmers, aggregators, processors, distributors, institutional buyers, and consumers; 2) foster and support this network; and 3) share best practices identified in our state and across the country.

The Department is honored to support the goals of the Local Food Act and is pleased to submit the Local Food, Farms, and Jobs Act 2025 Annual Report. The Department appreciates the assistance from our partners who provided contact information for institutions to make this report possible.

Appendix A: Respondents

The Local Food, Farms, and Jobs Act (Local Food Act) requires a list of respondents to be identified and publicly listed. A total of 577 institutions responded to the screening questions that determined their eligibility to complete a full report. Of the 577 respondents, a total of 485 institutions met the criteria for full reporting, and 92 did not meet the criteria.

Respondents indicated their institution type and institutions are listed below based on the type they **self-selected**. Institutions that submitted a signed policy statement outlining their commitment to local food procurement have an asterisk (*) next to their name below. For a full list of non-responders, please contact LFFJAHelp@arkansas.gov.

Early Childhood Education Facility

Of the 76 respondents for early childhood education, 55 (72.3%) were eligible to complete the full report, and 21 (27.6%) did not meet the criteria for full reporting.
