

OFFICE OF STATE PROCUREMENT

1509 West Seventh Street, Suite300 Little Rock, Arkansas 72201-4222 Phone: (501) 324-9316 Fax: (501) 324-9311 http://www.arkansas.gov

Memorandum

To: Senator Bill Sample, Co-Chair

Representative Jim Dotson, Co-Chair

Arkansas Legislative Council

From: Edward Armstrong, State Procurement Director

Date: January 9, 2019

Subject: Alternative Fuel Vehicle Report

This report is provided in accordance with Ark. Code Ann. §19-11-217(c)(2)(B)(i), which requires the Office of State Procurement ("OSP") to report on the state's usage of alternatively fueled vehicles. The report addresses acquired vehicles that help to reduce the overall annual petroleum consumption by state agencies.

This report includes:

- (a) The number and type of alternative fueled vehicles used by each state agency (Attachment A);
- (b) The difference between the acquisition cost and operation of alternative fueled vehicles and comparable conventionally fueled motor vehicles (Attachment B);
- (c) An evaluation of the plan's success; and
- (d) Suggestions for modifying the plan.

The initial step taken by OSP was creating a state-wide contract for alternative and hybrid vehicles, beginning with the 2006 models. Each year since the inception of this contract, it has been modified to increase and encompass the market of available vehicles.

Number and Type of Alternative Fueled Vehicles Used by Each State Agency The number and type of alternative fuel vehicles is shown in Attachment A. As a point of reference, the total current number of vehicles in each agency fleet is shown in Attachment C.

The Difference Between the Acquisition Cost and Operation of Alternative Fueled Vehicles and Comparable Conventionally Fueled Motor Vehicles

The purchase of alternative fueled vehicles is based on available funding, the State's emphasis on the use of hybrid or alternative fueled vehicles, the availability of competitively priced vehicles and alternative fuels, and the active participation of the state agencies. There continues to be a significant purchase price difference between alternative fueled vehicles and

conventionally fueled vehicles. A comparison of acquisition cost, average gas mileage, annual gas costs and savings, based upon an average of \$2.45 per gallon of regular unleaded gasoline is provided on Attachment B. The format of this report has changed from previous reports, attempting to depict a closer equivalent comparison to the alternative fuel vehicle type, based on the awarded 2019 state vehicle contract.

Ark. Code Ann. §15-13-205 required the Department of Finance & Administration to implement a policy regarding the standard of biofuel usage, effective January 1, 2009. The policy states that when available and economically feasible, all State agencies are required to purchase diesel fuel that contains at least a minimum of two percent (2%) biofuels by volume for all State diesel powered motor vehicles, light trucks and equipment. The average diesel cost in 2018 was \$3.02 per gallon. This policy works in tangent with the desire to purchase alternative fueled vehicles to help reduce petroleum consumption by state agencies.

This report covers the twelve month period from October 1, 2017 through September 30, 2018, which corresponds closely with the annual new vehicle contract developed by the Office of State Procurement. State agencies order most of their new fleet vehicles between October and March. As of September 30, 2018, the state had 1,243 vehicles that fall into the alternative fueled category. This figure includes those alternative or hybrid fueled vehicles purchased from contracts developed and, also awarded by the Arkansas Department of Transportation. The current percentage of alternative fuel vehicles is 15.99% of the 7,772 vehicles in the state fleet as of September 30, 2018. The purchase of alternative fueled vehicles has kept abreast of what the market currently bears relating to the life cycle cost of both types of vehicles.

The 2018 vehicle contract issued by OSP included the following:

Hybrids:

Chrysler Pacifica Toyota Camry Toyota Prius Toyota Prius Prime Nissan.Leaf Chevrolet Malibu

Chevrolet Bolt Ford Police Pursuit Utility Vehicle

Bi-Fuel/CNG:

Ford F-250 Reg. Cab Ford F-250 Super CabFord F-250 Crew Cab

There are three Bi-Fuel vehicles that can use CNG or regular gasoline. The opening of more CNG fueling stations could help position the state to migrate to this type of vehicle as the purchase price becomes more competitive. The current purchase price of an alternative fueled vehicle and the limited availability of fueling stations have restricted the number of alternative fueled vehicles in the state's fleet. OSP plans to continue to provide offerings on the vehicle contract that will provide agencies a wider variety of alternative fueled vehicle options. However, the lack of adequate refueling infrastructure continues to be a problem as it makes refueling with alternative fuel a logistical challenge. Traveling greater distances in order to refuel may efface many of the benefits of greater fuel efficiency. Similarly, increased travel

required for refueling with alternative fuels may counteract, to some degree, the efficacy of reducing transportation related greenhouse gas emissions by switching to alternative fueled vehicles.

Suggestions for Modifying the Plan

Car sharing Pilot Program for Designated Agencies Car sharing is a type of car rental designed to be convenient for people who want to use cars for relatively short periods of time (as little as 15 minutes, usually a few hours, up to multiple days) and only pay for their usage (costs depend on how long you have a car and miles driven). Car sharing allows drivers to access vehicles conveniently located within their vicinity as needed. Drivers simply pick up and return their car to its specific (designated) parking location. Car sharing could eliminate the need to purchase as many vehicles because we would essentially only be buying the transportation, and avoid much of the costs of ownership and maintenance. This could substantially reduce the number of fleet vehicles.

Hybrid Police Vehicles Ford is the first manufacturer to add a hybrid police pursuit utility vehicle to its police vehicle line. The new hybrid gets 24 mpg, combined, which is a 40% improvement over their previous utility. With more police departments adding hybrid vehicles to their fleet, other manufacturers are expected to add hybrids to their police line as well. Encouraging and incentivizing agencies such as ARDOT, Game and Fish, and the State Police to make investments in hybrid police vehicles could result in a marked improvement in overall fuel efficiency.

^{*} Based on 15,000 miles per year and \$2.45/Gallon of regular unleaded gasoline

* Carbon Footprint = [(Annual Miles/MPG)X19.8]/2000

* N/A = The EPA "US Department of Energy" and the manufacture do not list data for diesel products or bi-fuel products, MPG is a gasoline ratio while compressed Natural Gas is measured in pounds.
