ARKANSAS  
Department of Environmental Quality

December 8, 2011

The Honorable Mike Beebe  
Governor  
State Capitol Building  
Little Rock, AR 72201

The Honorable Mary Anne Salmon  
Senator

The Honorable Tommy Lee Baker  
Representative

Arkansas Legislative Council  
Room 315, State Capitol Building  
Little Rock, AR 72201

Dear Governor Beebe, Senator Salmon and Representative Baker:

The enclosed CD contains this year's progress report on the assistance provided through the Solid Waste Management and Recycling Grants Program. This report provides information about the grants distributed between 2006 and 2010.

The files on the CD include:

1. An overview of recycling activities and results during the 2011 fiscal year.
2. An introduction to the recycling grants program and the data files.
3. Files for each of the 18 regional solid waste management districts detailing recycling grants received and progress made. See the following page for a graphic to better understand report layout.

Should you or your staff wish to discuss the enclosed report, or discuss recycling issues more broadly, please contact me at your earliest convenience.

Sincerely,

Teresa Marks  
ADEQ Director

# Recycling Grants Program Details

December 2011

Arkansas Department of Environmental Quality

## 2011 Annual Report

Section 8-6-609 of Arkansas code describes "a grant program of assistance for districts and local governments ... to develop solid waste management plans, programs and facilities that integrate recycling as a functional part of the solid waste management system..." This section also requires the Arkansas Department of Environmental Quality to prepare an annual progress report on the grant assistance made under this section. The files on this CD are submitted as the recycling grants program annual report for 2011.

Recycling grant funds are allocated to each of the state's 18 regional solid waste management districts (see next page for a district map) based on a formula in the above statute. At the beginning of the grant round, districts submit information about potential projects. While ADEQ determines which of the potential projects are eligible for funding, district boards decide which of the eligible projects will be funded and the amount of funding for each. District boards are also responsible for reporting on the grants as required by statute and regulation.

Because of this, the report is divided into a separate file for each district. When you open a district file, the first grants shown are those to the district. Because district projects can cover multiple counties, districts do not have a county associated with them. Other grant recipients are grouped by county and are listed in alphabetical order within the county group. Each recipient starts a new page in the report. Bookmarks within the documents will take you to a specific recipient.

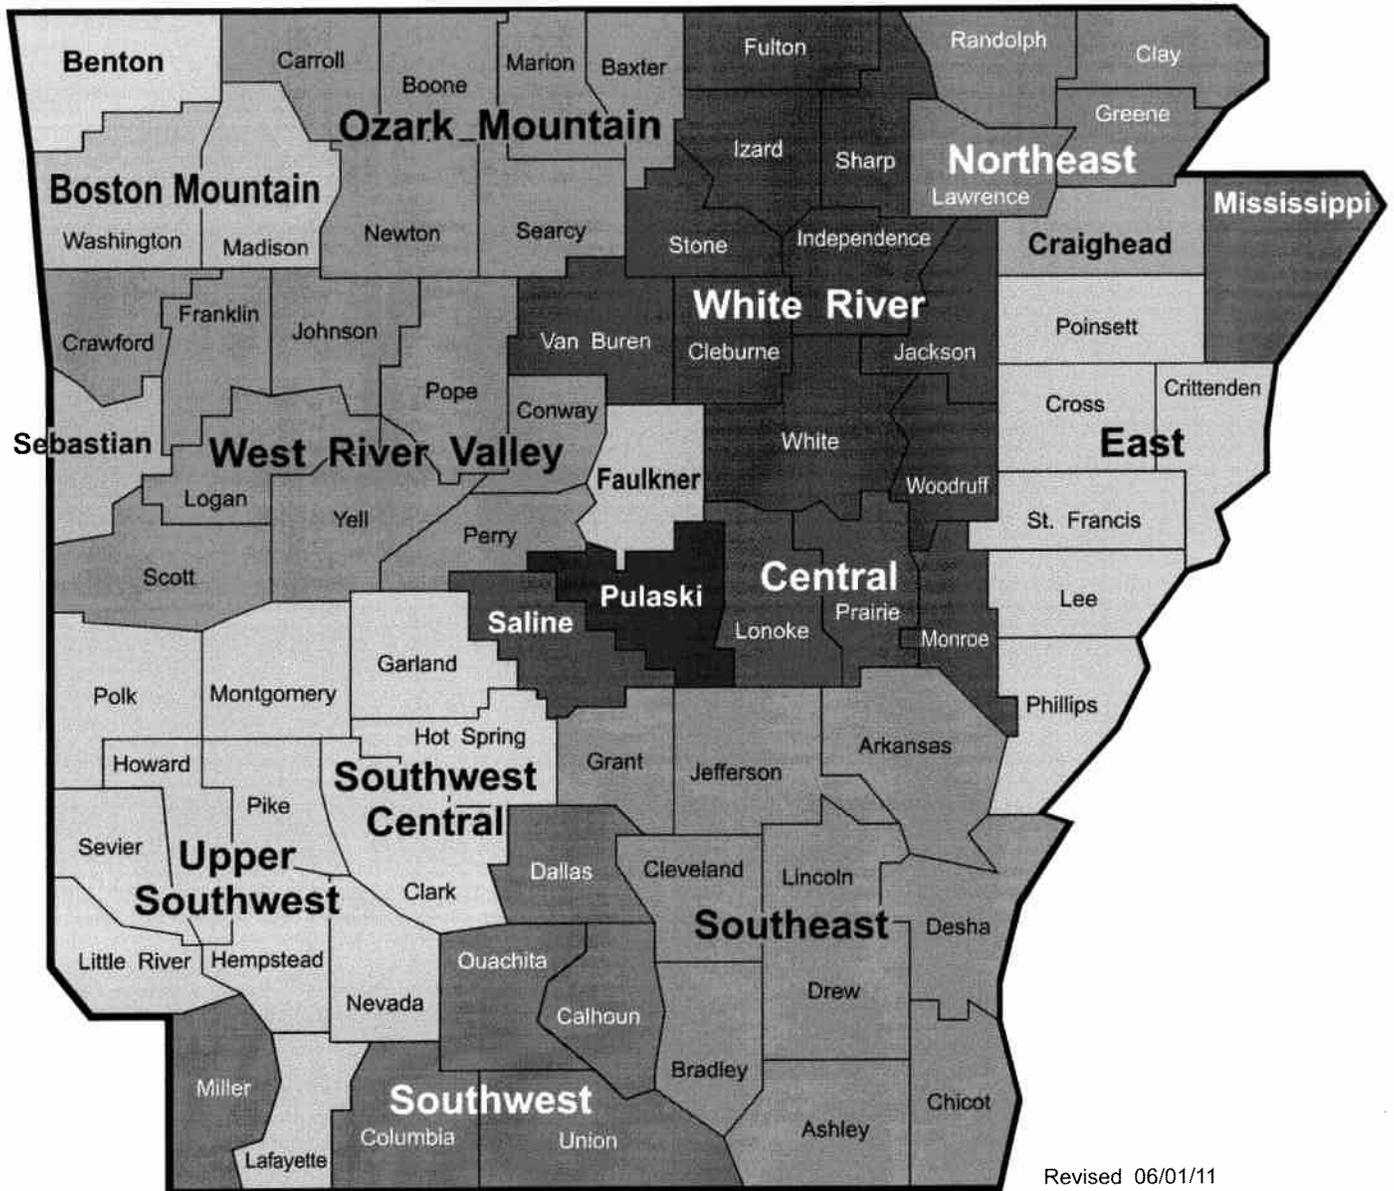

The first time a grant recipient is listed, the name is underscored by a double line. The tons recycled by the grant recipient and revenue from selling these recyclables is listed, by year, just below this line. If there is a facility listed in the "Processed By" column, some or all of the materials collected are reported by the listed facility instead of the grant recipient.

After the tonnage and revenue data, information about individual grants to the recipient is listed, with grants separated by a single line. Basic information about the grant—including grant number, purpose, grant amount, and balance remaining—is below this line. Information about expenditures is shown, by year, below the dotted lines.

2011 in the report title refers to Arkansas's fiscal year (i.e., July 1, 2010, to June 30, 2011). However, in the grant reports the same period would be the 2010 reporting period (i.e., reporting periods run from July 1 of the year listed to June 30 of the next year or one year behind the state fiscal year).

## Economic Impact of Recycling

The economy seems to be on everyone's mind these days. Did you ever stop to think about the economic impact of recycling?

According to the report, Arkansas supports 1,270 jobs directly related to the scrap recycling industry. An additional

generates \$19.7 million in tax revenues for state and local governments.

Another report, from the Southeast Recycling Development Council (SERDC), also looked at the economic impacts of recycling in Arkansas. According to SERDC, if the state recycled just 10% more municipal solid waste each year,

Recycling industries contribute to the state's economy in many ways.

The Institute of Scrap Recycling Industries (ISRI), the national trade association representing scrap recycling facilities, has. ISRI commissioned a study to quantify the impact recycling has on the United States' economy. The report, produced by John Durham and Associates, also includes state-specific information.

2,030 jobs in Arkansas are related to recycling through suppliers and industry expenditures. In addition, the industry

620 new jobs would be created. This would result in an additional \$1.3 million in annual state tax revenue.

As used in this report, "2011" means the period from July 1, 2010, to June 30, 2011.

## Right Direction/Wrong Direction

In 2010, Arkansans recycled a total of 1,479,088 tons. The total was 1,601,015 in 2011, a 8% increase.

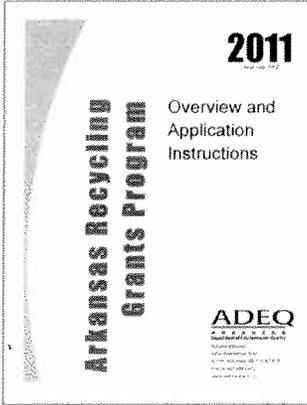

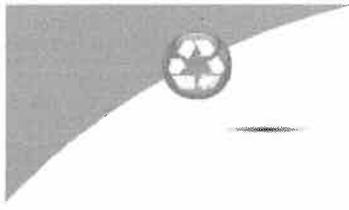

decrease when the tons recycled increased? The answer lies in the landfill.

the right direction for recycling, but the wrong direction for landfilling.

The recycling rate in 2010 was 32.1%; in 2011 it is 31.4%. How can the recycling rate

While the tons of material recycled increased, the tons of material landfilled increased faster (12%). An increase is

To increase the recycling rate, all Arkansans need to put more in the recycling bin and less in the trash can.

All new forms and guidance documents follow a similar format.

The \$3.6 million disbursed from 2010 grant funds supports recycling projects with total costs estimated at nearly \$10 million.

## Recycling Grants Program Update

It's been an exciting year for the Arkansas Recycling Grants Program. The ADEQ Recycling/Market Development Branch staff has worked to clarify program requirements and to increase ease of access to the program information.

Major projects during the year included:

- Setting specific dates for various program deadlines
- Developing new forms and guidance for the program
- Giving the public access to forms and guidance through the ADEQ web site ([www.adeg.state.ar.us/solwaste/branch\\_recycling/grants.htm](http://www.adeg.state.ar.us/solwaste/branch_recycling/grants.htm))

- Providing training about the grants program, including its history and requirements
- Working on a new database for the grants program, including entering information and designing reports that compile this information in a variety of ways
- Giving the public access to information from this database through the ADEQ web site ([www.adeg.state.ar.us/solwaste/branch\\_recycling/grants.asp](http://www.adeg.state.ar.us/solwaste/branch_recycling/grants.asp))

While all of these projects enhance the program, we are especially proud of the new database. It currently contains information about all grants since 2004.

Having this information in a database allows us to easily track the accomplishments of the Recycling Grants Program. It also provides reports that branch staff and regional solid waste management districts can use to audit equipment and expenditures, as well as keep track of items required by statute or regulation.

It's been a busy year, but the results are worth it. We're looking forward to continuing the progress in 2012.

## Recycling Grants Statistics

More than \$4.1 million was allocated to the 18 regional solid waste management districts for the 2010 grant round. (Grant round year runs a year behind the state fiscal year.) Of this, \$3.6 million has been distributed through 127 grants to districts, cities, counties and recycling facili-

ties statewide. This investment will support projects with total costs projected at nearly \$10 million. Grant recipients provide the balance of funds for these projects, \$6.4 million in this case.

During the past five grant rounds (2006—2010), nearly \$18.4 million has been dis-

tributed through 686 grants. Projected total cost of the supported projects is nearly \$53.3 million.

Grant recipients reported recycling 866,674.5 tons of materials in 2011. The sale of these materials provided nearly \$8.4 million to support community recycling programs.

## Materials Recycled 2011

Material	Weight in Tons	
Batteries		8,713
Electronic Waste		7,265
Glass		18,406
Household Hazardous Waste		969
Metals		1,079,011
Aluminum Cans/Non-ferrous—Aluminum, Brass, Copper	138,967	
Ferrous—Steel and Iron	849,193	
White Goods (Ferrous)	86,193	
Other	4,658	
Oil (motor, cooking)		27,541
Paper		211,989
Cardboard	126,086	
Magazines/Mixed Paper	12,354	
Newsprint	20,990	
Sorted Office Paper	43,020	
Sorted White Ledger	1,385	
Other	8,154	
Plastic		68,317
HDPE (High Density Polyethylene)	4,308	
LDPE (Low Density Polyethylene)	916	
PET (Polyethylene Terephthalate)	6,488	
Poly Pipe	39,994	
Other	16,611	
Textiles & Leather		707
Tires & Rubber		12,569
Wood Waste		60,104
Yard Wastes		105,424
<b>Total</b>		<b>1,601,015</b>

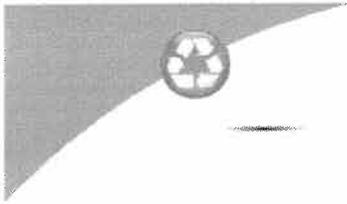

Tons Landfilled = 3,504,957

Tons Recycled = 1,601,015

Total Waste Stream (Tons) = Tons Landfilled + Tons Recycled = 5,105,972

Tons Recycled/Total Waste Stream x 100 = **Recycling Rate = 31.4%**

*Arkansas also reclaimed 47,270 tons of Tire Derived Fuel, 59,944 tons of asphalt and 355,468 tons of road material (not included in above totals).*

## Computer and Electronic Equipment Recycling

Brian Pugh helps un-  
load a TV at an e-waste  
recycling event in  
northwest Arkansas.

The use and disposal of electronic items has increased exponentially during the last decade, and used electronic equipment is now the most rapidly growing segment of the municipal solid waste stream. To help build the infrastructure needed to handle used electronics, Arkansas legislators have enacted two key pieces of legislation for funding.

Both the E-Waste Grants Program and the Arkansas Computer and Electronic Equipment Recycling Program (formerly E-WEN) are administered by the

Recycling Branch of ADEQ's Solid Waste Management Division. The first, the E-Waste Grants Program, is open to both public and private programs while the second, the Arkansas Computer and Electronic Equipment Recycling Program, is open only to public programs.

E-Waste grants were first awarded in 2006 to find ways to properly manage computers and other used electronics statewide. In 2010, almost \$113,000 was awarded to eight recipients.

Economic conditions in recent years prompted legislators to enact a second grants program to assist public programs with transportation costs associated with recycling used electronics. This "eminent need" funding was authorized on a temporary basis, while a long-term solution is planned.

Now in its third year, the Arkansas Computer and Electronic Equipment Recycling Program awarded almost \$625,000 in 2010. This fiscal year, \$2.5 million is available for awards, and project categories have expanded.
