Little Rock, AR 72201

RE: Annual Study of the Workers' Compensation Insurance Market in Arkansas

Dear Mr. Ferguson:

Ark. Code Ann. § 23-67-304 requires the Commissioner to conduct an annual study detailing the workers' compensation insurance market in Arkansas and to report the findings to the Legislative Council and the Chairs of the Senate and House Insurance and Commerce Committees. In compliance, please see the enclosed report for the year ending 2010.

If you have any questions regarding this report, please contact Property and Casualty Division Manager Bill Lacy at (501) 371-2801 or bill.lacy@arkansas.gov.

Sincerely,

Jay Bradford
Insurance Commissioner

JB:sc

Enclosure

cc: The Honorable Mike Beebe, C/O Mr. James Miller, Regulatory Liaison
Ms. Carol Stapleton, Legislative Liaison, Bureau of Legislative Research (3 Copies)
The Honorable A. Watson Bell, Chairman, AWCC
The Honorable Karen H. McKinney, Commissioner, AWCC
The Honorable Philip Alan Hood, Commissioner, AWCC
Mr. Alan McClain, Chief Executive Officer, AWCC
Ms. Lenita Blasingame, Insurance Chief Deputy Commissioner, AID

**A REPORT TO THE LEGISLATIVE COUNCIL AND
THE SENATE AND HOUSE INTERIM COMMITTEES
ON INSURANCE AND COMMERCE
OF
THE ARKANSAS GENERAL ASSEMBLY
(AS REQUIRED BY ACT 796 of 1993)**

**ANNUAL STUDY OF THE WORKERS' COMPENSATION
INSURANCE MARKET IN ARKANSAS**

**Prepared by: William R. Lacy, Property & Casualty Manager
Arkansas Insurance Department**

Approved by: Jay Bradford, State Insurance Commissioner

Date Submitted: September 1, 2011

REPORT TO THE LEGISLATURE ON ACT 796 OF 1993 THE STATE OF THE WORKERS' COMPENSATION MARKET FOR YEAR ENDING 2010

Previous reports to the Legislature have discussed in detail the condition of Arkansas's Workers' Compensation marketplace prior to the passage of Act 796 in 1993, and subsequent to the changes brought about because of Act 796.

Arkansas continues to enjoy a competitive workers' compensation market with the lowest premium levels in decades.

In the most recent data available, Arkansas had a combined loss ratio of 89% ranking it among the lowest of any state for which Arkansas's statistical agent, the National Council on Compensation Insurance (NCCI), compiles loss data. In 2011, NCCI filed for decreases in both the voluntary market loss costs (-5.8%) and assigned risk plan rates (-9.7%). Several factors and trends in the industry may affect future rates. These factors include changes in claim frequency, increased medical costs, increasing prescription drug utilization, increased reinsurance costs, and catastrophe loading for potential terrorism losses.

CONTINUED RATE IMPACT OF ACT 796 OF 1993

Arkansas's voluntary workers' compensation market would have disappeared and many employers would have found themselves unable to afford workers' compensation coverage, facing the choice of either closing down their business or operating outside the law, had Act 796 not become reality.

The impact of the Act on workers' compensation premiums is clear and significant. Prior to its enactment rates were increasing significantly. For example, for both the voluntary market and the assigned risk plan, rates in 1991 and 1992 increased 15% and 18% respectively. Passage of the Act forestalled anticipated rate increases in 1993 and 1994, with 1993 being the first year in the last ten in which there was no rate increase. 1993 and 1994 were years of market stabilization, and subsequent years have seen significant rate reductions in both the voluntary market and the assigned risk plan. Year 2001 saw our first increase in the assigned risk plan rates while experiencing a decrease in the voluntary market. In 2010, Arkansas had the lowest loss costs in the region per \$100 of payroll (\$0.96) compared to the regional average loss cost of \$1.45 and the countrywide average loss cost of \$1.19. There are still positive effects from this Act that benefit Arkansas employers.

Year	Voluntary Market	Assigned Risk Plan
1993	0.0%	0.0%
1994	0.0%	0.0%
1995	-12.4%	-12.4%
1996	-8.0%	-3.7%
1997	-4.7%	-7.6%

Year	Voluntary Market	Assigned Risk Plan
1998	-9.1%	-8.2%
1999	-4.1%	-3.0%
2000	-4.5%	-2.0%
2001	-7.5%	1.9%
2002	-4.5%	-1.9%
2003	1.8%	5.5%
2004	0.5%	5.1%
2005	-1.5%	-2.8%
2006	-0.5%	-2.0%
2007	-5.4%	-6.8%
2007 (effective 1/1/08)	2.7%	2.7%
2008 (effective 7/1/08)	-12.8%	-13.8%
2009	-7.0%	-6.4%
2010	1.9%	4.5%
2011	-5.8%	-9.7%

PAYROLL AND EXPERIENCE MODIFIER

Reported payroll in Arkansas continues to increase while premiums for insureds continue to decrease. The average experience modifier has increased minimally (0.985 from 0.977). This minimal change in experience modifier could represent the continuing effectiveness of loss control measures and the impact of the Hazardous Employer Program operated by the Health and Safety Division of the Workers' Compensation Commission. Please refer to Exhibit "A" for additional statistical information regarding premiums.

ASSIGNED RISK PLAN

The assigned risk plan has seen a consistent history of decline in population since the passage of Act 796 except for a gentle upward trend during 2002 through 2004. Down from a record high of \$150,000,000 in 1993, to a low of \$6,566,275 in September 2000, the premium volume for 2010, was \$9,360,039 as compared to \$10,245,439 for 2009. The increase in premium during the 2002 through 2004 period was, in part, attributable to the failure of several insurers domiciled in California and other states. A portion of the increase may also have been attributable to an increase in plan population of small premium employers who have premiums too low to be attractive to the competitive market. In essence, their premiums are less than the minimum premium for which coverage is available in the voluntary market. These employers may often get better rates through the plan; consequently, as of the end of 2010, small premium employers (less than \$2,500 in annual premium) constituted approximately 84% of the plan policy volume with an average of \$872 in premium per policy. Average plan premium per policy at the end of 2010 was \$2,161 for all 4,332 policies in the plan.

In 2008, NCCI filed a Voluntary Coverage Assistance Program (VCAP), which has helped to remove some employers from the assigned risk plan by allowing voluntary carriers to file their

underwriting guidelines for comparison to new applications submitted. When an application is received by NCCI, it is compared to the filed guidelines and if the risk appears to meet a company's guidelines, the application will be forwarded to the insurer to determine whether they will make a voluntary offer of coverage. This program was approved effective October 1, 2008. By December 31, 2010, 47 employers were removed from the assigned risk plan with a premium of \$228,790. These policyholders saved a total of \$48,296 with an average savings of \$1,240. We believe that as carriers become more familiar with this program, the number of policyholders taken out of the plan will continue to grow as will policyholder savings.

For those employers qualifying for voluntary coverage, cost savings have been substantial. According to the NCCI, price discounting by voluntary carriers reached record levels of 24% during 1999. Carriers pulled back on the discounting in 2000 to 14.7% and, as anticipated, carriers further reduced discounts in 2004 and 2005. In 2006, carriers resumed increased discounting again using primarily schedule credits and dividends. In 2007, there was a net -4.7%. That has continued into 2010 with a projected net of -9.2%.

PLAN ADMINISTRATION/SERVICING CARRIERS

The NCCI is an "Advisory Organization" licensed in Arkansas to assist its member insurers with ratemaking and data collection activities. Effective July 1, 2009, the Commissioner re-appointed NCCI as Administrator for the Arkansas assigned risk plan until at least July 1, 2013.

Arkansas participates in the oversight of the market and the NCCI through a multi-state working group of the National Association of Insurance Commissioners (NAIC). The working group monitors data reliability and any other issues that arise involving the market.

In recent years, Arkansas has also participated in a multi-state examination of the NCCI in its role as an advisory organization licensed pursuant to Ark. Code Ann. §23-67-214. Participation in the examination task force, and periodic reviews of this nature, function to assure the quality of the data, as well as presenting the opportunity to improve existing systems and procedures. The most recent examination found concerns about statistical reporting and error correction. These concerns were remedied and are monitored by the working group of the NAIC. These errors were never significant enough to affect the overall reliability of the data reported by the NCCI for the State of Arkansas.

During the implementation of the examination findings, Arkansas served as chair of the multi-state exam task force and concluded its responsibilities in this capacity after implementation of the required reforms. A current multi-state examination is in progress and Arkansas is participating in this examination, as well.

The location of an office in Little Rock (mandated by 1993 legislation) continues to resolve many policy related service problems and provides Arkansas agents and insureds easy, immediate access to responsive company personnel. The effectiveness of this office is apparent in the reduction of the number of complaints received by the Insurance Department and the reduction in the number of appeals reaching the Appeals Board. The NCCI personnel assigned to the office are knowledgeable and committed to providing excellent service.

Attached are Exhibits “B” entitled *Arkansas Residual Market 2nd Quarter 2011 Status Report*; and Exhibit “C” entitled *Arkansas Residual Market Annual 2010 Status Reports*. The exhibits are prepared by the NCCI and provide detailed information on risk profiles such as average premium size, top ten classifications by code and by premium, and a list of contacts within NCCI for specific areas of concern.

NCCI provides, at no charge to the agent, the option to submit assigned risk applications online. Upon successful submission, the customer receives a confirmation code and application identification number for reference. There are significant savings to the plan when an application can be processed electronically. Arkansas agents have been extremely responsive to this initiative with 95% of applications being submitted online in 2010.

The Annual Servicing Carrier Performance Review conducted by NCCI reveals either “Commendable” or “Satisfactory” scores for all areas for Arkansas’ servicing carriers. For the period commencing January 1, 2011, through December 31, 2013, the servicing carriers are Travelers Indemnity Company, Liberty Insurance Corporation, and Riverport Insurance Company (W.R. Berkley Group).

SUMMARY OF INSURANCE DEPARTMENT’S CRIMINAL INVESTIGATION UNIT

Before the passage of Act 796 of 1993, there had never been a criminal prosecution in Arkansas for workers’ compensation fraud committed by employees, employers or healthcare providers.

Act 796 of 1993 created the Workers’ Compensation Fraud Investigation Division and made any type of fraud committed within the workers’ compensation system a Class D felony (maximum six years and/or \$10,000 fine). The Division was renamed the Criminal Investigations Division during the 2005 Legislative Session.

Fraud in the workers’ compensation system was perceived to be epidemic. Since the majority of employers were in the “plan,” there was little, if any, incentive for thorough investigation of possibly fraudulent insurance claims and few consequences to those caught making intentional misrepresentations. Act 796 changed the entire landscape of the workers’ compensation system, particularly about the detection, prevention and prosecution of workers’ compensation fraud. The actual prosecution of a workers’ compensation fraud case is contingent on many factors.

Key among those factors is the elected prosecutor’s willingness to carry a case forward. If the information provided from an investigation is not enough to meet the standards for conviction found at Ark. Code Ann. § 11-9-106, a prosecutor will be unwilling to pursue the case. Local law enforcement agencies often do not have the resources to investigate workers’ compensation fraud; fortunately, the investigative authority of the Criminal Investigation Division allows the Arkansas Insurance Department to supplement these often under-funded local agencies. This Division’s dedication to a single purpose allows for complex investigations, which require time, and focus that would otherwise not be available. As these complex cases evolve, they frequently require investigators to work through a myriad of leads to develop a case. Occasionally, even

with dedicated resources for this single purpose being used, there simply is not enough information for a prosecutor to prosecute the crime. While the number of actual prosecutions varies from year to year, the possibility of investigation and prosecution is a constant deterrent. Any lessening of the Division's enforcement powers would likely result in a re-emergence of both frequency and severity of fraud committed by employees, employers, and healthcare providers.

The cases represented by the statistics noted below, which are comparable per capita to those of other states with active anti-fraud efforts, are believed to have had a significant impact on workers' compensation rates in Arkansas, and the deterrent factor has been substantial. In fact, many cases are not carried forward to prosecution. In many instances, the threat of prosecution is enough to get the parties involved to settle the cases outside of court, resulting in restitution for the aggrieved parties. While not technically prosecutor wins, these cases result in positive outcomes for injured workers in the state.

Act 743 of 2001 (The Act) significantly enhanced the efficiency and effectiveness of the Division by granting its investigators certified law enforcement authority. The Division can now execute arrest warrants, thus reducing the backlog of warrants that were awaiting service by local law enforcement agencies. Annual referrals to the Criminal Investigation Division have been reduced significantly since its first year of operation. This reduction is attributed to increased enforcement efforts under the Act. In the 2010 reporting period, there were 37 workers compensation investigations opened. Two cases were referred to prosecution. The investigative work continues on many of the cases that have been referred. Since the creation of the division in 1993, 148 cases have been referred for prosecution, which resulted in 110 convictions. Out of these 148 cases, only three prosecutions have resulted in acquittals. In the remaining 35 cases, the charges were not filed or dropped.

2010 LEGISLATIVE ACTIVITY WITH REGARD TO WORKERS' COMPENSATION

There was no legislative activity during 2010 with regard to Worker's Compensation.

SIGNIFICANT WORKERS' COMPENSATION CASES FISCAL YEAR 2011

Cases from the Arkansas Supreme Court

Honeysuckle v. Curtis H. Stout, Inc., et al, 2010 Ark. 328, 2010 WL 3611698: Honeysuckle and McCarthy traveled together on a business trip from Little Rock to Addison, Texas, by way of a single-engine aircraft piloted by McCarthy. The plane crashed on the return trip, killing Honeysuckle and resulting in severe injuries to McCarthy. Honeysuckle's estate and McCarthy each sought and obtained workers' compensation benefits. Subsequently, Honeysuckle's estate filed personal injury actions against McCarthy and the manufacturers of the aircraft and certain of its parts. McCarthy, who at all relevant times was an employee, president, board member and major stockholder for Respondent Curtis H. Stout, asserted the exclusive remedy protection afforded by Ark. Code Ann. §11-9-105 before the Arkansas Workers'

Compensation Commission (following remand from circuit court upon a writ of prohibition issued by the Arkansas Supreme Court). The Commission found in McCarthy's favor on the issue of exclusive remedy; however, the Arkansas Court of Appeals reversed. On further appeal, the Arkansas Supreme Court affirmed the Commission's original findings and vacated the decision of the Court of Appeals. In essence, the Court determined that substantial evidence supported the Commission's finding that McCarthy was Honeysuckle's employer at the time of plane crash. In particular, the Court noted the parties' stipulations that both McCarthy and Honeysuckle had been acting in the course of their employment at the time of the accident, and that McCarthy was the company's president, a board member, a major stockholder and worked as its sales manager. In addition, "Evidence showed that McCarthy took an active role in the management and personnel decisions of the company, as well as acted as Honeysuckle's sales supervisor, and that the company was family owned and operated...Considering the evidence in the light most favorable to the Commission's decision, the Commission's conclusion was reasonable based on the facts submitted to the Commission."

Jonesboro Care & Rehab Center v. Woods, 2010 Ark. 482, 2010 WL 5059566 (2010): On review of the Arkansas Court of Appeals' previous decision (*Jonesboro Care & Rehab Center v. Woods*, 2010 Ark. App. 236, 2010 WL 811239 (2010)), the Arkansas Supreme Court affirmed the original findings of the Arkansas Workers' Compensation Commission and vacated the opinion of the Court of Appeals. At the conclusion of a regularly scheduled training seminar on October 24, 2008, the Respondents' director of nursing instructed the employees to form a line to receive their paychecks and to complete paperwork for a flu shot. However, the Claimant elected instead to take a smoke break while waiting for the line to shorten. After a brief time, the Claimant elected to return inside due to the cold. With a lit cigarette in her hand, she approached a trash can to throw away some chewing gum and then fell, breaking her leg. The Claimant subsequently sought workers' compensation benefits but the Respondents denied the claim in its entirety for a lack of employment services. An Administrative Law Judge, however, awarded benefits primarily on the theory that the Claimant was returning from her break, had not received her paycheck, and had not clocked out when she fell. The Arkansas Workers' Compensation Commission adopted this decision as its own. On appeal by the Respondents, the Arkansas Court of Appeals reversed. On further appeal, the Supreme Court vacated the reversal, holding that there had been substantial evidence to support the Commission's original decision. In particular, and among other things, the Supreme Court noted that the Commission had "expressly found that appellant benefitted from its employees attending the seminar so that it could distribute information, conduct training, and dispense payroll checks to its employees. In finding appellee's injury was compensable, the Commission found that she was injured while she was returning to the seminar room after taking a short break and that, as required by her employer, appellee was still on the clock because she had yet to receive her paycheck."

Hudak-Lee v. Baxter Co. Regional Hospital, 2011 Ark. 31, 2011 WL 337793 (2011): While on vacation, the Claimant received a call from Respondent Employer asking whether she could come in for a twelve-hour night shift. In the midst of her usual clerical duties, the Claimant was asked to provide one-on-one supervision of a suicidal patient at around 11:30 p.m. At approximately 2:30 a.m., a co-worker relieved the Claimant, who went outside "with the intention of going outside...to revive herself in the night air." Before making it back inside, the Claimant fell and suffered a broken hip. Both an Administrative Law Judge and the Workers'

Compensation Commission found that the Claimant was not performing “employment services” at the time of the injury, and denied the claim. The Arkansas Court of Appeals reversed, however, holding that the Claimant was “performing a function that advanced the interests of BCRH” when she fell. On further appeal, the Arkansas Supreme Court also reversed the Commission’s decision, noting that “This court has previously recognized that an injury is compensable even when an employee was on break or had not yet clocked in as long as the employee was performing employment services at the time the injury occurred.” The Court also observed that “Appellant testified that she walked outside to revive herself so that she could complete her shift. It was also undisputed that Appellant was walking toward the emergency-room entrance in order to return to the patient’s room when she fell.” With these points in mind, the Court concluded that “Clearly, at the time of her injury, Appellant was advancing the interests of her employer, and the Commission’s finding that Appellant was not performing employment services was not supported by substantial evidence.”

Second Injury Fund v. Osborn, 2011 Ark. 232, 2011 WL 2062277 (2011): see below, under *Second Injury Fund v. Osborn*, 2010 Ark. App. 697, 2010 WL 4132865 (2010).

Cases from the Arkansas Court of Appeals

Vite v. Vite, 2010 Ark. App. 565, 2010 WL 3420580: In this case involving a broader question of permanent and total disability, the Arkansas Court of Appeals was presented with an issue of first impression concerning the proper calculation of the average weekly wage. In particular, the Court took up the question of whether any portion of business expenses should be deducted from a sole proprietor’s gross income. In finding that such expenses should be deducted, the Arkansas Workers’ Compensation Commission had followed its own precedent set in *Hunt v. Lovett* (Full Commission Opinion filed September 16, 1996 (Claim No. E218307)). Therein, the Commission had determined that the inclusion of unreimbursed business expenses in the average weekly wage computation “does not accurately reflect a claimant’s actual earnings during the period.” The Court looked to the statute at issue, Ark. Code Ann. §11-9-518, and noted its allowance for a computation “by a method that is just and fair to all parties concerned” where the other statutory methods were not feasible. Under the circumstances of this case, the Court concluded that the Commission had indeed made a determination that was “just and fair” to the parties, and affirmed its decision. The Court went on to likewise affirm the Commission’s findings that the Claimant was not permanently and totally disabled and was not entitled to additional medical treatment.

O’Hara v. Death & Permanent Total Disability Trust Fund, 2010 Ark. App. 685, 2010 WL 4132903 (2010): In this instance, the Arkansas Workers’ Compensation Commission affirmed and adopted an Administrative Law Judge’s finding that the Commission had no authority to order attorney’s fees to be paid in a lump sum by the Death and Permanent Total Disability Trust Fund. The Arkansas Court of Appeals reversed, holding that the Commission’s decision was “clearly erroneous as a matter of law” in light of the “clear language in Arkansas Code Annotated section 11-9-716 that authorizes lump sum attorney’s fees.”

Second Injury Fund v. Osborn, 2010 Ark. App. 697, 2010 WL 4132865 (2010): The Claimant in this instance sustained a work-related injury on June 1, 2001, and was eventually found by the Arkansas Workers' Compensation Commission to have a wage loss disability rating of 50%. In addition, the Claimant had previous military-related injuries which resulted in his being declared 100% disabled by the Veterans' Administration in 2007. The Second Injury Fund asserted that it should be entitled to a credit under Ark. Code Ann. §11-9-411 for the Claimant's service-related disability benefits. Following a remand from the Arkansas Court of Appeals for further findings on this issue, the Commission ultimately determined that the Fund was not entitled to a credit since the statute did not specifically mention VA benefits. On further appeal, the Court agreed, holding that "The statute allows subrogation for various types of insurance-provided benefits received due to disability. Had the legislature intended a set-off for such benefits, it could have expressed that intention in plain terms." **ADDENDUM: On May 26, 2011, the Arkansas Supreme Court likewise affirmed the Commission's original decision. In *Second Injury Fund v. Osborn*, 201 Ark. 232, 2011 WL 2062277 (2011), the Supreme Court noted that "Veterans' Administration benefits are not listed as one of the 'group plans' in the statute. We agree with the Commission that if the legislature had intended to include VA benefits among those plans enumerated in §11-9-411(a), it would have done so. Therefore, we find that the Commission did not err in its interpretation of §11-9-411."**

Gladden v. Georgia Pacific Corp., 2010 Ark. App. 808, 2010 WL 4972357 (2010): The Claimant sustained a compensable neck injury on December 12, 2007, and subsequently sought benefits for bilateral shoulder injuries stemming from the same incident. In an opinion that was affirmed and adopted by the Arkansas Workers' Compensation Commission, an Administrative Law Judge found that there were no objective findings to support a right shoulder injury, and that the Claimant's left shoulder problems pre-existed the date of injury. On appeal to the Arkansas Court of Appeals, however, the Court reversed the Commission's findings, holding that "the Commission failed to take the next step and determine whether his pre-existing left shoulder condition was aggravated by the December 12, 2007, incident...Because evidence was presented on the aggravation issue but no findings were made on it, we have nothing to review, and we cannot reach the merits of Gladden's argument. Therefore, we reverse and remand to the Commission with directions that it determine whether, on December 12, 2007, Gladden suffered an aggravation of his pre-existing left shoulder injury."

Aegon Ins. USA v. Durham-Gilpatrick, 2010 Ark. App. 826, 2010 WL 4972460 (2010): Here, the Arkansas Workers' Compensation Commission affirmed and adopted an Administrative Law Judge's finding that the Claimant was entitled to psychiatric benefits in relation to her compensable injury under Ark. Code Ann. §11-9-508, which requires an employer to provide "reasonably necessary" medical services in connection with a compensable claim. The Respondents appealed to the Arkansas Court of Appeals, which affirmed the Commission's findings. In its analysis, the Court noted its previous holding in *Dillard's, Inc. v. Johnson*, 2010 Ark. App. 138, ___ S.W.3d ___, in which it had applied §11-9-508 to affirm an award of psychiatric benefits. Relying on *Johnson*, the Court pointed out that "Durham-Gilpatrick could show that she was entitled to psychiatric treatment without meeting the requirements of section 11-9-113 as long as such treatment was reasonably necessary and causally related to her compensable injury. Further, as evidenced by our decision in *Johnson*, it is possible for a claimant to make such a showing even if he or she has a past history of mental-health issues."

Tyson Poultry, Inc. v. Narvaiz, 2010 Ark. App. 842, 2010 WL 5132119 (2010): Following a compensable injury, the Claimant returned to light duty but was subsequently terminated for calling his supervisor a “mother-f—king bitch.” An Administrative Law Judge denied the Claimant’s claim for additional temporary total disability; however, the Arkansas Workers’ Compensation Commission reversed, essentially finding that termination for misconduct was not a sufficient basis for finding that an employee refused suitable employment. In so doing, the Commission relied on *Superior Indus. v. Thomaston*, 72 Ark. App. 7, 32 S.W.3d 52 (2000), in which a Claimant had been terminated for calling her co-workers “bitches.” In *Thomaston*, the Court had reasoned that the Claimant “did not refuse employment, but instead accepted the employment and was later terminated not by his choice but at the option of the employer.” In the instant case, however, the Court took a different view, holding that its broad construction of Ark. Code Ann. §11-9-526 in *Thomaston* was “unwarranted” to the extent it implied that no act of misconduct could ever constitute a refusal of employment. In particular, the Court pointed out that “were that the case, a claimant provided with light duty work could simply stop coming to work, assured that he would continue to receive compensation benefits even if he were terminated.” The Court further held that *Thomaston* should be limited to its facts, and reversed the Commission’s findings in the present case.

Gingras v. Liberty Bank, 2011 Ark. App. 65, 2011 WL 311655 (2011): In this unusual case, the Claimant had gone home at the end of her work day and found a masked man in her kitchen. The intruder’s only words were “I’m not here to hurt you. It’ll be all right.” The Claimant managed to escape the intruder, but suffered a broken wrist in the process. As a teller for Respondent Employer, the Claimant was responsible for opening and closing the bank, and also had a key to the bank and the vault codes. Local police eventually focused on a suspect jailed in Texas who had allegedly used a similar method to attempt bank robbery in that state. The Claimant ultimately filed for workers’ compensation benefits, but her claim was denied by an Administrative Law Judge and, subsequently, the Arkansas Workers’ Compensation Commission. On appeal, the Arkansas Court of Appeals affirmed. In particular, the Court held that substantial evidence supported the Commission’s conclusion that there was no direct evidence of the intruder’s motive (in light of his sole comment during the event). The Court also concluded that substantial evidence supported the Commission’s conclusion that the Claimant was not within the course and scope of her employment at the time of the attack, to wit, she was at home, had completed her work day, was not on call, and had given deposition testimony that she “never had to return to work after her shift ended.”

J Mar Express, Inc. v. Poteete, 2011 Ark. App. 122, 2011 WL 523770 (2011): The Arkansas Workers’ Compensation Commission awarded benefits in this case involving a fatal heart attack that occurred at a truck stop on a 106-degree day in California. On appeal to the Arkansas Court of Appeals, the Respondents argued that the Commission had impermissibly resorted to speculation and had “basically filled in the gaps in appellee’s proof.” In particular, the Respondents asserted that “The only witnesses who provided testimony regarding appellee’s activities prior to his death...indicated that he had not been outside of the truck during the half-hour time period prior to collapsing and that he had only been out of his truck for less than a minute before suffering a heart attack.” However, the Court essentially concluded that the

Commission had drawn a logical inference of the Claimant's activities¹ from evidence that a new mud flap had been installed on his truck prior to his collapse, that there was no garage at the truck stop to have had this service performed, that the Claimant had purchased a mud flap while at the truck stop, and had also asked to borrow some tools. And while post-mortem testing revealed the presence of coronary artery disease, the Court held that "the medical evidence indicates that appellee's exertion in the extreme environmental conditions present on the day of the incident was the major cause of his heart attack." In so holding, the Court noted that despite any "pre-existing propensities," there was no indication that the Claimant had actually suffered from any heart problems or limitations prior to the date of injury. Consequently, the Court affirmed the Commission's findings.

Hope School District v. Wilson, 2011 Ark. app. 219, 2011 WL 898245 (2011): In this instance, the Arkansas Workers' Compensation Commission awarded a 2% wage loss disability rating and denied additional temporary total disability benefits. The Respondents appealed the wage loss award and the Claimant cross-appealed the denial of temporary total disability. With regard to wage loss, the Respondents argued that the award was barred by Ark. Code Ann. §§11-9-522(b) and 11-9-526, both of which essentially preclude wage loss disability in the event that suitable work is refused. In particular, the Respondents pointed out that the Claimant had signed a "letter of intention" which indicated that he did not want to be employed as a custodian for the school district during the next academic year. But because officials with the district had testified that the Claimant would have been "recommended" for continued employment if he had expressed an intention to return, both the Commission and the Arkansas Court of Appeals concluded that there had been "no definitive statement that he would be accepted for employment" and thus no bona fide job offer within the meaning of §11-9-522(b) (which, in turn, rendered the Respondents' argument under §11-9-526 moot). The Court also affirmed the Commission's finding that the Claimant was not entitled to additional temporary total disability benefits and was only entitled to a 2% wage loss disability rating. As to the former, the Court noted that the Commission simply did not believe the Claimant's version of events surrounding the temporary total disability issue, and pointed out that it is the Commission's sole prerogative to determine the weight and credibility of witness testimony. As for the amount of wage loss disability, the Court determined that substantial evidence supported the Commission's decision, and that the Claimant had "failed to put forth any proof that he was entitled to any greater amount of wage loss disability."

NATIONAL MARKETS IN GENERAL

While Arkansas has seen increases in the average indemnity and medical cost per lost time claim, claims frequency continues to decline. Arkansas's market remains strong and competitive.

The attached state of the industry report (Exhibit "D") graphically depicts the sound condition of the workers compensation marketplace; still, the NCCI continues to discover that workers' compensation results are affected by a number of factors that are having a negative impact on the market:

¹ With reference to whether they were "extraordinary and unusual" within the meaning of Ark. Code Ann. §11-9-114.

- lower earnings relating to investments;
- claim costs that are beginning to rise at more rapid rates than in previous years;
- pending proposals for benefit increases;
- challenges to workers' compensation as an exclusive worker remedy for workplace injury;
- recent federal initiatives that threaten to increase claim costs, broaden compensability definitions, and have the potential to create duplicate remedies;
- reform roll-back proposals in recent state legislative sessions;
- increasing costs of medical benefits; and
- increasing utilization of certain prescription pain medications

The NCCI does point out one favorable development among the negatives. The incidence of workplace injuries continues to fall sharply since the reform efforts of 1993. This means fewer injured workers – the most valuable outcome imaginable for workers, their families, and employers.

CONCLUSION

Absent the reforms encompassed in Act 796 of 1993, it is doubtful Arkansas's employers would now have the option of voluntary workers' compensation insurance. Rather, the assigned risk plan, designed to be a market of "last resort," would have become Arkansas's market of "only resort." The General Assembly is to be highly commended for its leadership in reforming the workers' compensation market in our State while protecting the interests of the injured worker.

Arkansas's employers must have available to them quality workers' compensation products in the voluntary market at affordable prices. The creation of good jobs requires a marketplace where all businesses, regardless of size, can grow. Maintaining a stable workers' compensation system is essential for this growth. The evidence shows the reforms have worked. The incidence of fraud has been reduced through high-profile fraud prosecutions, employee compensation rates and benefits have been increased, and workers injured within the course and scope of their employment have received timely medical treatment and the payment of much improved indemnity benefits. Eroding the positive changes incorporated into Act 796 would be counterproductive to continued economic growth and development.

Prepared: September 1, 2011

Arkansas Workers Compensation System— "Stable"

- Premium decline moderates
- Combined ratios remain stable
- Reduction in loss costs approved effective 7/1/2011
 - Claim frequency declined significantly in 2008
 - Continued increase in medical costs
- Economic recovery in Arkansas varies by industry
- Active legislative session although no changes result

State of the Workers Compensation Market— “Deteriorating”

- Calendar year and accident year combined ratios continue to deteriorate
- Decline in lost-time claim frequency stopped in 2010
- More increases proposed in latest NCCI filing cycle
- Impact of healthcare reform and federal involvement in insurance remains uncertain

What's Driving Arkansas Loss Cost Changes?

Arkansas Voluntary Loss Cost Level Change—Effective July 1, 2011 Filing Highlights

- The average experience period used in determining the loss cost level change was increased from two policy years to three policy years
- There was a significant reduction in claim frequency for Policy Year 2008
- As a result of this lower claim frequency, the annual indemnity and medical trends were reduced in the recently approved filing

Experience Period Underlying NCCI States Loss Cost/Rate Filings

State	CY 2009 Written Premium (\$'s in Millions)	Years In Experience Period	State	CY 2009 Written Premium (\$'s in Millions)	Years in Experience Period

Arkansas Voluntary Loss Cost Level Change—Effective July 1, 2011

Voluntary Loss Cost Components	Impact
Due to Change in Experience	-7.3%
Due to Change in Trend	-2.3%
Due to Change in Benefits	+3.9%
Overall Due to Change in Experience, Trend, and Benefits	-5.9%
Due to Change in Loss Adjustment Expenses	+0.1%
Overall Indicated Loss Cost Level Change	-5.8%

Factors Underlying Decrease in Advisory Loss Costs

- Double-digit decline in claim frequency observed in latest policy year
- Medical fee schedule increased due to federal changes
- Large loss claim emergence subsided
- Severity trends are flatter
- Loss ratio trends were reduced

Declines in Claim Frequency Have Contributed to Arkansas Improving Results

Severity of Recession: Output

The 2007 Recession Is the Most Severe Post-War Contraction

Severity is measured as the maximum cumulative percentage decline from the onset of the recession (peak of economic activity, as defined by the NBER); output is measured as Real GDP, billions of chained 2000 dollars, seasonally adjusted

Recessions are identified by the calendar year in which they started

Frequency of observation: quarterly; latest data point available for consideration: Q1/2011

Severity of Recession: Employment

Employment Has Been Hit Hard— Recent Recoveries Have Been "Jobless"

Severity is measured as the maximum cumulative percentage decline from the onset of the recession (peak of economic activity, as defined by the NBER); employment is measured as Total Nonfarm, Current Employment Statistics Survey, seasonally adjusted

Recessions are identified by the calendar year in which they started

Frequency of observation: monthly; latest data point available for consideration: April 2011

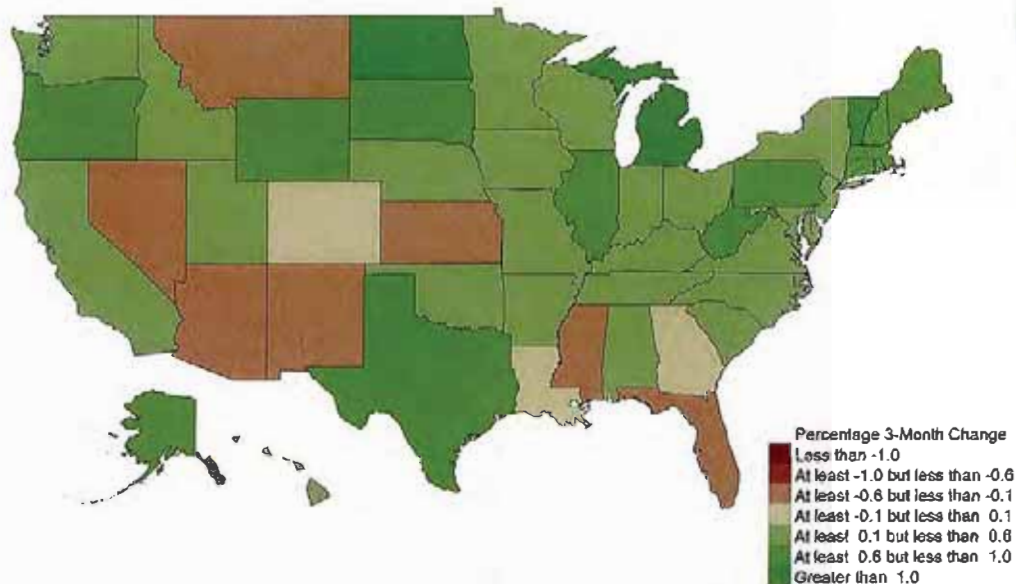

Sources: US Bureau of Labor Statistics (BLS), www.bls.gov; NBER, www.nber.org/cycles.html

80

The Economy on the Timeline: September 2010

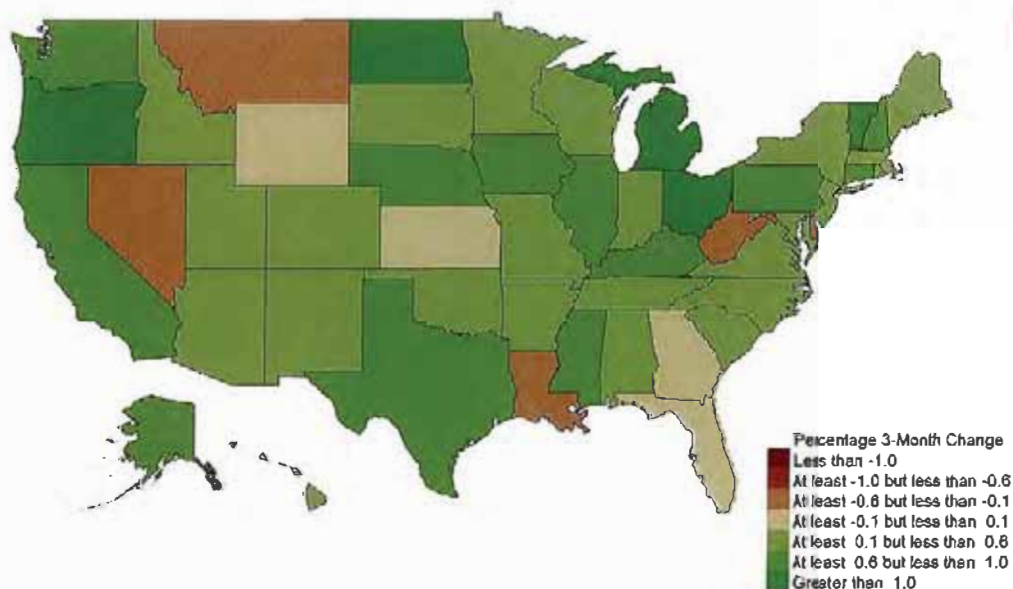

The map shows state coincidence indexes, which combine four state-level economic measures to summarize current economic conditions in a single statistic; the four data items are nonfarm payroll employment, average hours worked in manufacturing, the unemployment rate, and wage and salary disbursements deflated by the consumer price index (US city average).
Frequency of observation: monthly; latest observation: March 2011.

83

Number of States Expanding The Economic Recovery Has Taken Hold

The chart shows the number of states for which the one-month change in the coincidence index of economic activity indicates an expansion. This index summarizes the state of the economy in a single statistic, using nonfarm payroll employment, average hours worked in manufacturing, the unemployment rate, and wage and salary disbursements deflated by the consumer price index (U.S. city average). Frequency of observation: monthly; latest observation: March 2011. Does not include District of Columbia.

95

Implications for Workers Compensation

- Economic growth is slow and is likely to remain sub-par for several years into the future
 - Job creation is tepid (and is likely to remain so)
 - As a consequence, upward pressure on frequency is limited
- There is little inflationary impetus, due to significant excess industrial capacity and high unemployment
 - Medical Care price inflation and wage inflation is likely to be muted

Legislative Issues Nationwide and in Arkansas

© Copyright 2011 National Council on Compensation Insurance, Inc. All Rights Reserved.

Nationwide Legislative Environment

- Republicans made major gains in the number of state legislative and governor seats
- Fall elections produced a number of new insurance commissioners and benefit administrators
- Economy continues as a key factor in shaping the amount and scope of legislation with business backed reforms more prevalent
- Misclassification of workers/independent contractors continues to be a key issue in many states this legislative session

Arkansas Legislative Activity

- HB 1840/SB 778—Reform package to restore the statutory intent of the 1993 legislative reform and overturn case law that has deviated from such intent. As introduced, some of the provisions include:
 - Repealing Made-Whole Doctrine
 - Establishing compensable injury as major cause of need for treatment
 - Increasing threshold of justification for change of physician
 - Clarifying exclusions from the definition of “compensable injury”

Status: **SB 778: Amended/Dead**

HB 1840: Interim Study

Arkansas Legislative Activity

- HB 1839 establishes interagency agreement to address the problem of misclassifying workers as independent contractors
Status: Dead
- HB 1325 establishes definitions of “employee” and “independent contractor” as well as penalties for misclassification
Status: Dead
- SB 293 creates the presumption that the development of certain forms of cancer in firefighters is work-related
Status: Dead

Financial Services Modernization/Reform

Wall Street Reform and Consumer Protection Act/ Dodd-Frank

- Signed into law on 7/21/2010 to promote financial stability of the US and overhaul regulations in the financial sector
- Creates new Federal Insurance Office (FIO)
 - Monitors insurance industry to gain expertise
 - No supervisory or regulatory authority over “the business of insurance”
 - Incoming FIO Director is IL Insurance Director Michael McRaith

Health Reform

- **Direct impacts on workers compensation**
 - Changes to Black Lung Act
 - Changes to Medicare Reimbursement Levels
- **Indirect impacts on workers compensation costs include:**
 - Increased healthcare coverage for individuals
 - Taxes on medical devices, drug makers, health insurers
 - Possible reduction in fraud and abuse

Q & A

Closing Remarks Thank You!

© Copyright 2011 National Council on Compensation Insurance, Inc. All Rights Reserved.

Glossary

© Copyright 2011 National Council on Compensation Insurance, Inc. All Rights Reserved.

Glossary

- **Assigned Risk Adjustment Program (ARAP)**—An assigned risk market program that surcharges residual market risks based on the magnitude of their experience rating modification.
- **Calendar Year (CY)**—Experience of earned premium and loss transactions occurring within the calendar year beginning January 1, irrespective of the contractual dates of the policies to which the transactions relate and the dates of the accidents.
- **Calendar-Accident Year (AY)**—The accumulation of loss data on all accidents with the date of occurrence falling within a given calendar year. The premium figure is the same as that used in calendar year experience.
- **Claim Frequency**—The number of claims per unit of exposure; for example, the number of claims per million dollars of premium or per 100 workers.

Glossary

- **Claim Severity**—The average cost of a claim. Severity is calculated by dividing total losses by the total number of claims.
- **Combined Ratio**—The sum of the (i) loss ratio, (ii) expense ratio, and (iii) dividend ratio for a given time period.
- **Detailed Claim Information (DCI)**—An NCCI call that collects detailed information on an individual workers compensation lost-time claim basis, such as type of injury, whether or not an attorney was involved, timing of the claim's report to the carrier, etc.
- **Direct Written Premium (DWP)**—The gross premium income adjusted for additional or return premiums, but excluding any reinsurance premiums.

Glossary

- **Indemnity Benefits**—Payments by an insurance company to cover an injured worker's time lost from work. These benefits are also referred to as "wage replacement" benefits.
- **Loss Ratio**—The ratio of losses to premium for a given time period.
- **Lost-Time (LT) Claims**—Claims resulting in indemnity benefits (and usually medical benefits) being paid to or on behalf of the injured worker for time lost from work.
- **Medical-Only Claims**—Claims resulting in only medical benefits being paid on behalf of an injured worker.
- **Net Written Premium (NWP)**—The gross premium income adjusted for additional or return premiums and including any additions for reinsurance assumed and any deductions for reinsurance ceded.

Glossary

- **Permanent Partial (PP)**—Disability that prevents the insured from working at their own (and sometimes any) occupation. A disability is considered to result in partial permanent loss of earning power.
- **Policy Year (PY)**—Premium and loss data on business for a 12-month period for policies with inception dates within the 12-month period.
- **Schedule Rating**—A debit and credit plan that recognizes variations in the hazard-causing features of an individual risk.
- **Take-Out Credit Program**—An assigned risk program that encourages carriers to write current residual market risks in the competitive voluntary marketplace.
- **Temporary Total (TT)**—A disability that totally disables a worker for a temporary period of time.

Residual Market Demographics – 2Q 2011

Arkansas Residual Market Total New Applications Bound 2008 vs. 2009 vs. 2010 vs. 2011

The number of new applications that are actually assigned to a Servicing Carrier or Direct Assignment Carrier (if applicable).

Residual Market Demographics – 2Q 2011

Arkansas Residual Market Total New Application Premium Bound 2008 vs. 2009 vs. 2010 vs. 2011

*The total estimated premium on bound new applications assigned to as
Servicing Carrier or Direct Assignment Carrier (if applicable).*

Residual Market Demographics – 2Q 2011

Percentage of New Applications Received by Submission Format Data through June 30, 2011

The total percentage of new applications received via online, phone or mail formats.

Residual Market Demographics – 2Q 2011

Residual Market Total Policy Counts

Second Quarter Data for Policies Reported through June 30, 2011

Total Number of all Assigned Risk Plan Policies effective during and reported as of the date listed above.

Residual Market Total Premium Volume

Second Quarter Data Reported through June 30, 2011

Total Amount of All Assigned Risk Plan Premium effective during and reported as of the date listed above.

Residual Market Demographics

Residual Market Total Policies and Premium in Force As of June 30, 2011 compared to prior year

This chart reflects the total number of policies and estimated premium in-force for this state as of the date shown above.

The other exhibits in this report describe quarterly and year-to-date data.

	2010	2011	2010 vs. 2011 #	2010 vs. 2011 %
Policy Count	4,364	4,205	-159	-3.6%
Premium Volume	\$9,653,407	\$10,075,228	\$421,821	4.4%

Residual Market Demographics – 2Q 2011

Residual Market Second Quarter 2011 Total Premium Distribution by Size of Risk Data Reported through June 30, 2011

The total number of assigned risk plan policies reported to NCCI by Direct Assignment and Servicing Carriers in a premium range as of the date listed above.

Premium Interval	Policy Count	% of Total Policies	Total State Premium	% of Total Premium	Average Premium
\$0 - 2499	920	82.4%	\$789,851	26.3%	\$858

Residual Market Demographics – 2Q 2011

Residual Market Top 10 Classification Codes by Policy Count

Data Reported through June 30, 2011

The top ten governing class codes by total policy count - policies issued by Servicing Carriers and Direct Assignment Carriers in this state as of the date listed above.

Rank	Code	Description	Policy Count	% of Policies
1	5645	Carpentry Construction Of Residential Dwellings Not Exceeding Three Stories In Height	249	22.3%
2	5551	Roofing-All Kinds & Drivers	61	5.5%
3	5022	Masonry NOC	41	3.7%
4	8810	Clerical Office Employees NOC	37	3.3%
5	5474	Painting NOC & Shop Operations Drivers	31	2.8%
6	5437	Carpentry-installation Of Cabinet Work Or Interior Trim	28	2.5%
7	5183	Plumbing NOC & Drivers	26	2.3%
8	5403	Carpentry NOC	24	2.2%
9	0042	Landscape Gardening & Drivers	21	1.9%
10	9014	Janitorial Services By Contractors-No Window Cleaning Above Ground Level & Drivers	21	1.9%

Residual Market Top 10 Classification Codes by Premium Volume

Data Reported through June 30, 2011

The top ten governing class codes by premium volume written on total policies issued by Servicing Carriers and Direct Assignment Carriers in this state as of the date listed above.

Rank	Code	Description	Premium	% of Premium
1	5645	Carpentry Construction Of Residential Dwellings Not Exceeding Three Stories In Height	\$300,838	10.0%
2	7229	Trucking-Long Distance Hauling-& Drivers	\$284,229	9.5%
3	5403	Carpentry NOC	\$239,838	8.0%
4	3028	Pipe Or Tube Mfg.-Iron Or Steel-& Drivers	\$221,153	7.4%
5	5551	Roofing-All Kinds & Drivers	\$144,518	4.8%
6	5537	Heating Ventilation Air Conditioning And Refrigeration Systems - Installation Service	\$90,442	3.0%
7	2702	Logging Or Tree Removal - Non Mechanized Operations	\$74,491	2.5%
8	8829	Convalescent Or Nursing Home-All Employees	\$66,578	2.2%
9	7403	Aviation - All Other Employees & Drivers	\$65,817	2.2%
10	0037	Farm: Field Crops & Drivers	\$65,339	2.2%

Residual Market Demographics

Voluntary Coverage Assistance Program - Arkansas

*The volume of assigned risk applications redirected to the voluntary market through NCCI's **VCAP® Service**. The following shows the results **VCAP® Service** has provided during Second Quarter 2011.*

Date Ranges:	04/01/2011-06/30/2011
Number of Applications Reviewed by VCAP® Service	698
Associated Premium for Applications Reviewed	\$2,005,951.00
Number of VCAP® Service Matches	191
VCAP® Service Matches as a % of Applications Reviewed	27.36%
Number of VCAP® Service Offers	8
VCAP® Service Offers as a % of Matches	4.19%
Number of Confirmed VCAP® Service Policies	8
Confirmed VCAP® Service Policies as a % of Applications Reviewed	1.15%
Redirected Assigned Risk Premium	\$20,722.41
Associated Voluntary Market Premium	\$16,220.00
Savings	\$4,502.41
Average Savings per Application	\$562.80
Savings as a % of Redirected Assigned Risk Premium	21.73%
Redirected Premium as a % of Associated Premium for Applications Reviewed by VCAP® Service	1.03%

Residual Market Demographics

Collections/Indemnification

The following shows a comparison of gross written premium and uncollectible premium reported in Arkansas and the National Pool for Policy Years 2007-2011, obtained through NP-4 and NP-5 reports including traumatic and black lung claims, evaluated through First Quarter 2011.

Arkansas	Gross Written Premium	Uncollectible Premium	Percentage
2007	\$17,947,917	\$1,017,029	5.7%
2008	\$13,748,813	\$984,941	7.2%
2009	\$11,487,521	\$408,836	3.6%
2010	\$10,382,702	\$19,615	0.2%
2011	\$2,287,972	\$0	0.0%
National Pool 2011	\$65,379,326	\$0	0.0%

The uncollectible premiums provided are reported by the servicing carriers on a quarterly basis. Uncollectible premium is generally reported up to 24 months after the policy expiration date due to audit, billing, and collection requirements. Therefore, the most recent year data has not yet developed.

Residual Market Demographics

Arkansas Residual Market Reinsurance Pool Booked Loss Ratio
Policy Year Financial Results through 1st Quarter 2011 for 2010 and prior years
The ratio of total incurred losses to total earned premiums in a given period, in this state, expressed as a percentage .

Arkansas Residual Market Reinsurance Pool Ultimate Net Written Premium
(Projected to Ultimate) (000's)
Policy Year Financial Results through 1st Quarter 2011 for 2010 and prior years*
The premium charged by an insurance company for the period of time and coverage provided by an insurance contract in this state.

*-Second Quarter 2011 Data will be available the end of October 2011 due to the timing of data reporting

Residual Market Demographics

Arkansas Residual Market Reinsurance Pool Net Operating Results (Projected to Ultimate) Incurred Losses

Policy Year Financial Results through 1st Quarter 2011 for 2010 and prior years*

Policy year incurred losses reflect paid losses, case reserves and IBNR reserves for policies written in a particular policy year in that state.

Arkansas Residual Market Reinsurance Pool Net Operating Results (Projected to Ultimate) Estimated Net Operating Gain/(Loss) (000's)

Policy Year Financial Results through 1st Quarter 2011 for 2010 and prior years*

The financial statement presentation that reflects the excess of earned premium over incurred losses, less all operating expenses, plus all investment income in that state.

*- Second Quarter 2011 Data will be available the end of October 2011 due to the timing of data reporting

Glossary of Terms

Combined Ratio-The combined loss ratio, expense ratio and dividend ratio, expressed as a sum for a given period. The formula for combined ratio is [(loss + loss adjustment expense)/earned premium] + [underwriting expenses/written premium].

EBNR (Earned But Not Reported) Premium Reserve-A projection of additional premium that is expected to be uncovered after auditing at the end of the policy.

Earned Premium or Premiums Earned-That portion of written premiums applicable to the expired portion of the time for which the insurance was in effect. When used as an accounting term, "premiums earned" describes the premiums written during a period plus the unearned premiums at the beginning of the period less the unearned premiums at the end of the period.

Incurred But Not Reported (IBNR)-Pertaining to losses where the events which will result in a loss, and eventually a claim, have occurred, but have not yet been reported to the insurance company. The term may also include "bulk" reserves for estimated future development of case reserves.

Underwriting Gain/(Loss)-The financial statement presentation that reflects the excess of earned premium over incurred losses.

Applications Bound-The applications that are actually assigned to a Servicing Carrier or Direct Assignment Carrier (if applicable).

Premium Bound-The total estimated annual premium on bound applications.

Residual Market Demographics – Annual 2010

Arkansas Residual Market Total New Applications Bound 2007 vs. 2008 vs. 2009 vs. 2010

The number of new applications that are actually assigned to a Servicing Carrier or Direct Assignment Carrier (if applicable).

Residual Market Demographics – Annual 2010

Arkansas Residual Market Total New Application Premium Bound 2007 vs. 2008 vs. 2009 vs. 2010

*The total estimated premium on bound new applications assigned to as
Servicing Carrier or Direct Assignment Carrier (if applicable).*

Residual Market Demographics – Annual 2010

Percentage of New Applications Received by Submission Format Data through December 31, 2010

The total percentage of new applications received via online, phone or mail formats.

Residual Market Demographics – Annual 2010

Residual Market Total Policy Counts

Annual Data for Policies Reported through December 31, 2010

Total Number of all Assigned Risk Plan Policies effective during this year and reported as of the date listed above.

Residual Market Total Premium Volume

Annual Data Reported through December 31, 2010

Total Amount of All Assigned Risk Plan Premium effective during this year and reported as of the date listed above.

Residual Market Demographics

Residual Market Total Policies and Premium in Force As of December 31, 2010 compared to prior year

This chart reflects the total number of policies and estimated premium in-force for this state as of the date shown above.

The other exhibits in this report describe quarterly and year-to-date data.

	2009	2010	2009 vs. 2010 #	2009 vs. 2010 %
Policy Count	4,581	4,297	-284	-6.2%
Premium Volume	\$10,002,751	\$9,145,420	-\$857,331	-8.6%

Residual Market Demographics – Annual 2010

Residual Market Annual 2010 Total Premium Distribution by Size of Risk Data Reported through December 31, 2010

The total number of assigned risk plan policies reported to NCCI for this year by Direct Assignment and Servicing Carriers in a premium range as of the date listed above.

Premium Interval	Policy Count	% of Total Policies	Total State Premium	% of Total Premium	Average Premium
\$0 - 2499	3,639	84.00%	\$3,175,603	33.93%	\$872

Residual Market Demographics

Voluntary Coverage Assistance Program - Arkansas

*The volume of assigned risk applications redirected to the voluntary market through NCCI's **VCAP® Service**. The following shows the results **VCAP® Service** has provided during 2010.*

Date Range:	01/01/2010 - 12/31/2010
Number of Applications Reviewed by VCAP® Service	1,342
Associated Premium for Applications Reviewed	\$3,001,543
Number of VCAP® Service Matches	233
VCAP® Service Matches as a % of Applications Reviewed	17.4%
Number of VCAP® Service Offers	48
VCAP® Service Offers as a % of Matches	20.6%
Number of Confirmed VCAP® Service Policies	47
Confirmed VCAP® Service Policies as a % of Applications Reviewed	3.5%
Redirected Assigned Risk Premium	\$228,790
Associated Voluntary Market Premium	\$170,494
Savings	\$58,296
Average Savings per Application	\$1,240
Savings as a % of Redirected Assigned Risk Premium	25.5%
Redirected Premium as a % of Associated Premium for Applications Reviewed by VCAP® Service	7.6%

Residual Market Demographics

Collections/Indemnification

The following shows a comparison of gross written premium and uncollectible premium reported in Arkansas and the National Pool for Policy Years 2006-2010, obtained through NP-4 and NP-5 reports including traumatic and black lung claims, evaluated through Third Quarter 2010.

Arkansas	Gross Written Premium	Uncollectible Premium	Percentage
2006	\$22,692,079	\$1,656,652	7.3%
2007	\$17,957,927	\$989,987	5.5%
2008	\$13,699,346	\$1,038,514	7.6%
2009	\$11,679,754	\$208,244	1.8%
2010	\$7,669,361	\$38	0.0%
National Pool 2010	\$251,604,934	\$60,789	0.0%

The uncollectible premiums provided are reported by the servicing carriers on a quarterly basis. Uncollectible premium is generally reported up to 24 months after the policy expiration date due to audit, billing, and collection requirements. Therefore, the most recent year data has not yet developed.

Residual Market Demographics

Arkansas Residual Market Reinsurance Pool Booked Loss Ratio
Policy Year Financial Results through 3rd Quarter 2010 for 2009 and prior years
The ratio of total incurred losses to total earned premiums in a given period, in this state, expressed as a percentage .

Arkansas Residual Market Reinsurance Pool Ultimate Net Written Premium
(Projected to Ultimate) (000's)
Policy Year Financial Results through 3rd Quarter 2010 for 2009 and prior years*
The premium charged by an insurance company for the period of time and coverage provided by an insurance contract in this state.

*-First Quarter 2011 Data will be available the end of April 2011 due to the timing of data reporting

Residual Market Demographics

**Arkansas Residual Market Reinsurance Pool Net Operating Results
(Projected to Ultimate) Incurred Losses**
Policy Year Financial Results through 3rd Quarter 2010 for 2009 and prior years*
Policy year incurred losses reflect paid losses, case reserves and IBNR reserves for policies written in a particular policy year in that state.

**Arkansas Residual Market Reinsurance Pool Net Operating Results
(Projected to Ultimate) Estimated Net Operating Gain/(Loss) (000's)**
Policy Year Financial Results through 3rd Quarter 2010 for 2009 and prior years*
The financial statement presentation that reflects the excess of earned premium over incurred losses, less all operating expenses, plus all investment income in that state.

*- First Quarter 2011 Data will be available the end of April 2011 due to the timing of data reporting

Glossary of Terms

Combined Ratio-The combined loss ratio, expense ratio and dividend ratio, expressed as a sum for a given period. The formula for combined ratio is [(loss + loss adjustment expense)/earned premium] + [underwriting expenses/written premium].

EBNR (Earned But Not Reported) Premium Reserve-A projection of additional premium that is expected to be uncovered after auditing at the end of the policy.

Earned Premium or Premiums Earned-That portion of written premiums applicable to the expired portion of the time for which the insurance was in effect. When used as an accounting term, "premiums earned" describes the premiums written during a period plus the unearned premiums at the beginning of the period less the unearned premiums at the end of the period.

Incurred But Not Reported (IBNR)-Pertaining to losses where the events which will result in a loss, and eventually a claim, have occurred, but have not yet been reported to the insurance company. The term may also include "bulk" reserves for estimated future development of case reserves.

Underwriting Gain/(Loss)-The financial statement presentation that reflects the excess of earned premium over incurred losses.

Applications Bound-The applications that are actually assigned to a Servicing Carrier or Direct Assignment Carrier (if applicable).

Premium Bound-The total estimated annual premium on bound applications.

Summary of Loss Drivers

Frequency

- Economic recovery puts upward pressure on claim frequency
- The depth of the recession distorts some of the statistics used to measure frequency
 - Premium audits shifted from positive to negative
 - Average hours worked per week shifted from historical average
 - Rapid decline in manufacturing and contracting employment
- The estimated impact of these factors reduces the indicated change in frequency from 9% to 3% in 2010

AIS
Accident Insurance Specialists
2011

Summary of Loss Drivers

Severity

- Changes in severity are the lowest since the reform days of the 1990s
- 2010 apparently produced an increased number of small lost-time claims that in previous years were likely medical-only claims
- Indicated severity change may not be indicative of underlying cost drivers
- The severity changes for lost-time claims for 2010 were:

-3%	Indemnity
+2%	Medical
<hr/>	
0%	Total

Summary of Loss Drivers

Estimated Impact on Loss Costs

- The net impact of changes in frequency, severity, and wage growth is a small increase in loss cost:

	Frequency	+3% (1.03)
x	Severity	0% (1.00)
÷	Wage growth	<u>2% (1.02)</u>
=	Net loss cost change	1% (1.01)

Current Topics of Interest

Experience Rating Plan Methodology Review

- The experience rating plan showed excellent results overall in performance testing for prior years
- An extensive review has been recently completed
- Number of years in the plan will remain the same
- We are increasing the split point from \$5,000 to \$15,000 (trended) over a three-year transition
- The split point will be indexed for claim inflation
- A filing for these changes will likely be made in 3rd quarter of this year (2011)

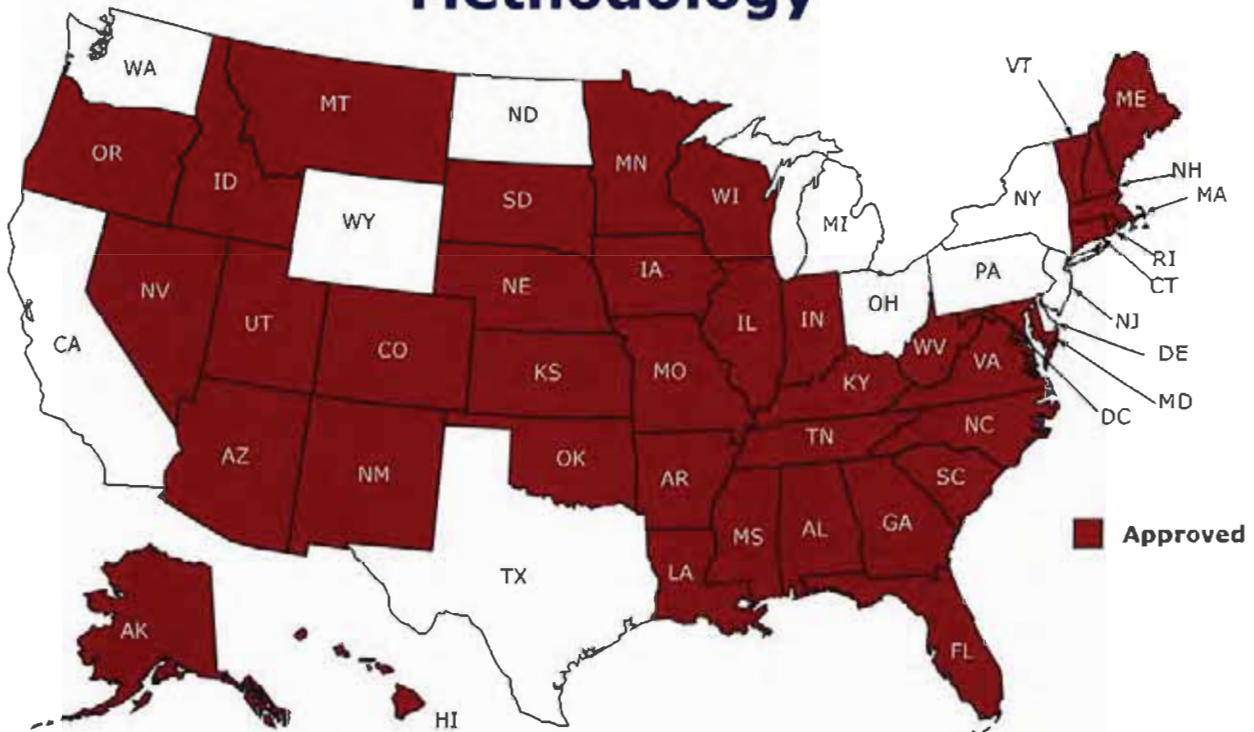

NCCI Developments in Class Ratemaking Methodology

- NCCI conducted a comprehensive review of all class ratemaking methodologies
- Implemented with filings effective October 1, 2009
- The goal of NCCI's new class ratemaking methodology is to improve accuracy, class equity, and loss cost stability
- The new methodology has been implemented in all NCCI states other than Texas

Concluding Remarks

In Summary

Negatives

- Frequency increases
- Underwriting results deteriorated
- Underwriting cycle
- Uncertain impact from Health Care reform
- Unknown scope of future Federal actions

Positives

- Severity flat
- Overall loss cost impact of frequency and severity minimal
- Industry's capital position
- Premium decline slowed materially
