

What is Virtual Reality?

Virtual Reality, VR for short. Is not only the present but is the future as well. Virtual Reality connects to phones, computers, and consoles to bring a bigger more realistic feel to video games, videos, and much more. It creates many more jobs for many people with the skill set and also allows a lot to happen or exist that we never thought to be possible.

VR at Southern Arkansas University

7th and 8th Grade Students presenting at SAU

Arkansas TechStart Winners

Winners received Kindle Fire tablets from Mark Zuckerberg

District 4 State Representative - DeAnn Vaught

State Representative enjoying VR at Horatio High School

Creating Frames for Facebook

A Part of the Arkansas TechStart Project

Robotics
