

The sensory room at Perimeter West Memphis was designed with functionality, playfulness, and peace in mind. The flooring is made of soft, lightly textured foam puzzle pieces that offers vestibular input, but is also easy to clean for long term use. We have incorporated sensa-soft bubble tubs, tactile wall panels, cubbies with sensory items, and swivel chairs.

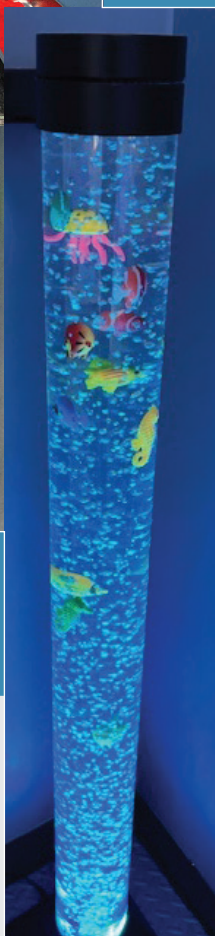

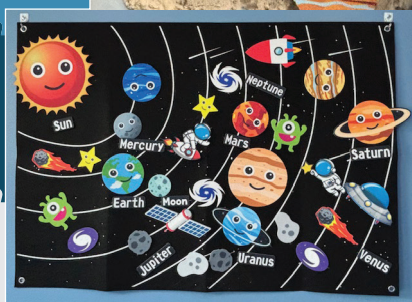

Some other stand out features are:

- Crash Pad Chairs
- Proprioceptive Wobble Chairs
- Liquid Tiles & Sensory mats for the walls and floor
- Sensory Bin Station
- Overhead lighting conducive to de-stimulating
- Sound machines
- Tent for time away and self-soothing
- Leggo wall

PERIMETER
Behavioral
of West Memphis

This room represents more than just equipment – it's a safe, sensory-focused sanctuary designed to meet our youth where they are.
