

The importance of PACE:

1. Removes the two biggest barriers to home owners making energy improvements—
 - a) I won't live in the house long enough to get my money back
 - b) Source of loan funds.
2. Creates jobs in every community for energy raters, and contractors in conjunction with the job training the 2 year colleges are doing —particularly Pulaski Tech and NYACC.
3. Provides financing for utility incentive programs.
4. Provides financing for the proposed Cut Energy Bills at Home Act which would, for the first time, provide tax credits for actual energy savings.
5. All paid for with energy/utility savings.
