An Equal Opportunity Employer

October 24, 2014

Marty Garrity, Director  
Arkansas Bureau of Legislative Research  
State Capitol Room 315  
Little Rock, Arkansas 72201

Dear Ms. Garrity:

Enclosed please find a copy of the Fiscal Year 2014 Annual Report of the Arkansas Natural Heritage Commission, as required by Arkansas Statute Annotated §15-20-308. The report is provided in electronic form on the enclosed CD-ROM, as per the guidelines in Act 501 of 2013.

Decision makers, land resource managers, educators, and Arkansas citizens use our annual report as an important reference tool. Our work activities and accomplishments are highlighted in the Executive Summary. Sites within the System of Natural Areas are documented in status reports that detail ownership information, driving directions, and stewardship activities. The Registry of Natural Areas contains the current listings of at-risk species that are tracked in each county in the state.

Thank you for the opportunity to submit this report of our accomplishments. Please contact me if I can provide additional information.

Sincerely,

Chris Colclasure, Director  
Arkansas Natural Heritage Commission

An Equal Opportunity Employer

We are happy to share with you the FY2014 Annual Report of the Arkansas Natural Heritage Commission in accordance with Arkansas Statute Annotated § 15-20-308 to highlight the work your support has made possible. Our new logo design implemented this year represents our wealth of information about Arkansas's biological diversity. This year we have worked with partners statewide to share that information in innovative and useful ways:

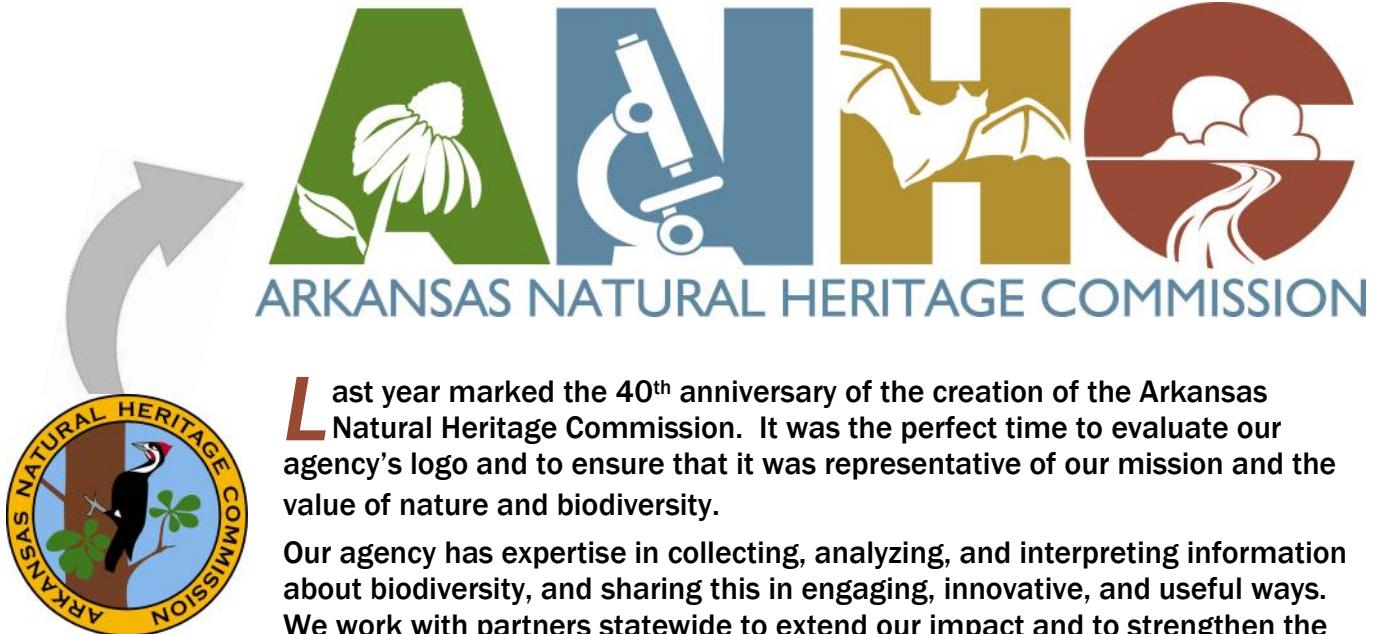

- we have established a formal volunteer program and have citizens, young and old, on the ground at habitats around the state, learning about their natural heritage in hands-on activities;
- our staff botanists served as editors for the most comprehensive account of Arkansas plants ever published, giving researchers, teachers, and students the tools they need to understand the many ways the 2,892 species of plants in our state impact our lives;
- local, state, and federal government personnel, along with private industry and private, non-profit groups have worked side-by-side with our staff studying and caring for the lands in our System of Natural Areas where remnants of the original landscape still exist;
- we continued to serve as the central clearing house for information on Arkansas's most at-risk plants, animals, and unique habitats, and provided technical assistance for land management.

This report illustrates some of the ways more Arkansans can be engaged to care for our state. We look forward to building on our current relationships while also welcoming new partners to our mission.

Sincerely,

Chris Colclasure  
Director

Robert Bevis, Jr.  
Commission Chairman

Last year marked the 40<sup>th</sup> anniversary of the creation of the Arkansas Natural Heritage Commission. It was the perfect time to evaluate our agency's logo and to ensure that it was representative of our mission and the value of nature and biodiversity.

Our agency has expertise in collecting, analyzing, and interpreting information about biodiversity, and sharing this in engaging, innovative, and useful ways. We work with partners statewide to extend our impact and to strengthen the capacity of others to manage biodiversity and natural places.

After careful consideration, we have chosen a new logo that represents these resources but with a more modern look that captures the broader scope of the work we do today and our goals for the future. You will begin seeing this logo on our social media, letterhead, educational materials, and more in the next few months leading up to the launch of our new, updated website and additional online outreach in early 2015.

Byrd Lake Natural Area

The ANHC protects and manages the state's System of Natural Areas consisting of 71 individual properties, totaling 61,544 acres.

These natural areas serve as remnant examples of some of our state's most unique natural features. Many provide critical habitat for rare or declining species. Each area is managed for its ecological importance and appropriate public use.

## SHARING THE COMMITMENT TO SUSTAIN OUR NATURAL HERITAGE

**F**orging partnerships is a key ingredient of the commission's conservation work.

Collaboration with federal and state agencies, colleges, private nonprofits, and private landowners allows us to pool resources, expand our knowledge base, and ultimately increase our overall conservation impact across the state.

**part·ner (' pär-t-nər) :** One that is united or associated with another or others in an activity or a common interest

**Partners from state and federal government, private industry, and private, nonprofit organizations came together to improve Devil's Eyebrow Natural Area and Beaver Lake.**

Devil's Eyebrow Natural Area joined the System of Natural Areas last year through the combined efforts of several private and public partners. The ANHC and the Arkansas Game and Fish Commission (AGFC) acquired the 2,032-acre area with the assistance of the Arkansas Field Office of The Nature Conservancy (TNC). TNC received a grant to assist in the acquisition from the National Fish and Wildlife Foundation (NFWF) and Walmart's Acres for America Program.

Devil's Eyebrow is incorporated into the Beaver Lake Wildlife Management Area which is a partnership with the AGFC and the Beaver Lake Project Office of the U.S. Army Corps of Engineers (USACOE). The natural area includes three miles of undeveloped shoreline and helps to protect the overall water quality of Beaver Lake. The Walmart role continued this year with a \$93,000 grant from their Realty Compliance Grant Fund to install erosion-control structures on the area.

The partners came together again in November 2013 – this time to put some “sweat equity” into the project by working on the ground to improve habitat on the natural area and Beaver Lake. The Walmart Real Estate team, along with staff from the ANHC, AGFC, and USACOE, spent two days cutting over 150 invasive cedar trees on glade habitat, dragging the trees to the shore, weighting each bundle of trees, and then sinking them in the lake for fish habitat.

New volunteer program includes major cleanup events at natural areas.

In the short time since its inception, volunteers in the program completed 293 man-hours of work at five different natural areas and their projects are as varied as the habitat they restore. They have removed

almost 1,000 tires from sensitive blackland prairie habitat at Terre Noire Natural Area in Clark County. Volunteers have made sure the trails at Kings River Falls and Sweden Creek Falls Natural Areas are safe and in good shape for hikers, and they have helped natural vegetation return to Cove Creek Natural Area by cutting, pulling, and removing invasive plant species.

Master Naturalists working on the trail at Sweden Creek Natural Area

Trailer full of tires removed from Terre Noire Natural Area

This spring, the ANHC launched a new volunteer program to coordinate the efforts of people across the state who generously donate their time and efforts to the agency. This new program helps us match our work needs to individuals, places, and interests. We can now bring together larger groups of volunteers to accomplish bigger goals and achieve substantial restoration at our natural areas.

In addition to dedicated individuals, the following organizations have helped get our new volunteer program off to a great start:

Keep Arkansas Beautiful

Ross Foundation

Henderson State University-Ready to Serve Program

The Nature Conservancy

Davis Rubber Company

Inter-district Waste Tire Management Program

Arkansas Wildlife Federation

City of Pine Bluff

Bayou Bartholomew Alliance

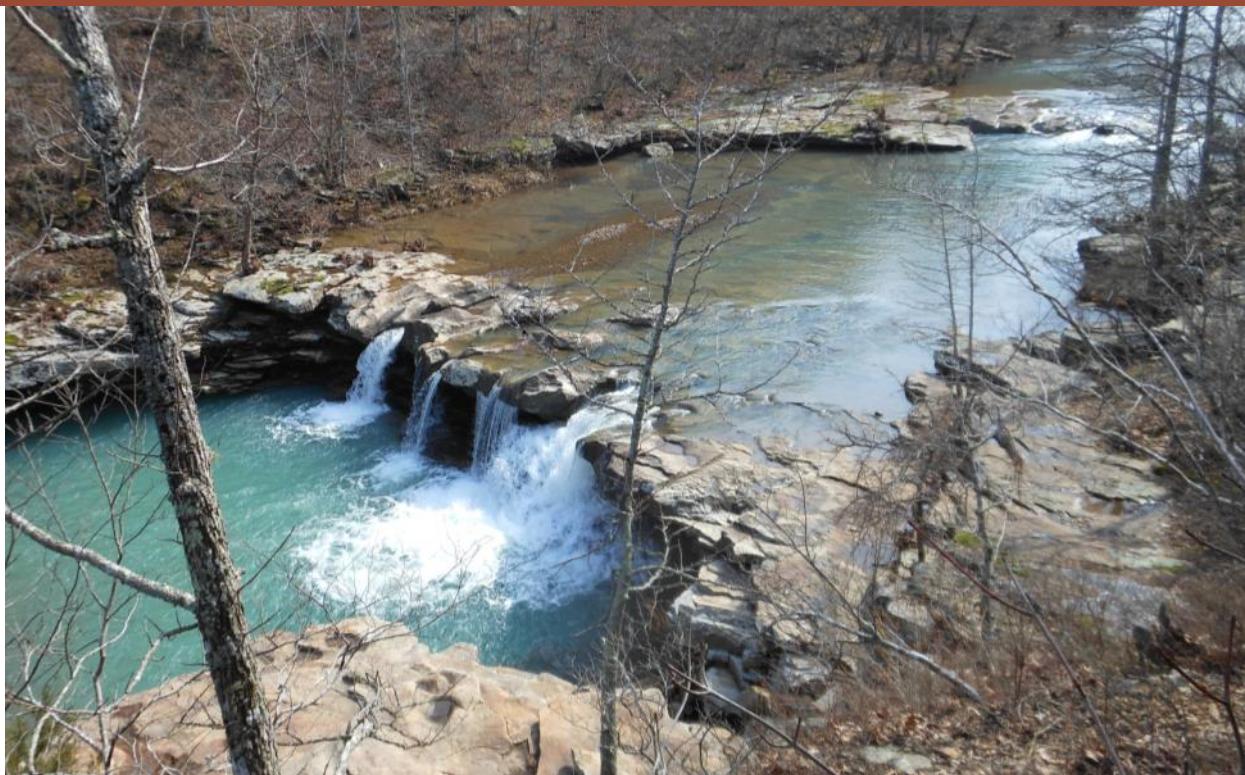

Beaver Watershed Alliance

Real Estate Division of Wal-Mart

Arkansas Game and Fish Commission

U.S. Army Corps of Engineers

Arkansas Master Naturalists

Kings River Falls Natural Area (pictured above) is one of the most visited sites in the System of Natural Areas. Two consecutive years of high water events eroded portions of the streambanks and damaged the parking area and a section of the trail at the natural area. In partnership with the Arkansas Game and Fish Commission, private landowners, and Madison County, the ANHC was able to stabilize banks, restore the channel to historic size and function, and re-vegetate the damaged segment of the riparian corridor of the Kings River that is an integral part of a healthy stream ecosystem.

Five crossvanes (structures built of large, native sandstone) were used at Kings River Falls Natural Area to shape a new channel at low flows and to disperse the powerful force of flood waters, protecting banks from scouring. All disturbed areas were planted with native vegetation to reduce the amount of substrate movement and sedimentation downstream.

**Birdwatchers travel 1,000 miles to visit ANHC Natural Areas.**

Several sites in the System of Natural Areas are regularly visited by birders from around the U.S. This year, a participant from Maryland re-routed a trip to Alaska to see his first Red-cockaded Woodpecker at Warren Prairie Natural Area. Connecticut Audubon Society members have been making trips to Arkansas for eight years.

**“ ...we greatly appreciate the wonderful hospitality that has been extended to us by the Arkansas Natural Heritage Commission and our other hosts across Arkansas at lodges, hotels, restaurants, and natural areas. We will be back, soon!”**

**Andrew Griswold, Director  
Connecticut Audubon Society EcoTravel**

Young hunter at Moro Big Pine Natural Area-WMA

Red-cockaded Woodpecker

A recent U.S. Fish and Wildlife Service national survey reported that:

- 47.8 million U.S. residents observed birds around the home or on trips
- 19.8 million U.S. residents traveled away from home to view birds
- Over 71 million Americans spent nearly \$45 billion (in retail sales) on observing, feeding, or watching wildlife each year

Along with activities such as hiking and bird-watching, specific types of hunting are allowed on natural areas. In an effort to make natural areas accessible to a broader segment of the public, the ANHC has incorporated approximately 50,000 acres into the Arkansas Game and Fish Commission's Wildlife Management Area (WMA) system.

**Research with Arkansas seed collecting safeguards against possible extinction.**

ANHC staff worked with national plant research centers this year to collect seed from the globally rare Cossatot leafcup (pictured above). White ash seeds were also collected from White Cliffs Natural Area (below) as precaution against possible ash extirpation by the invasive Emerald Ash Borer. This seed-banking will preserve the genetic diversity of these plants and protect them from possible future extinction.

emerald ash borer (*Agrilus planipennis*)

**Acquisition connects critical habitats in the Saline River watershed.**

A major acquisition this year added 1,622 acres to Longview Saline Natural Area (left) in Ashley County, bringing the total acreage to 3,837. The area represents a landscape-scale project for the ANHC, providing benefits for the Saline River watershed and connecting critical Ouachita terrace forests and wetlands.

The project ranked as a regional priority and was awarded \$1.34 million in Federal Recovery Land Acquisition Grant funding from the U.S. Fish and Wildlife Service. Funding was also provided by a grant from the Arkansas Natural and Cultural Resources Council and the 1/8 Cent Conservation Sales Tax.

The new acquisition borders 2.5 miles of the Saline River – the longest remaining free-flowing stream in the state (lower left). It also provides critical habitat for three federally listed mussel species and for the endangered Red-cockaded Woodpecker.

A state highway, a county road, and the Saline River frontage provide public access for quality areas for hunting, fishing, hiking, and birding.

An additional 471 acres were added to two natural areas this year:

- 431 acres at Devil's Eyebrow Natural Area, Benton County
- 40 acres at Slippery Hollow Natural Area, Marion County

## cooperation and sound science = big finds of little plants

**E**arlier this year, ANHC botanists teamed up with biologists from Fort Chaffee Maneuver Training Center to search for one of the smallest (and rarest) plants in the state. They were searching for geocarpon (*Geocarpon minimum*), one of just five plant species known from Arkansas on the federal Endangered Species List. Geocarpon is found in the state only in saline barrens, naturally open short grasslands, with bare “salt slicks” where naturally occurring sodium and/or magnesium salts are so concentrated that few plant species can survive.

After two days of searching, the scientists discovered geocarpon plants in some small barrens in a seldom used part of the military training facility in Sebastian County. This was the first time a new site for this rare plant had been found in Arkansas since the 1980s and the first time it had ever been found in Sebastian County.

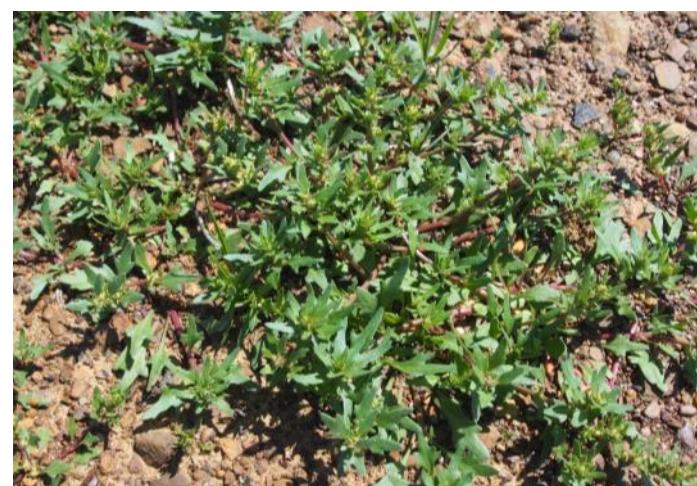

While they were looking for geocarpon, the scientists found new populations of several other rare plant species including tumble grass (*Schedonnardus paniculatus*), purple three-awn (*Aristida purpurea* var. *purpurea*), whorled dropseed (*Sporobolus pyramidatus*), rain lily (*Cooperia drummondii*), Wolf’s spikerush (*Eleocharis wolfii*), and western dwarf-dandelion (*Krigia occidentalis*).

At one site they found a species not documented in Arkansas before: Nuttall’s povertyweed (*Monolepis nuttalliana*). It was growing in the bare soil of a “salt slick” and is usually found to the west of Arkansas.

The ANHC will work with Fort Chaffee and the U.S. Fish and Wildlife Service to make management recommendations for the geocarpon habitat in Sebastian County.

geocarpon (*Geocarpon minimum*)

## SHARING THE KNOWLEDGE TO SUSTAIN OUR NATURAL HERITAGE

The dramatic landscapes of Arkansas are home to uniquely diverse plants and animals that are part of a natural heritage cherished by the people of our state. The ANHC is a portal for collecting and disseminating biodiversity information.

### ANHC staff:

- serve the information needs of decision-makers and the public by sharing natural resource management expertise, providing access to research results, and maintaining biological databases;
- teach educators, students, and the public about the biological resources of the state and the importance of science-based decision making;
- conduct nationally-recognized research and inventory on native plants, animals, and ecological communities of Arkansas.

**Staff botanists serve as editors of the most comprehensive published account of Arkansas plants.**

ANHC botanists Theo Witsell and Brent Baker served as two of the editors for the new book *The Atlas of Vascular Plants of Arkansas*, published by the Arkansas Vascular Flora Committee. The Atlas documents 2,892 species within 709 pages, and summarizes nearly 200 years of the state's flora data.

This publication provides critical information in planning Arkansas's ecological future and gives researchers, teachers, and students the tools they need to understand the many ways plants impact our lives: providing food, medicine, building materials, energy, raw materials for industry, clean air, and water.

**A**rkansas's native plants are uniquely adapted to live with our soils, climate, and wildlife. Native plants save water, require less maintenance, reduce chemicals, attract wildlife, support local ecology, reduce invasive species, and provide us with a sense of place.

### Native Plant Guide on the Website

[www.naturalheritage.com](http://www.naturalheritage.com)

A new section of the ANHC website features detailed information and resources for finding and growing native plants, including a list of recommended plants based on light and moisture needs, and a photo gallery of native plants. The materials are designed for anyone interested in native gardening, including Master Gardeners, teachers with schoolyard gardens, and butterfly gardeners.

### Formal Recognition of Staff Expertise and Accomplishments

ANHC botanist Theo Witsell (right) was named a Research Associate of the Botanical Research Institute of Texas (BRIT). This honorary appointment by BRIT "demonstrates its recognition of the major contributions by some individuals, indicates the association of the appointee with BRIT, and establishes a basis for preferential use of Institute facilities." Witsell was also named one of 25 Visionary Arkansans this year by the *Arkansas Times*. The weekly publication explains that he, and the others named Visionaries, "have ideas of transformative power."

**T**he sensitive species information contained in the ANHC biological diversity database is provided to timber companies operating in Arkansas to maintain their Sustainable Forestry Certification. This helps them to expand their market share by attracting consumers who are environmentally aware and gives them access to international markets through mutual recognition programs.

**ANHC research and staff training helps Arkansas timber companies.**

ANHC staff botanists participated with landowners and foresters involved in the Sustainable Forestry Initiative (SFI) and the Forest Stewardship Council (FSC) in an “Element Occurrence Field Day” training, including visiting rare plant sites and viewing specimens from our herbarium.

**“We are very appreciative of the expertise that [ANHC staff] share with us. Our working relationship with them has allowed us to become more knowledgeable in rare species that occur on or near our land base in Southwest Arkansas.”**

**Brad Dreyer, Forest Area Manager  
Hancock Forest Management**

## Accredited Workshops

Staff members give workshops throughout the year at professional conferences and for other state agencies, such as state parks interpreters. The programs are certified for continuing education credits for teachers and provide in-depth training for new Arkansas Master Naturalists certification. This year, over 200 people received hands-on training by ANHC staff.

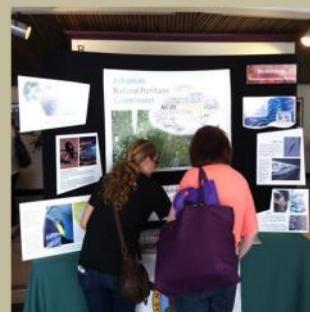

Arkansas ecoregions workshop for new Master Naturalists in training

Encouraging the next generation of Arkansas scientists.

ANHC continued to participate in the Arkansas State Science Fair, the Arkansas Science Olympiad, and the U.S. Fish and Wildlife Service's Endangered Species Student Art Contest by providing staff judges and financial support for awards.

**Endangered Species Day Art Contest**

**A**s part of an international network of heritage programs, the ANHC's Arkansas Heritage Program compiles and maintains data related to Arkansas's most at-risk animals and plants, and the places they live. Staff continuously update and add new information to this database from a variety of sources including herbaria, museums, scientific publications, research studies, and field surveys conducted by ANHC staff.

Surveys verify historically known rare species and natural community sites, and locate previously undocumented occurrences. This survey work can result in the discovery of new populations of rare species or even species not previously known to live here. Discoveries in the field this year included:

**A****B****C**

A) Wright's cliff-brake (*Pellaea wrightiana*), a type of desert fern previously unknown from Arkansas, found during plant inventory in novaculite glades in Hot Spring County

B) New locations for the bird-voiced treefrog (*Hyla avivoca*) in Calhoun and Saline Counties

C) The North American Butterfly Association counted 82 Diana fritillaries (*Speyeria diana*), a rare species and Arkansas's state butterfly, at Stone Road Glade Natural Area

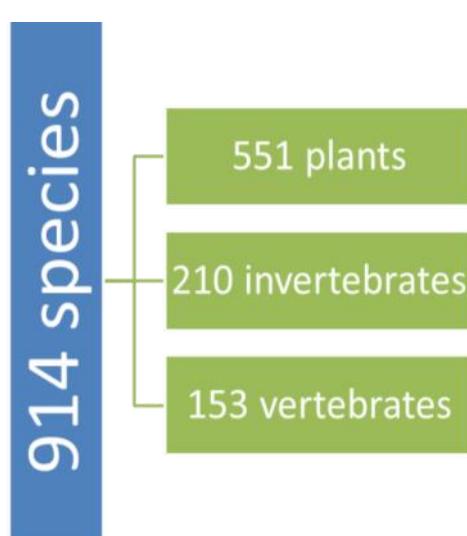

Survey results can be used to gauge the health and stability of rare species, identify high priority places, develop conservation measures, and guide natural area management practices.

The commission also performs ecological analysis to comply with the A-95 Environmental Review Process and is the central clearinghouse for information on Arkansas's most at-risk plants, animals, and natural communities.

A total of 16 new species were added to the list of species of special concern (2 animals and 14 plants), bringing the total of species currently tracked in the database to 914.

White flat-top goldenrod (*Solidago ptarmicoides*) found for the first time this year in the Ouachita Mountains ecoregion

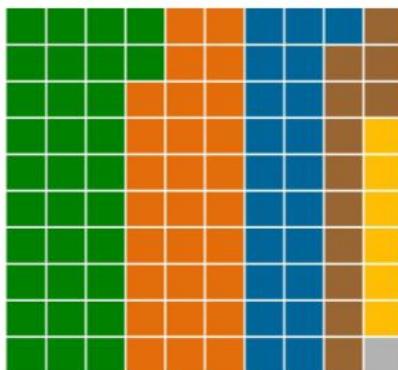

## FINANCIAL REPORT

The ANHC receives funding from six key sources:

- General Revenue
- Gas Proceeds
- 1/8 Cent Conservation Sales Tax
- Arkansas Natural and Cultural Resources Council (ANCRC) grants
- Federal Grants
- Cash Fund Accounts (donations, research fees, miscellaneous nonfederal grants, timber revenue)

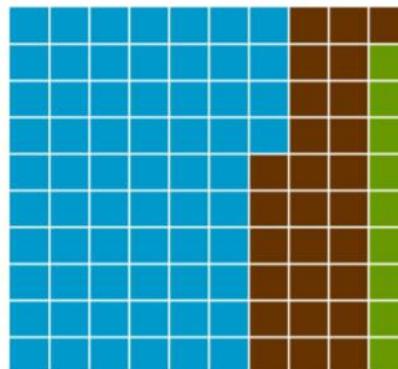

**The expenditures of FY2014 totaled \$5,610,446**

### EXPENDITURES BY FUND SOURCES

ANCRC Funds	32%	\$1,792,989
Federal Funds	28%	\$1,593,788
1/8 Cent Conservation Sales Tax	21%	\$1,203,876
General Revenue	12%	\$643,716
Gas Proceeds	6%	\$323,127
Agency Cash Funds	1%	\$52,950

### CATEGORIZED EXPENSES

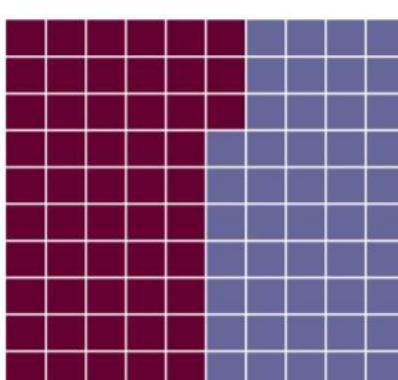

Natural Area Protection	64%	\$3,618,798
General and Administrative	27%	\$1,493,386
Land Management and Research	9%	\$498,262

The ANHC receives grant awards to fund land additions to the System of Natural Areas, and to fund survey and restoration work for at-risk species and unique habitats. Grants also fund salaries for part-time land stewards.

Funding from grants is non-recurring without any sources to fund fixed administrative costs. The ANHC continually seeks out grant opportunities to fund special projects.

**New awards received in FY14 totaled \$3,094,116.**

Nonfederal (ANCRC, Walmart Stores, Inc., Arkansas Chapter of National Wild Turkey Federation)	53%	\$1,635,611
Federal (U.S. Fish and Wildlife Service, USDA Forest Service)	47%	\$1,458,505

The Commission participates in quarterly meetings, provides general direction to ANHC professional staff, acts on proposals for acquiring and dedicating natural areas, establishes rules and regulations, and adopts and amends management plans for individual natural areas. Nine members are appointed by the Governor for staggered terms of nine years each. In addition, the President Pro Tempore of the Senate appoints three members, and the Speaker of the House of Representatives appoints three members.

**Governor Appointees**

**Christian "Trey" Ashcraft**, Pine Bluff  
**Robert Bevis Jr.**, Chairman, Scott  
**Hugh Earnest**, Fayetteville

**Marynell Branch, Deputy Director for Heritage Resources**

## System of Natural Areas

Arkansas Code Annotated §15-20-303 establishes a state System of Natural Areas and directs the ANHC to "...choose lands, waters, and interests therein to be acquired ... for inclusion in the natural area system."

The commission acquires lands for the System representing some of the best and last remaining features of the mosaic of Arkansas's natural landscape. Most additions secure habitat for rare species or offer a chance for restoration measures. Some tracts may buffer and protect natural areas from surrounding land use practices that could ultimately impact the survival and/or quality of protected ecosystems.

Working with partners broadens the scope of conservation and maximizes land acquisition dollars. For FY2014, the commission added 2,093 acres to the System of Natural Areas at three locations in the state.

The stewardship staff works to maintain functioning ecosystems and enhance the natural values of each site. Natural areas encompass a wide range of environments and generally exist as islands within otherwise altered settings. Stewardship actions are guided by the conservation vision stipulated in a management plan for each natural area.

ANHC staff conducting a prescribed fire at Chesney Prairie Natural Area

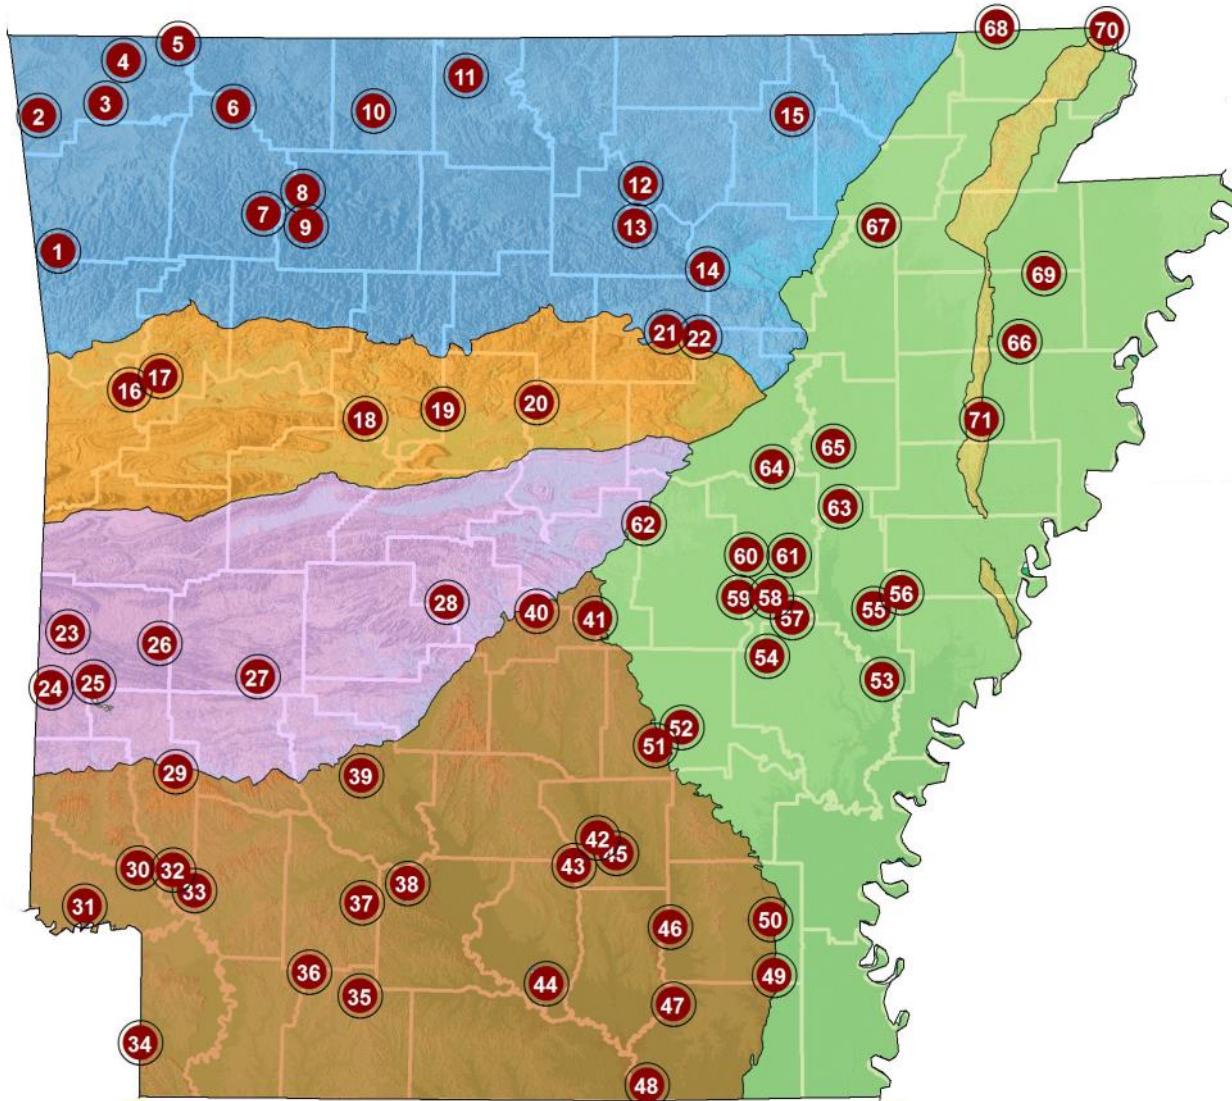

The following pages describe the status and condition of each portion of the System of Natural Areas. Entries for individual natural areas include county location, size, driving directions, site description, acquisition history, status, and details regarding stewardship activities conducted at the site over the reporting year.

The System of Natural Areas section can be cross-referenced in two ways: numerically by location on the state map (Page 19 of this report) or alphabetically by name (Page 21 of this report).

Natural areas are managed for varying levels of public usage, and accessibility varies widely. Printed boundary maps and county locator maps of each natural area are available free of charge. Maps can also be downloaded directly from the ANHC website:

[www.naturalheritage.com](http://www.naturalheritage.com)

## System of Natural Areas

Arkansas has six main natural divisions (ecoregions) as shown on the map above. Each division or region has its own distinctive components related to geology, climate, plants, animals, soils, and people.

- Ozark Mountains
- Arkansas Valley
- Ouachita Mountains
- Coastal Plain
- Mississippi Alluvial Plain
- Crowley's Ridge

The natural areas indicated by dots on the map are arranged and numbered by natural division.

## Arkansas Oak Natural Area

**County Name:** Nevada

**Size (in acres):** 200.27

**Latitude:** 33.65808

**Longitude:** -93.17229

### Description:

Arkansas Oak Natural Area, located in the Tertiary Uplands Ecoregion of the Coastal Plain, supports a number of plant species considered to be rare in Arkansas. The site is a mosaic of open sand barrens, dry upland woodlands, forested ravines, bottomland forests, shrub swamps, and seeps containing a diverse flora. The natural area adjoins Poison Springs State Forest and is co-managed with the Arkansas Forestry Commission (AFC).

### Access:

Take State Highway 299 at Bluff City and proceed southwest for 4.3 miles. Turn left (south) onto County Road 47 and continue south for 1.4 miles. Park along roadside; the natural area is located on both sides of the road.

### Stewardship Activities:

ANHC staff maintained the boundaries, cleaned the entrance sign, blocked two unauthorized vehicle access points, and monitored the effects of contracted beaver control efforts.

**Date of Last Visit:** 5/5/2014

### Status:

Ecological restoration improved woodland structure and species composition. Vegetative communities continue to shift as impoundments created by beaver activity are created and drained.

### Elements of Special Concern:

<u>Scientific Name</u>	<u>Common Name</u>	<u>Type of Element</u>
<i>Aristida desmantha</i>	curly three-awn	Plant
<i>Aristida lanosa</i>	woolly three-awn	Plant

## Baker Prairie Natural Area

**County Name:** Boone

**Size (in acres):** 30.315

**Latitude:** 36.24166

**Longitude:** -93.13479

### Description:

Baker Prairie Natural Area is a remnant of what was once a 5,000-acre tallgrass prairie located west and south of present day downtown Harrison. It is the largest known remnant of Ozark Mountain prairie occurring on a chert substrate. The prairie harbors a number of species of animals and plants of special concern in Arkansas. Due to its location within the city limits of Harrison, local development could impact the integrity of the natural area. The area is managed cooperatively with an adjacent tract owned by The Nature Conservancy (TNC).

### Access:

Follow U.S. Highway 65 north through Harrison. At the intersection of Hwy. 65, Hwy. 65B (North Main) and Industrial Park Road continue west on Industrial Park Road (Hwy. 65 is the main road and will turn to the north at this point). Follow Industrial Park Road to Goblin Drive. Turn left on Goblin Drive. The prairie is 0.5 mile down Goblin Drive. Signs are on both sides of the road. Parking is available on the left side of the road at the high school.

### Stewardship Activities:

ANHC staff conducted general plant inventory and rare plant monitoring, removed trash, and maintained the entrance signs. Contractors executed a prescribed burn on 40 acres and treated invasive plant species with herbicide. ANHC and TNC staff continued to monitor erosion occurring from the adjacent school parking lot.

**Date of Last Visit:** 5/1/2014

### Status:

Runoff from neighboring property continues to cause an erosion problem. Inventory work added species to the plant list and documented the persistence of rare plant species. A prescribed fire reduced woody encroachment in the western burn unit.

### Elements of Special Concern:

<u>Scientific Name</u>	<u>Common Name</u>	<u>Type of Element</u>
<i>Antennaria neglecta</i>	field pussytoes	Plant
<i>Bombus fervidus</i>	golden northern bumblebee	Animal
<i>Carex bicknellii</i>	Bicknell's sedge	Plant
<i>Carex gravida</i>	heavy sedge	Plant
<i>Drymocallis arguta</i>	tall cinquefoil	Plant
<i>Empidonax traillii</i>	Willow Flycatcher	Animal
<i>Erythronium mesochoreum</i>	prairie trout-lily	Plant
<i>Gentiana puberulenta</i>	downy gentian	Plant
<i>Gryllotalpa major</i>	prairie mole cricket	Animal
<i>Helianthus occidentalis</i> ssp. <i>occidentalis</i>	naked-stem sunflower	Plant
<i>Koeleria macrantha</i>	prairie June grass	Plant
<i>Laphria vorax</i>	a robberfly	Animal
<i>Nemastylis nuttallii</i>	Nuttall's pleat-leaf	Plant
Ozark Prairie and Woodland		Natural Community
<i>Prenanthes aspera</i>	prairie rattlesnake-root	Plant
<i>Silene regia</i>	royal catchfly	Plant
<i>Solidago juncea</i>	early goldenrod	Plant
<i>Symphyotrichum sericeum</i>	silvery aster	Plant
<i>Terrapene ornata ornata</i>	ornate box turtle	Animal
<i>Trillium ozarkanum</i>	Ozark trillium	Plant
<i>Viola pedatifida</i>	prairie violet	Plant

**Acquisition Summary:**

<b>Tract Name</b>	<b>Legal Interest</b>	<b>Appraised Value</b>	<b>Purchase Price</b>	<b>Date Acquired</b>	<b>Funding Source</b>
Baker 1	Fee title	\$112,575.00	\$97,572.00	1/7/1993	Natural and Cultural Resources Council, Land and Water Conservation Fund
Baker 2	Fee title	\$114,780.00	\$99,476.00	11/8/1993	Natural and Cultural Resources Council, Land and Water Conservation Fund

## Bear Hollow Natural Area

**County Name:** Madison

**Size (in acres):** 397.10

**Latitude:** 36.25392

**Longitude:** -93.70932

### Description:

Bear Hollow Natural Area includes a mile of the intermittent Bear Hollow Creek, beginning about 0.25 mile upstream from its confluence with Rockhouse Creek. The natural area is enclosed by ridges along most of its perimeter, with only one hilltop farm in prominent view. Located near the center of the site is the Ozark Natural Science Center (ONSC). This center was established in 1990 to provide environmental education opportunities for the people of the Ozark Mountains region. The natural area is bounded on the north and south by the Arkansas Game and Fish Commission's (AGFC) Madison County Wildlife Management Area.

### Access:

From Huntsville, follow State Highway 23 north. Pass through Withrow Springs State Park and the town of Forum. Approximately 3 miles north of Forum turn right onto County Road 1235 (formerly County Road 30) at the large brown Madison County Wildlife Management Area sign. Continue past the Arkansas Game & Fish Commission Headquarters trailer and turn right onto County Road 1250 at a green rectangular Ozark Natural Science Center (ONSC) sign. Turn left on County Road 1305 at the brown ONSC sign. Continue for two miles to the ONSC. The natural area is adjacent to ONSC property to the south and east.

### Stewardship Activities:

ANHC staff met with the new executive director for the ONSC, regularly attended the ONSC board of directors meeting, and mapped the trail system.

**Date of Last Visit:** 2/26/2014

### Status:

The natural area was utilized by approximately 3,500 students this year as part of programming at the ONSC. Field assessments noted no problems.

### Elements of Special Concern:

<u>Scientific Name</u>	<u>Common Name</u>	<u>Type of Element</u>
<i>Argyrochosma dealbata</i>	powdery cloak fern	Plant
<i>Bromus nottowayanus</i>	satin brome	Plant
<i>Carex sparganioides</i>	bur-reed sedge	Plant
<i>Hieracium scabrum</i>	rough hawkweed	Plant
<i>Symphyotrichum sericeum</i>	silvery aster	Plant

### Acquisition Summary:

<b>Tract Name</b>	<b>Legal Interest</b>	<b>Appraised Value</b>	<b>Purchase Price</b>	<b>Date Acquired</b>	<b>Funding Source</b>
Bear Hollow 1	Fee title	\$0.00	\$0.00	9/12/1991	Gift

## Benson Creek Natural Area

**County Name:** Monroe, Woodruff **Size (in acres):** 1,458.79

**Latitude:** 34.93567

**Longitude:** -91.24099

### Description:

Benson Creek Natural Area, located in the Mississippi Alluvial Plain of eastern Arkansas, provides an extension and buffer to a high-quality bald cypress-water tupelo swamp located along Bayou DeView. Previously disturbed plant communities within the natural area are the focus of restoration efforts designed to improve the ecological quality of the site. The Nature Conservancy (TNC) and the Arkansas Natural Heritage Commission (ANHC) hold an undivided interest in 302 acres.

### Access:

From Brinkley go north on U.S. Highway 49 to State Highway 17. Go west on State Highway 17 about 3 miles to the bridge over Bayou DeView. Parking and boat access are available south of bridge.

### Stewardship Activities:

ANHC staff removed trash, controlled invasive plant species, maintained the entrance signs, and mapped the area of a small wildfire. TNC staff and ANHC staff monitored the progress of a wetland reserve enhancement project. A contractor conducted plant community monitoring.

**Date of Last Visit:** 6/19/2014

### Status:

A Wetland Reserve Enhancement project began restoration of the hydrology on a portion of the natural area. Invasive plant species were reduced.

### Elements of Special Concern:

<u>Scientific Name</u>	<u>Common Name</u>	<u>Type of Element</u>
Lower Mississippi River Bottomland Depression		Natural Community

### Acquisition Summary:

<b>Tract Name</b>	<b>Legal Interest</b>	<b>Appraised Value</b>	<b>Purchase Price</b>	<b>Date Acquired</b>	<b>Funding Source</b>
Benson Creek 1 (Trice)	ANHC has a 45% undivided interest and The Nature Conservancy has a 55% undivided interest in fee title	\$61,155.00	\$35,000.00	7/8/1993	Natural and Cultural Resources Council
Benson Creek 2 (The Nature Conservancy-1)	Fee title	\$204,260.00	\$178,274.25	8/7/2006	Natural and Cultural Resources Council, Land Water Conservation Fund
Benson Creek 2 (The Nature Conservancy-2)	Fee title	\$70,739.20	\$61,740.00	9/26/2007	Natural and Cultural Resources Council, Land Water Conservation Fund

Benson Creek 4 (The Nature Conservancy)	Fee title	\$376,500.00	\$319,214.26	1/15/2009	U.S. Fish and Wildlife Service Grant, Natural and Cultural Resources Council
Benson Creek 5 (The Nature Conservancy)	Fee title	\$130,000.00	\$90,000.00	5/27/2009	Natural and Cultural Resources Council

## Big Creek Natural Area

**County Name:** Cleburne

**Size (in acres):** 1,507.676

**Latitude:** 35.5018

**Longitude:** -91.83698

### Description:

Big Creek Natural Area, located near the northeastern limit of the Arkansas Valley, includes approximately five miles of the course of Big Creek, a major tributary of the Little Red River. High water quality and diverse populations of fish and other aquatic organisms are characteristic of Big Creek. Bluffs tower as high as 200 feet above the streambed. This site's topographic relief, varied exposures, and considerable extent provide habitat for a broad array of plant and animal species. A primitive foot-trail provides access to some of the natural area's most interesting features.

### Access:

Take State Highway 110 east of Heber Springs to Wilburn. From Wilburn, go east on Tylar Road for approximately 0.9 mile. Turn right onto Center Chapel Road (gravel). Travel approximately 1.4 miles. At the stop sign, go straight onto Heritage Trail Road and follow the signs to the natural area.

### Stewardship Activities:

ANHC staff conducted routine trail maintenance to control erosion issues on problem areas, conducted water quality monitoring, and macroinvertebrate inventory. Staff worked with Cleburne County road department to maintain and improve the access road. Staff also oversaw an ecological timber thinning project on approximately 95 acres.

**Date of Last Visit:** 5/28/2014

### Status:

A plan was developed and approved for ecological thinning. Continued monitoring found no significant degradation of the overall water quality. Additional reduction of the mid-story took place on a portion of the natural area. Access was improved.

### Elements of Special Concern:

<u>Scientific Name</u>	<u>Common Name</u>	<u>Type of Element</u>
Central Interior Highlands & Appalachian Sinkhole & Depressional Pond		Natural Community
<i>Deschampsia flexuosa</i>	wavy hair grass	Plant
<i>Dulichium arundinaceum var. arundinaceum</i>	three-way sedge	Plant
<i>Lampsilis streckeri</i>	speckled pocketbook	Animal
<i>Lasmigona costata</i>	flutedshell	Animal
<i>Mimulus floribundus</i>	yellow monkey-flower	Plant
<i>Pantherophis emoryi</i>	Great Plains ratsnake	Animal
<i>Philadelphus hirsutus</i>	hairy mock orange	Plant
<i>Ptychobranchus occidentalis</i>	Ouachita kidneyshell	Animal
<i>Silene ovata</i>	ovate-leaf catchfly	Plant
<i>Toxolasma lividum</i>	purple lilliput	Animal
<i>Villosa iris</i>	rainbow	Animal

### Acquisition Summary:

<b>Tract Name</b>	<b>Legal Interest</b>	<b>Appraised Value</b>	<b>Purchase Price</b>	<b>Date Acquired</b>	<b>Funding Source</b>
Big Creek 1 (Petersen)	Fee title	\$353,600.00	\$331,500.00	2/7/1978	State General Improvement Fund, Land and Water Conservation Fund
Big Creek 2 (Green Bay)	Fee title	\$288,000.00	\$288,000.00	12/21/1998	Natural and Cultural Resources Council

## Big Fork Creek Natural Area

**County Name:** Polk

**Size (in acres):** 13.58

**Latitude:** 34.49781

**Longitude:** -93.97282

### Description:

Big Fork Creek Natural Area, located in the Ouachita Mountains, is a small mesophytic (moderately dry) tract containing an abundance of wildflowers and ferns, a free-flowing spring, and a small section of Big Fork Creek. The bluff and stream terrace near the spring support an excellent example of a diverse mesic hardwood forest with several rare plant species.

### Access:

Take State Highway 8 West at Big Fork. Travel 0.25 mile, then turn right on Polk County Road 67. Go 0.3 mile and bear left at the fork. Travel 0.1 mile to the parking area on the north side of the county road.

### Stewardship Activities:

ANHC staff maintained the boundaries, removed trash, and monitored a small erosion area near the county road.

**Date of Last Visit:** 6/2/2014

### Status:

The area continues to be heavily utilized by the public. Field assessments noted no problems.

### Elements of Special Concern:

<u>Scientific Name</u>	<u>Common Name</u>	<u>Type of Element</u>
<i>Cardamine angustata</i>	slender toothwort	Plant
<i>Carex laeviginata</i>	smooth-sheath sedge	Plant
<i>Cypripedium kentuckiense</i>	Kentucky lady's-slipper	Plant
<i>Dryopteris celsa</i>	log fern	Plant
<i>Hydrophyllum brownei</i>	Browne's waterleaf	Plant
<i>Plethodon caddoensis</i>	Caddo Mountain salamander	Animal
<i>Plethodon serratus</i>	southern red-backed salamander	Animal
<i>Scirpus polyphyllus</i>	leafy bulrush	Plant
<i>Solidago ouachitensis</i>	Ouachita goldenrod	Plant

### Acquisition Summary:

Tract Name	Legal Interest	Appraised Value	Purchase Price	Date Acquired	Funding Source
Big Fork 1	Fee title	\$16,975.00	\$15,100.00	12/6/1978	State General Improvement Fund

## Byrd Lake Natural Area

**County Name:** Jefferson

**Size (in acres):** 144

**Latitude:** 34.17993

**Longitude:** -91.9995

### Description:

Byrd Lake is an oxbow lake that still interacts with its parent stream, Bayou Bartholomew, in times of high water. The natural area is representative of the natural boundary between the Coastal Plain and the Mississippi Alluvial Plain. Bald cypress trees surround the lake, while adjoining lands support bottomland plant communities that respond to fluctuating water levels and rich alluvial soils. The slopes north of Byrd Lake are well drained and support a contrasting mixed pine-hardwood forest. A paved foot-trail provides visitors with access to the site. Due to its location within the city limits of Pine Bluff, development of nearby private land has the potential to impact the ecological integrity of the natural area.

### Access:

From Interstate 530 in Pine Bluff, take exit 43. Travel north on Olive Street approximately 0.5 mile to Main Street and turn right. Travel 0.2 mile to 52nd Street and turn right. Travel east on 52nd Street 0.2 mile to the parking lot on the right.

### Stewardship Activities:

ANHC staff treated invasive plant species, conducted routine trail maintenance, removed trash, and continued a trail renovation project funded through a wildlife observation grant from Arkansas Game and Fish Commission (AGFC). Staff from ANHC, Bayou Bartholomew Alliance, AGFC, Pine Bluff Parks and Recreation Department, and volunteers cooperated in a cleanup project that removed several hundred pounds of trash from Bayou Bartholomew and the shores of the natural area.

**Date of Last Visit:** 6/11/2014

### Status:

Restoration and renovation work began on the parking lot and trail. Invasive plant species were reduced.

### Elements of Special Concern:

<b>Scientific Name</b>	<b>Common Name</b>	<b>Type of Element</b>
<i>Carex arkansana</i>	Arkansas sedge	Plant
<i>Carex decomposita</i>	cypress-knee sedge	Plant
<i>Notropis maculatus</i>	taillight shiner	Animal
<i>Pteronotropis hubbsi</i>	bluehead shiner	Animal

### Acquisition Summary:

<b>Tract Name</b>	<b>Legal Interest</b>	<b>Appraised Value</b>	<b>Purchase Price</b>	<b>Date Acquired</b>	<b>Funding Source</b>
Byrd Lake 1	Fee title	\$239,000.00	\$239,000.00	8/1/1978	State General Improvement Fund, Land and Water Conservation Fund

## Cache River Natural Area

**County Name:** Woodruff

**Size (in acres):** 937.43

**Latitude:** 35.15188

**Longitude:** -91.28856

### Description:

Cache River Natural Area consists mainly of a forested wetland complex along the Cache River in the Mississippi Alluvial Plain. The natural area contains a high-quality river swamp and bottomland hardwood forest plus many miles of the Cache River itself. Much of the forested wetlands that occurred across this part of the state have been cleared for agriculture. Areas such as Cache River Natural Area represent the last remaining fragments of these once extensive forested wetlands. This natural area lies within the Rex Hancock/Black Swamp Wildlife Management Area and is co-managed with the Arkansas Game and Fish Commission (AGFC).

### Access:

From Augusta, travel south on State Highway 33 to Gregory (from Interstate 40 take exit 202 and travel north on State Highway 33). At Gregory turn east onto County Road 752 and travel 1.4 miles to the intersection with County Road 745. Bear right and continue on County Road 752 for 1.6 miles to the boat launch site.

### Stewardship Activities:

ANHC staff conducted monitoring of the easement and AGFC staff conducted routine management activities.

**Date of Last Visit:** 11/12/2013

### Status:

Field assessments noted no problems.

### Elements of Special Concern:

<u>Scientific Name</u>	<u>Common Name</u>	<u>Type of Element</u>
<i>Ambystoma talpoideum</i>	mole salamander	Animal
<i>Corynorhinus rafinesquii</i>	Rafinesque's big-eared bat	Animal
Lower Mississippi River Bottomland Depression		Natural Community
<i>Myotis austroriparius</i>	southeastern myotis	Animal
<i>Toxolasma lividum</i>	purple lilliput	Animal
Willow Oak Forest		Natural Community

### Acquisition Summary:

Tract Name	Legal Interest	Appraised Value	Purchase Price	Date Acquired	Funding Source
Cache River 1	Conservation easement (Arkansas Game and Fish Commission holds fee title)	\$311,000.00	\$296,530.50	10/12/1983	State General Improvement Fund

## Cave Springs Cave Natural Area

**County Name:** Benton

**Size (in acres):** 57.265

**Latitude:** 36.26262

**Longitude:** -94.22622

### Description:

Cave Springs Cave is basically a long "solution channel" formed by a groundwater-fed stream. The stream is considered to be an outstanding example of an Ozark Mountains cave stream and hosts the largest known population of the rare Ozark cavefish. The cave has also harbored a summer maternity colony of gray bats. Ozark trillium, a rare plant species, also occurs on the natural area.

### Access:

From State Highway 112/264 junction on the south side of the town of Cave Springs, proceed north about 0.25 mile to Midway Avenue. Turn right (east) and travel 0.25 mile to the northwest corner of the natural area. Park along roadside.

### Stewardship Activities:

ANHC staff removed trash, maintained boundaries, controlled invasive plant species, and monitored hardwood tree plantings. Staff also worked with the Illinois River Watershed Partnership, the U.S. Fish and Wildlife Service, and the Arkansas Game and Fish Commission to discuss and monitor restoration activities occurring on adjacent land.

**Date of Last Visit:** 5/23/2014

### Status:

Invasive plant species were reduced. Staff continues to monitor residential development in the watershed and the effects of proposed construction downstream from the cave.

### Elements of Special Concern:

<u>Scientific Name</u>	<u>Common Name</u>	<u>Type of Element</u>
<i>Caecidotea stiladactyla</i>	an isopod	Animal
Cave Stream		Natural Community
<i>Eurycea spelaea</i>	grotto salamander	Animal
<i>Ligidium elrodii</i>	an isopod	Animal
<i>Myotis grisescens</i>	gray myotis	Animal
<i>Orconectes meeki brevis</i>	Meek's short pointed crayfish	Animal
<i>Stygobromus onondagaensis</i>	an amphipod	Animal
<i>Stygobromus ozarkensis</i>	Ozark cave amphipod	Animal
<i>Trillium ozarkanum</i>	Ozark trillium	Plant
<i>Troglichthys rosae</i>	Ozark cavefish	Animal

### Acquisition Summary:

<b>Tract Name</b>	<b>Legal Interest</b>	<b>Appraised Value</b>	<b>Purchase Price</b>	<b>Date Acquired</b>	<b>Funding Source</b>
Cave Springs 1 (Collier)	Fee title	\$49,500.00	\$34,752.70	1/28/1985	State General Improvement Fund
Cave Springs 2 (Loch Lono)	Conservation easement (private landowner holds fee title)	\$2,000.00	\$0.00	6/3/2005	Gift
Cave Springs 3 (Brandon)	Fee title	\$1,250,000.00	\$0.00	12/29/2005	Gift
Cave Springs 4 (Northwest Land)	Fee title	\$397,000.00	\$0.00	12/29/2005	Gift

## **Chalk Bluff Natural Area**

**County Name:** Clay

**Size (in acres):** 54.9252

**Latitude:** 36.47809

**Longitude:** -90.16495

**Description:**

Chalk Bluff Natural Area is situated on the north end of the Arkansas portion of Crowley's Ridge where the St. Francis River cuts through the Ridge and divides Missouri's "booteel" from Arkansas. Despite its name, Chalk Bluff has no chalk deposits. Rather, its soils are derived from sedimentary materials consisting of light-colored clays, silts, and sands. If exposed, such soils are subject to severe erosion and favor the development of steep slopes and deep ravines. On the natural area, these ravines are characterized by extensive stands of pawpaw and Christmas fern growing beneath beech trees. An upland oak-hickory forest clothes most of the remainder of the area. Clay County holds a long-term lease for development and operation of public-use facilities on a portion of the natural area.

**Access:**

From U.S. Highway 62 in St. Francis, travel west on County Road 341 for 1.5 miles. At intersection, turn right and go north on County Road 347 for 1.5 miles to the natural area.

**Stewardship Activities:**

ANHC staff maintained the trail and discussed day to day management activities with Clay County staff.

**Date of Last Visit:** 6/23/2014

**Status:**

Field assessments noted no problems.

**Elements of Special Concern:**

<u>Scientific Name</u>	<u>Common Name</u>	<u>Type of Element</u>
Mississippi River Alluvial Plain Dry-Mesic Loess Slope Forest		Natural Community

**Acquisition Summary:**

Tract Name	Legal Interest	Appraised Value	Purchase Price	Date Acquired	Funding Source
Chalk Bluff 1	Fee title	\$45,000.00	\$30,000.00	5/6/1977	State General Improvement Fund

## Cherokee Prairie Natural Area

**County Name:** Franklin

**Size (in acres):** 584.436

**Latitude:** 35.33553

**Longitude:** -94.03834

### Description:

Cherokee Prairie Natural Area is one of the largest remaining tracts of tallgrass prairie in the Arkansas Valley. Located just north of Charleston, this tract is a high-quality prairie representative of the more extensive Cherokee Prairies that once occurred across the western portion of the Arkansas Valley. The natural area contains a diverse array of forb species (herbaceous species other than grasses) including compass plant, purple prairie clover, and Indian paintbrush. It also supports a number of plant and animal species that are now considered rare, or even endangered. Prairie Creek flows through the center of the natural area.

### Access:

The natural area is located approximately 2 miles north of Charleston, at the intersection of State Highways 60 and 217.

### Stewardship Activities:

A contractor completed plant community monitoring, herbicide treatments to invasive plant species, and a prescribed burn on 240 acres. ANHC staff maintained the parking areas and boundaries, removed trash, and conducted post burn monitoring of a contracted burn.

**Date of Last Visit:** 5/19/2014

### Status:

Management activities continued to reduce invasive plant species and hardwood encroachment. Field assessments noted no problems.

### Elements of Special Concern:

<u>Scientific Name</u>	<u>Common Name</u>	<u>Type of Element</u>
<i>Ammodramus henslowii</i>	Henslow's Sparrow	Animal
<i>Antennaria neglecta</i>	field pussytoes	Plant
Arkansas Valley Prairie and Woodland		Natural Community
<i>Asio flammeus</i>	Short-eared Owl	Animal
<i>Atrytone arogos</i>	Arogos Skipper	Animal
<i>Bombus fervidus</i>	golden northern bumblebee	Animal
<i>Callophrys irus hadros</i>	Frosted Elfin	Animal
<i>Calopogon oklahomensis</i>	Oklahoma grass-pink	Plant
<i>Carex opaca</i>	opaque prairie sedge	Plant
<i>Eleocharis wolfii</i>	Wolf's spike-rush	Plant
<i>Erythronium mesochoreum</i>	prairie trout-lily	Plant
<i>Gentiana puberulenta</i>	downy gentian	Plant
<i>Gryllotalpa major</i>	prairie mole cricket	Animal
<i>Gymnopogon brevifolius</i>	short-leaf skeleton grass	Plant
<i>Koeleria macrantha</i>	prairie June grass	Plant
<i>Laphria vorax</i>	a robberfly	Animal
<i>Lithospermum incisum</i>	fringed pucooon	Plant
<i>Nemastylis nuttallii</i>	Nuttall's pleat-leaf	Plant
<i>Nicrophorus americanus</i>	American burying beetle	Animal
<i>Prenanthes aspera</i>	prairie rattlesnake-root	Plant
<i>Rhynchospora macrostachya</i>	prairie horned beaksedge	Plant
<i>Scleria muehlenbergii</i>	Muhlenberg's nut-rush	Plant
<i>Solidago tortifolia</i>	twist-leaf goldenrod	Plant
<i>Terrapene ornata ornata</i>	ornate box turtle	Animal

**Acquisition Summary:**

<b>Tract Name</b>	<b>Legal Interest</b>	<b>Appraised Value</b>	<b>Purchase Price</b>	<b>Date Acquired</b>	<b>Funding Source</b>
Cherokee Prairie 1 Fee title (C-Bar)		\$224,000.00	\$220,000.00	7/12/1983	State General Improvement Fund, Land and Water Conservation Fund
Cherokee Prairie 2 Fee title (Carmen Lake)		\$144,000.00	\$112,647.50	5/15/1986	State General Improvement Fund, Land and Water Conservation Fund
Cherokee Prairie 3 Fee title (Bollinger)		\$79,300.00	\$79,300.00	1/25/1996	Natural and Cultural Resources Council

## Chesney Prairie Natural Area

**County Name:** Benton

**Size (in acres):** 82.54

**Latitude:** 36.21865

**Longitude:** -94.4822

### Description:

Chesney Prairie Natural Area is one of very few tallgrass prairie remnants left on the Arkansas portion of the Springfield Plateau and supports a number of rare species. Much of its flora and fauna is representative of the once extensive upland prairies and savannas of the western Ozark Mountains. Sager Creek runs through the prairie, creating a wooded riparian corridor.

### Access:

From Interstate 540 in Springdale, take U.S. Highway 412 west approximately 17.5 miles to State Highway 59. Turn right on State Highway 59 and travel north 2.0 miles to County Road 6 (Chesney Road). Turn right on County Road 6 and travel east approximately 0.8 mile to a farm road on the left. Turn left on this farm road and travel north 0.5 mile along easements to the southeast corner of the natural area as indicated by the natural area sign.

### Stewardship Activities:

ANHC staff conducted plant community monitoring, general plant inventory, and rare plant monitoring. A contractor conducted a prescribed burn on 20 acres and treated invasive plant species.

**Date of Last Visit:** 6/19/2014

### Status:

Inventory work documented an additional tracked plant species. A plan was developed and received grant funding to restore old fields to prairie vegetation. A prescribed burn reduced woody encroachment on a portion of the area.

### Elements of Special Concern:

<u>Scientific Name</u>	<u>Common Name</u>	<u>Type of Element</u>
<i>Amorpha canescens</i>	lead-plant	Plant
<i>Antennaria neglecta</i>	field pussytoes	Plant
<i>Asclepias incarnata</i> ssp. <i>incarnata</i>	swamp milkweed	Plant
<i>Calopogon oklahomensis</i>	Oklahoma grass-pink	Plant
<i>Carex bicknellii</i>	Bicknell's sedge	Plant
<i>Carex conjuncta</i>	soft fox sedge	Plant
<i>Carex davisii</i>	Davis' sedge	Plant
<i>Carex gravida</i>	heavy sedge	Plant
<i>Carex opaca</i>	opaque prairie sedge	Plant
<i>Carex pellita</i>	woolly sedge	Plant
<i>Carex scoparia</i> var. <i>scoparia</i>	pointed broom sedge	Plant
<i>Cistothorus platensis</i>	Sedge Wren	Animal
<i>Crataegus reverchonii</i>	Reverchon's Hawthorn	Plant
<i>Eleocharis wolfii</i>	Wolf's spike-rush	Plant
<i>Gentiana puberulenta</i>	downy gentian	Plant
<i>Gryllotalpa major</i>	prairie mole cricket	Animal
<i>Helianthus pauciflorus</i> ssp. <i>pauciflorus</i>	prairie sunflower	Plant
<i>Koeleria macrantha</i>	prairie June grass	Plant
<i>Nemastylis nuttallii</i>	Nuttall's pleat-leaf	Plant
Ozark Prairie and Woodland		Natural Community
<i>Scleria muehlenbergii</i>	Muhlenberg's nut-rush	Plant
<i>Solidago ptarmicoides</i>	white flat-top goldenrod	Plant
<i>Terrapene ornata ornata</i>	ornate box turtle	Animal

**Acquisition Summary:**

<b>Tract Name</b>	<b>Legal Interest</b>	<b>Appraised Value</b>	<b>Purchase Price</b>	<b>Date Acquired</b>	<b>Funding Source</b>
Chesney 1	Fee title	\$121,000.00	\$121,000.00	10/24/2000	Natural and Cultural Resources Council
Chesney 2	Fee title	\$155,890.00	\$155,890.00	6/26/2008	1/8 Cent Conservation Tax, Natural and Cultural Resources Council

## Coffee Prairie Natural Area

**County Name:** Ashley

**Size (in acres):** 56

**Latitude:** 33.0595

**Longitude:** -92.05709

### Description:

Coffee Prairie Natural Area, located in the Coastal Plain, preserves some of the last remaining examples of a type of grassland called "lowland sand prairie." This rare community is known to occur only in extreme southern Arkansas and northern Louisiana in the bottomlands of the Ouachita River and is unlike any other grassland type in Arkansas in species composition, soils, and hydrology. Coffee Prairie Natural Area falls within the Beryl Anthony/Lower Ouachita Wildlife Management Area and is co-managed with the Arkansas Game and Fish Commission (AGFC).

### Access:

From the intersection of U.S. Highway 82 and State Highway 169 in western Crossett, take U.S. Highway 82 west approximately 3.8 miles and then turn left (south) on Ramsour Road. Take Ramsour Road 2.2 miles and turn right (south) on Walls Trail and travel 1.4 miles to Cremer Trail. Turn right (west) and go 0.5 mile on Cremer Trail, and then turn left (south) on Loop Road. Travel 2.5 miles to Missouri Pacific Railroad Tram Road. Turn left (southeast) onto Missouri Pacific Railroad Tram Road and travel 1.1 miles to the natural area road. The natural area road is on the right (south) side, just past an open, flooded area that is on the left (north) side of the Tram Road. Park at Arkansas Game and Fish Commission parking area. Walk along the old road trace in a southwesterly direction (posted with blue diamonds) to the boundary of the natural area.

### Stewardship Activities:

ANHC staff monitored the conservation easement and maintained the boundaries.

**Date of Last Visit:** 1/24/2014

### Status:

Field assessments noted no problems.

### Elements of Special Concern:

<u>Scientific Name</u>	<u>Common Name</u>	<u>Type of Element</u>
<i>Carex glaucescens</i>	southern waxy sedge	Plant
<i>Coelorachis rugosa</i>	wrinkled joint-tail	Plant
<i>Lindera melissifolia</i>	pondberry	Plant
<i>Stylisma aquatica</i>	water dawnflower	Plant
West Gulf Coastal Plain Lowland Sand Prairie		Natural Community

### Acquisition Summary:

<b>Tract Name</b>	<b>Legal Interest</b>	<b>Appraised Value</b>	<b>Purchase Price</b>	<b>Date Acquired</b>	<b>Funding Source</b>
Coffee Prairie 1	Conservation easement (Arkansas Game and Fish Commission holds fee title)	\$11,225.57	\$11,225.57	7/24/1991	ANHC purchased 2 tracts of land that became part of Cut-off Creek WMA. Title to that land went to AGFC; ANHC retained an easement in exchange, AGFC dedicated conservation easements on Rock Creek, Coffee Prairie, & additional land at Cut-off Creek

## Cossatot River State Park-Natural Area

**County Name:** Howard, Polk

**Size (in acres):** 4,470.20

**Latitude:** 34.29388

**Longitude:** -94.17704

### Description:

The Cossatot River is an outstanding example of an upland river in the Ouachita Mountains. As it flows southward, the river cuts through a series of east-west oriented ridges, producing magnificent rapids and waterfalls. The natural area supports at least two fish species endemic to the Little River system and numerous special plant species, including Browne's waterleaf. The area is managed cooperatively with Arkansas State Parks (ASP). Portions of the site have been developed to enhance public visitation and environmental education opportunities. These developments include a visitor information center, a canoe launching area, solar restrooms, picnic areas, primitive camp sites, a hiking/nature trail, and a barrier-free pedestrian river walkway.

### Access:

The area may be reached by traveling U.S. Highway 278 (old State Highway 4) west from Umpire about 9 miles or east from U.S. Highway 71 at Wickes about the same distance. State Highway 246 passes through the northern portion of the area between Athens and Vandervoort. The Visitor Center is located off of U.S. Highway 278.

### Stewardship Activities:

ASP staff continued with day-to-day management of the area as a state park. ANHC staff assisted the United States Fish and Wildlife Service with darter surveys and conducted rare plant inventory.

**Date of Last Visit:** 9/12/2013

### Status:

Inventory work verified the continued presence of leopard darters, added species to the plant list, and documented the persistence of rare plants species. Field assessments noted no problems.

### Elements of Special Concern:

<u>Scientific Name</u>	<u>Common Name</u>	<u>Type of Element</u>
<i>Acer saccharum</i> var. <i>leucoderme</i>	chalk maple	Plant
<i>Amorpha ouachitensis</i>	Ouachita indigo-bush	Plant

## Cove Creek Natural Area

**County Name:** Faulkner

**Size (in acres):** 228

**Latitude:** 35.2886

**Longitude:** -92.4842

### Description:

Cove Creek Natural Area, located in the Arkansas Valley, contains almost a mile of the course of Cove Creek near its confluence with Cadron Creek. At this point, the meandering stream cuts deeply through a ridge of sandstone, creating a spectacular bluff-lined gorge. A small area of creek bottom forest borders the watercourse at the lower end of the tract. Restoration efforts are underway to restore an extensive complex of sandstone glades and woodlands that covers more than 100 acres on the west side of the creek above the bluffs. A primitive foot-trail provides access to some of the natural area's most interesting features.

### Access:

From the junction of State Highway 25 and State Highway 285 in Wooster, travel north on State Highway 285 approximately 6.2 miles to intersection with Mallet Town Road. Turn left (west) onto Mallet Town Road and travel approximately 1.5 miles. Turn right (north) onto Town Circle Road. Go approximately 0.3 mile to JD Road and turn right (east). Follow road straight to parking area at end of road.

### Stewardship Activities:

ANHC staff continued with invasive plant species control efforts, maintained the trail and installed interpretative trail signs, and conducted water quality monitoring. Contractors conducted a prescribed burn on the area following understory clearing by a forestry grinder and installed a fence along the southern boundary, settling a boundary dispute with an adjacent landowner.

**Date of Last Visit:** 6/21/2014

### Status:

Ecological restoration, including the first prescribed burn, improved open woodland structure. Water quality monitoring found no significant degradation. One new tracked plant species was documented. A boundary dispute was resolved.

### Elements of Special Concern:

<u>Scientific Name</u>	<u>Common Name</u>	<u>Type of Element</u>
Central Interior Highlands Dry Acidic Glade and Barrens		Natural Community
<i>Claytonia arkansana</i>	Ozark spring-beauty	Plant
<i>Draba aprica</i>	open-ground whitlow-grass	Plant

<i>Heuchera villosa</i> var. <i>arkansana</i>	Arkansas alumroot	Plant
<i>Lathyrus pusillus</i>	low vetchling	Plant
<i>Nemastylis nuttallii</i>	Nuttall's pleat-leaf	Plant
<i>Philadelphus hirsutus</i>	hairy mock orange	Plant
<i>Trifolium carolinianum</i>	Carolina clover	Plant

### Acquisition Summary:

<b>Tract Name</b>	<b>Legal Interest</b>	<b>Appraised Value</b>	<b>Purchase Price</b>	<b>Date Acquired</b>	<b>Funding Source</b>
Cove Creek 1	Fee title	\$74,100.00	\$68,400.00	12/17/1976	State General Improvement Fund

## Cow Shoals Riverfront Forest Natural Area

**County Name:** Cleburne

**Size (in acres):** 63.27

**Latitude:** 35.51316

**Longitude:** -91.93051

### Description:

Cow Shoals Riverfront Forest Natural Area, located near the boundary of the Boston Mountains and the Arkansas Valley, lies within the floodplain of the Little Red River. The natural area contains a successional riverfront forest dominated by river birch and American sycamore. The Arkansas Game and Fish Commission (AGFC) holds fee title and co-manages this natural area.

### Access:

Travel east from Heber Springs on State Highway 110. Turn left on State Highway 210 and travel northwest 2.3 miles to the natural area.

### Stewardship Activities:

ANHC staff monitored the conservation easement and removed trash. AGFC continued with daily management of the area.

**Date of Last Visit:** 5/28/2014

### Status:

Field assessments noted no problems.

### Elements of Special Concern:

<u>Scientific Name</u>	<u>Common Name</u>	<u>Type of Element</u>
<i>Carex radiata</i>	eastern star sedge	Plant
<i>Isoetes engelmannii</i>	Engelmann's quillwort	Plant
South-Central Interior Large Floodplain		Natural Community

### Acquisition Summary:

<b>Tract Name</b>	<b>Legal Interest</b>	<b>Appraised Value</b>	<b>Purchase Price</b>	<b>Date Acquired</b>	<b>Funding Source</b>
Cow Shoals 1	Conservation easement (Arkansas Game and Fish Commission holds fee title)	\$60,000.00	\$15,000.00	2/13/1992	Natural and Cultural Resources Council

## Cut-off Creek Ravines Natural Area

**County Name:** Drew

**Size (in acres):** 377

**Latitude:** 33.40641

**Longitude:** -91.56307

### Description:

Cut-off Creek Ravines Natural Area, located in the Coastal Plain, contains two ravines that flow generally eastward from uplands to the adjacent bottomlands along Cut-off Creek. The ravines are forested with a pine-oak forest at their heads and a mixed oak and beech forest near their mouths. The bottomland into which the ravines empty is forested with willow oak and water oak on higher sites and overcup oak and bald-cypress on lower sites. This natural area represents a valuable example of a Coastal Plain forest and of the transition from Coastal Plain to Mississippi Alluvial Plain. The natural area falls within the Cut-off Creek Wildlife Management Area and is co-managed with the Arkansas Game and Fish Commission (AGFC).

### Access:

From Monticello, travel east 14 miles on State Highway 35 to Collins. From Collins travel south on County Road 51 (Collins-Line Road) for 9.3 miles. Turn left onto a gravel road marked by an Arkansas Game and Fish Commission sign for "Campsite 2." Travel east 1.2 miles to the boat launch ramp.

### Stewardship Activities:

ANHC staff monitored the conservation easement and removed trash. Staff also communicated with AGFC staff, who continued with daily management of the area.

**Date of Last Visit:** 6/19/2014

### Status:

The water trail, including interpretive panels, was opened to the public. Field assessments noted an on-going need for prescribed fire. No other problems were noted.

### Elements of Special Concern:

<u>Scientific Name</u>	<u>Common Name</u>	<u>Type of Element</u>
<i>Limnothlypis swainsonii</i>	Swainson's Warbler	Animal
Lowland Pine-Oak Forest		Natural Community

### Acquisition Summary:

<b>Tract Name</b>	<b>Legal Interest</b>	<b>Appraised Value</b>	<b>Purchase Price</b>	<b>Date Acquired</b>	<b>Funding Source</b>
Cut-off Creek 1	Conservation easement (Arkansas Game and Fish Commission holds fee title)	\$16,036.54	\$16,036.54	7/26/1990	Natural and Cultural Resources Council
Cut-off Creek 2	Conservation easement (Arkansas Game and Fish Commission holds fee title)	\$14,919.99	\$14,919.99	1/9/1991	Natural and Cultural Resources Council
Cut-off Creek 3	Conservation easement (Arkansas Game and Fish Commission holds fee title)	\$44,501.38	\$44,501.38	5/31/1991	ANHC purchased 2 tracts of land that became part of Cut-off Creek WMA. Title to that land went to AGFC; ANHC retained an easement. In exchange, AGFC dedicated conservation easements on Rock Creek, Coffee Prairie, & additional land at Cut-off Creek

## Dardanelle Rock Natural Area

**County Name:** Yell

**Size (in acres):** 10

**Latitude:** 35.23778

**Longitude:** -93.16374

### Description:

Dardanelle Rock Natural Area, located in the Arkansas Valley, contains an exposure of Hartshorne sandstone that was folded into a synclinal (concave upward fold) structure when the Ouachita Mountains were formed and then breached through erosion by the Arkansas River to form a water gap. Dardanelle Rock has been a major landmark along the Arkansas River since the days of early Arkansas exploration. Parts of the outcrop are naturally devoid of vegetation; however, some slopes hold enough soil to support a forest of black oak, mockernut hickory, and shortleaf pine.

### Access:

The site is located on the east end of Dardanelle Mountain at Dardanelle, Arkansas. To access the area, turn north off State Highway 7 onto Front Street. Proceed 1 mile to the natural area sign.

### Stewardship Activities:

ANHC staff monitored public use, removed trash, and controlled invasive species.

**Date of Last Visit:** 11/21/2013

### Status:

Invasive plant species were reduced. Field assessments noted that litter and graffiti problems continued and that public use remained consistent.

### Elements of Special Concern:

<u>Scientific Name</u>	<u>Common Name</u>	<u>Type of Element</u>			
Geological feature		Other			
<b>Acquisition Summary:</b>					
Tract Name	Legal Interest	Appraised Value	Purchase Price	Date Acquired	Funding Source
Dardanelle Rock 1	Fee title	\$25,000.00	\$25,000.00	10/14/1976	State General Improvement Fund

## Devil's Eyebrow Natural Area

**County Name:** Benton

**Size (in acres):** 1,806.1

**Latitude:** 36.48364

**Longitude:** -93.92266

### Description:

Devil's Eyebrow Natural Area is located at the northern end of Beaver Lake along Indian Creek and its tributaries. The terrain is rugged and steep, consisting of deep, bluff-lined hollows separated by steep ridges. Much of the area is underlain by alternating layers of chert and limestone that include caves and many springs. Plant communities are diverse and include high quality glades, woodlands, bluffs, rich hardwood forests, and riparian forests. Devil's Eyebrow supports one of the highest concentrations of rare plant species in Arkansas with several species typically found far to the north and others that are restricted in distribution and considered globally rare. The Arkansas Game and Fish Commission (AGFC) and the Arkansas Natural Heritage Commission (ANHC) share undivided fee title and co-manage this natural area.

### Access:

From the town of Garfield, travel east on U.S. Highway 62 for 4 miles to the community of Gateway. From the junction of Highways 62 and 37 at Gateway, continue east on U.S. Highway 62 for 0.4 miles to a gravel access road on the right (south) side of U.S. Highway 62 (marked with a sign). Follow the gravel access road to the parking area.

### Stewardship Activities:

ANHC staff conducted boundary maintenance, general plant inventory, and led the Arkansas Native Plant Society on a tour of the area. ANHC staff also met with AGFC, National Park Service, and Arkansas Archeological Survey staff to discuss and plan a road/trail stabilization project. ANHC, U.S. Army Corps of Engineers, and AGFC worked cooperatively with volunteers to cut invasive eastern red cedars and sink them into Beaver Lake for fish habitat. Staff from The Nature Conservancy led a public tour of the area and a contractor reduced invasive plant species.

**Date of Last Visit:** 5/31/2014

### Status:

A project to reduce erosion was implemented. Land management restored open woodlands and glades, and reduced invasive plants. Inventory work added species to the plant list and three new tracked plant species were documented. New property was acquired.

### Elements of Special Concern:

<b>Scientific Name</b>	<b>Common Name</b>	<b>Type of Element</b>
<i>Acer saccharum</i> var. <i>nigrum</i>	black maple	Plant
<i>Allium canadense</i> var. <i>lavendulare</i>	tall pink glade onion	Plant

## Devil's Knob-Devil's Backbone Natural Area

**County Name:** Izard

**Size (in acres):** 822.13

**Latitude:** 36.00592

**Longitude:** -92.04704

### Description:

Located about ten miles southwest of Melbourne in the Ozark Mountains, Devil's Knob-Devil's Backbone Natural Area includes limestone, dolomite, and sandstone glades, woodlands, and bluffs. Local topography includes an uplifted ridge with two knolls joined by a saddle known as Devil's Backbone. Glade and bluffs on the natural area support several rare plant species and the bluffs are home to a number of very old Ashe's juniper trees, the largest measuring 30 inches or more in diameter.

### Access:

Travel north on State Highway 9 from Mountain View approximately 15 miles. Turn left on Mt. Olive Access Road and travel 1.3 miles to the natural area sign and small clearing on either side of the road for parking.

### Stewardship Activities:

ANHC staff led a tour of the area for a medicinal plant workshop held by the Arkansas State Parks' Ozark Folk Center. Staff also conducted boundary maintenance, installed a cliff warning sign, performed general plant inventory and rare plant monitoring, and treated invasive plant species.

**Date of Last Visit:** 4/4/2014

### Status:

Invasive plant species were reduced. Inventory work added species to the plant list, verified the persistence of tracked plants, and documented a new tracked plant.

### Elements of Special Concern:

<u>Scientific Name</u>	<u>Common Name</u>	<u>Type of Element</u>
<i>Argyrochosma dealbata</i>	powdery cloak fern	Plant
<i>Artemisia ludoviciana</i> ssp. <i>mexicana</i>	white sagebrush	Plant
<i>Asarum canadense</i> var. <i>acuminatum</i>	taper-tip wild ginger	Plant
<i>Asplenium pinnatifidum</i>	lobed spleenwort	Plant
<i>Brickellia grandiflora</i>	tassel-flower	Plant
<i>Carex planostachys</i>	cedar sedge	Plant
Central Interior Highlands Calcareous Glade and Barrens		Natural Community
Central Interior Highlands Dry Acidic Glade and Barrens		Natural Community
<i>Coreopsis grandiflora</i> var. <i>saxicola</i>	large-flower tickseed	Plant
<i>Nemastylis nuttallii</i>	Nuttall's pleat-leaf	Plant
<i>Penstemon cobaea</i>	showy beardtongue	Plant
<i>Symphyotrichum sericeum</i>	silvery aster	Plant

### Acquisition Summary:

<b>Tract Name</b>	<b>Legal Interest</b>	<b>Appraised Value</b>	<b>Purchase Price</b>	<b>Date Acquired</b>	<b>Funding Source</b>
Devil's Knob 1	Fee title	\$94,827.10	\$80,600.00	12/10/1976	State General Improvement Fund
Devil's Knob 2	Fee title	\$20,000.00	\$20,000.00	1/23/2006	Natural and Cultural Resources Council, Land Water Conservation Fund
Devil's Knob 3	Fee title	\$360,000.00	\$356,300.00	3/17/2009	Natural and Cultural Resources Council
Devil's Knob 4	Fee title	\$46,464.00	\$43,560.00	6/9/2010	1/8 Cent Conservation Tax
Devil's Knob 5	Fee title	\$32,000.00	\$30,000.00	8/30/2010	1/8 Cent Conservation Tax

## Downs Prairie Natural Area

**County Name:** Prairie

**Size (in acres):** 24

**Latitude:** 34.78142

**Longitude:** -91.49654

### Description:

Downs Prairie Natural Area is one of the few remnants of tallgrass prairie left in the Grand Prairie of eastern Arkansas (Mississippi Alluvial Plain). The natural area contains a diverse assemblage of wildflowers including Indian paintbrush, ashy sunflower, and white wild indigo. The area also supports several plant species that were probably once more common across this part of the state, such as prairie evening-primrose. Downs Prairie supports the largest documented remaining population of prairie mole crickets in the Grand Prairie. Prior to settlement, more than 400,000 acres of tallgrass prairie occurred across the Grand Prairie region. Today, less than one percent of those prairies remain.

### Access:

From DeValls Bluff travel approximately 1.5 miles west on U.S. Highway 70.

### Stewardship Activities:

ANHC staff continued treatment and monitoring of invasive plant species in the restoration areas and executed prescribed burns on 22 acres. ANHC staff also met with staff from the White River Irrigation District to discuss mitigation for possible impacts to the natural area as result of the proposed Grand Prairie Area Demonstration Project.

**Date of Last Visit:** 6/25/2014

### Status:

Field assessments noted a need for additional management activities in the restoration area. Invasive plant species were reduced. Plant inventory noted the persistence of tracked plants, and documented a new tracked plant.

### Elements of Special Concern:

<b>Scientific Name</b>	<b>Common Name</b>	<b>Type of Element</b>
<i>Asclepias obovata</i>	savannah milkweed	Plant
<i>Calopogon oklahomensis</i>	Oklahoma grass-pink	Plant
<i>Carex opaca</i>	opaque prairie sedge	Plant
<i>Eleocharis wolfii</i>	Wolf's spike-rush	Plant
<i>Gryllotalpa major</i>	prairie mole cricket	Animal
<i>Gymnopogon brevifolius</i>	short-leaf skeleton grass	Plant
<i>Lathyrus pusillus</i>	low vetchling	Plant
Lower Mississippi Alluvial Plain Grand Prairie		Natural Community
<i>Oenothera pilosella</i> ssp. <i>sessilis</i>	prairie evening-primrose	Plant
<i>Solidago speciosa</i> var. <i>rigidiuscula</i>	narrow-leaf showy goldenrod	Plant
<i>Solidago tortifolia</i>	twist-leaf goldenrod	Plant
<i>Tetraopes quinquemaculatus</i>	a red milkweed beetle	Animal

### Acquisition Summary:

<b>Tract Name</b>	<b>Legal Interest</b>	<b>Appraised Value</b>	<b>Purchase Price</b>	<b>Date Acquired</b>	<b>Funding Source</b>
Downs 1	Fee title	\$37,560.00	\$0.00	12/31/2000	Gift

## Falcon Bottoms Natural Area

**County Name:** Columbia, Lafayette, Nevada    **Size (in acres):** 3,210.815    **Latitude:** 33.44522    **Longitude:** -93.36312

### Description:

Falcon Bottoms Natural Area is an excellent example of the narrow, but highly diverse, natural communities that occur along small-to-medium sized streams of the Coastal Plain. Bayou Dorcheat, which flows through the natural area, is considered to be one of the most intact and important Arkansas streams west of the Ouachita River. The relatively unaltered landscape of the bottomlands and associated rare species and plant communities found along Bayou Dorcheat contribute to the site's overall high quality. Most of the natural area is occupied by a bottomland forest community dominated by willow oak and overcup oak in the seasonally flooded areas and bald cypress in the wetter areas. High knolls and terraces support a lowland pine-oak forest community. The U.S. Fish and Wildlife Service (USFWS) holds a conservation easement on the area as a result of a North American Wetlands Council Act (NAWCA) grant.

### Access:

From Interstate 30 in Prescott, take U.S. Highway 371 south to State Highway 53. Take State Highway 53 south to Falcon. At Falcon turn east on State Highway 355 and travel approximately 3 miles to Dorcheat Bayou. The natural area lies to the north and south of the bridge crossing along the Bayou.

### Stewardship Activities:

Contractors completed plant community monitoring, boundary maintenance, blocked unauthorized vehicle access, and removed invasive animal species. ANHC staff monitored the parking areas and sections of the boundary.

**Date of Last Visit:** 4/14/2014

### Status:

Feral hogs on the area continued to be reduced. Field assessments noted the need for ecological thinning.

### Elements of Special Concern:

<u>Scientific Name</u>	<u>Common Name</u>	<u>Type of Element</u>
Colonial nesting site, water birds		Other
Cypress-Tupelo Swamp		Natural Community
<i>Ditrysinia fruticosa</i>	Sebastian-bush	Plant
<i>Eurycea quadrivittata</i>	dwarf salamander	Animal
<i>Hexalectris spicata</i> var. <i>spicata</i>	crested-coralroot	Plant
<i>Hypoxis curtissii</i>	Curtiss' star-grass	Plant
<i>Noturus phaeus</i>	brown madtom	Animal
<i>Platanthera flava</i>	rein orchid	Plant
Willow Oak Forest		Natural Community

### Acquisition Summary:

<b>Tract Name</b>	<b>Legal Interest</b>	<b>Appraised Value</b>	<b>Purchase Price</b>	<b>Date Acquired</b>	<b>Funding Source</b>

## Fernwood Seep Natural Area

**County Name:** Polk

**Size (in acres):** 9.59

**Latitude:** 34.34962

**Longitude:** -94.3881

### Description:

Fernwood Seep Natural Area consists of a complex of Ouachita Mountain wooded acid seeps, with a spring-fed stream and upland pine-oak-hickory forests. Wooded acid seeps are an uncommon natural community and support rare species. There are few protected examples in the southeastern Ouachita Mountains and this site is the only example protected by the Arkansas Natural Heritage Commission (ANHC).

### Access:

From Wickes travel north on U.S. Highway 71 approximately 3 miles to County Road 14. Turn left (west) on County Road 14 and travel 1 mile. The natural area is north of the road.

### Stewardship Activities:

ANHC staff conducted general plant inventory, boundary maintenance, and trash removal.

**Date of Last Visit:** 2/15/2014

### Status:

Field assessments noted that road grading has caused sedimentation in the natural area. Inventory work added species to the plant list.

### Elements of Special Concern:

<u>Scientific Name</u>	<u>Common Name</u>	<u>Type of Element</u>
<i>Cardamine angustata</i>	slender toothwort	Plant
<i>Carex latebracteata</i>	Waterfall's sedge	Plant
<i>Carex stricta</i>	tussock sedge	Plant
<i>Hemidactylum scutatum</i>	four-toed salamander	Animal

### Acquisition Summary:

Tract Name	Legal Interest	Appraised Value	Purchase Price	Date Acquired	Funding Source
Fernwood 1	Fee title	\$8,700.00	\$0.00	10/7/2002	Gift

## Foushee Cave Natural Area

**County Name:** Independence

**Size (in acres):** 2,725.73

**Latitude:** 35.726902

**Longitude:** -91.788434

### Description:

Foushee Cave Natural area, located where the Boston Mountains meet the Springfield Plateau of the Ozarks in Independence County, includes one of the most biologically significant caves in Arkansas. Its rich biodiversity, including seven cave species tracked by Arkansas Natural Heritage Commission (ANHC), make protecting this site a high priority. Gray bats and Indiana bats, both federally endangered species, are known from the site, and the Foushee Cave snail occurs only in this cave system. The natural area contains a diversity of geology and landforms that support pine, pine-hardwood, and hardwood forests and woodlands along the full gradient of slopes and aspects. Deep forested ravines along perennial streams provide excellent foraging habitat for endangered bats.

### Access:

From the community of Locust Grove, travel southwest on State Highway 14/25 for 0.4 miles. Turn right onto State Highway 14 and travel 2.8 miles. The natural area is on the south side of the road.

### Stewardship Activities:

ANHC, The Nature Conservancy and Arkansas Game and Fish Commission (AGFC) staff conducted inventories for cave snails, plants, and bats. ANHC staff also maintained the boundaries, improved an old access road, and met with AGFC and Arkansas Highway and Transportation Department staff to plan for better public access to the area, including a new access road and parking area.

**Date of Last Visit:** 6/24/2014

### Status:

Surveys showed that the cavesnail population is stable and noted the presence of gray myotis (bats) and other bat species but no sign of white-nose syndrome. Inventory work added species to the plant list and documented a new tracked plant species.

### Elements of Special Concern:

<u>Scientific Name</u>	<u>Common Name</u>	<u>Type of Element</u>
<i>Amnicola cora</i>	Foushee cavesnail	Animal
<i>Caecidotea ancyla</i>	an isopod	Animal
<i>Epilobium coloratum</i>	willow-herb	Plant
<i>Eurycea spelaea</i>	grotto salamander	Animal
<i>Geological feature</i>		Other
<i>Heuchera villosa var. arkansana</i>	Arkansas alumroot	Plant
<i>Lirceus bicuspidatus</i>	an isopod	Animal
<i>Myotis grisescens</i>	gray myotis	Animal
<i>Myotis sodalis</i>	Indiana bat	Animal
<i>Xolotrema occidentale</i>	Arkansas wedge	Animal

### Acquisition Summary:

<b>Tract Name</b>	<b>Legal Interest</b>	<b>Appraised Value</b>	<b>Purchase Price</b>	<b>Date Acquired</b>	<b>Funding Source</b>
Foushee 1	Fee title	\$1,725,000.00	\$1,725,000.00	9/6/2011	Natural and Cultural Resources Council, State General Improvement Fund, Natural Gas Proceeds
Foushee 2	Fee title	\$1,055,000.00	\$1,055,000.00	6/1/2012	Natural and Cultural Resources Council, 1/8 Cent Conservation Tax, Natural Gas Proceeds, U.S. Fish and Wildlife Service Grant

## Gap Creek Natural Area

**County Name:** Montgomery

**Size (in acres):** 10.07

**Latitude:** 34.39285

**Longitude:** -93.58681

### Description:

Gap Creek is a small upland tributary of the Caddo River located in the Ouachita Mountains. The creek is spring fed and runs year-round. The natural area is surrounded by the Ouachita National Forest. These lands have not been significantly altered in more than half a century, a factor that contributes to the high water quality of Gap Creek. Plant communities within the natural area include upland pine-hardwood forest and riparian forest along Gap Creek. Fee title is held by a private landowner.

### Access:

From Glenwood, travel north on State Highway 8 for approximately 5 miles to unpaved road on the right. Turn right and travel approximately 0.5 mile to the second fork in the road. Bear right and travel 0.8 mile to the natural area sign. Access to this area is by permission of private landowner.

### Stewardship Activities:

ANHC staff maintained the boundaries, removed trash, and monitored the conservation easement.

**Date of Last Visit:** 2/12/2014

### Status:

Field assessments noted no problems.

### Elements of Special Concern:

<u>Scientific Name</u>	<u>Common Name</u>	<u>Type of Element</u>
<i>Cypripedium kentuckiense</i>	Kentucky lady's-slipper	Plant
<i>Etheostoma pallididorsum</i>	paleback darter	Animal
<i>Houstonia ouachitana</i>	Ouachita bluet	Plant
Upland Headwater Stream-Ouachita Mountains		Natural Community

### Acquisition Summary:

<b>Tract Name</b>	<b>Legal Interest</b>	<b>Appraised Value</b>	<b>Purchase Price</b>	<b>Date Acquired</b>	<b>Funding Source</b>
Gap Creek 1	Conservation easement (private landowner holds fee title)	\$0.00	\$0.00	7/20/1981	Gift

## Garrett Hollow Natural Area

**County Name:** Washington

**Size (in acres):** 747.008

**Latitude:** 35.78526

**Longitude:** -94.411

### Description:

Garrett Hollow Natural Area is located at the northern edge of the Boston Mountains near the boundary of the Ozark Highlands. The natural area is marked by rugged topography and consists of diverse hardwood forests and sandstone glades. Like much of the Ozarks, this natural area contains a number of karst features where fractured bedrock allows water to drain into crevices and solution tubes, creating small caves and subterranean streams. Caves and crevices within the natural area provide critical habitat for the federally endangered Ozark big-eared bat.

### Access:

From Van Buren take State Highway 59 for 16 miles to Natural Dam. Turn right on Liberty Hill Road. Go 8.3 miles until the road forks. Take the road to the right (Antioch Road) to the natural area entrance sign.

### Stewardship Activities:

ANHC staff maintained the parking areas, entrance signs, and boundaries.

**Date of Last Visit:** 5/29/2014

### Status:

Field assessments noted the need for supplemental tree planting in the restoration area.

### Elements of Special Concern:

<b>Scientific Name</b>	<b>Common Name</b>	<b>Type of Element</b>
<i>Corynorhinus townsendii ingens</i>	Ozark big-eared bat	Animal
<i>Eurycea spelaea</i>	grotto salamander	Animal
<i>Plethodon angusticlavius</i>	Ozark zigzag salamander	Animal

### Acquisition Summary:

<b>Tract Name</b>	<b>Legal Interest</b>	<b>Appraised Value</b>	<b>Purchase Price</b>	<b>Date Acquired</b>	<b>Funding Source</b>
Garrett Hollow 1	Fee title	\$400,000.00	\$300,000.00	4/6/2004	Natural and Cultural Resources Council, Land Water Conservation Fund
Garrett Hollow 2	Fee title	\$257,300.00	\$255,223.00	11/4/2008	U.S. Fish and Wildlife Service Grant

## Goose Pond Natural Area

**County Name:** Pope, Conway    **Size (in acres):** 391.89    **Latitude:** 35.26234    **Longitude:** -92.85391

### Description:

Goose Pond Natural Area, located in the Arkansas Valley, is a mosaic of open water and vegetated wetlands. Plant communities within the natural area include young water tupelo-bald cypress swamps, shrub swamps, American lotus-water lily marshes, and submerged beds of coontail. Many species of migratory waterfowl visit Goose Pond in the winter months, while a variety of other birds are present year round. The bird-voiced treefrog, a species of very limited distribution west of the Mississippi River, occurs here as well. Goose Pond Natural Area lies within the Ed Gordon/Point Remove Wildlife Management Area and is co-managed with the Arkansas Game and Fish Commission (AGFC).

### Access:

From Atkins, travel east on U.S. Highway 64 3.8 miles to Talley Lane. Turn left and travel north 1.3 miles to Happy Bend Road. Turn right and go east 1 mile to gravel road. Turn left at natural area sign and follow gravel road to parking area.

### Stewardship Activities:

AGFC staff conducted day-to-day management activities. ANHC staff removed trash and installed project signs.

**Date of Last Visit:** 1/21/2014

### Status:

Field assessments noted no problems.

### Elements of Special Concern:

<u>Scientific Name</u>	<u>Common Name</u>	<u>Type of Element</u>
<i>Hyla avivoca</i>	bird-voiced treefrog	Animal

### Acquisition Summary:

<b>Tract Name</b>	<b>Legal Interest</b>	<b>Appraised Value</b>	<b>Purchase Price</b>	<b>Date Acquired</b>	<b>Funding Source</b>
Goose Pond 1	Conservation easement (Arkansas Game and Fish Commission holds fee title)	\$196,500.00	\$200,000.00	2/19/1981	State General Improvement Fund

## H. E. Flanagan Prairie Natural Area

**County Name:** Franklin

**Size (in acres):** 340.18

**Latitude:** 35.3591

**Longitude:** -93.99756

### Description:

H.E. Flanagan Prairie Natural Area is an excellent example of the tallgrass prairie that once occurred across this part of the Arkansas Valley. Along with prairie grasses, the natural area hosts a wide variety of forbs. H.E. Flanagan Prairie, along with the nearby Cherokee Prairie Natural Area, are among the few remaining remnants of the more extensive Cherokee Prairie Complex that formerly occupied approximately 135,000 acres of the western portion of the Arkansas Valley. Prairies in this complex are different from prairies elsewhere in Arkansas as their soils are derived from shale. An oak savanna/woodland complex at the eastern edge of the area is currently being restored.

### Access:

From the intersection of State Highways 60 and 217, just north of Charleston, go east 2.2 miles and turn left (north) onto Grand Prairie Road, go 1.5 miles and the parking area is on the left.

### Stewardship Activities:

ANHC staff conducted bird surveys, controlled invasive plant species, maintained the parking areas, removed trash, and met with a contractor to review invasive plant control methods. Contractors treated invasive plant species with herbicides and used a forestry grinder to remove undesirable species from a prairie restoration area.

**Date of Last Visit:** 6/11/2014

### Status:

Both prairie and woodland habitat structure and composition were improved. Management activities reduced woody vegetation and invasive plants. Inventory work added species to the plant list and monitoring documented the persistence of rare species.

### Elements of Special Concern:

<b>Scientific Name</b>	<b>Common Name</b>	<b>Type of Element</b>
<i>Ammodramus henslowii</i>	Henslow's Sparrow	Animal
<i>Antennaria neglecta</i>	field pussytoes	Plant
Arkansas Valley Prairie and Woodland		Natural Community

<i>Laphria vorax</i>	a robberfly	Animal
<i>Nemastylis nuttallii</i>	Nuttall's pleat-leaf	Plant
<i>Nicrophorus americanus</i>	American burying beetle	Animal
<i>Polygala incarnata</i>	pink milkwort	Plant
<i>Rhynchospora macrostachya</i>	prairie horned beaksedge	Plant
<i>Terrapene ornata ornata</i>	ornate box turtle	Animal
<i>Tetraopes quinquemaculatus</i>	a red milkweed beetle	Animal
<i>Tetraopes texanus</i>	a red milkweed beetle	Animal

**Acquisition Summary:**

<b>Tract Name</b>	<b>Legal Interest</b>	<b>Appraised Value</b>	<b>Purchase Price</b>	<b>Date Acquired</b>	<b>Funding Source</b>
Flanagan 1 (Bumpers)	Fee title	\$120,000.00	\$110,000.00	7/12/1988	Natural and Cultural Resources Council
Flanagan 2 (Sullivan)	Fee title	\$50,000.00	\$50,000.00	12/20/1991	Natural and Cultural Resources Council
Flanagan 3 (Hudson)	Fee title	\$126,871.00	\$126,871.00	8/3/2010	1/8 Cent Conservation Tax

## Hall Creek Barrens Natural Area

**County Name:** Cleveland

**Size (in acres):** 647.3

**Latitude:** 33.81759

**Longitude:** -92.19725

### Description:

Hall Creek Barrens Natural Area, located in the Coastal Plain, consists of a mosaic of salt slicks, saline barrens, mound woodlands, pine-hardwood flatwoods, Delta post oak flatwoods, and bottomland hardwood forest communities. Soils at the site, containing naturally high amounts of sodium and magnesium salts, account for the sparse and irregular distribution of trees and the resultant dominance of grasses and other herbaceous vegetation in the barrens and associated woodlands. Stands of dwarf palmetto are distributed irregularly and lend a tropical aspect to the natural area. The unique soils and sparse tree cover over portions of the natural area create ideal habitat for a number of rare herbaceous plant species including the federally threatened species Geocarpon minimum.

### Access:

From Kingsland travel 6.4 miles south on Arkansas State Highway 189. Turn left on Mt. Elba Road. Travel northeast for 1.2 miles. Turn right (east) onto Hall Creek Deer Camp Road. Travel 0.3 mile to the natural area.

### Stewardship Activities:

ANHC staff conducted general plant inventory, rare plant monitoring, and targeted surveys for American chaffseed. A contractor developed a prescribed burn plan.

**Date of Last Visit:** 6/5/2014

### Status:

Inventory work added species to the plant list. Field assessments noted no problems.

### Elements of Special Concern:

<u>Scientific Name</u>	<u>Common Name</u>	<u>Type of Element</u>
<i>Ammodramus henslowii</i>	Henslow's Sparrow	Animal
<i>Anthenantia texana</i>	Kral's silkscale	Plant
<i>Eleocharis wolfii</i>	Wolf's spike-rush	Plant
<i>Geocarpon minimum</i>	geocarpon	Plant
<i>Krigia occidentalis</i>	western dwarf-dandelion	Plant
<i>Minuartia drummondii</i>	Drummond's sandwort	Plant
<i>Prenanthes barbata</i>	barbed rattlesnake-root	Plant
<i>Schoenolirion wrightii</i>	Texas sunnybell	Plant
South Central Saline Glade		Natural Community
<i>Symphyotrichum pratense</i>	barrens silky aster	Plant

### Acquisition Summary:

Tract Name	Legal Interest	Appraised Value	Purchase Price	Date Acquired	Funding Source
Hall Creek 1	Fee title	\$1,117,000.00	\$1,090,288.20	7/30/2010	Natural and Cultural Resources Council, U.S. Fish and Wildlife Service Grant

## Hell Creek Natural Area

**County Name:** Stone

**Size (in acres):** 211.3782

**Latitude:** 35.90699

**Longitude:** -92.07728

### Description:

Located at the boundary of the Springfield and Salem Plateaus of the Ozark Mountains, Hell Creek Natural Area supports populations of the Hell Creek Cave crayfish and the gray myotis, both federally endangered species. Most of Hell Creek Cave is wet year-round, with many of its passages flooded during periods of high rainfall. Hell Creek Cave is considered an example of a "solution channel" or "tunnel cave." Hell Creek, which flows through the cave, is spring fed and eventually empties into the White River. Hills above the cave support a diverse oak-hickory forest.

### Access:

From Mountain View (junction of State Highways 9 and 66) go east 0.6 mile on State Highway 9 to its junction with State Highway 14. Turn left (north) on State Highway 9 and go 1.3 miles to Herpel Road. Go about 4.9 miles (bearing left at 4.0 and 4.6 miles) and turn left. At Mountain View water tank, turn right and follow to natural area sign. Caution: public access may be restricted from time to time by a neighboring landowner's locked gate.

### Stewardship Activities:

ANHC staff conducted general vascular plant inventory and rare plant monitoring, entrance sign maintenance, and cleared the access road of fallen trees.

**Date of Last Visit:** 10/11/2013

### Status:

Surveys found the cave crayfish population is stable and no evidence of white-nose syndrome in the bat population. Unauthorized attempts were made to access the cave. Inventory work added species to the plant list and documented a new tracked plant.

### Elements of Special Concern:

<u>Scientific Name</u>	<u>Common Name</u>	<u>Type of Element</u>
<i>Brickellia grandiflora</i>	tassel-flower	Plant
<i>Cambarus zophonastes</i>	Hell Creek Cave crayfish	Animal
<i>Elymus riparius</i>	river-bank wild rye	Plant
<i>Eurycea spelaea</i>	grotto salamander	Animal
<i>Juglans cinerea</i>	butternut	Plant
<i>Lirceus bicuspidatus</i>	an isopod	Animal
<i>Myotis grisescens</i>	gray myotis	Animal
<i>Myotis leibii</i>	eastern small-footed bat	Animal

### Acquisition Summary:

<b>Tract Name</b>	<b>Legal Interest</b>	<b>Appraised Value</b>	<b>Purchase Price</b>	<b>Date Acquired</b>	<b>Funding Source</b>
Hell Creek 1 (The Nature Conservancy)	Fee title	\$44,000.00	\$30,891.30	6/8/1985	State General Improvement Fund
Hell Creek 2 (Dawson)	Fee title	\$10,000.00	\$8,000.06	6/8/1988	State General Improvement Fund, Federal Fund Balances
Hell Creek 3 (Dawson Family Trust)	Fee title	\$5,000.00	\$4,500.00	10/5/1989	Federal Fund Balances

## Holland Bottoms Willow Oak Forest Preserve

**County Name:** Lonoke

**Size (in acres):** 632.3

**Latitude:** 34.89646

**Longitude:** -92.06933

### Description:

Holland Bottoms Willow Oak Forest Preserve is located in the Mississippi Alluvial Plain. Jacks Bayou, a tributary of Bayou Two Prairie, bisects the natural area. Extensive hardwood flatwoods dominated by mature stands of willow oak characterize the natural area, with more diverse bottomland hardwood forests occupying lower sites adjacent to streams. Only 18 percent of the bottomland hardwood forests that occurred across the Lower Mississippi Valley currently remain. The natural area falls within the Holland Bottoms Wildlife Management Area and is co-managed with the Arkansas Game and Fish Commission (AGFC).

### Access:

Travel north on U.S. Highway 67 from Little Rock. Take exit 16A and turn right at red light onto access road. Travel 2.4 miles and turn left on East Coffett Road. Travel 0.2 mile and turn right on Holland Bottoms Road. Travel 0.7 mile and turn right on gravel road at Pickthorne Reservoir. Stay right through gate. Travel 1.1 miles to Wildlife Management Area campground parking area. Proceed on foot south into natural area.

### Stewardship Activities:

ANHC staff communicated with AGFC staff that conducts day-to-day management activities.

**Date of Last Visit:** 5/14/2014

### Status:

AGFC staff and field assessments noted no problems.

### Elements of Special Concern:

<b>Scientific Name</b>	<b>Common Name</b>	<b>Type of Element</b>
<i>Limnothlypis swainsonii</i>	Swainson's Warbler	Animal
Lower Mississippi River Flatwoods		Natural Community
<i>Spiranthes praecox</i>	giant ladies'-tresses	Plant

### Acquisition Summary:

<b>Tract Name</b>	<b>Legal Interest</b>	<b>Appraised Value</b>	<b>Purchase Price</b>	<b>Date Acquired</b>	<b>Funding Source</b>
Holland 1	Conservation easement (Arkansas Game and Fish Commission holds fee title)	\$0.00	\$0.00	1/20/1986	Gift

## Holloway Memorial Natural Area

**County Name:** Prairie

**Size (in acres):** 75

**Latitude:** 35.07016

**Longitude:** -91.5399

### Description:

Holloway Memorial Natural Area is representative of the once extensive hardwood flatwoods that occurred along terraces of the Grand Prairie of eastern Arkansas (Mississippi Alluvial Plain). These flatwoods forests typically varied with the topography and underlying soils, and included both bottomland and upland hardwood tree species. Prairie mounds are also scattered throughout the area, suggesting that it was once prairie thousands of years ago. Fee title is held by Prairie County.

### Access:

From State Highway 38 in Des Arc, travel north 6.8 miles on State Highway 11. Turn right on Allred Drive and go north 0.6 mile. The parking area is on the left side.

### Stewardship Activities:

ANHC staff maintained the trail and parking area, installed fire lines, and removed trash.

**Date of Last Visit:** 1/24/2014

### Status:

Field assessments noted no problems.

### Elements of Special Concern:

<b>Scientific Name</b>	<b>Common Name</b>	<b>Type of Element</b>
<i>Eleocharis wolfii</i>	Wolf's spike-rush	Plant

### Acquisition Summary:

<b>Tract Name</b>	<b>Legal Interest</b>	<b>Appraised Value</b>	<b>Purchase Price</b>	<b>Date Acquired</b>	<b>Funding Source</b>
Holloway 1	Conservation easement (Prairie County holds fee title)	\$0.00	\$0.00	1/27/1978	Gift

## Iron Mountain Natural Area

**County Name:** Polk

**Size (in acres):** 260.51

**Latitude:** 34.52942

**Longitude:** -94.33754

### Description:

Iron Mountain Natural Area is located within the Athens Plateau subdivision of the Ouachita Mountains. The area is bisected by Paul Branch, a small, intermittent stream which defines the valley between the northern and southern ridges. The natural area preserves a typical example of the upland pine-oak-hickory forests of the Ouachita Mountains and provides protected habitat for the southern red-backed salamander, a regional endemic.

### Access:

From Mena, travel approximately 7.1 miles southwest on U.S. Highway 71 through and beyond Potter Junction. Turn right on County Road 168 and travel 0.2 mile to fork. Turn right on County Road 169 and travel 0.3 mile to parking area on right. For additional parking, continue 0.1 mile on County Road 169, continue traveling west on a two track for 0.2 mile (keeping to the right as road splits) to the overflow parking area.

### Stewardship Activities:

ANHC staff treated invasive plant species, maintained the parking areas and trail, and conducted salamander inventory.

**Date of Last Visit:** 6/5/2014

### Status:

Invasive plant species continued to be reduced. Monitoring work documented the persistence of rare salamanders.

### Elements of Special Concern:

<b>Scientific Name</b>	<b>Common Name</b>	<b>Type of Element</b>
<i>Acer saccharum</i> var. <i>leucoderme</i>	chalk maple	Plant
<i>Cardamine angustata</i>	slender toothwort	Plant
<i>Carex latebracteata</i>	Waterfall's sedge	Plant
<i>Plethodon serratus</i>	southern red-backed salamander	Animal

### Acquisition Summary:

<b>Tract Name</b>	<b>Legal Interest</b>	<b>Appraised Value</b>	<b>Purchase Price</b>	<b>Date Acquired</b>	<b>Funding Source</b>
Iron Mountain 1	Fee title	\$64,000.00	\$48,000.00	7/26/1979	State General Improvement Fund, Land and Water Conservation Fund
Iron Mountain 2	Fee title	\$88,000.00	\$88,000.00	6/18/2003	Natural and Cultural Resources Council, 1/8 Cent Conservation Tax

## Kings River Falls Natural Area

**County Name:** Madison

**Size (in acres):** 1,059.386

**Latitude:** 35.8945

**Longitude:** -93.58484

### Description:

Kings River Falls Natural Area is located at the interface of the Springfield Plateau and Boston Mountains subdivisions of the Ozarks. The natural area includes more than 3 miles of the Kings River with Kings River Falls being a focal point. Kings River is a clear mountain stream originating east of Boston in Madison County. The river flows for about 50 miles through Madison and Carroll Counties, eventually merging with Osage Creek before it flows into Table Rock Reservoir. A mixed hardwood forest covers the slopes and ridges of the natural area, with scattered pockets of shortleaf pine. Steep rocky slopes, sandstone bluffs, and rocky banks characterize the corridor along the river. A diverse and colorful shrub community borders the stream.

### Access:

From the community of Boston on State Highway 16 (between Fallsville and St. Paul), go north on County Road 3175 (dirt) for 2.1 miles; bear right as the road forks onto County Road 3415. Stay on this road for 2.3 miles until you come to a "T" intersection with County Road 3500. Turn left, and go across the creek and park at natural area sign.

### Stewardship Activities:

ANHC staff conducted trail maintenance, removed trash, maintained boundaries, conducted general plant inventory, and targeted surveys for harperella. ANHC staff held an on-site quality circle day and monitored the streambank stabilization project aimed at restoring natural hydrologic flow.

**Date of Last Visit:** 6/3/2014

### Status:

The coordination of road work and parking lot repair was completed. The degraded areas of Mitchell Branch and Kings River have been stabilized. Inventory work added species to the plant list. A new tracked plant species was documented.

### Elements of Special Concern:

<u>Scientific Name</u>	<u>Common Name</u>	<u>Type of Element</u>
<i>Elymus riparius</i>	river-bank wild rye	Plant
<i>Heuchera villosa var. arkansana</i>	Arkansas alumroot	Plant
<i>Hieracium scabrum</i>	rough hawkweed	Plant
<i>Orconectes williamsi</i>	Williams crayfish	Animal
<i>Osmorrhiza claytonii</i>	hairy sweet-cicely	Plant

### Acquisition Summary:

Tract Name	Legal Interest	Appraised Value	Purchase Price	Date Acquired	Funding Source
Kings River 1 (Coger)	Fee title	\$9,000.00	\$8,000.00	5/25/1979	State General Improvement Fund, Land and Water Conservation Fund
Kings River 2 (Ewing)	Fee title	\$232,000.00	\$190,000.00	8/19/1996	Natural and Cultural Resources Council
Kings River 3 (Maggard)	Fee title	\$61,397.12	\$55,000.00	12/10/1996	Natural and Cultural Resources Council
Kings River 4 (Maggard/ Johnson)	Fee title	\$156,079.00	\$156,079.00	4/3/2008	Natural and Cultural Resources Council
Kings River 5 (BVF)	Fee title	\$66,600.00	\$0.00	6/27/2008	Gift
Kings River 6 (Eaton)	Fee title	\$279,000.70	\$279,000.00	3/8/2010	1/8 Cent Conservation Tax
Kings River 7 (Bennett)	Fee title	\$54,306.75	\$54,307.75	4/9/2010	1/8 Cent Conservation Tax
Kings River 8 (Throneberry)	Fee title	\$146,523.00	\$146,523.70	5/3/2010	1/8 Cent Conservation Tax
Kings River 9 (Johnson)	Fee title	\$203,601.60	\$203,601.60	5/31/2012	1/8 Cent Conservation Tax

## Kingsland Prairie Natural Area

**County Name:** Cleveland

**Size (in acres):** 399.19

**Latitude:** 33.8636

**Longitude:** -92.252

### Description:

Kingsland Prairie Natural Area, located in the Coastal Plain, consists of a mosaic of salt slicks, saline barrens, mound woodlands, pine savanna, and bottomland hardwood forest communities. Soils at the site, containing naturally high amounts of sodium and magnesium salts, account for the sparse and irregular distribution of trees and the resultant dominance of grasses and other herbaceous vegetation in the barrens and associated woodlands. The unique soils and sparse tree cover create ideal habitat for a number of rare herbaceous plant species including the federally threatened species Geocarpon minimum. Numerous shallow, seasonally-wet depressions in the barrens also provide for a rich diversity of plant species. The Nature Conservancy (TNC) owns property contiguous with the natural area.

### Access:

From Kingsland, travel northeast approximately 2.6 miles on State Highway 79. Turn right (southeast) onto Prairie Road and travel 1.2 miles to the "Y" in the road. Park along roadside.

### Stewardship Activities:

ANHC staff conducted monitoring and surveys for geocarpon. A contractor treated invasive plant species, installed fire lines, completed plant community monitoring, and inspected a bedded plantation area for future forest thinning activities.

**Date of Last Visit:** 6/18/2014

### Status:

Inventory work added species to the plant list and documented additional locations of geocarpon. Field assessments noted feral hog damage on a portion of the area including within geocarpon habitat. Invasive plants were reduced.

### Elements of Special Concern:

<b>Scientific Name</b>	<b>Common Name</b>	<b>Type of Element</b>
<i>Alophia drummondii</i>	pinwoods-lily	Plant
<i>Ammodramus henslowii</i>	Henslow's Sparrow	Animal
<i>Anthenantia texana</i>	Kral's silkscale	Plant
<i>Crocanthemum rosmarinifolium</i>	rosemary rock-rose	Plant
<i>Geocarpon minimum</i>	geocarpon	Plant
<i>Iva angustifolia</i>	slender marsh-elder	Plant
<i>Krigia occidentalis</i>	western dwarf-dandelion	Plant
<i>Schoenolirion wrightii</i>	Texas sunnybell	Plant
South Central Saline Glade		Natural Community
<i>Spiranthes praecox</i>	giant ladies'-tresses	Plant
<i>Symphyotrichum pratense</i>	barrens silky aster	Plant

### Acquisition Summary:

<b>Tract Name</b>	<b>Legal Interest</b>	<b>Appraised Value</b>	<b>Purchase Price</b>	<b>Date Acquired</b>	<b>Funding Source</b>
Kingsland 1 (The Nature Conservancy)	Fee title	\$165,000.00	\$165,000.00	6/17/2009	Natural and Cultural Resources Council, Land and Water Conservation Fund
Kingsland 2 (AR Pulpwood)	Fee title	\$179,000.00	\$178,809.27	7/1/2010	Natural and Cultural Resources Council, U.S. Fish and Wildlife Service Grant

## Konecny Grove Natural Area

**County Name:** Prairie

**Size (in acres):** 22.17

**Latitude:** 34.63496

**Longitude:** -91.59229

### Description:

Konecny Grove Natural Area is one of the few remaining examples of prairie slash woodland that once occurred across certain parts of the Grand Prairie of eastern Arkansas (Mississippi Alluvial Plain). Slash woodlands represent a transitional habitat from prairie to bottomland hardwood forest. Today, less than three percent of this habitat type remains in the Grand Prairie. Sugarberry, green ash, green hawthorn, and elm trees dominate the Area. A four-acre seasonal herbaceous wetland exists in the northern portion. The natural area protects the only known population of the rare Stern's Medlar. Fee title is held by a private landowner.

### Access:

From Hazen, travel south on U.S. Highway 63 (old State Highway 11) for 10 miles to its junction with State Highway 86. Turn Right on State Highway 86 and travel for 1.2 miles. At a sharp curve in the road turn onto a gravel road that goes straight and go for 0.9 mile. Turn left on a dirt road and go 0.4 mile to the grove.

### Stewardship Activities:

ANHC staff treated invasive plant species, installed fire lines, and conducted a prescribed burn.

**Date of Last Visit:** 2/21/2014

### Status:

Invasive plant species continued to be reduced. Field assessments noted no other problems.

### Elements of Special Concern:

<b>Scientific Name</b>	<b>Common Name</b>	<b>Type of Element</b>
<i>Carex opaca</i>	opaque prairie sedge	Plant
<i>Crataegus x canescens</i>	Stern's medlar	Plant
<i>Spiranthes odorata</i>	fragrant ladies'-tresses	Plant

### Acquisition Summary:

<b>Tract Name</b>	<b>Legal Interest</b>	<b>Appraised Value</b>	<b>Purchase Price</b>	<b>Date Acquired</b>	<b>Funding Source</b>
Konecny Grove 1	Conservation easement (private landowner holds fee title)	\$22,170.00	\$17,736.00	2/15/1976	State General Improvement Fund

## Konecny Prairie Natural Area

**County Name:** Prairie

**Size (in acres):** 70.69

**Latitude:** 34.62665

**Longitude:** -91.58035

### Description:

Konecny Prairie Natural Area is the largest block of high-quality tallgrass prairie left in the Grand Prairie of eastern Arkansas (Mississippi Alluvial Plain). Konecny Prairie is dominated by big bluestem, little bluestem, switchgrass, and Indian grass. Forb diversity is high with such plant species as compass-plant, prairie gayfeather, rough blazing-star, false aloe, and large coneflower being common. Prior to settlement, the entire Grand Prairie ecosystem covered approximately 900,000 acres, with more than 400,000 acres of that total consisting of prairie. Today, less than one percent of the prairie remains. A private landowner holds fee title to a portion of the natural area.

### Access:

From Hazen, travel south on U.S. Highway 63 (old State Highway 11) for 10 miles to its junction with State Highway 86. Turn right on State Highway 86 and travel for 1 mile. Turn left onto a gravel road and travel 1 mile. Turn right onto a farm road. Prairie lies at end of the farm road.

### Stewardship Activities:

ANHC staff cut and treated invasive plant species with herbicide.

**Date of Last Visit:** 2/21/2014

### Status:

Invasive woody plant species continue to be reduced. Field assessments noted no other problems.

### Elements of Special Concern:

<u>Scientific Name</u>	<u>Common Name</u>	<u>Type of Element</u>
<i>Antennaria neglecta</i>	field pussytoes	Plant
<i>Asclepias obovata</i>	savannah milkweed	Plant
<i>Asio flammeus</i>	Short-eared Owl	Animal
<i>Calopogon oklahomensis</i>	Oklahoma grass-pink	Plant
<i>Carex opaca</i>	opaque prairie sedge	Plant
<i>Cistothorus platensis</i>	Sedge Wren	Animal
<i>Cuscuta glomerata</i>	rope dodder	Plant
<i>Eleocharis wolfii</i>	Wolf's spike-rush	Plant
<i>Empidonax traillii</i>	Willow Flycatcher	Animal
<i>Gryllotalpa major</i>	prairie mole cricket	Animal
<i>Gymnopogon brevifolius</i>	short-leaf skeleton grass	Plant
Lower Mississippi Alluvial Plain Grand Prairie		Natural Community
<i>Oenothera pilosella</i> ssp. <i>sessilis</i>	prairie evening-primrose	Plant
<i>Paspalum boscianum</i>	bull paspalum	Plant
<i>Polygala incarnata</i>	pink milkwort	Plant
<i>Prunus pumila</i> var. <i>susquehanae</i>	sand cherry	Plant
<i>Solidago tortifolia</i>	twist-leaf goldenrod	Plant
<i>Terrapene ornata</i> ornata	ornate box turtle	Animal

### Acquisition Summary:

<b>Tract Name</b>	<b>Legal Interest</b>	<b>Appraised Value</b>	<b>Purchase Price</b>	<b>Date Acquired</b>	<b>Funding Source</b>
Konecny Prairie 1 (Konecny)	Conservation easement (private landowner holds fee title)	\$45,872.00	\$37,271.00	2/2/1977	State General Improvement Fund

<b>Tract Name</b>	<b>Legal Interest</b>	<b>Appraised Value</b>	<b>Purchase Price</b>	<b>Date Acquired</b>	<b>Funding Source</b>
Konecny Prairie 2	Fee title (Smith/Dobrovich)	\$23,100.00	\$23,100.00	12/9/1998	Natural and Cultural Resources Council
Konecny Prairie 3	Fee title (Dobrovich)	\$31,500.00	\$31,500.00	8/5/2005	Natural and Cultural Resources Council

## Logoly Natural Area

**County Name:** Columbia

**Size (in acres):** 200

**Latitude:** 33.34989

**Longitude:** -93.18353

### Description:

Logoly Natural Area, located in the Coastal Plain, is used intensively for environmental education and contains various natural communities representative of south central Arkansas. Forests of both pines and hardwoods are found on the area, including very large loblolly pines. The area also features several springs along with an assemblage of increasingly scarce plant species that are restricted to spring environments. American beech dominates the moist ravines and the beech-drops that grow parasitically on their roots are especially abundant. The natural area is contained within Logoly State Park and is managed jointly with Arkansas State Parks (ASP).

### Access:

The natural area is located within Logoly State Park six miles north of Magnolia. It can be reached by turning east on Logoly Road off U.S. Highway 79 at the McNeil junction.

### Stewardship Activities:

ANHC staff met with ASP staff to inspect trail erosion areas and develop a plan for remediation. ASP staff conducted day-to-day management activities.

**Date of Last Visit:** 6/2/2014

### Status:

Field assessments noted continued trail erosion and the need for a prescribed burn.

### Elements of Special Concern:

<b>Scientific Name</b>	<b>Common Name</b>	<b>Type of Element</b>
<i>Carex leptalea</i>	bristly-stalk sedge	Plant
<i>Coluber constrictor anthicus</i>	buttermilk racer	Animal
<i>Eurycea quadrivittata</i>	dwarf salamander	Animal
Lowland Pine-Oak Forest		Natural Community
<i>Polygonia nana</i>	candyroot	Plant

### Acquisition Summary:

<b>Tract Name</b>	<b>Legal Interest</b>	<b>Appraised Value</b>	<b>Purchase Price</b>	<b>Date Acquired</b>	<b>Funding Source</b>
Logoly 1	Conservation easement (Arkansas State Parks holds fee title)	\$80,000.00	\$0.00	4/16/1979	Gift

## Longview Saline Natural Area

**County Name:** Ashley

**Size (in acres):** 3,837

**Latitude:** 33.34695

**Longitude:** -91.95473

### Description:

Longview Saline Natural Area, located in the Coastal Plain, consists of a mosaic of saline barrens, mound woodlands, pine-hardwood flatwoods, and bottomland hardwood forest. Soils in parts of the site, containing naturally high amounts of sodium and magnesium salts, account for the sparse and unique vegetation of the barrens and associated woodlands. Some of the barrens at this site are unique for Arkansas in that they are often inundated for long durations from overbank flooding and support a flora distinct from that of other protected barrens within the state. Bottomland hardwood forests along the Saline River help to protect water quality, which, in turn helps to protect two federally endangered mussel species found in the river.

### Access:

From the intersection of U.S. Highway 425 in Fountain Hill, travel west on State Highway 8 for approximately 3.8 miles. Continue west on State Highway 8 from its junction with State Highway 133 for approximately 1.9 miles to Ashley County Road 452. Turn west (left) on County Road 452 and travel 1.8 miles. The natural area is on the west side of County Road 452 near its intersection with County Road 458.

### Stewardship Activities:

ANHC staff maintained the boundaries, reinstalled a gate and a fence that had been torn down, conducted general plant inventory, and targeted surveys for American chaffseed. Staff also monitored for Red-cockaded Woodpeckers and inspected prospective tracts for acquisition.

**Date of Last Visit:** 6/24/2014

### Status:

Inventory work documented one new tracked animal and added species to the plant list. Field assessments noted continued feral hog damage on a portion of the area. A new acquisition protected habitat for federally listed species.

### Elements of Special Concern:

<b>Scientific Name</b>	<b>Common Name</b>	<b>Type of Element</b>
<i>Ammocrypta clara</i>	western sand darter	Animal
<i>Anthenantia texana</i>	Kral's silkscale	Plant
<i>Carex lupuliformis</i>	false hop sedge	Plant
<i>Cyprogenia aberti</i>	western fanshell	Animal
<i>Eleocharis wolfii</i>	Wolf's spike-rush	Plant
<i>Lampsilis abrupta</i>	pink mucket	Animal
<i>Lampsilis ornata</i>	southern pocketbook	Animal
<i>Myotis austroriparius</i>	southeastern myotis	Animal
<i>Obovaria arkansasensis</i>	Ouachita creekshell	Animal
<i>Percina uranidea</i>	stargazing darter	Animal
<i>Picoides borealis</i>	Red-cockaded Woodpecker	Animal
<i>Pleurobema rubrum</i>	pyramid pigtoe	Animal
<i>Prenanthes barbata</i>	barbed rattlesnake-root	Plant
<i>Ptychobranchus occidentalis</i>	Ouachita kidneyshell	Animal
<i>Quadrula cylindrica cylindrica</i>	rabbitfoot	Animal
<i>Quadrula fragosa</i>	winged mapleleaf	Animal
<i>Quadrula metanevra</i>	monkeyface	Animal
<i>Schoenolirion wrightii</i>	Texas sunnybell	Plant
South Central Saline Glade		Natural Community
<i>Spiranthes praecox</i>	giant ladies'-tresses	Plant

**Acquisition Summary:**

Tract Name	Legal Interest	Appraised Value	Purchase Price	Date Acquired	Funding Source
Longview Saline 1	Fee title	\$1,020,000.00	\$1,020,000.00	3/25/2011	1/8 Cent Conservation Tax, Natural and Cultural Resources Council
Longview Saline 2	Fee title	\$3,000,000.00	\$3,000,000.00	5/1/2012	U.S. Fish and Wildlife Service Grant, Natural and Cultural Resources Council, Natural Gas Proceeds
Longview Saline 3	Fee title	\$3,170.00	\$2,996,338.96	1/3/2014	U.S. Fish and Wildlife Service Grant, Natural and Cultural Resources Council, 1/8 Cent Conservation Tax

## Lorance Creek Natural Area

**County Name:** Pulaski, Saline

**Size (in acres):** 294.34

**Latitude:** 34.58682

**Longitude:** -92.25376

### Description:

Lorance Creek Natural Area is primarily a shallow, groundwater-fed swamp that spreads out along both sides of Lorance Creek. The natural area is situated at the transition zone between the sandy uplands of the Coastal Plain and the flat lowlands of the Mississippi Alluvial Plain and includes examples of each. The entire system is a diverse mosaic of upland pine hardwood forest, open water, bald-cypress/tupelo swamp, beaver ponds, and sandy washes overlain with groves of swamp black-gum. All these features are inter-connected by a complex network of small streams and seeps, which support a rich aquatic flora. A portion of the natural area has been developed, using environmentally sensitive construction techniques, to enhance public visitation and environmental education opportunities. This part of the natural area features a paved foot-trail, interpretive panels, and a boardwalk out into the swamp. Both the foot-trail and boardwalk are universally accessible. The Nature Conservancy (TNC) owns adjoining property.

### Access:

From Little Rock, take Interstate 530 (old U.S. Highway 65) south approximately 10 miles, exit at Bingham Road (Exit 9). Turn left (east) on Bingham Road, cross over the interstate, and continue through a residential area. At the first "Y" in the road, go right on Bingham Road. At the second "Y" in the road, bear right on Border Lane and the Lorance Creek parking lot is approximately 100 yards on the right.

### Stewardship Activities:

Weekly site monitoring and trash removal continued for the public-use facilities by both ANHC and TNC staff. ANHC staff also removed trash, maintained the trail and entrance areas, conducted post burn monitoring, and monitored for effects on the area from an upstream construction project. ANHC staff initiated a trail renovation project and selected a professional design architect for the project. A contractor executed a prescribed burn on 120 acres.

**Date of Last Visit:** 6/26/2014

### Status:

Inventory work increased the plant list. A contract for trail renovation design was implemented. Field assessments noted periodic vandalism still occurring.

### Elements of Special Concern:

<b>Scientific Name</b>	<b>Common Name</b>	<b>Type of Element</b>
<i>Carex bullata</i>	button sedge	Plant
<i>Carex stricta</i>	tussock sedge	Plant
<i>Hyla avivoca</i>	bird-voiced treefrog	Animal
<i>Prenanthes barbata</i>	barbed rattlesnake-root	Plant
<i>Spiraea tomentosa</i>	hardhack	Plant
<i>Spiranthes praecox</i>	giant ladies'-tresses	Plant
<i>Tradescantia paludosa</i>	confederate spiderwort	Plant

### Acquisition Summary:

## Louisiana Purchase Natural Area

**County Name:** Monroe, Lee,  
Phillips

**Size (in acres):** 35.102

**Latitude:** 34.64559

**Longitude:** -91.05422

### Description:

Louisiana Purchase Natural Area preserves the initial point, marked by a commemorative marker, from which the land surveys of the Louisiana Purchase Territory began in 1815. It also protects a portion of the largest remaining headwater swamp in the Lower Mississippi River Valley. The swamp surrounding the marker is about six miles long and less than a mile wide and comprises the headwaters of Little Cypress Creek, making it a "headwater swamp." Headwater swamps maintain more constant water levels than riparian swamps due to reduced watershed areas. This factor also makes them easier to drain and these swamps have all but vanished from the Mississippi Alluvial Plain. The natural area is a cooperative project with Arkansas State Parks (ASP) and features an interpretive boardwalk into the heart of the swamp, providing a view of the stone survey monument.

### Access:

From Interstate 40 at Brinkley, take U.S. Highway 49 and go 21 miles south to State Highway 362. Travel 2 miles east.

### Stewardship Activities:

ASP staff conducted day-to-day management activities. ANHC cleared debris from the boardwalk and monitored the area.

**Date of Last Visit:** 3/28/2014

### Status:

The altered hydrology of the surrounding area continues to impact the headwater swamp. Field assessments noted no other problems.

### Elements of Special Concern:

<u>Scientific Name</u>	<u>Common Name</u>	<u>Type of Element</u>
<i>Hyla avivoca</i>	bird-voiced treefrog	Animal

### Acquisition Summary:

<b>Tract Name</b>	<b>Legal Interest</b>	<b>Appraised Value</b>	<b>Purchase Price</b>	<b>Date Acquired</b>	<b>Funding Source</b>
Louisiana 1 (Hill)	Conservation easement (Arkansas State Parks holds fee title)	\$5,395.20	\$5,000.00	2/15/1977	State General Improvement Fund
Louisiana 2 (Bennett)	Conservation easement (Arkansas State Parks holds fee title)	\$5,395.20	\$5,000.00	3/10/1977	State General Improvement Fund

Louisiana 4 (Davidson)	Conservation easement (Arkansas State Parks holds fee title)	\$4,575.15	\$4,240.00	4/13/1977	State General Improvement Fund

## Middle Fork Barrens Natural Area

**County Name:** Saline

**Size (in acres):** 135.98

**Latitude:** 34.63757

**Longitude:** -92.84207

### Description:

Located in the eastern portion of the central Ouachita Mountains, Middle Fork Barrens Natural Area contains a complex of open glades, barrens, and dry oak woodlands on a shale substrate. Glades at the natural area range from seasonally wet, flat glades situated in erosional drainages to very dry hillside glades on south and west-facing slopes. Located within the glades are several globally rare, endemic plant species. The natural area is very diverse botanically and also includes rich hardwood forests on north-facing slopes and terraces along the Middle Fork of the Saline River, including a one-third mile stretch of the river. Extensive cedar removal work has been completed in recent years to restore open glades and woodlands to the area.

### Access:

From the junction of State Highway 5 and State Highway 9 at Crows, travel approximately 4.6 miles west, through Owensville to Burk Road, and turn right. Then travel approximately 1.5 miles. The majority of the area is located on the east side of the road.

### Stewardship Activities:

ANHC staff collected a new rare grass species, led a public tour for Master Naturalist, conducted general plant species inventory, and monitored for invasive plant species. A contractor executed a prescribed burn on 75 acres.

**Date of Last Visit:** 5/15/2014

### Status:

Inventory work added species to the plant list and documented one new tracked plant. Two additional species found on the area are now listed as tracked plants. Invasive plant species were reduced.

### Elements of Special Concern:

<b>Scientific Name</b>	<b>Common Name</b>	<b>Type of Element</b>
<i>Amsonia hubrichtii</i>	Ouachita bluestar	Plant
<i>Draba aprica</i>	open-ground whitlow-grass	Plant
<i>Eleocharis wolfii</i>	Wolf's spike-rush	Plant

Middle Fork 1	Fee title	\$188,900.00	\$188,500.00	6/30/2004	Natural and Cultural Resources Council

## Miller County Sandhills Natural Area

**County Name:** Miller

**Size (in acres):** 274.3104

**Latitude:** 33.19354

**Longitude:** -94.02781

### Description:

Miller County Sandhills Natural Area, located in the Coastal Plain, is one of the few remaining examples of relatively undisturbed sandhill vegetation in southwestern Arkansas. The area is marked by rolling topography and very sandy soils. The dry sandy soils support a distinctive flora, which includes a number of species characteristic of similar sites in eastern Texas. Some of the area is open and supports sandhill grasslands, while the remainder supports wooded and open seeps, pine forest, and oak woodlands characterized by a number of "scrub species." This natural area supports more rare plant species than any other area in the System of Natural Areas. The Nature Conservancy (TNC) shares ownership on a portion of the area and also owns additional land adjacent to the natural area.

### Access:

From Texarkana travel south on U.S. Highway 71 to State Highway 237. Travel south about 13.6 miles. The natural area is on the west side of State Highway 237. A primitive parking area is located about 0.8 mile south of the junction with State Highway 134 (County Road 434) on the west side of the road.

### Stewardship Activities:

ANHC staff conducted plant inventories, documented a new plant species, maintained the boundaries, removed trash, and conducted post-burn monitoring. A contractor executed a prescribed burn on 65 acres.

**Date of Last Visit:** 5/10/2014

### Status:

Inventory work added new species to the plant list and documented two new tracked plants. Management activities reduced woody vegetation.

### Elements of Special Concern:

<b>Scientific Name</b>	<b>Common Name</b>	<b>Type of Element</b>
<i>Alophia drummondii</i>	pinewoods-lily	Plant
<i>Aristida lanosa</i>	woolly three-awn	Plant
<i>Asimina parviflora</i>	dwarf pawpaw	Plant

## Mills Park Natural Area

**County Name:** Saline

**Size (in acres):** 10.4763

**Latitude:** 34.60542

**Longitude:** -92.48287

### Description:

Mills Park is a unique example of an urban natural area. This small tract harbors acidic wooded seeps and represents the once extensive forests that occurred across the Coastal Plain. The natural area consists of a wooded block within the larger context of an 80-acre city park owned by the City of Bryant. Ferns, shrubs, and sedges grow in a series of wooded seeps that flow into an unnamed tributary of Crooked Creek.

### Access:

Travel southeast on State Highway 183 through Bryant to Mills Park Road. Travel east and then north on Mills Park Road. Turn left at the second Warren Bass Circle entrance to the city park. The natural area lies within the city park in the northwest corner.

### Stewardship Activities:

ANHC staff reduced invasive plant species, removed trash, and maintained the boundaries. The City of Bryant managed the daily public use of the area.

**Date of Last Visit:** 5/15/2014

### Status:

The city of Bryant approved a prescribed burn plan. Invasive plant species were reduced. Active public use continues.

### Elements of Special Concern:

<u>Scientific Name</u>	<u>Common Name</u>	<u>Type of Element</u>
<i>Photinia melanocarpa</i>	black chokeberry	Plant

### Acquisition Summary:

Tract Name	Legal Interest	Appraised Value	Purchase Price	Date Acquired	Funding Source
Mills 1	Conservation easement (city of Bryant holds fee title)	\$0.00	\$0.00	10/12/1990	Gift

## Moro Big Pine Natural Area-Wildlife Management Area

**County Name:** Calhoun

**Size (in acres):** 15,922.78

**Latitude:** 33.39717

**Longitude:** -92.41385

### Description:

Moro Big Pine Natural Area-Wildlife Management Area is part of a 120,000 acre site that is considered the best and largest remaining loblolly pine flatwoods in the Coastal Plain of Arkansas. The soils at this site are poorly-drained with a shallow fragipan that limits root penetration and creates wetland conditions during part of the growing season. Overall diversity is high with several rare plant communities represented including pine flatwoods savanna and woodland, saline soil barrens, and both wooded and open sandy seeps. The site also supports a variety of rare plants and animals including the federally endangered Red-cockaded Woodpecker. A conservation easement on the area ensures that some of this habitat is also managed to support increased game species like deer, turkey, and quail. A private landowner, The Arkansas Game and Fish Commission (AGFC) and the Arkansas Natural Heritage Commission (ANHC) co-manage this natural area.

### Access:

From Hampton travel south on U.S. Highway 167 approximately 8.5 miles to County Road 29 and turn left (east). Proceed 4.4 miles to County Road 31 (second road on the right). Turn right and travel approximately 0.3 mile to parking area.

### Stewardship Activities:

ANHC staff led a field trip for the Arkansas Native Plant Society, conducted general plant inventories and targeted surveys for American chaffseed. ANHC staff also attended the annual Moro Big Pine Natural Area-Wildlife Management Area management meeting with staff from ANHC, AGFC, Potlatch, and The Nature Conservancy to discuss past and future management of the area.

**Date of Last Visit:** 5/15/2014

### Status:

A prescribed burn improved the composition and structure of rare plant communities. Inventory added species to the plant list and documented the persistence of rare plants. Staff coordinated with other partners about a proposed highway widening project.

### Elements of Special Concern:

<u>Scientific Name</u>	<u>Common Name</u>	<u>Type of Element</u>
<i>Alophia drummondii</i>	pinewoods-lily	Plant
<i>Anthenantia texana</i>	Kral's silkscale	Plant
<i>Coelorachis rugosa</i>	wrinkled joint-tail	Plant
<i>Dichanthelium scabriusculum</i>	tall swamp rosette grass	Plant
<i>Eleocharis wolfii</i>	Wolf's spike-rush	Plant
<i>Eriocaulon decangulare</i>	large-head pipewort	Plant
<i>Fuirena bushii</i>	Bush's umbrella sedge	Plant
<i>Gymnopogon brevifolius</i>	short-leaf skeleton grass	Plant
<i>Hyla avivoca</i>	bird-voiced treefrog	Animal
<i>Lampropeltis triangulum amaura</i>	Louisiana milksnake	Animal
<i>Paspalum praecox</i>	early paspalum	Plant
<i>Picoides borealis</i>	Red-cockaded Woodpecker	Animal
<i>Plethodon kisatchie</i>	Louisiana slimy salamander	Animal
<i>Prenanthes barbata</i>	barbed rattlesnake-root	Plant
<i>Rhynchospora gracilenta</i>	slender beaksedge	Plant
<i>Rhynchospora rariflora</i>	few-flower beaksedge	Plant
<i>Sabatia campanulata</i>	slender rose-gentian	Plant
<i>Smilax walteri</i>	red-berried greenbrier	Plant
<i>Tradescantia paludosa</i>	confederate spiderwort	Plant
<i>Xyris ambigua</i>	Coastal Plain yellow-eyed-grass	Plant

**Acquisition Summary:**

<b>Tract Name</b>	<b>Legal Interest</b>	<b>Appraised Value</b>	<b>Purchase Price</b>	<b>Date Acquired</b>	<b>Funding Source</b>
Moro Big 1 (Potlatch)	Conservation easement (ANHC has 36% interest and Arkansas Game and Fish Commission has 64% interest)	\$771,280.99	\$771,280.99	12/17/2007	Natural and Cultural Resources Council
Moro Big 2 (Potlatch)	Conservation easement (ANHC has 36% interest and Arkansas Game and Fish Commission has 64% interest)	\$1,261,021.50	\$1,261,031.50	3/2/2009	U.S. Forest Service Grant

## Moro Creek Bottoms Natural Area

**County Name:** Cleveland

**Size (in acres):** 81.113

**Latitude:** 33.77712

**Longitude:** -92.32454

### Description:

Moro Creek Bottoms Natural Area, located in the Coastal Plain, supports high-quality stands of lowland oak-sweetgum and bald-cypress. Several cherrybark oak, water oak, and sweetgum trees on the natural area exceed three feet in diameter and tower more than 90 feet in height. The Nature Conservancy (TNC) owns adjoining property.

### Access:

From downtown Fordyce take State Highway 8 East. Go 5.7 miles and turn right (south), taking the first right fork at 1.0 mile. Continue about 0.4 mile on an unimproved woods road that joins from the right (west). Park and walk this woods road for about 1.0 mile. Caution: Public access may be restricted from time to time by a neighboring landowner's locked gate.

### Stewardship Activities:

ANHC staff maintained the boundaries.

**Date of Last Visit:** 6/24/2014

### Status:

Field assessments noted feral hog damage. No other problems were noted.

### Elements of Special Concern:

<u>Scientific Name</u>	<u>Common Name</u>	<u>Type of Element</u>
Lowland Oak-Sweetgum Forest		Natural Community
<i>Spiranthes odorata</i>	fragrant ladies'-tresses	Plant
West Gulf Coastal Plain Small Stream and River Forest		Natural Community

### Acquisition Summary:

Tract Name	Legal Interest	Appraised Value	Purchase Price	Date Acquired	Funding Source
Moro 1	Fee title	\$166,842.00	\$83,420.00	9/15/1987	Land and Water Conservation Fund

## Nacatoch Ravines Natural Area

**County Name:** Hempstead

**Size (in acres):** 2,122.125

**Latitude:** 33.65034

**Longitude:** -93.83154

### Description:

Nacatoch Ravines Natural Area protects a continuum of plant communities that occur along the transition from the upland blackland prairies to the low bottomlands along the Little River. It contains one of the largest, and most intact, examples of mesic (moderately moist), dry-mesic, and dry upland forests remaining in the northern part of the Coastal Plain. Through much of the site, canopy trees average two to three feet or more in diameter, with many larger individual trees. It also includes blackland prairie remnants, hardwood flatwoods, wooded seeps, and supports several rare plant species. The Nature Conservancy (TNC) shares ownership on portions of this area.

### Access:

From Interstate 30 take exit 18 at Fulton, travel west on U.S. Highway 67 for 1 mile to State Highway 355. Turn right and travel north approximately 3 miles to southern tract. Continue north on Highway 355 for approximately 2.5 miles to northern tract.

### Stewardship Activities:

ANHC staff continued with intensive treatments of invasive kudzu, removed trash, maintained the boundaries and parking area, and performed general plant inventory. Staff also monitored the conservation easements. Contractors reduced invasive plant species, utilized a forestry grinder to remove understory, and executed a prescribed burn on 615 acres.

**Date of Last Visit:** 6/26/2014

### Status:

Inventory work added species to the plant list. Management activities improved forest structure. Shortleaf pine trees were planted in an area recently burned by a wildfire. Invasive plants were reduced, including continued aerial herbicide for kudzu.

### Elements of Special Concern:

<b>Scientific Name</b>	<b>Common Name</b>	<b>Type of Element</b>
<i>Carex decomposita</i>	cypress-knee sedge	Plant
<i>Carex kraliana</i>	Kral's sedge	Plant
<i>Cypripedium kentuckiense</i>	Kentucky lady's-slipper	Plant
<i>Diaperia prolifera</i> var. <i>prolifera</i>	big-head rabbit-tobacco	Plant
<i>Haliaeetus leucocephalus</i>	Bald Eagle	Animal
<i>Lithospermum tuberosum</i>	tuberous pucooon	Plant
<i>Plethodon serratus</i>	southern red-backed salamander	Animal
<i>Quercus austrina</i>	bluff oak	Plant
<i>Quercus sinuata</i>	Durand's white oak	Plant

### Acquisition Summary:

<b>Tract Name</b>	<b>Legal Interest</b>	<b>Appraised Value</b>	<b>Purchase Price</b>	<b>Date Acquired</b>	<b>Funding Source</b>
Nacatoch 1	Fee title	\$99,000.00	\$68,400.00	1/13/1989	Natural and Cultural Resources Council
Nacatoch 2 (IP)	ANHC has a 71% undivided interest and The Nature Conservancy has a 29% undivided interest in fee title.	\$155,000.00	\$110,000.00	5/18/1992	Natural and Cultural Resources Council, Land and Water Conservation Fund
Nacatoch 3 (IP)	Fee title	\$377,000.00	\$377,000.00	6/20/2002	Natural and Cultural Resources Council
Nacatoch 4 (The Nature Conservancy)	Conservation easement (The Nature Conservancy holds fee title)	\$963,000.00	\$963,000.00	8/4/2008	Natural and Cultural Resources Council
Nacatoch 5 (Anthony/Weyco)	Fee title and conservation easement (The Nature Conservancy holds fee title on 248 acres)	\$448,000.00	\$446,258.86	6/3/2010	Natural and Cultural Resources Council

## Palmetto Flats Natural Area

**County Name:** Little River

**Size (in acres):** 1,848

**Latitude:** 33.63689

**Longitude:** -94.26751

### Description:

Palmetto Flats Natural Area is the largest contiguous block of alluvial terrace forest remaining in the Red River Valley in Arkansas. It contains large, high-quality examples of rare wet hardwood and pine-hardwood flatwoods with a dwarf palmetto understory as well as seeps, upland mound woodlands, forested sloughs, and marshes.

### Access:

From Ashdown take State Highway 32 west approximately 5.2 miles to Richmond Road (Little River 21). Turn left (south) on Richmond Road and drive for about 5.6 miles. Turn right (north) onto a dirt road. Travel for 0.25 miles to the natural area boundary. A parking area is located one mile north on the east side of the road. This area may be seasonally inaccessible due to flooding.

### Stewardship Activities:

A local contracted caretaker maintained the parking area, cleaned the entrance sign, blocked unauthorized vehicle access, and maintained the boundaries. ANHC staff monitored the boundary and removed trash.

**Date of Last Visit:** 6/5/2014

### Status:

The need for an ecological thin continues. Field assessments noted no other problems.

### Elements of Special Concern:

<b>Scientific Name</b>	<b>Common Name</b>	<b>Type of Element</b>
<i>Alophia drummondii</i>	pinewoods-lily	Plant
<i>Crataegus brachyacantha</i>	blueberry hawthorn	Plant
<i>Eleocharis wolfii</i>	Wolf's spike-rush	Plant

### Acquisition Summary:

<b>Tract Name</b>	<b>Legal Interest</b>	<b>Appraised Value</b>	<b>Purchase Price</b>	<b>Date Acquired</b>	<b>Funding Source</b>
Palmetto 1	Fee title	\$163,105.50	\$162,750.00	8/4/2008	Natural and Cultural Resources Council
Palmetto 2	Fee title	\$1,846,354.26	\$1,842,330.00	9/30/2008	Natural and Cultural Resources Council

## Pine City Natural Area

**County Name:** Monroe

**Size (in acres):** 1,043.21

**Latitude:** 34.60493

**Longitude:** -91.13565

### Description:

Pine City Natural Area provides vital habitat for the only known population of the federally endangered Red-cockaded Woodpecker in the Mississippi Alluvial Plain of Arkansas. The natural area also contains the "Lost Pine of Arkansas." These fairly extensive, high-quality natural stands of loblolly pines are "lost" in the sense that they are an isolated population within the Mississippi Alluvial Plain. As a result, they have become genetically distinct from loblolly pines found elsewhere in the United States. Natural communities present include extensive loblolly pine flatwoods, wet hardwood flatwoods, and saline barrens. Additional holdings at the natural area consist of former agricultural land that is being restored to loblolly pine-hardwood forest.

### Access:

From Clarendon, take U.S. Highway 79 east (about 5 miles) to State Highway 17. Travel south on State Highway 17 (approximately 6 miles) to State Highway 86. Go east on State Highway 86 for 3 miles.

### Stewardship Activities:

ANHC staff assessed the effects of a small (<1 acre) wildfire, maintained the parking area and entrance signs, and conducted post burn monitoring of a contracted burn on 135 acres. ANHC staff continued to monitor the federally endangered Red-cockaded Woodpeckers (RCWs) and clean their nesting cavities. Staff also translocated one of the RCWs to Warren Prairie Natural Area.

**Date of Last Visit:** 6/17/2014

### Status:

The area continued to support three breeding RCW groups, the maximum possible until further habitat restoration is completed. Field assessments noted the need for supplemental planting in areas impacted by wildfire. Feral hogs continued to cause damage.

### Elements of Special Concern:

<u>Scientific Name</u>	<u>Common Name</u>	<u>Type of Element</u>
<i>Ammodramus henslowii</i>	Henslow's Sparrow	Animal
<i>Eleocharis wolfii</i>	Wolf's spike-rush	Plant
<i>Minuartia drummondii</i>	Drummond's sandwort	Plant
<i>Picoides borealis</i>	Red-cockaded Woodpecker	Animal
<i>Regina grahamii</i>	Graham's crayfish snake	Animal
<i>Spiranthes praecox</i>	giant ladies'-tresses	Plant

### Acquisition Summary:

<b>Tract Name</b>	<b>Legal Interest</b>	<b>Appraised Value</b>	<b>Purchase Price</b>	<b>Date Acquired</b>	<b>Funding Source</b>

## Pine Hollow Natural Area

**County Name:** Newton

**Size (in acres):** 132.525

**Latitude:**

**Longitude:**

### Description:

Pine Hollow Natural Area, located in the Ozark Mountains, consists primarily of second growth oak-hickory forest. Part of the natural area shelters numerous beech trees, some of them quite large. Mountain azaleas occur in the understory of certain parts of the natural area. A portion of the Upper Buffalo Wilderness Area (Ozark National Forest) partially surrounds the natural area and receives much of the tract's surface runoff, a factor contributing to the water quality of the Buffalo National River. Fee title is held by a private landowner.

### Access:

There is no public access to this natural area.

### Stewardship Activities:

ANHC monitored the conservation easement and the resident landowners continued to perform routine grounds maintenance of the area.

**Date of Last Visit:** 6/25/2014

### Status:

Adjacent landowner noted feral hog damage. Field assessments noted no other problems.

### Elements of Special Concern:

#### Scientific Name

#### Common Name

#### Type of Element

None Recorded

### Acquisition Summary:

Tract Name	Legal Interest	Appraised Value	Purchase Price	Date Acquired	Funding Source
Pine Hollow 1 (Messling)	Conservation easement (private landowner holds fee title)	\$0.00	\$0.00	6/12/1998	Gift

## Poison Springs State Forest Sand Barren & Oak-Pine Forest Preserve

**County Name:** Ouachita, Nevada **Size (in acres):** 899.46 **Latitude:** 33.66033 **Longitude:** -93.02663

### Description:

Poison Springs State Forest Sand Barren & Oak-Pine Forest Preserve includes more than 435 acres of sandhill barrens and woodland vegetation which support many rare species. Portions of the site are treeless, supporting sandhill grasslands and scrubby barrens, while others support woodlands with margareta oak, Arkansas oak, and bluejack oak. Much of the balance of the upland areas supports a mixed shortleaf pine-loblolly pine-oak forest while beech-holly-oak forest is found along streams. Although not old-growth, these forest stands are relatively mature compared to others of their kind in the Coastal Plain. Wooded seeps and open marshes are found in some areas. The area falls within the Poison Springs State Forest and is managed in cooperation with the Arkansas Forestry Commission (AFC) and The Nature Conservancy (TNC).

### Access:

The natural area includes seven non-contiguous tracts. The following directions guide visitors to the original two tracts acquired by the agency. From State Highway 57 and State Highway 24 at Chidester, travel 1.6 miles on State Highway 24 east to Scott Story Road (County Road 361). Travel south 1.35 miles to the north boundary of the Woods Unit. From this point, it is approximately 2.4 miles to the northeast corner of the barrens unit.

### Stewardship Activities:

ANHC staff monitored the conservation easements and marked a trail route used by researchers.

**Date of Last Visit:** 5/22/2014

### Status:

An ecological thin improved the structure and composition of woodlands on a portion of the natural area.

### Elements of Special Concern:

<u>Scientific Name</u>	<u>Common Name</u>	<u>Type of Element</u>
<i>Alophia drummondii</i>	pinewoods-lily	Plant

## Railroad Prairie Natural Area

**County Name:** Prairie, Lonoke

**Size (in acres):** 250.7

**Latitude:** 34.78175

**Longitude:** -91.69782

### Description:

Railroad Prairie Natural Area occupies portions of the abandoned right-of-way of the former Chicago, Rock Island, and Pacific railroad along U.S. Highway 70 between Carlisle and DeValls Bluff. Its long, linear shape encompasses a variety of habitats and communities including prairie, herbaceous wetland, oak woodland, and forest. A large portion of Railroad Prairie consists of tallgrass prairie, a habitat that was once much more common across the Grand Prairie of eastern Arkansas (Mississippi Alluvial Plain). Today, less than one percent of the prairies that occurred across this region remain. Parts of the prairie have been little disturbed and are dominated by grass species typical of tallgrass prairies such as big bluestem, little bluestem, switchgrass, and Indiangrass. Along with grasses, the natural area contains a diverse complement of forbs including narrow-leaved sunflower, long-bracted wild indigo, and compass plant. The natural area also provides critical habitat for several species now considered rare throughout the state.

### Access:

From Interstate 40 take the Carlisle exit (State Highway 13) and travel to the intersection with U.S. Highway 70. Turn left (east) on U.S. Highway 70. The prairie lies along the north right-of-way of Highway 70 beginning just east of Carlisle and extending to DeValls Bluff.

### Stewardship Activities:

ANHC staff maintained the entrance signs and boundaries, treated invasive species, and conducted prescribed burns. Staff met with an adjacent landowner to review a common boundary to prevent encroachment on the natural area. ANHC staff also met with representatives of the White River Irrigation District to discuss impacts to the natural area resulting from the Grand Prairie Area Demonstration Project.

**Date of Last Visit:** 6/25/2014

### Status:

Inventory work added species to the plant list. Management activities reduced invasive plant species and woody encroachment. Staff coordinated with others on the Grand Prairie Area Demonstration Project in order to minimize impacts to the natural area.

### Elements of Special Concern:

<b>Scientific Name</b>	<b>Common Name</b>	<b>Type of Element</b>
<i>Asclepias obovata</i>	savannah milkweed	Plant
<i>Calopogon oklahomensis</i>	Oklahoma grass-pink	Plant
<i>Carex normalis</i>	spreading oval sedge	Plant
<i>Carex opaca</i>	opaque prairie sedge	Plant
<i>Coelorachis rugosa</i>	wrinkled joint-tail	Plant
<i>Dichanthelium dichotomum</i> ssp. <i>roanokense</i>	Roanoke rosette grass	Plant
<i>Eleocharis wolfii</i>	Wolf's spike-rush	Plant
<i>Gentiana puberulenta</i>	downy gentian	Plant
<i>Gryllotalpa major</i>	prairie mole cricket	Animal
<i>Gymnopogon brevifolius</i>	short-leaf skeleton grass	Plant
<i>Hypericum adpressum</i>	creeping St. John's-wort	Plant
<i>Koeleria macrantha</i>	prairie June grass	Plant
Lower Mississippi Alluvial Plain Grand Prairie		Natural Community
<i>Muhlenbergia glabriflora</i>	inland muhly	Plant
<i>Nemastylis geminiflora</i>	celestial-lily	Plant
<i>Oenothera pilosella</i> ssp. <i>sessilis</i>	prairie evening-primrose	Plant
<i>Polygala incarnata</i>	pink milkwort	Plant
<i>Prenanthes aspera</i>	prairie rattlesnake-root	Plant
<i>Prunus pumila</i> var. <i>susquehanae</i>	sand cherry	Plant
<i>Sabatia campanulata</i>	slender rose-gentian	Plant
<i>Solidago speciosa</i> var. <i>rigidiuscula</i>	narrow-leaf showy goldenrod	Plant

<u>Scientific Name</u>	<u>Common Name</u>	<u>Type of Element</u>			
<i>Solidago tortifolia</i>	twist-leaf goldenrod	Plant			
<i>Tetraopes quinquemaculatus</i>	a red milkweed beetle	Animal			
<b>Acquisition Summary:</b>					
<b>Tract Name</b>	<b>Legal Interest</b>	<b>Appraised Value</b>	<b>Purchase Price</b>	<b>Date Acquired</b>	<b>Funding Source</b>
Railroad 1	Fee title	\$209,000.00	\$160,532.00	2/10/1987	State General Improvement Fund, Land and Water Conservation Fund
Railroad 2	Fee title	\$9,546.50	\$0.00	11/26/2003	Gift

## Rock Creek Natural Area

**County Name:** Sharp

**Size (in acres):** 414.68

**Latitude:** 36.22659

**Longitude:** -91.44052

### Description:

Rock Creek Natural Area, located within the Salem Plateau of the Arkansas Ozarks, contains one of the highest concentrations of rare plants in Arkansas. Many of these rare plants occur in a series of calcareous seep-fen and dolomite glade plant communities along Rock Creek and its tributaries. Rock Creek, a tributary of the Spring River, has very high water quality due to several springs and seeps feeding the creek, and the lack of development in the watershed. The natural area lies within the Harold Alexander Wildlife Management Area and is co-managed with the Arkansas Game and Fish Commission (AGFC).

### Access:

The Area is located approximately 6 miles south of Hardy. Take State Highway 342 east from U.S. Highway 62 along the Spring River to Rock Creek Road (County Road 51). Follow Rock Creek Road south to the Rock Creek bridge within the Harold Alexander Wildlife Management Area.

### Stewardship Activities:

AGFC staff conducted day-to-day management activities. ANHC staff monitored the conservation easement and led a tour of the area for the Natural Resources Conservation Service. Staff also maintained the entrance sign and trail, blocked unauthorized all-terrain vehicle access, and removed trash.

**Date of Last Visit:** 5/21/2014

### Status:

Inventory work added species to the plant list and one additional tracked plant. AGFC continues to address negative impacts from public use. Ground flora and species diversity increased following restoration in glade and woodland habitats.

### Elements of Special Concern:

<b>Scientific Name</b>	<b>Common Name</b>	<b>Type of Element</b>
<i>Carex interior</i>	inland star sedge	Plant
<i>Carex leptalea</i>	bristly-stalk sedge	Plant
<i>Carex suberecta</i>	prairie straw sedge	Plant
<i>Carex timida</i>	timid sedge	Plant
Central Interior Highlands Calcareous Glade and Barrens		Natural Community
<i>Cicindela oboleta</i>	scrubland tiger beetle	Animal
<i>Elymus riparius</i>	river-bank wild rye	Plant
<i>Erysimum capitatum</i> var. <i>capitatum</i>	western wallflower	Plant
<i>Juncus subcaudatus</i>	fen rush	Plant
<i>Ludwigia microcarpa</i>	small-fruit primrose-willow	Plant
<i>Mimulus ringens</i> var. <i>ringens</i>	Allegheny monkey-flower	Plant
<i>Nemastylis geminiflora</i>	celestial-lily	Plant
<i>Orconectes marchandi</i>	Mammoth Spring crayfish	Animal
Ozark-Ouachita Fen		Natural Community
<i>Pediomelum esculentum</i>	large Indian-breadroot	Plant
<i>Penstemon cobaea</i>	showy beardtongue	Plant
<i>Perideridia americana</i>	American squaw-root	Plant
<i>Plantago cordata</i>	heart-leaf plantain	Plant
<i>Pycnanthemum virginianum</i>	Virginia mountain-mint	Plant
<i>Rhynchospora capillacea</i>	capillary beaksedge	Plant
<i>Salix eriocephala</i>	Missouri willow	Plant
<i>Scleria verticillata</i>	whorled nut-rush	Plant
<i>Scutellaria bushii</i>	Bush's skullcap	Plant
<i>Solidago riddellii</i>	Riddell's goldenrod	Plant
<i>Spiranthes lucida</i>	shining ladies'-tresses	Plant

<u>Scientific Name</u>	<u>Common Name</u>	<u>Type of Element</u>			
Spring-Ozark Mountains		Natural Community			
<i>Sympyotrichum sericeum</i>	silvery aster	Plant			
Upland Stream-Ozark Mountains		Natural Community			
<i>Vitis rupestris</i>	sand grape	Plant			
<b>Acquisition Summary:</b>					
<b>Tract Name</b>	<b>Legal Interest</b>	<b>Appraised Value</b>	<b>Purchase Price</b>	<b>Date Acquired</b>	<b>Funding Source</b>
Rock Creek 1	Conservation easement (Arkansas Game and Fish Commission holds fee title)	\$83,189.52	\$83,189.52	5/30/1991	ANHC purchased 2 tracts of land that became part of Cut-off Creek WMA. Title to that land went to AGFC; ANHC retained an easement. In exchange, AGFC dedicated conservation easements on Rock Creek, Coffee Prairie, & additional land at Cut-off Creek

## Roth Prairie Natural Area

**County Name:** Arkansas

**Size (in acres):** 41.066

**Latitude:** 34.45407

**Longitude:** -91.57699

### Description:

Roth Prairie Natural Area is a tract of tallgrass prairie formerly managed for hay production. Grass species typical of tallgrass prairies dominate the site, such as big bluestem and Indiangrass. Prairie mounds occur across Roth Prairie, with some rising up to three feet in height. Prairie mounds are generally considered to be an indication that the prairie has never been plowed or leveled. Roth Prairie Natural Area represents one of the last few fragments of tallgrass prairie left in the Grand Prairie of eastern Arkansas (Mississippi Alluvial Plain). It has been estimated that, prior to settlement, the Grand Prairie contained approximately 400,000 acres of prairie. Less than one percent of these prairies remain. Arkansas State University holds title to the land.

### Access:

From Stuttgart, take U.S. Highway 79B to State Highway 276. Travel south 1.0 mile onto South Buerkle Road. After 1.0 mile on this road, turn right onto Roth Prairie Road. Continue 0.8 mile to the southeast corner entrance of natural area.

### Stewardship Activities:

ANHC staff maintained the entrance signs and parking area, reduced invasive plant species, removed trash. Staff also met with a local contactor to discuss vegetation management of the prairie.

**Date of Last Visit:** 6/25/2014

### Status:

Field assessments noted erosion problems on a portion of the natural area. Invasive plant species were reduced.

### Elements of Special Concern:

<u>Scientific Name</u>	<u>Common Name</u>	<u>Type of Element</u>
<i>Asclepias obovata</i>	savannah milkweed	Plant
<i>Asio flammeus</i>	Short-eared Owl	Animal
<i>Calopogon oklahomensis</i>	Oklahoma grass-pink	Plant
<i>Carex opaca</i>	opaque prairie sedge	Plant
<i>Cuscuta glomerata</i>	rope dodder	Plant
<i>Eleocharis wolfii</i>	Wolf's spike-rush	Plant
<i>Gymnopogon brevifolius</i>	short-leaf skeleton grass	Plant
<i>Laphria vorax</i>	a robberfly	Animal
Lower Mississippi Alluvial Plain Grand Prairie		Natural Community
<i>Muhlenbergia glaberrima</i>	inland muhly	Plant
<i>Oenothera pilosella</i> ssp. <i>sessilis</i>	prairie evening-primrose	Plant
<i>Ophisaurus attenuatus</i> <i>attenuatus</i>	western slender glass lizard	Animal
<i>Pycnanthemum verticillatum</i>	Whorled Mountain-mint	Plant
<i>Solidago speciosa</i> var. <i>rigidiuscula</i>	narrow-leaf showy goldenrod	Plant
<i>Solidago tortifolia</i>	twist-leaf goldenrod	Plant
<i>Sporobolus junceus</i>	pineywoods dropseed	Plant
<i>Terrapene ornata</i> <i>ornata</i>	ornate box turtle	Animal

### Acquisition Summary:

Tract Name	Legal Interest	Appraised Value	Purchase Price	Date Acquired	Funding Source
Roth 1	Conservation easement (Arkansas State University holds fee title)	\$61,500.00	\$61,500.00	7/23/1976	State General Improvement Fund

## Saratoga Blackland Prairie Natural Area

**County Name:** Howard

**Size (in acres):** 66.3886

**Latitude:** 33.75806

**Longitude:** -93.91196

### Description:

Saratoga Blackland Prairie Natural Area, located in the Coastal Plain, contains high quality blackland prairies and associated woodlands, with few non-native, invasive species. A prescribed fire regime has been successfully reintroduced, along with other management activities that are restoring the natural structure and composition of the prairies and woodlands over significant portions of the area. Several rare plant and animal species are also found on the area.

### Access:

From Hope take State Highway 73 to Saratoga. Travel north on State Highway 355 for approximately 0.6 miles. Stay straight and merge onto State Highway 32, continue to Chapel Hill Road and turn right. The natural area is located at the end of Chapel Hill Road.

### Stewardship Activities:

ANHC staff maintained the boundaries and the entrance sign. Staff also removed trash and conducted general plant inventory and rare plant monitoring. A contactor executed a prescribed burn on 60 acres.

**Date of Last Visit:** 2/28/2014

### Status:

Inventory work added to the plant list and monitoring confirmed the persistence of tracked plant species. Field assessments noted the need for woody vegetation management.

### Elements of Special Concern:

<u>Scientific Name</u>	<u>Common Name</u>	<u>Type of Element</u>
<i>Astragalus crassicarpus</i> var. <i>crassicarpus</i>	purple ground-plum	Plant
<i>Diaperia prolifera</i> var. <i>prolifera</i>	big-head rabbit-tobacco	Plant
<i>Microstylum morosum</i>	giant prairie robber fly	Animal
<i>Penstemon cobaea</i>	showy beardtongue	Plant
<i>Physaria gracilis</i> ssp. <i>gracilis</i>	slender bladderpod	Plant
<i>Stenosiphon linifolius</i>	false gaura	Plant
<i>Tetraloniella albata</i>	white long-horned bee	Animal
<i>Tetraopes texanus</i>	a red milkweed beetle	Animal

### Acquisition Summary:

Tract Name	Legal Interest	Appraised Value	Purchase Price	Date Acquired	Funding Source
Saratoga 1	Fee title	\$23,760.00	\$23,760.00	8/20/2004	Natural and Cultural Resources Council

## Searles Prairie Natural Area

**County Name:** Benton

**Size (in acres):** 10

**Latitude:** 36.3557

**Longitude:** -94.14364

### Description:

Searles Prairie Natural Area is a 10-acre remnant of a 10,000-acre tallgrass prairie that once occupied part of the Springfield Plateau of the Ozark Mountains around Rogers. Prairie mounds are scattered throughout the natural area and are thought to have originated from windblown material deposited during dry climatic periods since the last glaciation. Plant species such as big bluestem, little bluestem, prairie cordgrass, and switchgrass occur across the site. Located within the city limits of Rogers, this natural area provides public opportunities for environmental education. Although located within an urban setting, rare plant species continue to be recorded from this site. Fee title is held by a private landowner.

### Access:

Take exit 86 off Interstate 540 in Rogers. Go 2 miles east on U.S. Highway 62. The natural area is located at the junction of Dixieland Road and U.S. Highway 62.

### Stewardship Activities:

ANHC staff maintained the boundaries, removed trash, led a multi-agency tour of the area, conducted general plant inventory and monitored rare plant species. A contractor treated invasive species and volunteers sporadically removed trash.

**Date of Last Visit:** 5/22/2014

### Status:

Invasive plant species and woody encroachment were reduced. Inventory work added to the plant list and monitoring noted the persistence of tracked plant species.

### Elements of Special Concern:

<u>Scientific Name</u>	<u>Common Name</u>	<u>Type of Element</u>
<i>Asclepias incarnata</i> ssp. <i>incarnata</i>	swamp milkweed	Plant
<i>Calopogon oklahomensis</i>	Oklahoma grass-pink	Plant
<i>Carex buxbaumii</i>	brown bog sedge	Plant
<i>Carex conoidea</i>	open-field sedge	Plant
<i>Carex opaca</i>	opaque prairie sedge	Plant
<i>Carex scoparia</i> var. <i>scoparia</i>	pointed broom sedge	Plant
<i>Eleocharis wolfii</i>	Wolf's spike-rush	Plant
<i>Ozark Prairie and Woodland</i>		Natural Community
<i>Scleria muehlenbergii</i>	Muhlenberg's nut-rush	Plant

### Acquisition Summary:

<b>Tract Name</b>	<b>Legal Interest</b>	<b>Appraised Value</b>	<b>Purchase Price</b>	<b>Date Acquired</b>	<b>Funding Source</b>
Searles 1	Conservation easement (private landowner holds fee title)	\$100,000.00	\$0.00	6/16/1988	Gift

## Seven Devils Swamp Natural Area

**County Name:** Drew

**Size (in acres):** 1,076.26

**Latitude:** 33.57546

**Longitude:** -91.5789

### Description:

Seven Devils Swamp Natural Area is located along Cut-off Creek at the point where the creek flows from the pine-covered hills of the Coastal Plain to the flat lowlands of the Mississippi Alluvial Plain. The area is comprised of a relatively narrow bottomland occupied by bald cypress and water tupelo on the wetter sites and bottomland hardwood tree species on drier, but still flood-prone, sites. Further downstream, the area is almost permanently flooded, supporting a diverse swamp community. High-quality forested canebrakes are interspersed throughout the area. The natural area lies within the Seven Devils Swamp Wildlife Management Area and is co-managed with the Arkansas Game and Fish Commission (AGFC).

### Access:

From Monticello, travel east on State Highway 35 approximately 14.0 miles to Collins. From the Cut-off Creek bridge in Collins, continue east approximately 0.1 mile, and turn left on Selma-Collins Road (County Road 69). Travel north 3.65 miles. Turn left on Barnard Road. Travel 1.5 miles to boat ramp.

### Stewardship Activities:

AGFC staff conducted day-to-day management activities. ANHC staff monitored the conservation easement.

**Date of Last Visit:** 6/19/2014

### Status:

AGFC and ANHC field assessments noted no problems.

### Elements of Special Concern:

<u>Scientific Name</u>	<u>Common Name</u>	<u>Type of Element</u>
Colonial nesting site, water birds		Other
<i>Hypericum apocynifolium</i>	dogbane St. John's-wort	Plant

### Acquisition Summary:

<b>Tract Name</b>	<b>Legal Interest</b>	<b>Appraised Value</b>	<b>Purchase Price</b>	<b>Date Acquired</b>	<b>Funding Source</b>
Seven Devils 1	Conservation easement (Arkansas Game and Fish Commission holds fee title)	\$750,000.00	\$750,000.00	9/27/2002	Natural and Cultural Resources Council

## Singer Forest Natural Area

**County Name:** Poinsett

**Size (in acres):** 519.44

**Latitude:** 35.46242

**Longitude:** -90.54101

### Description:

Singer Forest Natural Area, located in the Mississippi Alluvial Plain, primarily consists of a bottomland forest/overflow swamp. Singer Forest is a good representation of the forested wetlands that once occurred throughout this part of Arkansas. Although once common across the Mississippi Alluvial Plain, most forested wetlands have been cleared for agricultural production. The Arkansas Game and Fish Commission (AGFC) holds fee title and co-manages this natural area.

### Access:

From Marked Tree, take State Highway 75 south 8.8 miles and turn right onto a dirt levee road (County Road 401). Travel west approximately 1.2 miles on top of levee and turn right crossing Ditch #109. The property is on the north side of Ditch #109.

### Stewardship Activities:

AGFC staff performed routine stewardship activities. ANHC staff maintained boundaries and removed trash.

**Date of Last Visit:** 2/27/2014

### Status:

AGFC and ANHC field assessments noted no problems.

### Elements of Special Concern:

<u>Scientific Name</u>	<u>Common Name</u>	<u>Type of Element</u>
------------------------	--------------------	------------------------

None Recorded

### Acquisition Summary:

Tract Name	Legal Interest	Appraised Value	Purchase Price	Date Acquired	Funding Source
Singer 1	Conservation easement (Arkansas Game and Fish Commission holds fee title)	\$0.00	\$0.00	8/30/1973	Gift

## Slippery Hollow Natural Area

**County Name:** Marion

**Size (in acres):** 1,195.121

**Latitude:** 36.35608

**Longitude:** -92.77574

### Description:

Slippery Hollow Natural Area, located in the Springfield and Salem Plateaus of the Ozark Mountains, consists of steep-sided stream valleys and intervening dry ridges. Upper slopes and ridges are forested with a mix of post oak, blackjack oak, and shortleaf pine with calcareous glades on south- and west-facing aspects. On the lower slopes, a mesic (moderately moist) hardwood forest of red and white oak, basswood, and sugar maple transitions to rich riparian forests along spring-fed streams. The area provides critical habitat for the federally endangered Ozark big-eared bat. The area is managed cooperatively with an adjacent tract owned by The Nature Conservancy (TNC).

### Access:

At Lakeway (junction of State Highway 14 and County Road 8001) go north on State Highway 14 for approximately 1.4 miles. The entrance sign is on the right side of the road. Parking is on the shoulder.

### Stewardship Activities:

ANHC staff conducted general plant inventory, maintained the entrance signs, and assessed adjacent property for possible acquisition.

**Date of Last Visit:** 9/25/2013

### Status:

A new property acquisition protected additional foraging habitat for federally listed bat species. Monitoring confirmed the presence of White Nose Syndrome. Inventory added to the plant list, including three new tracked species.

### Elements of Special Concern:

<b>Scientific Name</b>	<b>Common Name</b>	<b>Type of Element</b>
<i>Bactrurus speleopolis</i>	Cave City cave amphipod	Animal
<i>Carex careyana</i>	Carey's sedge	Plant
<i>Carex hitchcockiana</i>	Hitchcock's sedge	Plant
<i>Carex sparganioides</i>	bur-reed sedge	Plant
<i>Corynorhinus townsendii ingens</i>	Ozark big-eared bat	Animal
<i>Elymus glaucus</i> ssp. <i>mackenzii</i>	Mackenzie's blue wild rye	Plant
<i>Erythronium mesochoreum</i>	prairie trout-lily	Plant
<i>Eurycea spelaea</i>	grotto salamander	Animal
<i>Malvastrum hispidum</i>	yellow false mallow	Plant
<i>Myotis griseescens</i>	gray myotis	Animal
<i>Myotis leibii</i>	eastern small-footed bat	Animal
<i>Penstemon cobaea</i>	showy beardtongue	Plant
<i>Phlox bifida</i>	sand phlox	Plant
<i>Stygiobromus ozarkensis</i>	Ozark cave amphipod	Animal

### Acquisition Summary:

<b>Tract Name</b>	<b>Legal Interest</b>	<b>Appraised Value</b>	<b>Purchase Price</b>	<b>Date Acquired</b>	<b>Funding Source</b>
Slippery 1 (The Nature Conservancy/ Hulbert)	Fee title	\$66,000.00	\$51,031.88	6/19/1985	State General Improvement Fund, Land and Water Conservation Fund

## **Smoke Hole Natural Area**

**County Name:** Lonoke, Prairie

**Size (in acres):** 455

**Latitude:** 34.64226

**Longitude:** -91.66368

### **Description:**

Smoke Hole Natural Area, located in the Mississippi Alluvial Plain, contains a mature water tupelo swamp surrounded by forests consisting of a diverse mix of upland and bottomland hardwood tree species. Some tupelo trees within the swamp are up to 60 inches in diameter. The natural area encompasses approximately three miles of Two Prairie Bayou, which is a tributary to Bayou Meto. The channel of Two Prairie Bayou is braided throughout the area creating an ill-defined network of channels.

### **Access:**

From Carlisle, travel 9 miles south on State Highway 13. Turn left onto a county road and continue for 5 miles to the end of road. Park on side of road next to gate and walk east approximately 0.4 mile to the natural area. Caution: public access may be restricted from time to time by a neighboring landowner's locked gate.

### **Stewardship Activities:**

ANHC staff treated invasive plant species, maintained boundaries, and removed trash.

**Date of Last Visit:** 12/18/2013

### **Status:**

Invasive plant species were reduced. Field assessments noted no other problems.

### **Elements of Special Concern:**

<b>Scientific Name</b>	<b>Common Name</b>	<b>Type of Element</b>
Lower Mississippi River Bottomland Depression		Natural Community

### **Acquisition Summary:**

<b>Tract Name</b>	<b>Legal Interest</b>	<b>Appraised Value</b>	<b>Purchase Price</b>	<b>Date Acquired</b>	<b>Funding Source</b>
Smoke Hole 1	Fee title	\$185,000.00	\$150,000.00	10/7/1976	State General Improvement Fund, Land and Water Conservation Fund

## St. Francis Sunken Lands Natural Area

**County Name:** Poinsett

**Size (in acres):** 80

**Latitude:** 35.68692

**Longitude:** -90.43968

### Description:

St. Francis Sunken Lands Natural Area is located in the Mississippi Alluvial Plain on the east side of the St. Francis River within an area of bottomland forest known as the St. Francis Sunken Lands. It includes a portion of the largest known Arkansas population of the federally endangered shrub pondberry. The area is characterized by varied microtopography consisting of a series of shallow, north-south trending channels which are separated by low, sandy ridges of relative uplands (one to three feet high). The area is seasonally inundated by flood waters in winter and spring, but the varied microtopography provides a hydrologic gradient along which a rich diversity of plant species is found. The natural area lies adjacent to St. Francis Sunken Lands Wildlife Management Area.

### Access:

From Jonesboro travel east on Highway 18 for approximately 15 miles to Highway 135. Turn south on Highway 135 and travel approximately 9 miles to County Road 876. Turn right (west) on County Road 876 and travel into the St. Francis Sunken Lands Wildlife Management Area. Travel to the first gate. From this point the natural area is approximately 2.3 miles to the south. Access is dependent on road conditions. Contact the Arkansas Game and Fish Commission (Delta Field Office) for information on road conditions.

### Stewardship Activities:

ANHC staff communicated with Arkansas Game and Fish Commission staff about the status of the area.

**Date of Last Visit:** 5/21/2014

### Status:

AGFC staff reported no problems.

### Elements of Special Concern:

<u>Scientific Name</u>	<u>Common Name</u>	<u>Type of Element</u>
<i>Carex muskingumensis</i>	palm sedge	Plant
<i>Limnothlypis swainsonii</i>	Swainson's Warbler	Animal
<i>Lindera melissifolia</i>	pondberry	Plant

### Acquisition Summary:

<b>Tract Name</b>	<b>Legal Interest</b>	<b>Appraised Value</b>	<b>Purchase Price</b>	<b>Date Acquired</b>	<b>Funding Source</b>
St. Francis 1 (Portis)	Conservation easement (private landowner holds fee title)	\$61,700.00	\$61,700.00	10/1/2009	U.S. Fish and Wildlife Service Grant

## Stateline Sand Ponds Natural Area

**County Name:** Clay

**Size (in acres):** 140

**Latitude:** 36.49788

**Longitude:** -90.61163

### Description:

Stateline Sand Ponds Natural Area, located in the Mississippi Alluvial Plain, is a wooded tract composed of a mix of forest types set within an almost completely cleared agricultural landscape. The natural area includes ancient sand dune/pond complexes, floodplains, terraces, and associated landforms of the Pleistocene Mississippi River and present day Black and Little Black Rivers. It represents one of the last remaining areas of habitat for the federally endangered pondberry in this corner of the state and is a portion of a larger 1,500-acre conservation site that extends south and west into Arkansas and north and east into Missouri.

### Access:

From the center of Corning take U.S. Highway 67 north approximately 2.8 miles to its junction with State Highway 328, turn left (west) onto State Highway 328. Go 1 mile, turn right (north) on County Road 143; go 2.5 miles north.

### Stewardship Activities:

ANHC staff maintained the boundaries. The Nature Conservancy staff monitored the conservation easement.

**Date of Last Visit:** 1/25/2014

### Status:

Field assessments noted no problems.

### Elements of Special Concern:

<u>Scientific Name</u>	<u>Common Name</u>	<u>Type of Element</u>
<i>Ambystoma talpoideum</i>	mole salamander	Animal
<i>Blephilia hirsuta</i>	hairy wood mint	Plant
<i>Leitneria floridana</i>	corkwood	Plant
<i>Lindera melissifolia</i>	pondberry	Plant
<i>Platanthera flava</i>	rein orchid	Plant
<i>Platanthera peramoena</i>	purple fringeless orchid	Plant

### Acquisition Summary:

Tract Name	Legal Interest	Appraised Value	Purchase Price	Date Acquired	Funding Source
Stateline 1	Fee title	\$208,000.00	\$190,000.00	12/1/1994	Natural and Cultural Resources Council

## Stone Road Glade Natural Area

**County Name:** Howard

**Size (in acres):** 108.23

**Latitude:** 34.07987

**Longitude:** -93.90398

### Description:

Stone Road Glade Natural Area contains one of the least disturbed and highest quality limestone glades remaining in the Coastal Plain of Arkansas. This community type is unusual for this part of the state and contains a diverse assemblage of wildflowers throughout the growing season. Ecologically, the natural area is a mix of limestone glades, blackland prairie, woodland, and riparian forest communities.

### Access:

From the town of Center Point (northwest of Nashville) go east on State Highway 26 to State Highway 369. Go north on State Highway 369 for 4 miles. Cross Railroad tracks. Take first left after tracks. Cross bridge, and another set of tracks. Continue until reaching a "T" in the road. The natural area lies across the road at this "T." Caution: Public access may be restricted from time to time by a neighboring landowner's locked gate.

### Stewardship Activities:

ANHC staff maintained the boundaries, and entrance sign, and treated invasive plant species. A contractor completed plant community monitoring.

**Date of Last Visit:** 6/7/2014

### Status:

Invasive plant species were reduced. Conservation partners noted positive responses to woodland restoration activities.

### Elements of Special Concern:

<u>Scientific Name</u>	<u>Common Name</u>	<u>Type of Element</u>
<i>Allium drummondii</i>	Drummond's wild onion	Plant
<i>Plantago rhodosperma</i>	red-seed plantain	Plant
<i>Speyeria diana</i>	Diana Fritillary	Animal
<i>Tetraopes quinquemaculatus</i>	a red milkweed beetle	Animal
West Gulf Coastal Plain Northern Calcareous Prairie		Natural Community

### Acquisition Summary:

Tract Name	Legal Interest	Appraised Value	Purchase Price	Date Acquired	Funding Source
Stone Road 1	Fee title	\$99,000.00	\$20,833.00	4/9/1990	Natural and Cultural Resources Council

## Striplin Woods Natural Area

**County Name:** Arkansas

**Size (in acres):** 30.0139861

**Latitude:** 34.36948

**Longitude:** -91.12404

### Description:

A forest long protected from human disturbance, Striplin Woods Natural Area displays considerable diversity over an elevational gradient extending from elevated river terrace down to the margin of the White River. Overcup oak forest occupies much of the floodplain that constitutes most of the tract. Water hickory, willow oak, and honey locust are the major associate species. A steep slope above the floodplain supports species more typical of upland forests. The canopy is high, and many of the trees exceed 24 inches in diameter. Located in the Mississippi Alluvial Plain of eastern Arkansas, Striplin Woods represents a small portion of the once extensive hardwood forests that occurred across this part of the state. With clearing for agriculture, much of this habitat type has been lost. Striplin Woods is a part of the Dale Bumpers White River National Wildlife Refuge and is co-managed with the U.S. Fish and Wildlife Service (USFWS).

### Access:

From St. Charles, travel east on State Highway 1 towards the White River. Turn right (south) onto South CC Camp Road which leads to the White River Refuge Visitor Center. Park at the visitor center. The natural area is located behind (east of) the visitor center.

### Stewardship Activities:

USFWS White River National Wildlife Refuge staff conducted day-to-day management activities. ANHC and USFWS staff maintained water bars and maintained a shared trail system that links the refuge visitor center to the natural area.

**Date of Last Visit:** 1/28/2014

### Status:

Runoff from neighboring landowner is causing erosion and sediment deposition on a portion of the natural area. The trail was improved by the addition of foot bridges.

### Elements of Special Concern:

<u>Scientific Name</u>	<u>Common Name</u>	<u>Type of Element</u>
<i>Limnothlypis swainsonii</i>	Swainson's Warbler	Animal
Mississippi River Low Floodplain (Bottomland) Forest		Natural Community

### Acquisition Summary:

Tract Name	Legal Interest	Appraised Value	Purchase Price	Date Acquired	Funding Source
Striplin 1	Conservation easement (U.S. Fish and Wildlife Service holds fee title)	\$0.00	\$0.00	12/18/1979	Gift

## **Sweden Creek Falls Natural Area**

**County Name:** Madison

**Size (in acres):** 136.2

**Latitude:** 35.96919

**Longitude:** -93.45301

### **Description:**

Sweden Creek Falls Natural Area, located in the Boston Mountains of the Ozarks, supports a mix of glades, dry woodlands, dry-mesic woodlands, bluffs, and mesic hardwood forests. The terrain is dissected, with pine-oak woodlands on the dry upper west-facing slopes, and an oak-dominated forest on the lower west and east-facing slopes. Seasonally wet sandstone glades found along the blufftop are home to the rare small-headed pipewort. An 80-foot waterfall maintains moist conditions on a talus slope that supports a diverse fern community.

### **Access:**

From the town of Boxley take State Highway 21 north. At 4.0 miles turn left (south) onto a dirt road and proceed 3.0 miles to a gate on the right. The road is closed to vehicle access. Visitors can park along or across the road and walk into the property.

### **Stewardship Activities:**

ANHC staff treated invasive plant species, maintained boundaries, monitored bluff shelters for artifact poaching, conducted general plant inventories, rare plant monitoring, and led plant tours of the area in conjunction with the spring meeting of the Arkansas Native Plant Society. ANHC staff also worked with Master Naturalist volunteers to address an erosion problem at the trail head. A contractor executed a prescribed burn on 136 acres.

**Date of Last Visit:** 6/18/2014

### **Status:**

Inventory work added new species to the plant list and documented one new rare plant. Monitoring documented the persistence of other rare plant species. Invasive plants were reduced. Erosion problems from road grading were corrected.

### **Elements of Special Concern:**

<b>Scientific Name</b>	<b>Common Name</b>	<b>Type of Element</b>
<i>Asplenium pinnatifidum</i>	lobed spleenwort	Plant
<i>Eriocaulon koernickianum</i>	small-head pipewort	Plant
<i>Heuchera villosa var. arkansana</i>	Arkansas alumroot	Plant
<i>Lithobates sylvaticus</i>	wood frog	Animal
Ozark-Ouachita Dry-Mesic Oak Forest		Natural Community
<i>Solidago ptarmicoides</i>	white flat-top goldenrod	Plant

### **Acquisition Summary:**

<b>Tract Name</b>	<b>Legal Interest</b>	<b>Appraised Value</b>	<b>Purchase Price</b>	<b>Date Acquired</b>	<b>Funding Source</b>
Sweden Creek 1	Fee title	\$10,500.00	\$10,000.00	6/29/1977	State General Improvement Fund
Sweden Creek 2	Fee title	\$89,000.00	\$84,885.00	5/12/2000	Natural and Cultural Resources Council

## Swifton Sand Ponds Natural Area

**County Name:** Jackson

**Size (in acres):** 60

**Latitude:** 35.858

**Longitude:** -91.0999

### Description:

Swifton Sand Ponds Natural Area, located in the Mississippi Alluvial Plain, protects intact examples of rare sand pond habitat. These natural ponds occur between Pleistocene-aged sand dunes and provide habitat for pondberry, a federally-listed endangered shrub that continues to decline due to ongoing habitat loss. The natural area consists of a mostly wooded tract set within a largely cleared agricultural landscape. It contains the only protected examples of sand pond habitat in this part of the state. This rare habitat is continuing to be lost as the Pleistocene dune fields are leveled and filled.

### Access:

From Swifton travel northeast on U.S. Highway 67 approximately 2 miles to Jackson County Road 73. Turn right (east) on County Road 73 and travel 0.3 mile. The natural area is located south of the road.

### Stewardship Activities:

ANHC staff repaired the entrance sign, maintained boundaries, and monitored for unauthorized vehicle access.

**Date of Last Visit:** 11/29/2013

### Status:

Field assessments noted no problems.

### Elements of Special Concern:

<u>Scientific Name</u>	<u>Common Name</u>	<u>Type of Element</u>
<i>Lindera melissifolia</i>	pondberry	Plant

### Acquisition Summary:

<b>Tract Name</b>	<b>Legal Interest</b>	<b>Appraised Value</b>	<b>Purchase Price</b>	<b>Date Acquired</b>	<b>Funding Source</b>
Swifton 1 (Harvey)	Conservation easement (private landowner holds fee title)	\$34,257.00	\$34,257.00	10/3/2008	U.S. Fish and Wildlife Service Grant

## Taylor Woodlands Natural Area

**County Name:** Jefferson

**Size (in acres):** 137

**Latitude:** 34.19597

**Longitude:** -91.97174

### Description:

Taylor Woodlands Natural Area is characterized by the closed canopy, relatively open interior, and poor drainage representative of the bottomland hardwood forests that were once widespread across the Mississippi Alluvial Plain. The dominant tree species of the wetter areas of the natural area include bald-cypress, black willow, red maple, and water locust. Drier sites contain pecan, water hickory, and sugarberry trees.

### Access:

From the eastern terminus of Interstate 530 at Pine Bluff, take U.S. Highway 65 South toward Dumas. Travel southeast 0.2 mile to Taylor Phillips Road (I-530 Frontage Road). Turn right, and travel approximately 0.9 mile west. Turn left (south) on the farm road. The natural area is within the wooded area to the left (northeast).

### Stewardship Activities:

ANHC staff performed routine grounds maintenance and maintained the trail to the monument.

**Date of Last Visit:** 6/11/2014

### Status:

Field assessments noted no problems.

### Elements of Special Concern:

<u>Scientific Name</u>	<u>Common Name</u>	<u>Type of Element</u>
------------------------	--------------------	------------------------

None Recorded

### Acquisition Summary:

Tract Name	Legal Interest	Appraised Value	Purchase Price	Date Acquired	Funding Source
Taylor 1	Fee title	\$97,200.00	\$0.00	11/30/1977	Gift

## Terre Noire Natural Area

**County Name:** Clark

**Size (in acres):** 493.04

**Latitude:** 34.08696

**Longitude:** -93.17322

### Description:

Terre Noire Natural Area, located in the Coastal Plain, is one of the highest-quality blackland prairie and woodland complexes remaining in the state. The site is a mosaic of native herbaceous and woody vegetation that includes high-quality prairie as well as prairie in various stages of restoration. It also includes wooded areas that illustrate the forest and woodland matrix within which the prairie openings existed in southwestern Arkansas. The site is home to a number of rare plant and animal species. The Nature Conservancy (TNC) shares ownership on portions of the area.

### Access:

From Arkadelphia, travel west 4.8 miles on State Highway 26/51. At split, travel south on State Highway 51 for 0.5 mile to natural area on left (south) side of road.

### Stewardship Activities:

ANHC staff treated invasive plant species, maintained entrance signs, conducted general plant inventories and rare plant monitoring, and toured the area with ANHC Commissioners. A contractor completed plant community monitoring, removal of invasive plant species and executed a prescribed burn on 75 acres. ANHC staff and volunteers removed over 700 tires from the area.

**Date of Last Visit:** 6/26/2014

### Status:

Inventory work added new species to the plant list and documented the persistence of rare species. Restoration improved the quality of natural communities.

### Elements of Special Concern:

<b>Scientific Name</b>	<b>Common Name</b>	<b>Type of Element</b>
<i>Amblyscirtes bellii</i>	Bell's Roadside-Skipper	Animal
<i>Astragalus crassicarpus</i> var. <i>crassicarpus</i>	purple ground-plum	Plant

<i>Stenosiphon linifolius</i>	false gaura	Plant
<i>Tetraloniella albata</i>	white long-horned bee	Animal
West Gulf Coastal Plain Northern Calcareous Prairie		Natural Community

**Acquisition Summary:**

<b>Tract Name</b>	<b>Legal Interest</b>	<b>Appraised Value</b>	<b>Purchase Price</b>	<b>Date Acquired</b>	<b>Funding Source</b>
Terre Noire 1	ANHC has a 66% undivided interest and The Nature Conservancy has a 34% undivided interest in fee title	\$76,000.00	\$50,000.00	10/2/1991	Natural and Cultural Resources Council
Terre Noire 2	Fee title	\$103,000.00	\$103,000.00	6/23/2003	Natural and Cultural Resources Council, Land Water Conservation Fund
Terre Noire 3	Fee title	\$20,000.00	\$20,000.00	6/23/2003	Natural and Cultural Resources Council, Land Water Conservation Fund
Terre Noire 4	Fee title	\$243,000.00	\$243,000.00	10/10/2007	Natural and Cultural Resources Council, Land Water Conservation Fund
Terre Noire 5	Fee title	\$105,000.00	\$102,000.00	4/17/2009	Natural and Cultural Resources Council, 1/8 Cent Conservation Tax

## Warren Prairie Natural Area

**County Name:** Bradley, Drew

**Size (in acres):** 4,615.56

**Latitude:** 33.57956

**Longitude:** -91.98643

### Description:

Warren Prairie Natural Area, located in the Coastal Plain, consists of a mosaic of salt slicks, saline barrens, Delta post oak flatwoods, mound woodlands, pine flatwoods and woodlands, and bottomland hardwood forest communities. Soils at the site containing naturally high amounts of sodium and magnesium salts account for the sparse and irregular distribution of trees and the resultant dominance of grasses and other herbaceous vegetation in the barrens and associated woodlands. Stands of dwarf palmetto are distributed irregularly and lend a tropical aspect to the area. The natural area provides critical habitat for the state's largest population of the federally threatened plant, Geocarpon minimum. A breeding population of the federally endangered Red-cockaded Woodpecker was reestablished between 2011 and 2012 through translocations from donor populations in Arkansas and Louisiana. The Nature Conservancy (TNC) owns fee title to a 40-acre parcel surrounded by the natural area and a divided interest in 606 acres.

### Access:

From Warren, take U.S. Highway 278 East approximately 4.5 miles, across the Saline River, to the junction of State Highway 172. Turn right (south) and proceed 2.0 miles to parking lot and sign on left (east).

### Stewardship Activities:

ANHC staff conducted general plant inventories, rare plant monitoring, bird surveys, conservation easement monitoring, and maintained boundaries. ANHC staff also led field trips for Audubon Society, Yale School of Forestry, LeadAR, and University of Arkansas Monticello School of Forestry Resources, and coordinated a volunteer trash clean up along 4.5 miles of roadside boundary. Contractors executed prescribed burns on 603 acres and thinned the understory. ANHC staff conducted maintenance on Red-cockaded Woodpecker (RCW) cavity trees, monitored active nests, and participated with others in the translocation of four RCWs.

**Date of Last Visit:** 6/20/2014

### Status:

Continued habitat restoration increased the population of RCWs along with additional releases and birds fledged from the previous year. Two new tracked plants were documented. Prescribed fire improved woodland structure but damaged soil locally.

### Elements of Special Concern:

<u>Scientific Name</u>	<u>Common Name</u>	<u>Type of Element</u>

## White Cliffs Natural Area

**County Name:** Little River

**Size (in acres):** 573

**Latitude:** 33.76603

**Longitude:** -94.05902

### Description:

White Cliffs Natural Area, located in the Coastal Plain, occurs on a large outcrop of Annona Chalk, rising out of the Little River floodplain (now Millwood Lake) and includes a 100-foot high chalk bluff over the Little River, from which the area derives its name. A continuum of plant communities reflects a range of elevations at the site from the floodplain to the ridgeline. The area includes the largest, and least disturbed, Arkansas occurrences of chalk woodland. This community type is unusual for Arkansas as it is more typical of vegetation found on the Edwards Plateau of Texas. The area is also of historic significance as the site of a late 19th century settlement. The crumbling remains of foundations mark the locations of several structures.

### Access:

From Brownstown, travel approximately 4 miles south on State Highway 317 to parking area on the right.

### Stewardship Activities:

ANHC staff treated invasive plant species, removed trash, and maintained the parking area and trail. Staff also led a tour for Arkansas Native Plant Society members, conducted general plant inventory and rare plant monitoring.

**Date of Last Visit:** 6/14/2014

### Status:

Inventory work added species to the plant list and documented one new tracked plant species. Invasive plant species were reduced. A winter ice storm damaged trees.

### Elements of Special Concern:

<u>Scientific Name</u>	<u>Common Name</u>	<u>Type of Element</u>
<i>Allium drummondii</i>	Drummond's wild onion	Plant

## Wittsburg Natural Area

**County Name:** Cross

**Size (in acres):** 167.65

**Latitude:**

**Longitude:**

### Description:

As a representative example of southern Crowley's Ridge, where Tertiary sands and gravels remain capped with loess, Wittsburg Natural Area preserves a mixed mesophytic forest that contains interesting plant species not represented elsewhere in the System of Natural Areas. For example, the natural distributions in Arkansas of tulip tree and pennywort are limited to Crowley's Ridge and both plant species occur at Wittsburg Natural Area. American beech and sugar maple are common as well. The natural area also includes almost the entire watershed for a small network of intermittent streams. The topography is deeply dissected and the upper slopes are extremely steep.

### Access:

There is no public access to this natural area.

### Stewardship Activities:

ANHC staff conducted boundary maintenance.

**Date of Last Visit:** 12/30/2013

### Status:

Field assessments noted no problems.

### Elements of Special Concern:

<b>Scientific Name</b>	<b>Common Name</b>	<b>Type of Element</b>
<i>Carex kraliana</i>	Kral's sedge	Plant
Mississippi River Alluvial Plain Dry-Mesic Loess Slope Forest		Natural Community
<i>Obolaria virginica</i>	Virginia pennywort	Plant
Southern Crowley's Ridge Mesic Loess Slope Forest		Natural Community

### Acquisition Summary:

<b>Tract Name</b>	<b>Legal Interest</b>	<b>Appraised Value</b>	<b>Purchase Price</b>	<b>Date Acquired</b>	<b>Funding Source</b>
Wittsburg 1	Fee title	\$40,000.00	\$40,000.00	5/23/1980	State General Improvement Fund, Land and Water Conservation Fund
Wittsburg 2	Fee title	\$36,000.00	\$42,105.00	7/24/1980	Gift of \$42,150 from Lily Peter of Marvell, Arkansas was used to purchase area

# Registry of Natural Areas

Arkansas Code Annotated §15-20-308 directs the Arkansas Natural Heritage Commission (ANHC) to maintain a registry or inventory of lands and waters in the state that are of significant scientific, educational, and/or recreational interest. The first registry items were sites identified as significant for their primeval character; however, the methodologies of the registry have changed over time.

Until October 13, 2000, the registry consisted of more than 50 areas not owned by the ANHC and tracts of land within the System of Natural Areas that had not been officially dedicated in perpetuity. At that time, the commissioners recognized a better way of managing a registry of the state's significant natural sites. They clarified that the Registry of Natural Areas would consist of the list of special species and their locations that is contained in the inventory information maintained by ANHC.

The development of a biological inventory program began in 1978 in partnership with The Nature Conservancy. Known as the "Arkansas Heritage Program," the inventory process is managed by the ANHC Research and Inventory Section. The Arkansas Heritage Program is a member of NatureServe, an international network of State Natural Heritage Programs and Conservation Data Centers. The principal mission of NatureServe members is to gather, organize, and distribute high-quality biodiversity information. To this end, NatureServe members utilize the same data management methodology, enabling standardized information regarding biological diversity to be shared across state and international boundaries.

For this annual report, the information is summarized in the form of county-by-county listings of inventory

information and a county map. A legend is also provided which includes explanations for federal and state status codes and global and state ranks. Federal status codes represent designations by the U.S. Fish and Wildlife Service under the Endangered Species Act. State status codes comprise administrative designations by the ANHC to describe species status within Arkansas. Global and state ranks provide information as to the relative rarity and endangerment of a species throughout its range. Global ranks address the rarity of a species throughout its entire range. The state rank refers to the "in-state" range of a species. State ranks for species and natural communities are not static and require regular evaluation by ANHC staff.

Searches for rare species (in the field and in libraries, herbaria, the Internet, etc.) may reveal a conservation status change is necessary. As new information becomes available, rare species and natural communities may be added to (or eliminated from) the biodiversity database, and included (or no longer listed) as the commission's "Inventory Research Program" for each county.

Rio Grande copper-lily  
(*Habranthus tubispathus/texanus*)

## LEGEND

### STATUS CODES

#### FEDERAL STATUS CODES

C	=	Candidate species. The U.S. Fish and Wildlife Service has enough scientific information to warrant proposing this species for listing as endangered or threatened under the Endangered Species Act.
LE	=	Listed Endangered. The U.S. Fish and Wildlife Service has listed this species as endangered under the Endangered Species Act.
LT	=	Listed Threatened. The U.S. Fish and Wildlife Service has listed this species as threatened under the Endangered Species Act.
PE	=	Proposed Endangered. The U.S. Fish and Wildlife Service has proposed this species for listing as endangered under the Endangered Species Act.

#### STATE STATUS CODES

INV	=	Inventory Element. The Arkansas Natural Heritage Commission is currently conducting active inventory work on these elements. Available data suggests these elements are of conservation concern. These elements may include outstanding examples of Natural Communities, colonial bird nesting sites, outstanding geologic features as well as plants and animals, which, according to current information, may be rare, peripheral, or of an undetermined status in the state. The ANHC is gathering detailed location information on these elements.
SE	=	State Endangered. This term is applied differently for plants and animals.  Animals – These species are afforded protection under Arkansas Game and Fish Commission (AGFC) Regulation. The AGFC states that it is unlawful to import, transport, sell, purchase, hunt, harass or possess any threatened or endangered species of wildlife or parts. The AGFC lists as endangered any wildlife species or subspecies endangered or threatened with extinction, listed or proposed as a candidate for listing by the U.S. Fish and Wildlife Service, or any native species or subspecies listed as endangered by the Commission.
		Plants – These species have been recognized by the Arkansas Natural Heritage Commission as being in danger of being extirpated from the state. This is an administrative designation with no regulatory authority.
ST	=	State Threatened; These species have been recognized by the Arkansas Natural Heritage Commission as being likely to become endangered in Arkansas in the foreseeable future, based on current inventory information. This is an administrative designation with no regulatory authority.

### DEFINITION OF RANKS

#### Global Ranks

G1	=	Critically imperiled globally. At a very high risk of extinction due to extreme rarity (often 5 or fewer populations), very steep declines, or other factors.
G2	=	Imperiled globally. At high risk of extinction due to very restricted range, very few populations (often 20 or fewer), steep declines, or other factors.
G3	=	Vulnerable globally. At moderate risk of extinction due to a restricted range, relatively few populations (often 80 or fewer), recent and widespread declines, or other factors.
G4	=	Apparently secure globally. Uncommon but not rare; some cause for long-term concern due to declines or other factors.
G5	=	Secure globally. Common, widespread and abundant.
GH	=	Of historical occurrence, possibly extinct globally. Missing; known from only historical occurrences, but still some hope of rediscovery.
GU	=	Unrankable. Currently unrankable due to lack of information or due to substantially conflicting information about status or trends.
GX	=	Presumed extinct globally. Not located despite intensive searches and virtually no likelihood of rediscovery.
GNR	=	Not ranked. The global rank has not yet been assessed.
GNA	=	Not Applicable. A conservation status rank is not applicable.
T-RANKS=		T subranks are given to global ranks when a subspecies, variety, or race is considered at the state level. The subrank is made up of a "T" plus a number or letter (1, 2, 3, 4, 5, H, U, X) with the same ranking rules as a full species.

#### State Ranks

S1	=	Critically imperiled in the state due to extreme rarity (often 5 or fewer populations), very steep declines, or other factors making it vulnerable to extirpation.
S2	=	Imperiled in the state due to very restricted range, very few populations (often 20 or fewer), steep declines, or other factors making it vulnerable to extirpation.
S3	=	Vulnerable in the state due to a restricted range, relatively few populations (often 80 or fewer), recent and widespread declines, or other factors making it vulnerable to extirpation.
S4	=	Apparently secure in the state. Uncommon but not rare; some cause for long-term concern due to declines or other factors.
S5	=	Secure in the state. Common, widespread and abundant.
SH	=	Of historical occurrence, with some possibility of rediscovery. Its presence may not have been verified in the past 20-40 years. A species may be assigned this rank without the 20-40 year delay if the only known occurrences were destroyed or if it had been extensively and unsuccessfully sought.
SU	=	Unrankable. Currently unrankable due to lack of information or due to substantially conflicting information about status or trends.
SX	=	Presumed extirpated from the state. Not located despite intensive searches and virtually no likelihood of rediscovery.
SNR	=	Not ranked. The state rank has not yet been assessed.
SNA	=	Not applicable. A conservation status rank is not applicable.

#### General Ranking Notes

Q	=	A "Q" in the global rank indicates the element's taxonomic classification as a species is a matter of conjecture among scientists.
RANGES=	=	Ranges are used to indicate a range of uncertainty about the status of the element.
?	=	A question mark is used to denote an inexact numeric rank.
B	=	Refers to the breeding population of a species in the state.
N	=	Refers to the non-breeding population of a species in the state.
