

5.5 continued

We consistently work within deadlines and deliverables. To that regard, this engagement will be no different to us.

A description of our plan for assisting the Subcommittee in meeting its goals and objectives is evident in this RFP. We will follow the Subcommittee on its mission as described in this RFP. The path to success is allowing Collier to have access to all relevant claims data, programs and processes so that we can develop a go forward plan of executable programs.

The RFP is extremely detailed and defines the objectives and goals of the Subcommittee including communication timelines and we intend to comply with all aspects of the Subcommittees requests whether contained in the RFP or born out of conversations during our reporting to the Subcommittee.

We intend to review your current plans and offer solutions that have been utilized by other clients whether we're the broker or consultant. Stated again, the solutions we'll employ aren't simply advising changing of deductibles and coinsurance, they will be more systemic.

We respect the Subcommittee's request for our specific client data however we're constrained by Non-Disclosure Agreements.

We have no known conflicts of interests with the objectives and goals of the Subcommittees' intent of the RFP.
