

ANNUAL REPORT ON RETENTION AND GRADUATION OF INTERCOLLEGIATE ATHLETES

This report complies with Act 267 of 1989 that requires reporting retention and graduation rates for entering freshmen who participate in Arkansas intercollegiate athletics. This information is produced from data submissions through the Arkansas Higher Education Information System for first-time, full-time, degree-seeking student athletes participating in football, basketball (men's and women's), cross country/track programs and others sports programs. Information related to initial athletic scholarship status also is included. Table 8-A provides a statewide overview of athletic retention one year after entry, followed by institutional summaries at the one-year and six-year points after entry into college.

Methodology

Enrollment patterns over a six-year period have been followed for 15 student-athlete cohorts from the public universities, beginning in 1992-93. It should be noted that students continue to be tracked as part of the cohort group regardless of whether or not (s)he participated on an athletic team after the first year. For that reason, NCAA data may vary from that reported here. Institutional-level data also indicate the number of students who enrolled or completed a program of study at their original institution (native students) as required by Student-Right-to-Know legislation, as well as their success at an Arkansas public or independent transfer institution. NCAA data are based on enrollments and completions at the originating institution only. Additionally, NCAA data are based only on student-athletes receiving athletic aid.

ATHLETIC RETENTION RATES

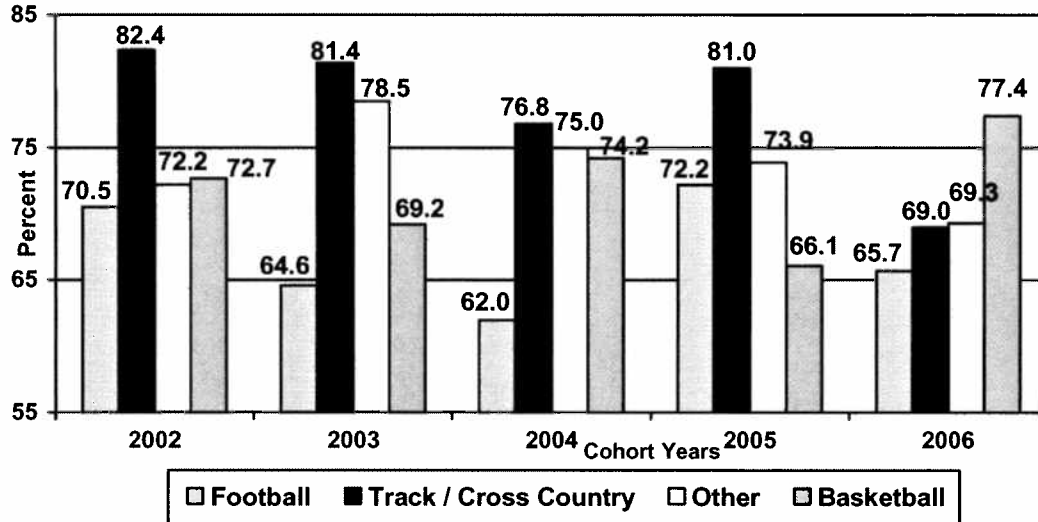

Statewide Overview

The following observations are based on Tables 8-A and 8-B that present statewide summary data for the 15 student-athlete cohorts entering during 1992-93 through 2006-07.

- For all institutions by sport, native retention rates for 2006-07 were highest for men's basketball (80.9 percent), followed by women's basketball (73.9 percent), and other sports (69.3 percent).
- The greatest changes in first-year native retention rates over one year was in men's basketball, which increased by 15.4 percentage points. Track/cross country decreased by 12.0 percentage points from the previous year. Although these appear to be significant changes, it should be noted that

corresponding changes in the small athletic cohort numbers greatly impact the rate percentages.

Native One-Year Retention Rates by Sport

- First-year recipients of athletic aid in 2006-07 had a slightly higher native one-year retention rate (74.5 percent) than that for all native athletes (69.1 percent).

University Summary

The following observations for the athletic retention rates at Arkansas public universities are based on Table 8-C.

- The first-year native retention rate for all sports at public universities in 2006-07 is 70.1 percent, 5.6 percentage points lower than the previous year's cohort. However, that rate slightly exceeds the statewide native retention rate for all entering students at all public universities (68.3 percent).

University Native Retention Rates

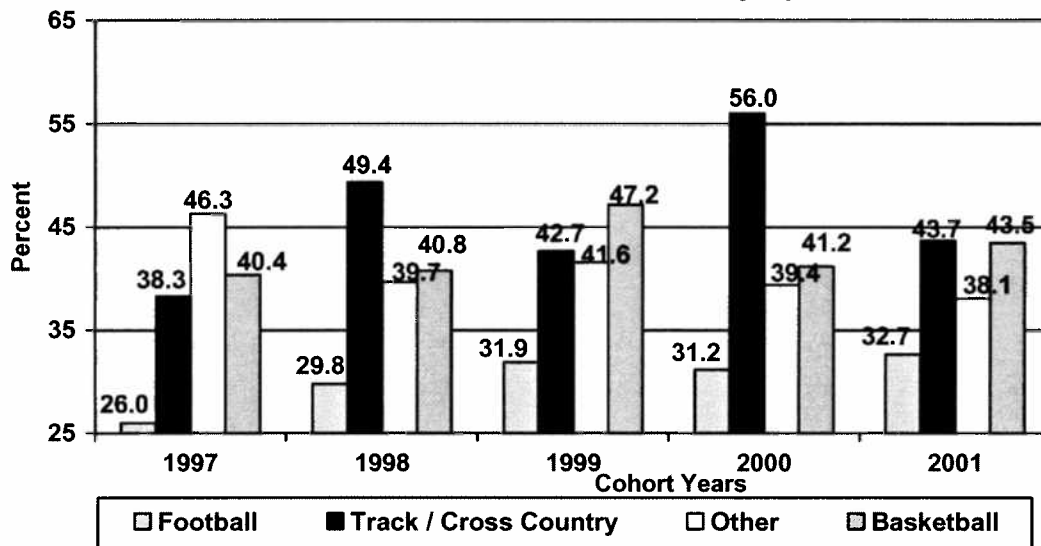

ATHLETIC GRADUATION RATES

Statewide Overview

The following observations are based on Tables 8-A and 8-B that present statewide summary data for the fifteen student-athlete cohorts entering during 1992-93 through 2006-07.

- The native six-year graduation rate for athletic scholarship recipients in all sports for the 2001 cohort was 42.1 percent, 0.2 percentage points higher than last year's cohort.
- The statewide native six-year graduation rate for all athletes at all institutions was 37.4 percent. This is 1.1 percentage point lower than last year's cohort.

Native Six-Year Graduation Rates by Sport

- The highest native six-year graduation rate was for athletes participating in women's basketball (52.6 percent), followed by track/cross country (43.7 percent). These two sports have consistently had the higher rates over the last ten years.

University Summary

The following observations for the athletic graduation rates at Arkansas public universities are based on Table 8-C.

- The statewide six-year university graduation rate across all sports at the native institution was 39.2 percent, a decrease of 1.1 percentage points. This compares to 40.6 percent for scholarship athletes and slightly exceeds the statewide native six-year graduation rate for all entering students at all public universities (38.9 percent).

- Native athletes participating in women’s basketball at public universities recorded the highest six-year graduation rate at 48.1 percent, followed by other sports at 44.2 percent.

- The 2006 six-year national student athletic graduation rates reported by the National Collegiate Athletic Association for the 2000-01 cohorts of all division I schools--making no distinction for sport or demographics -- was 63 percent, while the student-athlete graduation rate for all division II schools was 55 percent.

ADHE Executive Staff recommend that the AHECB accept this report. However, because retention and graduation rates for all athletes and scholarship athletes have remained consistent over the last several years, policies and strategies affecting retention and completion of athletes may need further review to make greater improvement in these rates.

Note: Students transferring to out-of-state institutions are not included in the transfer sections of the following tables.
