Since 1988, all entering first-year students seeking an associate degree or higher from an Arkansas public college or university must meet AHECB assessment and placement standards in the disciplines of English, mathematics, and reading. A cut-off subscore of 19 on the ACT exam (or the equivalent on the ASSET, SAT, or COMPASS tests) is used for each of the three areas. Attachments 2-1 and 2-2 offer a general overview of remediation in Arkansas public higher education, while Attachments 2-3, 2-4, and 2-5 provide institutional detail by discipline for the terms of 2007 Fall through 2011 Fall. In all tables, remedial data are based on students who meet two criteria: (1) not meeting the board's cut-off score; and (2) being assigned to developmental-level coursework.

Traditionally, ADHE has calculated remediation rates for any and all first-time entering students. However, the legislature passed Act 970 in 2009 which required remediation rates to be calculated on students that had graduated high school within the past two years prior to entering college and the legislature conducted an interim study during 2010 in which ADHE was requested to calculate remediation rates on students that had graduated high school in the previous 12 months. Therefore, ADHE is publishing remediation calculations using three slightly different methodologies:

1. Anytime Rates – rates in which the high school graduation date is ignored
2. 2-Year Rates – rates in which the student graduated high school in the previous 2 years
3. 1-Year Rates – rates in which the student graduated high school in the previous 1 year

### Statewide Overview

In fall 2011, Arkansas's public institutions enrolled 23,253 first-time degree-seeking students. 23,176 of those students were tested for placement purposes.

- Of the 23,176 students who were tested, 11,436 students (49.3 percent) were assigned to one or more remedial courses while the balance were placed in college-level coursework. This represents a decrease in the remediation rate of 3.3 percentage points from fall 2010. Note that this is the lowest remediation rate in the 5-years reviewed.

- Of the 11,436 students assigned to remediation, 5,101 (44.6 percent) were in the four-year sector and 6,335 (55.4 percent) were in the two-year sector.
- Over the last five years, the number of students assigned to remedial coursework has increased by 100 students (2.0 percent) at 4-Year

Universities, whereas, the number of students assigned to remediation has increased by 915 students (16.9 percent) at 2-Year Colleges, and by 1,015 students (9.7 percent) at all public institutions.

### **Remediation Rates by Subject Area**

- From last year, the remediation rate for all three subject areas have decreased:
  - Math – a decrease of 3.0 percentage points;
  - English – a decrease of 2.8 percentage points; and
  - Reading – a decrease of 2.5 percentage points.

### **Remediation Rates by Demographics**

- Gender: As the graph below illustrates, remediation rates for females are only slightly higher than that of males.

- Race/Ethnicity: Regarding remediation rates by race and ethnicity, students of the Asian race have the lowest remediation rates followed by White, American Indian/Alaskan Natives, Hispanic, Hawaiian and Pacific Islanders, and Black. (Note that the race/ethnicities are actually defined as Asian Only, Black Only, Hispanic Any, American Indian and Alaskan Natives Only, White Only, and Hawaiian and Pacific Islanders Only.)

- Age: Students in age groups 20 and above have substantially higher remediation rates than the younger age groups.

- Attend Status: Full-time students have substantially lower remediation rates than part-time students.

Most students require remediation in one subject only, but many also require remediation in all three subject areas.

#### **Anytime Rates as Compared with 2-Year Rates and 1-Year Rates**

As mentioned previously, due to legislative input ADHE is including data on three different types of remediation rates:

1. Anytime Rates – rates in which the high school graduation date is ignored
2. 2-Year Rates – rates in which the student graduated high school in the previous 2 years
3. 1-Year Rates – rates in which the student graduated high school in the previous 1 year

As noted above in the section on remediation rates by age, the longer the time period that a student has been out of high school, the greater the chance the student needs to be remediated. This situation is true for both the 4-Year Universities and the 2-Year Colleges.

The remediation rates discussed above relate to all students. However, the below chart shows the remediation rate of out-of-state students against the traditional anytime remediation rate for the 2011 Fall term.

**Act 970 of 2009** required additional calculations regarding remedial students. (1) The first of these new calculations is the remediation rate of recent high school students that graduated high school with a GPA (grade point average) of 3.00 or higher. (2) The second new calculation is a determination of how many times it takes a student to pass a remedial course. The complete reports for these new calculations are shown in the attachments, whereas graphical summaries are shown below.

## NOTES:

1. First-Time Students - these are students that enrolled in college for the first-time (they have never before attended college). This includes students that are seeking an associate or bachelor's degree only. Certificate-seekers are not included.
2. Test Takers - this is a subset of First-Time Students that took the ACT, SAT, ASSET, or Compass exam.
3. Counts of less than 10 are hidden due to FERPA.
