50	SA	Sexual Solicitation	I	CACD

\* Depending upon the location (head/torso, excluding buttocks), severity and multiplicity of the injuries, cuts, bruises, and welts may be a Priority I

\*\* The investigation of bruises, cuts, or welts in or on any portion of the head, face, neck, or torso, excluding buttocks, that are the result of a direct act against the child by a parent or caretaker, when reported by a medical facility or medical personnel or law enforcement, will be the responsibility of the CACD. This does not include an injury that is the result of a failure on the part of the parent or caretaker to safeguard the child from environmental situations that resulted in those injuries.

\*\*\* CACD will investigate if the Failure to Protect is linked to a Priority I CACD investigation.
