ARKANSAS DEPARTMENT OF HEALTH

MONOCLONAL ANTIBODY THERAPY

PLAN OF ACTION

Testing for antibodies

Hospitals have the discretion regarding the usage of federal funding allocated through the Arkansas Department of Health (ADH) to be directed testing for antibodies. To date, \$9 million in federal funding has been earmarked to be distributed to rural hospitals statewide for the purpose of COVID-19 related testing.

ADH's Involvement with Monoclonal Antibody Treatments/Infusions

Arkansas has been a pioneer and champion of monoclonal antibody (MAB) therapy ever since it was introduced at the end of 2020. Early and aggressive therapy with MAB has prevented multiple hospitalizations and deaths in the state over the past year. Though the availability of various MAB therapies has changed our strategy to utilize them to the fullest extent possible has not.

ADH, through its Healthcare-Associated Infections and Office of Preparedness Programs, has provided several educational seminars on benefits and utilization of MABs to Arkansas Medical Society, American College of Physicians, Arkansas Hospital Association, Arkansas Pharmacy Association, numerous Long Term Care Facilities, besides fielding hundreds of calls from various providers and facilities. Due to these efforts, there has been a continued increase in MAB utilization in the state with the rapid expansion of facilities utilizing this therapy in a variety of settings.

When MAB therapy was first introduced, national utilization rates were very low in the 20-30% range. Arkansas quickly enhanced its efforts and we were consistently utilizing 50-60% of our quota, which was double the national average utilized weekly. This has played a crucial role in preventing hospitalizations, especially in our unvaccinated population. In the past couple of months, ADH has developed the MAB squad to help our minority and underserved populations in the state and connecting them with local providers to ensure acceptance and utilization of MAB therapy.

Today we have over 160 sites providing MAB therapy. The sites are posted on the ADH website which provides the public with their address and contact information for appointment scheduling. The locations can be found in 61 counties, and for the 14 counties without an infusion site, the surrounding counties are providing coverage and taking appointments for them.

Since our first shipment on September 8th, 2020, where the first two facilities that received MABs (Casirivimab/Imdevimab) were Stone County Medical Center and Arkansas Children's Northwest, Arkansas has administered over 45,000 doses. We are currently administering between 2600 - 3650 doses per week.

ADH also maintains a small "buffer" stock to assist facilities when they are having trouble receiving an allocation from Amerisource Bergen (ADH validates usage and number of patients), delay in Amerisource Bergen shipment, LTCF, Nursing Homes, Jail/Detention Center, etc. to include outbreaks.

Unfortunately, as of 9/14/2021, HHS has transitioned from direct ordering of monoclonal antibodies to a state-coordinated distribution system, like the system that was used from November 2020 - February 2021. Hospitals and other administration sites will no longer order from AmeriSource Bergen directly. The federal government will determine the total allocation amount for each state based upon state cases and hospitalizations, and utilization as reported to HHS Protect / TeleTracking. ADH will then be required to determine which sites will receive MABs and what amount. Our state allotment for the week of 9/15/2021 is Bamlanivimab 370 doses and Regeneron's REGN-COV2 – 3260 doses for a total of 3630 doses.

ADH is very experienced with this process since this was the way allocations and ordering were conducted during 2020 into 2021. We have already met with all our sites and have provided a streamlined order process and we have already taken over 80 orders from the administration sites since 9:00 Wednesday morning.

While ADH anticipates that Arkansas hospitals will not see an immediate decrease in supplies coming to the state, NIH has recently updated treatment guidelines to help prioritization when supplies are low.

Monoclonal Antibody Activity at ADH Local Health Units

When someone presents to the LHU for a Rapid or PCR COVID test, the patient is educated on MAB treatment and given an informational flyer about the treatment. If the person tests POS on a rapid in the LHU they are entered into our portal and if they are interested in the MAB treatment that information is also entered. Each morning we get a report from the portal that indicates anyone that tested POS via a rapid test in the LHU the day before. Using that list we extract those that are interested in the MAB treatment and send them to an internal team to call and connect them with a treatment center near their residence, go over the procedure for getting treatment and assist if needed.

If the person that tests POS in the LHU via a Rapid test has no PCP that information is also entered into the portal and those individuals are extracted from the report and sent to our team at Baptist that will connect with those patients and evaluate them for MAB via telemed. This is needed to establish the patient/provider relationship so that an order can be created if the patient wants the treatment and is eligible.

Those individuals that test POS through a PCR test are educated while testing about MAB and given a flyer. Once the results come in, the LHU and MAB teams through the Office of Health Equity place calls to those individuals and offers the treatment and assist in getting the patient connected with a treatment location. If the POS PCR patient does not have a PCP, those individuals are then routed to the Baptist team for follow-up.

Funding for the Monoclonal Antibody Therapy (MAb) Squad - \$850,000

The Monoclonal Antibody Therapy (MAb) Squad is a special team called who directly contacts high-risk patients as soon as their COVID-19 test results are positive to connect them with treatment at infusion centers across the state.

Current Mab Contractor fees - \$3,250

Contractor Fees and Supplies

Proposed allocation: \$500,000 for two years.

Contractors will be paid on hourly bases at rates set by the state of Arkansas for general and medical professional salaries. These pay rates are as follows:

Title	Hourly Rate
Licensed Practical Nurse (LPN)	\$17.38
Registered Nurse (RN)	\$30.69
Nurse Practitioner (NP)	\$42.97
General Physician (MD, DO)	\$53.79

Funds may also be spent on supplies as needed. Supplies may include general office supplies, cellphones, and laptops, etc. Contractors will be added to handle the MAb squad caseload as needed.

Transportation

Proposed allocation - \$350,000 for two years.

Transportation for MAb patients who do not have any means of transporting themselves to MAb infusion centers for treatment will be provided. Transportation will be available to MAb patients located anywhere in the state. Transportation costs will be billed per patient based on the following rates:

Monoclonal Antibody Media Estimation – \$ 103,848

Total:	\$ 1	03,848.00	
Production	\$	3,500.00	
Print	\$	2,951.10	
Digital	\$	11,790.40	
Radio	\$	11,961.10	
CTV	\$	10,588.20	
Broadcast Cable	\$ \$	53,457.80 9,599.40
