## Memorandum

**To:** Senator Co-Chair Barbara Horn  
Representative Co-Chair David Dunn  
Arkansas Legislative Council

**From:** Jane T. Benton, Director

**Date:** January 26, 2010

**Subject:** Alternative Fuel Vehicle Report ACA 19-11-217 (2) (A)

---

This report is provided in accordance with Ark. Code Ann. §19-11-217(2)(A) which requires that the Office of State Procurement develop and implement a plan for all state agencies acquiring vehicles that will reduce the overall annual petroleum consumption of state agencies by at least ten percent (10%) by January 1, 2009, through various measures. The statute requires OSP to report to the Arkansas Legislative Council each January on the progress of the plan.

This report includes:

- (a) The number and type of alternative fueled vehicles used by each state agency; **(Attachment A)**
- (b) The difference between the cost of the purchase, maintenance, and operation of alternative fueled vehicles and comparable conventionally fueled motor vehicles **(Attachment B)**
- (c) An evaluation of the plan's success; and
- (d) Suggestions for modifying the plan;

The initial step taken by the Office of State Procurement was to create a State-wide contract for alternative and hybrid vehicles, beginning with 2006 model vehicles. Each year since the inception of this contract, it has been modified to increase and encompass the market available vehicles.

State agencies are aware of the availability of hybrid and alternative fueled vehicles and agency staff have demonstrated a willingness to support the program where funds are available. The success of the program is based on continued funding, emphasis on the continued use of hybrid or alternative fueled vehicles, the availability of competitively priced vehicles and alternative fuels, and the active participation of the State agencies. There remains a significant price difference between hybrid and alternative fueled vehicles and conventionally fueled vehicles. **(Attachment B)** As the market changes so that hybrid and alternative fueled vehicles increase in availability and prices decrease, the margin between petroleum fueled vehicles and alternative fueled vehicles should begin to equalize and become more attractive for the State to purchase and use.

**Attachment B** is a comparison of contract cost, average gas mileage, annual gas costs and savings, reflecting both averages of \$2.67 per gallon of gasoline. The hybrid fleet has not been in service long enough to enable State agencies to report complete long term cost figures. Comparisons with conventionally fueled motor vehicles is still several years in the future, however the Department of Finance and Administration does have the necessary tools to collect, analyze and report cost comparison figures and will do so as the hybrid fleet ages.

As of December 31, 2009, the State has 307 vehicles that fall into the alternative fueled category, a 6% increase from December 2008. This figure includes those alternative or hybrid fueled vehicles purchased from contracts developed and awarded by the AHTD. While the Statewide contract has facilitated the purchase of hybrids or alternative fueled vehicles, the Office of State Procurement has an updated three year plan to broaden the spectrum, while negotiating lower pricing alternatives.

Ark. Code Ann. § 15-13-205 required the Department of Finance & Administration to implement a policy regarding the standard of biofuel usage, effective January 1, 2009. The policy states that when available and economically feasible all State agencies are required to purchase diesel fuel that contains at least a minimum of two percent (2%) biofuels by volume for all State diesel powered motor vehicles, light trucks and equipment. This policy will work in tangent with the requirement to purchase alternative vehicles to help achieve the 10% goal for the annual reduction of petroleum consumption by State agencies.

The current percentage of alternative fuel vehicles in the state fleet is 3.5 percent. The purchase of alternative fuel vehicles has kept abreast of what the market currently bears relating to the life cycle cost of both vehicles. As the market changes and alternative fuel vehicles and alternative fuels become more widely available in Arkansas, could possibly increase.

The Office of State Procurement, working with the Arkansas Office of Energy and the Arkansas Department of Environmental Quality will continue to disseminate informational materials to educate agency personnel about alternative fuels, vehicles and their availability in Arkansas. Education of agency personnel is the key to the success of this program and attainment of the goal of reducing usage of petroleum based fuel products for State vehicles and equipment.
