Technical Notes

The *Arkansas Labor Market* is prepared monthly in conjunction with the U.S. Department of Labor, Bureau of Labor Statistics (BLS). The current month's estimates are preliminary, while previous month's data is subject to revision.

Estimates of nonfarm payroll jobs show the number of jobs by industry and reflect employment by place of work. Hours and earnings estimates are based on payroll and worker-hour data collected for production workers in manufacturing industries.

Industries are classified according to the North American Industry Classification System (NAICS). All estimates are based on a first quarter 2017 benchmark.

Explanation of Terms and Concepts

Monthly Business Survey of Employers

A monthly sample survey designed to provide industry information on nonfarm payroll jobs. Data are compiled each month from mail surveys and telephone interviews conducted by the Bureau of Labor Statistics in cooperation with Department of Workforce Services. The data are based on establishment records and include all workers, full- or part-time, who received pay during the payroll period which includes the 12th of

the month. Approximately 5,000 Arkansas business establishments are surveyed.

Metropolitan Statistical Area (MSA)

A term applied by the U.S. Office of Management and Budget to counties that have one or more central cities and that meet specified criteria of population density, commuting patterns and social and economic integration.

Current Population Survey (CPS)

A monthly sample survey of the population 16 years of age and over, designed to provide data on the labor force, the employed and the unemployed. The survey is conducted each month by the Bureau of the Census for BLS. The information is collected by trained interviewers from a sample of about 60,000 households. The data collected are based on the activity reported for the calendar week including the 12th of the month. Approximately 800 Arkansas households are represented in the sample survey.

Civilian Labor Force

The sum of all employed and unemployed persons 16 years of age or older. Members of the Armed Forces are excluded.

Employment

An estimate of the number of persons who worked any time for pay or profit or worked 15 hours or more as unpaid workers in a family business during the calendar week which includes the 12th of the month. Also included are those who, although not working, had some job attachment and were not looking for work, and persons involved in labor management disputes.

Unemployment

An estimate of the number of persons who did not have a job, but were available for work and actively seeking work during the calendar week which includes the 12th of the month.

Unemployment Rate

The number of unemployed as a percentage of the civilian labor force. Unemployment rates are calculated from unrounded data.

Seasonal Adjustment

A statistical technique applied to monthly data to eliminate changes that normally occur during the year due to seasonal events such as weather, major holidays, schedule shifts, harvest times, and the opening/closing of schools.

August Spotlight

Seasonal Employment Trends (Part 1 of 2)

Employment in several major industry sectors is directly affected by seasonal patterns. These patterns can be seen by comparing monthly employment across multiple years. Seasonal trends can be attributed to set schedules of operation, holidays, or weather patterns. Examples of all three types are provided.

Education is one of the most obvious examples of seasonal employment. Most of Arkansas' public schools and universities are scheduled to operate from August to May. Chart 1 shows how state and local government employment is affected by the operation schedule of public schools. Note that the number of jobs begin to decline between May and June, reaches a low in July, and then increases between August and September. Jobs remain fairly stable during the rest of the year, with the exception of the holiday-related drop in December/January.

While employment at public universities and secondary schools falls under state and local government, employment at *private* universities and *private* secondary schools falls under educational services. This is a subsector under **educational and health services**. With the exception of the few schools that utilize a three-quarter system, the majority of private schools operate on the same August to May schedule as public schools. Chart 2 below shows the seasonal employment trends of private educational services, which closely mirrors the trend seen in state and local government.

Leisure and hospitality is another sector affected by seasonal patterns. People tend to travel more during the summer months. Hotels, restaurants, and recreational facilities have increased business during this time and require more employees. Similarly, many recreational facilities in Arkansas are only open during the summer months—amusement parks and camps are prime examples. Chart 3 shows the seasonal employment pattern that occurs in the **leisure and hospitality** sector. Note that employment begins to steadily rise throughout the spring, peaks in June, and then typically declines slowly throughout the second half of the year.

State of Arkansas Civilian Labor Force Summary

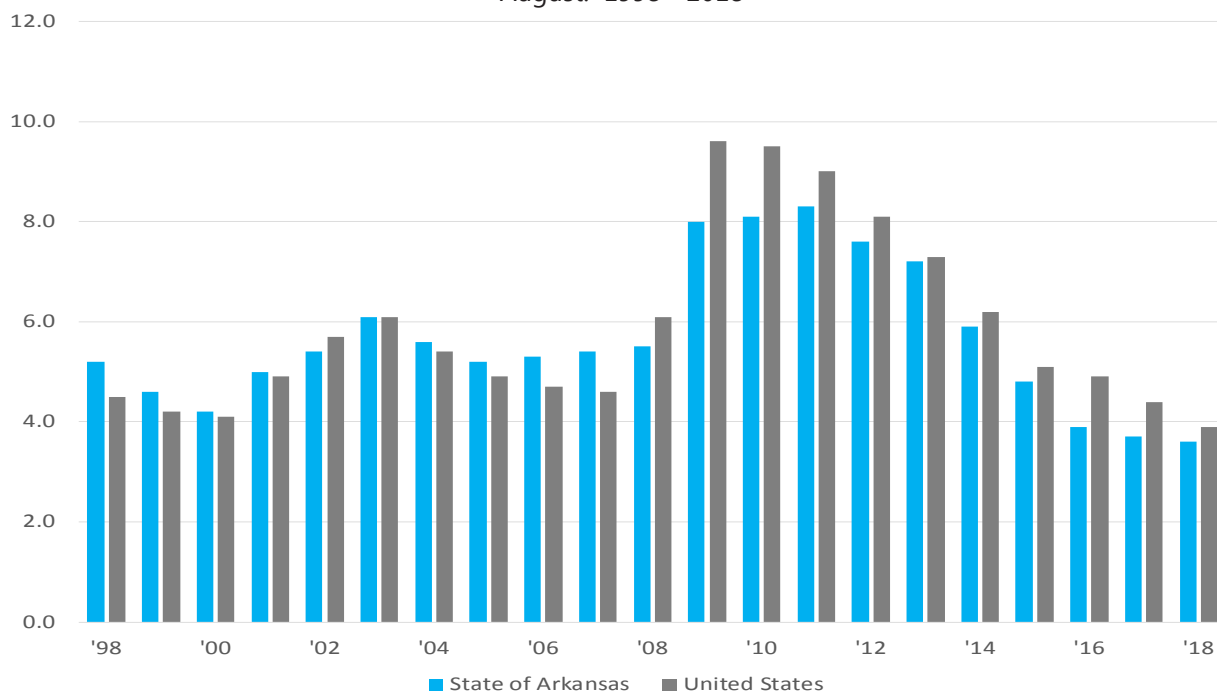

Labor force data, produced by the U.S. Department of Labor, Bureau of Labor Statistics and released by the Arkansas Department of Workforce Services, show Arkansas' seasonally adjusted unemployment rate declined one-tenth of a percentage point, from 3.7 percent in July to 3.6 percent in August. Arkansas' civilian labor force decreased 1,693, a result of 1,419 fewer unemployed and 274 less employed Arkansans. The United States' jobless rate remained unchanged at 3.9 percent in August.

BLS Program Operations Manager Susan Price said, "Down to 3.6 percent in August, Arkansas' unemployment rate decreased for the second month in a row. This is due in part to declines in the number of unemployed over the last several months."

State of Arkansas Nonfarm Payroll Job Summary

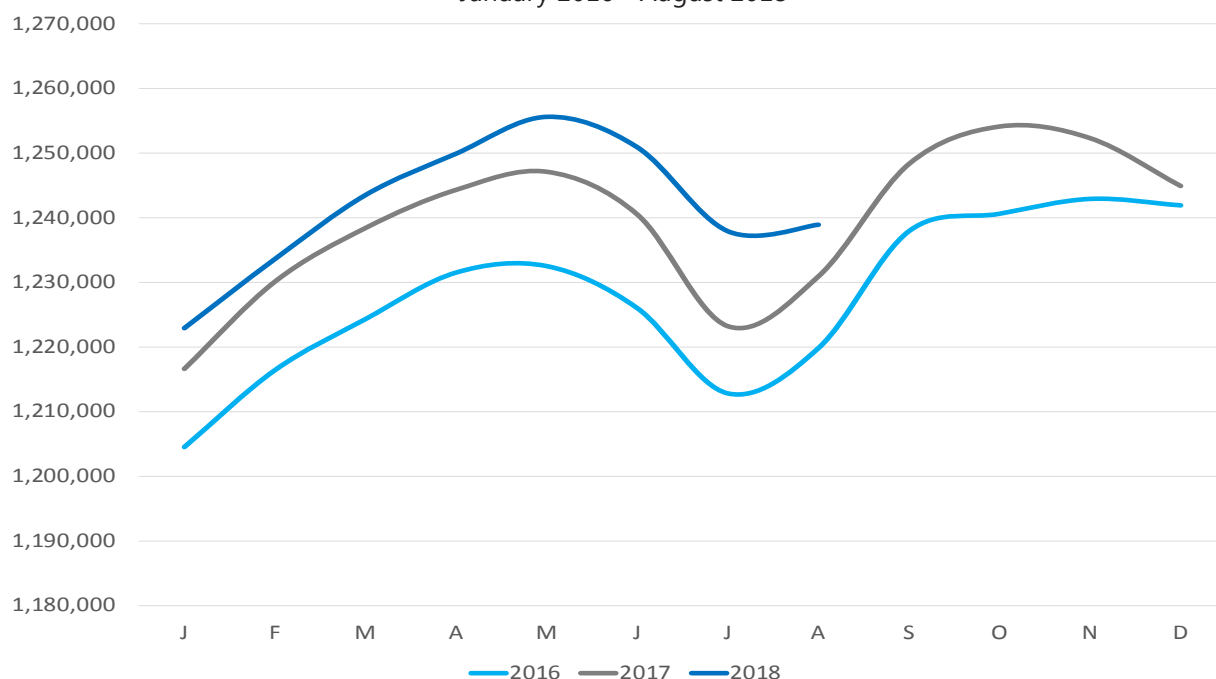

July 2018 - August 2018

Arkansas' nonfarm payroll employment rose 1,000 in August to total 1,238,900. Two major industry sectors added jobs, more than offsetting the declines in seven industry sectors. Jobs in **government** increased 3,200. Hiring in local (+1,800) and state (+1,500) government reflect the start of the 2018-2019 public school year. Employment in **educational and health services** rose 900. Gains in educational services (+900) were attributed to seasonal hiring at private educational facilities. Jobs in **manufacturing** decreased 1,200. Most of the decline was in durable goods (-1,000), due to reported losses in wood product manufacturing and machinery manufacturing.

August 2017 - August 2018

Compared to August 2017, nonfarm payroll jobs in Arkansas are up 8,000. Growth was posted in six major industry sectors, while five sectors declined. **Professional and business services** added 6,000 jobs. A majority of the gains were in administrative and support services (+5,800), a subsector which includes employment agencies. Jobs in **construction** increased 1,900, mostly in specialty trade contractors (+1,300). Employment in **manufacturing** rose 1,900. The bulk of the expansion was in nondurable goods manufacturing (+1,800). **Trade, transportation, and utilities** declined 1,000. Small gains in retail trade (+300) were more than offset by losses in wholesale trade (-1,200) and transportation-warehousing-utilities (-100). Jobs in **information** declined 1,000. This sector includes activities such as publishing, telecommunications, and related services.

County Labor Force Summary

Between July and August, unemployment rates declined in 74 of Arkansas' 75 counties. Johnson County was unchanged over-the-month. Jobless rates ranged from a low of 2.4 percent in Washington County to a high of 5.8 percent in Jackson County.

In August, forty-nine counties posted unemployment rates at or below four percent. That is up significantly from 26 counties at or below four percent last month. For the second month in a row, no county reported a jobless rate above eight percent.

Compared to August 2017, unemployment rates decreased in 72 Arkansas counties. Three counties--Howard, Johnson, and Lincoln-- posted over-the-year rate increases.
